About MTIP Formal/Full Amendments

Formal MTIP amendments represent a significant change to a project from the original funding or scope of improvement activities. The various required process steps are intended to demonstrate that the required changes have no significant impact upon air conformity, plus fiscal constraint is still maintained, and/or the priorities, policies, and goals established in the approved Regional Transportation Plan (RTP) have not changed. Formal MTIP amendments normally fall into one or more of the following categories: (1) Significantly adds, revises, reduces, or changes the project scope of improvement activities. (2) Requires a significant change to the project limits (greater than 1 mile). (3) Involves a significant cost change (increase or decrease normally 20% or 30% greater). (4) Adds or cancels a project from the MTIP.

#### Added Amendment Notes:

The complexity of separating the Beaverton pedestrian portion from the ODOT Street improvement project results in continue discussions over the appropriate name, description, and funding composition for the project. Through the public comment process, additional tweaks and adjustments to the project name, description, and funding composition may still occur. The final version will proceed to Metro Council with no further changes then occurring.

	Fund Type Codes References
ADVCON	Federal Advance Construction fund type code. ADVCON is a generic federal fund placeholder. The State DOT normally covers the expenditures using their own funds until the final federal fund code is known and can be applied to the project. ADVCON is also stated as "AC" or ACPO in the STIP. In this case, the origin of the AC funds are fund exchanged federal Highway Infrastructure Program (HIP) funds between ODOT and Metro. When the final federal conversion code is known, a technical correction will occur to identify the specific programmatic federal fund code for the project
Equity B	Older federal Equity Bonus Special funds that date back to SAFETEA-LU and reflect adjusted apportionments of federal funds to the state DOTs
HSIP	Federal Highway Safety Improvement Program funds appropriated to the State DOT and applied to eligible safety related type improvement projects
NHS Minimum Guarantee	A specialized federal fund type within the National Highway System (NHS) funding program that ensures that each State receives a specific share of the aggregate funding for major highway programs, with every State guaranteed at least a 90.5 percent return on its percentage share of contributions to the Highway Account of the HTF and that no State receives less that \$1 million annually.
Local	General Local funds committed by the lead agency that normally cover the minimum match requirement to the federal funds
Other	Local or general state funds used above the required match to cover phase costs. Also referred to as "overmatch" funds for the project.
Redistribution	FHWA rescinds some funds from states that don't meet their annual obligation targets and redistributes them to other states as a bonus that don't meet their annual obligation targets. Redistribution funds reflect a portion of those funds Oregon received from other states by meeting Oregon's annual obligation targets
State	General state funds normally used by ODOT as the match to the required federal fund match requirement.
State STBG	Federal Surface Transportation Block Grant funds appropriated to the state DOT. The portion ODOT retains is subclassified as State STBG to differentiate it from STBG allocated to the MPOs.

STP, STP-U, or(Metro STBG) Federal Surface Transportation Block Grant funds appropriated to ODOT and with a portion allocated under a formula to the MPOs and then<br/>committed to eligible projects via a discretionary award process
