Metro respects civil rights

Metro fully complies with Title VI of the Civil Rights Act of 1964, Title II of the Americans with Disabilities Act, Section 504 of the Rehabilitation Act and other statutes that ban discrimination. If any person believes they have been discriminated against regarding the receipt of benefits or services because of race, color, national origin, sex, age or disability, they have the right to file a complaint with Metro. For information on Metro's civil rights program, or to obtain a discrimination complaint form, visit oregonmetro.gov/civilrights or call 503-797-1890. Metro provides services or accommodations upon request to persons with disabilities and people who need an interpreter at public meetings. If you need a sign language interpreter, communication aid or language assistance, call 503-797-1890 or TDD/TTY 503-797-1804 (8 a.m. to 5 p.m. weekdays) 5 business days before the meeting. All Metro meetings are wheelchair accessible. Individuals with service animals are welcome at Metro facilities, even where pets are generally prohibited. For up-to-date public transportation information, visit TriMet's website at trimet.org

Thông báo về sự Metro không kỳ thị của

Metro tôn trọng dân quyền. Muốn biết thêm thông tin về chương trình dân quyền của Metro, hoặc muốn lấy đơn khiếu nại về sự kỳ thị, xin xem trong www.oregonmetro.gov/civilrights. Memo

Date: May 20, 2025

To: TPAC and Interested Parties

From: Ken Lobeck, Funding Programs Lead

Subject: TPAC Metropolitan Transportation Improvement Program (MTIP) Monthly

Submitted Amendments: June 2025 Report

BACKGROUND

The following pages contain the list of projects <u>from early through mid-May 2025</u> submitted to complete a formal/full amendment, or administrative modification to the 2024-27 MTIP. A summary of the differences between formal/full amendments and administrative modifications is stated below.

Formal Amendments Approval Process:

Formal/Full MTIP Amendments require approvals from Metro JPACT& Council, ODOT-Salem, and final approval from FHWA/FTA before they can be added to the MTIP and STIP. After Metro Council approves the amendment bundle, final approval from FHWA and/or FTA can take 30 days or more from the Council approval date. This is due to the required review steps ODOT and FHWA/FTA must complete prior to the final approval for the amendment.

Administrative Modifications Approval Process:

Projects requiring only small administrative changes as approved by FHWA and FTA are completed via Administrative Modification bundles. Metro normally accomplishes one "Admin Mod" bundle per month. The approval process is far less complicated for Admin Mods. The list of allowable administrative changes is already approved by FHWA/FTA and are cited in the Approved Amendment Matrix. As long as the administrative changes fall within the approved categories and parameters, Metro has approval authority to make the change and provide the updated project in the MTIP immediately. Approval for inclusion into the STIP requires approval from the ODOT. Final approval into the STIP usually takes between 2-3 weeks to occur depending on the number of submitted admin mods in the approval queue.

Approved Amendments:

The STIP now provides a list of approved statewide amendments covering a two-week span. The last 30-day period (last two report cycles) usually will be included in this monthly report assuming the STIP report is available.

MTIP FORMAL/FULL Amendments

May Regular Formal Amendment Bundle: MY25-10-MAY

	2024-2027 Metropolitan Transportation Improvement Program Exhibit A to Resolution 25-5493					
	May 2025 Formal Amendment Bundle Contents Amendment Type: Formal/Full Amendment #: MY25-10-MAY Total Number of Projects: 2					
Key Number & MTIP ID	Lead Agency	Project Name	Project Description	Amendment Action		
Category:	Adding Nev	v Projects to the 20	24-2027 MTIP:			
(#1) ODOT Key # New MTIP ID TBD New Project	Metro	2028-30 RFFA Step 2 Awarded Project Development Scoping	The approved funding will provide technical assistance to awarded Metro 2028-30 RFFA Step 2 projects to complete project development scoping actions supporting ODOT's Technical Scoping Sheet (TSS) requirements, (e.g. descriptions, limits, costs estimates, and delivery timing), enabling the project IGAs to be properly developed ensuring Preliminary Engineering is not delayed.	ADD NEW PROJECT: The formal amendment adds the new project development/scoping project to the MTIP. Metro has already approved the STBG funding for the project as part of Resolution 24-5414. The STBG funding originates from the \$13.6 million Redistribution bonus Metro was allocated		

Category: Amending Existing Projects in the 2024-2027 MTIP:						
(#3) ODOT Key # 22196 MTIP ID 71136	SMART	SMART Senior and Disabled Program (2024)	Provides overall ADA & paratransit services to improve Enhanced Mobility of Seniors and Individuals with Disabilities with a focus on travel training for seniors and people with disabilities in Wilsonville.	CANCEL PROJECT: The formal amendment cancels the project from the MTIP and STIP. SMART and TriMet completed a fund exchange during the development of the 2024-27 MTIP. The project should have been canceled as part of the Transition amendment. The corrective action is now occurring.

