

Mirror leaf drawing.

Complete the leaf! Draw the other half of the leaf by mirroring the provided image. Practice observational drawing skills and learn firsthand about the structure of leaves and symmetry.

Plane or bilateral symmetry (also reflective symmetry) is a body that can be divided by two equal halves and form mirror images of each other. Human beings, insects, and the leaves below all show bilateral symmetry.

<p>Maple</p> 	<p>Oxalis</p> 
<p>Cottonwood</p> 	<p>Hazelnut</p> 
<p>Oak</p> 	<p>Stinging nettle</p>
