# Carter Commons

*N Interstate & Overlook Blvd - Portland - Urban League of Portland, Northwest Housing Alternatives*

Named after Oregon's first Black woman legislator, Margaret Louise Carter, Carter Commons will create 62 senior apartments in the Overlook neighborhood for households looking to return to the area under the N/NE Preference Policy. The project, located on land donated by Kaiser Permanente, will have low barriers to entry, and approximately one-third of the apartments will be affordable at extremely low incomes (30% AMI or below).

The project is directly adjacent to a light rail stop with frequent service to local services, activities, and regional mass transit connections. The site is across the street from a Kaiser Permanente medical campus and within one block of the historically Black Albina District neighborhoods. Residents will also enjoy immediate proximity to Overlook Park, with its sweeping views of the Willamette River. Surrounding streets are accessible with continuous sidewalks and signalized intersections.

A community room, property management and resident services offices, shared laundry facilities, and a protected entry courtyard will all be available to residents.

The Urban League will design services for those identifying as Black/African American, elders and people with disabilities to support self-determination and independent living with life skills development coaching and workshops. Additional services will include food security resources, transportation support, hygiene resource connections, financial planning, workforce training, and eviction prevention.

# Development program

The Carter Commons affordable housing project will create 75 new homes, including 21 one-bedroom apartments, 32 two-bedroom apartments and 21 three-bedroom apartments.

Unit size	Number of units	AMI %	Project Based Vouchers	Square feet/unit
Studio	2	30%		446
Studio	4	60%		446
1 BR	19	30%	11	596
1 BR	37	60%		596
1 BR / Manager's unit	1	n/a		596
<b>Total</b>	<b>63</b>		<b>11</b>	

## Amenities

- proximity to transit