FROM: KEN LOBECK

Memo

Date: May 30, 2025

To: Transportation Policy Alternatives Committee (TPAC) and interested parties

From: John Mermin, Senior Transportation Planner

Subject: Administrative amendments to the 2025-26 Unified Planning Work Program (UPWP)

Background

The Unified Planning Work Program (UPWP) is developed annually by Metro as the Metropolitan Planning Organization (MPO) for the Portland Metropolitan Area. It is a federally-required document that serves as a guide for transportation planning activities to be conducted over the course of each fiscal year, beginning on July 1. The UPWP is developed by Metro with input from local governments, TriMet, ODOT, FHWA, and FTA. It includes all planning projects that will be receiving federal funds for the upcoming fiscal year. The UPWP describes a process for administrative amendments: 1) Notify TPAC; 2) Send amendment to USDOT for approval. ¹

See attached project narratives which describes (in tracked changes) changes to the budgets of two Metro projects.

- Metro TV Highway Transit and Development project
- Metro Investment Areas (Corridor Refinement and Project Development)

Please contact John Mermin, <u>john.mermin@oregonmetro.gov</u> if you have any questions about this amendment.

¹ This budget change emerged in April, after TPAC had taken action on the draft UPWP, but before the UPWP was adopted by JPACT and the Council on April 17. Thus, the updated budget figures are already reflected in the adopted FY 2025-26 UPWP, and this amendment does not need to be submitted to USDOT staff for approval. This memo serves to provide transparency for TPAC members.

Investment Areas (Corridor Refinement and Project Development)

Staff Contact: Kelly Betteridge, kelly.betteridge@oregonmetro.gov

Description

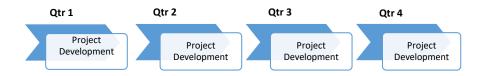

Metro's Investment Areas program works with partners to develop shared investment strategies that help communities build their downtowns, main streets and corridors and that leverage public and private investments that implement the region's 2040 Growth Concept. Projects include supporting compact, transit-oriented development (TOD) in the region's mixed-use areas, conducting multijurisdictional planning processes to evaluate high-capacity transit and other transportation improvements and integrating freight and active transportation projects into multimodal corridors.

The Investment Areas program completes system planning and develops multimodal projects in major transportation corridors identified in the Regional Transportation Plan (RTP) as well as developing shared investment strategies to align local, regional, and state investments in economic investment areas that support the region's growth economy. It includes ongoing involvement in local and regional transit and roadway project conception, funding, and design. Metro aids local jurisdictions with the development of specific projects as well as corridor-based programs identified in the RTP. Metro works to develop formal funding agreements with partners in an Investment Area, leveraging regional and local funds to get the most return. This program coordinates with local and state planning efforts to ensure consistency with regional projects, plans, and policies.

In FY 2024-2025, Investment Areas staff have supported partner work on TV Highway, Better Bus, Columbia Connects, 82nd Ave, the Interstate Bridge Replacement Program, additional support for the Development Strategy for the Southwest Corridor, Sunrise Corridor visioning, and mobility and transit capacity improvements across the region.

This is an ongoing program; staff will further refine the projects listed above as well as potentially identifying additional projects to further the goals identified for mobility corridors in our region.

TV Highway Transit and Development Project

Staff Contact Kate Hawkins, kate.hawkins@oregonmetro.gov

Description

The Tualatin Valley (TV) Highway Transit and Development Project creates a collaborative process with the surrounding communities and relevant jurisdictions to advance a bus rapid transit project on the TV Highway corridor between Beaverton and Forest Grove. The project also brings together community to create a development Strategy that identifies actions to stabilize and support community when future transportation investments occur. It is a partnership between Metro and TriMet, ODOT, Washington County, Beaverton, Hillsboro, Cornelius and Forest Grove. Metro was recently selected to receive \$2 Million from the Reconnecting Communities grant program for additional community engagement and planning for workforce development and housing needs to support implementation of the EDS. Example community engagement strategies include:

- Providing inclusive community engagement and education that supports navigating transit
 and programs available to low-income individuals and community members with limited
 English proficiency.
- Developing new methods to engage community members and residents, especially hard-toaccess community members who do not typically engage in planning meetings.
- Supporting community civic engagement and advocacy by involving them throughout the planning process, planning for community placemaking, programming and events.

