## What is a Quilt Barn?

- A Quilt Barn is a barn or other farm building that displays a quilt square. Often these barns are very old and have historical or landmark significance in the area.
- Usually the quilt squares are hand-painted to resemble traditional quilt blocks (or patterns) that have been used by generations of quilters.

## Quilt Barn Trail of Washington County

- The Westside Quilters Guild has embarked on a multi-year project to create a quilt barn trail in Washington County.
- Quilt blocks will be mounted on non-residential buildings outside the Washington County Urban Growth Boundary.
- This trail will highlight the county's agricultural and historical heritage, promote area tourism, create public art, and showcase the art of quilting.
- The three blocks are installed:  
31535 SW Simpson Road, Cornelius  
32720 NW Hornecker Road, Hillsboro  
30975 NW Hillcrest St, North Plains
