

Construction and Demolition Waste Acceptance Form

This form is required for all loads containing construction, remodeling, or demolition debris. This form must be completed by the person responsible for and knowledgeable about the contents of the load.

- Asbestos survey reports or lab test results are required for construction and demolition waste generated from residential structures constructed before 2004 and **all commercial structures regardless of age.**
- Homeowners performing renovation work inside their home are exempt from the State of Oregon asbestos survey requirement. However, asbestos testing results must be presented for suspect asbestos-containing materials from structures constructed before January 1, 2004, or any suspect material contained in the load.
- *Materials accepted without a survey/test: bare wood, bare glass, bare metal, household garbage.*

1. Select origin of waste material (RVs, campers, and boats are considered residential structures)

<input type="checkbox"/> Residential structure constructed <u>before</u> 2004 (attach asbestos survey report/testing results)	<input type="checkbox"/> Residential structure constructed <u>after</u> January 1, 2004	<input type="checkbox"/> Commercial structure or multi-family structure with more than 4 units (attach survey report/testing results)
---	---	---

2. Was an asbestos survey or testing conducted? ☐ Yes ☐ No (if yes, attach survey or testing results)

3. Address of work site _____

City _____ State _____ Zip _____

Property owner or authorized representative _____

Phone _____

Mailing address of property owner or authorized representative (if different) _____

_____ City _____ State _____ Zip _____

4. Hauled by: ☐ Self ☐ Building Contractor ☐ Waste Hauler

Company name: _____

Company contact: _____ Phone number: _____

5. Description of waste:

--

6. Certification: By signing below, I attest that I have read and understood the contents of this form; I attest that the waste materials in this load do not contain asbestos or other prohibited waste; and I understand and accept that I am liable for Metro's disposal and abatement costs (which may include, among other costs: sampling, testing, cleanup, management, and associated administrative costs) if asbestos or other prohibited waste is discovered in this load. I further acknowledge that if asbestos or other prohibited waste is discovered in this load, I may be subject to penalties under Metro Code Chapter 5.09.

Name (Print): _____ Signature: _____

Date: _____

Please print this document, sign, and bring to a Metro transfer station with a **hard copy** of any required testing results.

FACILITY USE ONLY	Date: _____ Time: _____ AM/PM	Facility: <input type="checkbox"/> MCS <input type="checkbox"/> MSS
	Comments: _____	
	Accepted: <input type="checkbox"/> Y <input type="checkbox"/> N	Approver: _____
	License Plate #: _____ TRACKING NUMBER: _____	

Potential Asbestos-Containing Building Materials

The table below includes building materials that are commonly known to contain asbestos. This list is not all inclusive and any material that may be suspect will be subject to screening. Any load with these materials generated from a residential structure constructed before 2004 or a commercial structure of any age will require an asbestos survey report. Loads may be rejected based on the presence of suspect asbestos-containing waste or other prohibited waste not included in this table. **Please note: flat/built-up roofing is not accepted. This type of waste such as layered shingle-tar, or layered asphalt rolls with tar cannot be accepted even if the customer presents negative asbestos testing results.**

TYPE	EXAMPLES
INTERIOR WALLS AND CEILINGS	Acoustical tiles, glue dots, plaster, drywall, textured surfaces, cove base, vapor barrier (Tyvek exempt)
EXTERIOR	Vapor barrier (Tyvek exempt), cement siding, stucco
FLOORING	Vinyl tiles or sheets, associated mastic
INSULATION	Block, boiler insulation, spray-applied, vermiculite, sink and appliance undercoating, thermal system insulation (fiberglass, cellulose, and mineral wool are exempt)
GASKETS	Furnace, mechanical, boiler, wood stove (automotive gaskets exempt)
HEATING	White paper or seam tape on ducts, air-duct cement and insulation
ROOFING MATERIALS	Tar paper, felt, silver/white roofing paint, Nicolite™ paper
FIREPROOFING	Safes and materials associated with furnaces and older heating systems and structures: fire doors, fire/kiln brick, MonoKote™
VARIOUS COMPOUNDS	Window glazing, adhesives, caulks, joint compound, patching, mastics (plastic or synthetic materials such as Tyvek are exempt)
ELECTRICAL	Cloth wiring and materials inside switch gear, circuit boxes and fuse panels (Romex wiring is exempt)