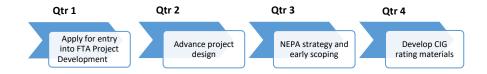

In FY 24-25, project partners developed a transit and safety concept for the corridor and reached agreement on a Locally Preferred Alternative (LPA). Metro supported the process of LPA approval and adoption into local plans, JPACT and Metro Council endorsement of the LPA, and then codifying the LPA into the 2023 Regional Transportation Plan via amendment. During FY 25-26, the project team will apply for entry into FTA CIG Small Starts Project Development, and success willing, begin early scoping in the NEPA process, advance design, and work on materials for the FTA funding process. Key milestones will include:

- Apply for entry into FTA CIG Small Starts Project Development phase
- Continue supporting EDS community partners with project implementation
- Determine NEPA strategy and begin process of early scoping
- Advance project design to approximately 30%
- Develop materials for FTA CIG Small Starts project rating to be submitted in subsequent year

This project advances the 2023 Regional Transportation Plan goals and policies. It also advances the 2023 High Capacity Transit Strategy, which identifies TV Highway as a priority corridor for transportation investments.

CALL TO ORDER, DECLARATION OF QUORUM AND INTRODUCTIONS

Chair Tom Kloster called the meeting to order at 9:00 a.m. A quorum of members present was declared.

COMMENTS FROM THE CHAIR AND COMMITTEE MEMBERS

The following staff and committee member updates were made:

- Sarah lannarone thanked everyone who participated in the Oregon Active Transportation
 Summit (OATS). She let the committee know about two links she added to the chat (included as part of the meeting record).
- Chris Ford provided an update on the State of Oregon Transportation Safety Action Plan
- Ken Lobeck provided a monthly Metropolitan Transportation Improvement Program (MTIP)

 Amendment update and directed the committee to information included in the meeting packet.
- Anthony Cabadas provided a fatal crash update, noting that at least 10 people have been in traffic crashes during the month of April.
- Ally Holmqvist provided an update on transit ridership and news for the Month of March.
- Caleb Winter provided a TransPort/Transportation System Management and Operations (TSMO) update. He noted that the TransPort committee nominated and elected a Chair (Kate Freitag) and Vice Chair (Bikram Raghubansh).
- Jean Senechal Biggs noted that Metro has heard from the Interstate Bridge Replacement (IBR) team, who are requesting an MTIP amendment to program funding for the project. She noted that information is still being reviewed, and the action timeline being planned. She added that there will be a presentation and information to TPAC in June, with a request for recommendation to JPACT planned in July. The public comment period will occur from 5/12/25 6/13/25.

PUBLIC COMMUNICATIONS ON AGENDA ITEMS

None.

MEETING MINUTES OF APRIL 4, 2024

Chair Kloster asked the committee to approve the April 4, 2025, TPAC meeting minutes.

<u>ACTION TAKEN</u>: Hearing no objections, abstentions or edits, the minutes were approved as presented. With Adam Fiss abstaining, and the remaining members voting in approval, the meeting minutes were <u>approved as presented</u>.

MTIP Formal Amendment 25-5493

Ken Lobeck, Metro, appeared before the committee to provide information on the May 2025 Formal Metropolitan Transportation Improvement Program (MTIP) formal/full amendment. It contains two projects. One is a new Metro project development/scoping project that will support the 2028-30 Regional Flexible Funds Allocation (RFFA) awarded projects complete required project development/scoping actions to ensure the ODOT Technical Scoping Sheet is Properly completed. As a new project an ODOT key number has not been assigned to the project

presently. The second project involves a SMART FTA 5310 funded project (Key 22196) which requires cancelation from the MTIP and STIP. SMART and TriMet completed a fund exchange during development of the 2024-27 MTIP. The fund exchange invalidated Key 22196's funding. The project needs to be removed from the MTIP and STIP as a result.

ACTION TAKEN: Chris Ford moved, and Dyami Valentine seconded the motion to approve Resolution 25-5493. Hearing no objections or abstentions, the motion <u>passed</u>.

82nd AVENUE TRANSIT PROJECT LPA

Melissa Ashbaugh, Metro appeared before the committee to provide information and request recommendation to JPACT on the 82nd Avenue Transit Project Locally Preferred Alternative (LPA). Her presentation covered the following:

- Timeline and next steps
- TPAC's role
- Project location/map
- Transit Project LPA
 - Mode: Frequent Express (FX) BRT
 - General Station Locations: ~1/3-mile average spacing
 - Alignment: ~10-mile alignment between Clackamas Town Center Transit Center and the Cully Boulevard and Killingsworth Street area.
- Engagement Process to Date
- Transit Project Improvements

Sarah lannarone inquired how the bicycling community was engaged and what the plan is to accommodate access to businesses. Julia Reed, Senior Transportation Planner with the City of Portland, responded that in addition to the work on the transit project there are a series of improvements the City is making under the Build A Better 82nd Avenue program, which includes safety and maintenance improvements to 82nd Avenue, and the development of a parallel bicycle network on streets parallel to 82nd Avenue.

ACTION TAKEN: Indie Namkoong moved, seconded by Eric Hesse to approve the 82nd Avenue Transit Project LPA. With Sarah lannarone and Bill Beemer abstaining, the motion **passed**.

2028-30 REGIONAL FLEXIBLE FUND STEP 2 ALLOCATION PACKAGE OPTIONS

Jean Senechal Biggs presented information on the 2028-30 Regional Flexible Fund Step 2, estimated to award \$42 million to projects around the region. Her presentation (included as part of the meeting record) provided information on the following:

- How we got here
- Package Development & Concepts Input
 - Concept 1: RTP Goals + Design
 - Concept 2: Safe System
 - Concept 3: Thriving Economy & Mobility Options
 - o Concept 4: Equity, Safety & Climate
- Next Steps

Jeff Owen thanked Jean for the overview. He asked when there might be a public comment summary available for decision makers. Jean responded that she would connect with the communication team and get back him.

Eric Hesse expressed some concern over weighting the various RTP goals and agreed with Jeff Owen, that having a summary of public comments would be helpful information to have before advising JPACT.

Mike McCarthy, shared Eric Hesse's concern over weighting RTP goals. He also noted that the Washington County Coordinating Committee expressed desire to wait for public input before taking action. He suggested that prior to the next round of RFFA, a subcommittee could be formed and work together on the scoring rubric.

Dyami Valentine agreed that the guidance has already been established, the technical evaluation reflected the goals in the scoring matrix and wants to review the public comment in order to aid their decision making.

Will Farley stated his appreciation for Washington County's feedback about not elevating one goal over another. He noted that the Clackamas County's projects didn't score as well in the rubric. He also agreed that it is important to know what projects have been most favored by the community.

Chair Kloster noted that the June TPAC meeting there would be options for the committee to consider, and the recommendation would occur at the July meeting.

5 MINUTE BREAK (10:15 a.m.)

EPA CLIMATE POLLUTION REDUCTION GRANT: CARBON REDUCTION STRATEGIES

Eliot Rose, Metro, provided a presentation on the Comprehensive Climate Action Plan (CCAP).

In 2023, Metro received a Climate Pollution Reduction Grant (CPRG) Planning Grant from the US Environmental Protection Agency (EPA). The grant supports planning work to create a regional climate action plan for the Portland-Vancouver metropolitan area. Metro is leading this work in close coordination with regional partners.

Eliot's presentation covered the following topics:

- Overview of the CCAP
- CCAP Greenhouse Gas Inventory
- Selecting CCAP GHG reduction measures

Gerik Kransky thanked Eliot for his work and noted that they are conducting an equivalent statewide effort.

Kate Lyman inquired how this work was being reflected in the RTP. Eliot responded that this is a 25-year plan and they are focusing on the long term impact of strategies.

Mik McCarthy noted the importance of making sure the modeling is as close as possible to actual greenhouse emissions and not using proxies.

MONTGOMERY PARK STREETCAR LPA

Jason Nolin, Metro, appeared before the committee to provide a presentation on the Montgomery

Park Transit Project and the recommended Locally Preferred Alternative (LPA). His presentation included the following topics:

- Project Background
- Projected Outcomes
- Community Engagement
- LPA description and map
- Additional Project Elements
- Project Funding
- Timeline
- Next Steps

The recommended Locally Preferred Alternative for high capacity transit to the Montgomery Park Area is streetcar transit with stations, operating as a .65 one-way route mile extension of the existing Portland Streetcar North-South (NS) Line from its existing terminus at NW 23rd Avenue and NW Northrup Street to a new terminus at NW 26th Avenue and NW Wilson Street near the Montgomery Park building in Northwest Portland. This extension will allow the NS Line to operate between the Montgomery Park Building and the South Waterfront. The route extension will operate on NW 23rd Avenue, as well as on a new one-way parallel couplet using NW Roosevelt Street, NW 26th Avenue, and NW Wilson Street.

The committee will have an opportunity to act on this item next month.

TITLE VI REPORT

Alfredo Haro presented information on Metro's title VI plan update, which included the following highlights:

- The Civil Rights Act of 1964
- Metro and Title VI compliance
- Metro's Title VI Plan
- Updates in the 2025 Title VI Plan
- Next Steps

Tom Kloster noted that Metro's Title VI Plan hasn't previously been brought before the committee. He noted that Metro, as an agency that receives Federal Funds, we are required to have at Title VI Plan.

Alfredo stated that the plan would be available for review prior to next meeting.

ADJOURN

There being no further business, Chair Kloster adjourned the meeting at 11:30a.m.

Respectfully submitted, Jessica Martin, TPAC Recorder

Memo

Date: Thursday, May 29, 2025
To: TPAC and interested parties

From: Alfredo Haro, Senior Public Engagement and Title VI Specialist

Subject: 2025 Title VI Plan approval

Background

The Civil Rights Act of 1964 outlined protections for millions of people in the United States regarding public accommodations, employment, public education, access to federally assisted programs and voting rights. Title VI of the Civil Rights Act further prohibits discrimination based on race, color, or national origin in any programs and activities receiving federal financial assistance. In step with federal compliance and Metro's values, Metro ensures its planning processes and transportation investments are non-discriminatory and do not disproportionately harm minority or low-income communities. Metro's nondiscrimination responsibilities, compliance mechanisms, and policies are outlined in the attached draft 2025 Title VI Plan. The key updates in the 2025 Title VI Plan include:

- Documentation of JPACT and Metro Council Title VI Plan approval
 - See attached resolution
- The Title VI Plan's content is indexed to reflect state and federal guidance
- Updated discrimination complaint procedures
- Signed non-discrimination standard assurances
- Updated organizational chart
 - Identifies Metro's Deputy Chief Operating Officer (Holly Calhoun) as the Title VI Designated Official
 - o Identifies Metro's new Title VI Coordinator/Specialist
- General updates

Formal approval process

Metro submits an updated Title VI Plan to the Federal Highway Administration (FHWA) and the Oregon Department of Transportation (ODOT) every three years. However, the Title VI Plan must first be approved by the Metropolitan Planning Organization's board responsible for policy decisions— the Joint Policy Advisory Committee on Transportation (JPACT) and the Metro Council. The 2025 Title VI Plan is tentatively on JPACT's consent agenda on July 17, 2025. After Metro Council approves the Title VI Plan, the Plan will be submitted to FHWA and ODOT no later than October 1, 2025.

Title VI Plan

October 2025

METRO RESPECTS CIVIL RIGHTS

Metro fully complies with Title VI of the Civil Rights Act of 1964 that requires that no person be excluded from the participation in, be denied the benefits of, or be otherwise subjected to discrimination on the basis of race, color or national origin under any program or activity for which Metro receives federal financial assistance.

Metro fully complies with Title II of the Americans with Disabilities Act and Section 504 of the Rehabilitation Act that requires that no otherwise qualified individual with a disability be excluded from the participation in, be denied the benefits of, or be subjected to discrimination solely by reason of disability under any program or activity for which Metro receives federal financial assistance.

If any person believes they have been discriminated against regarding the receipt of benefits or services because of race, color, national origin, income level, sex, age or disability, they have the right to file a complaint with Metro. For information on Metro's civil rights program, or to obtain a discrimination complaint form, visit oregonmetro.gov/civilrights or call 503-813-7514.

Metro provides services or accommodations upon request to persons with disabilities and people who need an interpreter at public meetings. If you need a sign language interpreter, communication aid or language assistance, call 503-797-1700 or TDD/TTY 503-797-1804 (8 a.m. to 5 p.m. weekdays) 5 business days before the meeting. All Metro meetings are wheelchair accessible. For up-to-date public transportation information, visit TriMet's website at trimet.org.

Metro is the federally mandated metropolitan planning organization designated by the governor to develop an overall transportation plan and to allocate federal funds for the region.

The Joint Policy Advisory Committee on Transportation (JPACT) is a 17-member committee that provides a forum for elected officials and representatives of agencies involved in transportation to evaluate transportation needs in the region and to make recommendations to the Metro Council. The established decision-making process strives for a well-balanced regional transportation system and involves local elected officials directly in decisions that help the Metro Council develop regional transportation policies, including allocating transportation funds. Together, JPACT and the Metro Council serve as the MPO board for the region in a unique partnership that requires joint action on all MPO decisions. This means JPACT approves MPO decisions and submits them to the Metro Council for adoption. The Metro Council will adopt the recommended action or refer it back to JPACT with a recommendation for amendment.

I. Introduction to Metro

Introduction to Metro

Metro is a directly elected regional government serving 1.7 million people living in the urbanized areas of the greater Portland, Oregon metropolitan region. Metro is authorized by Congress and the State of Oregon to coordinate and plan investments in the transportation system. As the designated metropolitan planning organization (MPO), Metro works collaboratively with cities, counties and transportation agencies to invest federal highway and public transit funds within its service area. It creates a long-range transportation plan and leads efforts to expand the public transit system.

Metro's work is grounded in excellence, innovation, respect and sustainability. The agency works with communities, businesses and residents to chart a wise course for the future. Metro brings people together to make decisions about where the region grows. Metro guides investments in jobs, waste management, housing, parks and nature, arts, and culture venues. Finally, Metro protects farms, forests, clean air, and water for the use of future generations.

II. Commitment to non-discrimination

Metro receives financial assistance from federal agencies, including the Federal Highway Administration (FHWA), Metro takes measurable steps to ensure non-discrimination in all agency programs and activities. As a condition of federal funding and the agency's values, Metro fully complies with Title VI of the Civil Rights Act of 1964, including various non-discrimination laws and regulations. Specifically, Title VI provides the following:

"[n]o person in the United States shall, on the ground of race, color, or national origin be excluded from participation in, be denied benefits of, or be subjected to discrimination under any program or activity receiving Federal assistance." 42 U.S.C § 2000d.

The use of the word "person" is important as the protections afforded under Title VI apply to anyone, regardless of whether the individual is lawfully present in the United States or a citizen of a State within the United States. The U.S. Supreme Court has further held that discrimination based on English-language ability equates to national origin discrimination. Subsequently, Federal and state authorities extended these protections to include sex, age, disability, income level and Limited English Proficiency.

It is Metro's commitment to assure that no person shall, on the grounds of race, color, national origin, age, sex, disability, income level or Limited English Proficiency as provided by Title VI of the Civil Rights Act of 1964 and related authorities, be excluded from participation in, be denied the benefit of, or be otherwise discriminated against under any² of the programs or activities it administer

2025-2028 Title VI Plan and Assurances

Title 23, CFR Part 200.0 (b) (11) and the Federal Highway Administration (FHWA) specifically requires recipients of federal funds, including Metro, to prepare a Title VI Plan. Title VI plans describe the roles, responsibilities, and procedures for assuring compliance with Title VI of the Civil Rights Act of 1964 and related regulations and directives by the state transportation agency.

¹ Lau v. Nichols, 414 U.S. 563 (1974)

² This includes all programs under Metro's metropolitan planning organization role per the Civil Rights Restoration Act of 1987, which extends the scope and coverage of the nondiscrimination statutes to include all programs and activities of federal-aid recipients, subrecipients and contractors, whether such programs and activities are federally assisted or not. All programs not directly FTA-to-Metro funded will follow FHWA guidance because 1) the majority of Metro's federal funding comes from FHWA, and 2) FHWA guidance to recipients on Title VI complaints is more specific and less discretionary.

Metro's **Planning, Development and Research department** measures compliance and implementation of Title VI federal directives. This document outlines Metro's Title VI implementation processes and procedures on the following:

- organization and staff structure
- Title VI program monitoring
- compliance review of external agencies in receipt of federal funds through FHWA and other Title VI activities and assurances
- guidance regarding language access for individuals with Limited English Proficiency

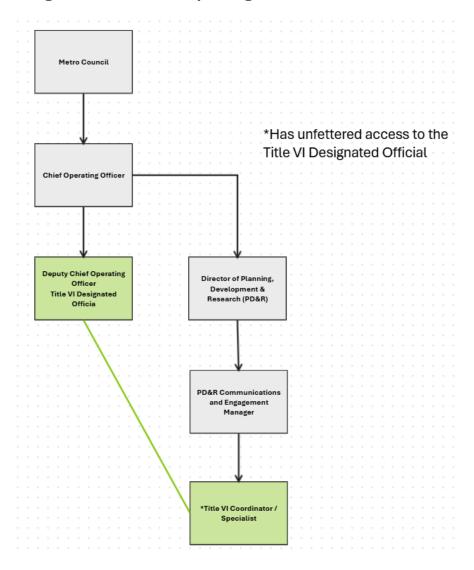

On April 24, 2013, the Secretary of Transportation signed the DOT Standard Title VI Assurances and Non-discrimination Provisions, Order 1050.2A, requiring that recipients of federal aid assure they will promptly take any measures necessary to implement Title VI as a condition to receiving any federal financial assistance from the U.S. Department of Transportation, through the Federal Highway Administration. It also requires that such recipients are subject to and comply with the following statutory/regulatory authorities.

