

# MetroPaint™ Colors

---

## CONSISTENT COLOR

MetroPaint™ goes through a strict screening and color-matching process to ensure the colors are consistent from one gallon to the next, and from one year to the next.

The strict color-matching process is achieved in two steps:

1. Incoming paint is carefully sorted for quality and color. Only certain gallons that meet MetroPaint standards make it through the initial screening process.
2. Fine-tuning of color is done as part of pre-production batch adjustments, by adding carefully measured amounts of other MetroPaint colors, in order to match the color standard. No tints or colorants other than from recycled paint are used.

## SEE HOW IT'S DONE

Watch a short video to see MetroPaint's color-matching process:
