

POWELL-DIVISION TRANSIT AND DEVELOPMENT PROJECT

TRANSIT ALTERNATIVES TO STUDY FURTHER

Adopted by the Steering Committee on September 29, 2014

Steering Committee members reached consensus on high capacity transit alternatives to study further.

1. **Transit types** - The Steering Committee advanced bus options.
2. **Routes** - The Steering Committee advanced the general route of inner Powell Boulevard in Southeast Portland transitioning to Division Street.

What does this mean? The project will continue studying a range of potential bus options in the corridor and will no longer study rail options. These bus options will be studied along a general alignment, shown below, from inner Powell Boulevard to outer Division Street, with route options identified by dashed lines.

Route and route options to be studied further.
