What would you like to share with Metro about the Diversified Marine, Inc. solid waste facility license application? *	I am in favor of this application. Removing and cleaning up the abandoned and out-of-service boats and ships is an exceptional benefit to our state.

What would you like to share with Metro about the Diversified Marine, Inc. solid waste facility license application? *

I live in a floating home directly across from DMI. Over the years DMI has expanded its operations by adding more dry docks. With this came an increase in noxious fumes and pollution coming from the shipyard and increase in noise from 4am 7 days a week. I highly oppose the expansion of this facilities purpose to include ship deconstruction or waste disposal of toxic materials such as asbestos. The granting of this license application will pose a health hazard to us, to all residents of Jantzen Beach Moorage, and surrounding moorage and multifamily residences, hotels, and guests of the shopping center. It will decrease surrounding property values, degrades our beautiful riverfront, increases river and air pollution, and causes a nuisance by emitting sickening fumes from welding and asbestos into the environment. Please take responsible action and care the public health and environment are not damaged by denying this application. Thank you.