- Title VI of the Civil Rights Act of 1964 (42 U.S.C. § 2000d et seq., 78 stat. 252), (prohibits discrimination on the basis of race, color, national origin);
- 49 C.F.R. Part 21 (entitled Non-discrimination In Federally-Assisted Programs Of The Department Of Transportation -- Effectuation Of Title VI Of The Civil Rights Act Of 1964);
- 28 C.F.R. section 50.3 (U.S. Department of Justice Guidelines for Enforcement of Title VI of the Civil Rights Act of 1964);

A copy of the Standard Title VI Assurances and Non-discrimination Provisions signed by Metro's Deputy Chief Operating Officer for 2025 appears as an appendix at the end of this document.

This 2025 Title VI Implementation Plan is available online: oregonmetro.gov/civilrights

III. Title VI Organizational and Reporting Structure

Metro's Organizational Structure

One of Metro's Deputy Chief Operating Officers has been appointed as the agency's "Title VI Designated Official" who is responsible for ensuring and overseeing Title VI compliance efforts. They are a primary point of contact for matters related to Title VI including resolving corrective actions. Additionally, they report to the Chief Operating Officer, who is the head of the agency, allowing for quick resolutions and efficient communication. The Title VI Coordinator/Specialist is the designee who holds several responsibilities and works in collaboration with the agency's departments and senior leadership involving several responsibilities that ensure compliance with Title VI of the Civil Rights Act of 1964. While this position reports to the Communications and Engagement Manager within the Planning, Development and Research department, the Title VI Coordinator/Specialist has unfettered access to Metro's Deputy Chief Operating Officer who is the "Title VI Designated Official."

The Deputy Chief Operating Officer of Metro has approved unfettered access to the Title VI Specialist allowing direct communication and/or meeting with them to address civil rights concerns needing their attention, whether internal to Metro or through our external partners, constituents, or contractors. Under this procedure, the Title VI Specialist serves as Metro's Title VI Coordinator and has full support to work directly with the Deputy Chief Operating Officer to address civil rights matters.

Deputy Chief Operating Officer - Title VI Designated Official Holly Calhoun 503-867-0311

Title VI Program Coordinator/Specialist Alfredo Haro 503-797-1555

To contact Metro's Planning, Development and Research department:

Metro Regional Center Planning, development and research department 600 NE Grand Ave. Portland, OR 97232-2736

Telephone: 503-797-1700

Title VI responsibilities within Planning, Development and Research Department

The department collaborates with public and private sector partners to build communities consistent with the Region 2040 Growth Concept³ and local goals. Major programs in this department include regional planning, Metropolitan Planning Organization planning and activities, resource development, and investment areas. Within Metro's planning, development and research department, staff from multiple levels participate in Title VI implementation processes.

Title VI Coordinator/Specialist

- Reports Title VI activities and compliance processes through Title VI Plan
 (ODOT/FHWA, triennially) and Title VI Program (FTA, triennially with the LEP Plan)
- Develops and submits the Title VI Annual Accomplishments Report (AAR)
- Reports significant Title VI issues directly to the Metro Deputy Chief Operating Officer
- Monitors corrective actions related to Title VI
- Monitors changes in informal or formal guidance from USDOT, FHWA, FTA and ODOT; communicates these changes to agency leadership
- Coordinates with public engagement staff in PDR to develop and implement engagement plans meeting Title VI public engagement guidance

³ Region 2040 Growth Concept: https://www.oregonmetro.gov/2040-growth-concept

- Collaborates with language access coordinator in the Central Communications
 Department to address Limited English Proficiency (LEP) services
- Coordinates with the Central Communications staff to track LEP training opportunities and staff participation
- Co-manage Title VI complaint intake with the Office of Metro Attorney
- Routes formal Title VI complaints to outside agencies such as ODOT, FHWA and FTA

