

MOTHER NATURE'S GARDEN

Music and Lyrics by Richard Moore

9. MOTHER NATURE'S GARDEN

Oh the world is so big and mysterious, sometimes it makes me feel small
And because there's so much of this natural stuff, I'm hardly ever scared at all.
It's a big unknown, but it feels just like home.
That's because I'm standing in Mother Nature's garden.

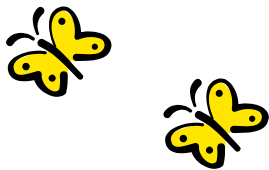

10. LADYBUGS AND BUTTERFLIES

To send an invitation to the bugs you want to see
You plant lots of different kinds of herbs and vegetable seeds.
And flowers! Don't forget them, they're so colorful and bright,
It sends a signal loud and clear that your garden is feeling right.

If you want to see ladybugs and butterflies
And lots of birds and bees
Then I'll show you how to tend your garden...naturally.

Here's a way to feed your plants, the most natural way I've found,
Take compost from the compost pile and spread it all around.
And if you water daily and you pull out all the weeds,
You'll have a healthy garden and guess who you're gonna see

You're gonna see ladybugs and butterflies
And lots of birds and bees
And they'll keep your garden growing, naturally!

11. FERD AND PESTY SONG

I'm fertilizer, I help your plants thrive
My name is Pesty, I'm an insecticide
We're helpful in the garden and we thought you'd like to know

(Sammie Salmon) But there is a better way to make your garden grow!

I'm fertilizer, I've got a battle plan
My name is Pesty, I'm poison in a can
We feed the plants and kill the bugs we're such a helpful team

(Sammie Salmon) Wait! They can be dangerous if they get in the stream!
If those guys get on the ground and washed into my stream,
The water will turn green and brown, and I won't be able to breathe!

I'm fertilizer, the plants say I'm de-lish
My name is Pesty, who cares about the fish
We feed the plants, we kill the bugs, we're such a helpful team

(Sammie Salmon) Wait-there is a natural way that won't pollute the stream!

12. LADYBUGS AND BUTTERFLIES (REPRISE)

It's fun to grow a garden and it's a natural thing to do
You can have flowers, fruits, herbs and roots and vegetables too.
Just remember.... KEEP IT NATURAL... that's all you need to know
Then Mother Nature and all her friends will help your garden grow

Chorus:
You're gonna see ladybugs and butterflies
And lots of birds and bees
And they'll keep your garden growing.... Naturally!

Chorus repeats
