1:40 p.m.	Making Next Gen Transit Signal Priority a Reality <i>The region's Transportation System Management and Operations strategy works to improve the reliability of multimodal travel. As our regional arterials fill with package deliveries, for-hire vehicles and other uses and demands, transit reliability decreases. TransPort supported development of the Next Gen TSP in our region, providing an important tool called for by Enhanced Transit Corridor/Better Bus planning efforts. Next Gen TSP will help Division Transit Project and many other frequent service transit lines provide reliable transit service while recording detailed performance measures to optimize signalized intersections. TriMet formed a partnership with ODOT to pursue competitive federal funding to build the system. TriMet will share an update as they break ground on building the Next Gen TSP system, connecting it to the Central Traffic Signal System, addressing cybersecurity and other issues along the way.</i>	A.J. O'Connor (TriMet) / (All)
