

Lots of bugs are rad, not bad!

Did you know that bug spray can kill good bugs that help keep bad bugs away? It can be dangerous to children and pets, too. Try planting lots of different kinds of flowers to attract good bugs, and they'll help take care of the bad bugs!

Sing the "Good Bugs" chorus and color the insects and other garden creatures that help keep the bad bugs away. How many bugs can you find?

Good bugs

sing to the tune of "Row, Row, Row Your Boat"

Good bugs all around
in the plants and trees,
eating up the bad bugs,
so gardening's a breeze!

Good bugs help us out,
so let them stick around,
please don't spray or
smash one, because
a friend you've found.