Communications and Engagement Manager

- Provides oversight on Title VI Coordinator/Specialist responsibilities
- Supervises and monitors the Title VI Coordinator/Specialist workplan

Planning, development and research Program Manager

- Coordinates with Title VI Coordinator/Specialist to identify and address potential impacts from programs, policies and activities on historically marginalized and lowincome populations
- Identifies and promotes Title VI and other non-discrimination trainings available to all planning, development and research staff

Planning, development and research staff

- Ensure federally funded projects meet FHWA and FTA non-discrimination compliance requirements
- Plan and budget for public engagement within projects
- Plan and budget for translation and interpretation services
- Participate in trainings on LEP
- Conduct populations assessment and analysis of non-discrimination outcomes for RTP, MTIP (inc. RFFA) and NEPA projects

IV. Program Review Procedures

The Deputy Chief Operating Officer and the Title VI Coordinator/Specialist monitor Title VI activities, including the preparation of this plan. The Deputy Chief Operating Officer reports to Metro's Chief Operating Officer, who is the head of the agency, while the Title VI Coordinator/Specialist reports to management in the Planning, Development and Research department (PD&R). Together, they foster collaboration between multiple internal offices and departments to ensure Title VI compliance.

The Title VI Coordinator/Specialist along with the Deputy Chief Operating Officer are developing procedures for assessing and delegating internal Title VI responsibilities for Metro's departments and offices. The deliverables listed below outline and serve as internal procedures on how Metro tracks compliance around Title VI agency wide.

- Title VI Plan for ODOT & FHWA, updated annually, last updated in 2022
- Title VI Annual Accomplishments Report, updated annually, last updated in 2024
- Public Engagement Guide, updated every five years, updated every three years, last updated in 2024
- FTA Title VI Program & Limited English Proficiency Plan, updated every three years, last updated in 2024,
- Metro's SPAREDI report, update in process, last updated in 2016
- Section 504 of the Rehabilitation Act and the Americans with Disabilities Act
 - o MPO ADA Self-Evaluation and Transition Plan, last updated 2024
 - MPO ADA Self-Evaluation and Transition Plan Annual Implementation Status Report, updated annually, last updated 2025

Office of Chief Operating Officer

The Chief Operating Officer (COO) provides leadership and management authority to agency staff by implementing Council's policy directives. The COO serves at the pleasure of the Council and provides leadership and management authority to agency staff by implementing the Council's policy directives, goals and objectives. The COO and Deputy COO enforce Metro ordinances, including Title VI, provide day-to-day management of Metro's resources, programs, enterprise businesses, facilities and workforce and prepare the proposed budget for Council consideration.

- Manage and ensure Title VI compliance agency wide
- One of the agency's Deputy Chief Operating Officer (Holly Calhoun) is a primary point of contact for matters related to Title VI including resolving corrective actions

Planning, Development and Research (PD&R)

The Title VI Coordinator/Specialist works with PD&R's Data Research Center to gather demographic data and determine whether concentrations of historically marginalized communities live in project affected area. There is special focus on identifying the region's populations limited English proficiency. To improve the demographic profile accuracy, PD&R utilizes data on English-language learners in regional public schools and the American Community Survey to provide more detailed information than the datasets for the American Community Survey "other language" categories (e.g., "Other Slavic, "African," "Other Indo-European"). These efforts improve the demographic profile accuracy and better inform how to serve populations in project affected areas.

Central Communications

The Central Communications department staff liaison between the public and Metro's departments, elected officials and other involved parties, providing services in media relations, public involvement, journalism, marketing, graphic and web design, issue management, feedback analysis and advocacy. Their regular interfacing with the public recognizes the need for Title VI compliance efforts. In 2025, the central communications team consolidated the language translation and interpretation contracts. The contracts also include clauses emphasizing federal non-discrimination compliance. These language resources have been made available to staff to ensure Metro programs and activities are accessible to every person who lives in the region and meet all federal non-discrimination laws, including The Americans with Disabilities Act, Title VI of The Civil Rights Act of 1964 and Section 504 of The Rehabilitation Act. Their other notable Title VI efforts include:

- Updating Metro's public engagement guide providing best practices and tools
- Updates language access guide and online hub in coordination with Title VI program specialist
- Coordinates LEP trainings for frontline, communications and engagement staff

Diversity, Equity & Inclusion Department

The department houses Metro's Americans with Disabilities Act coordinator who leads various non-discrimination compliance efforts.

- Respond to and investigate ADA complaints in partnership with Office of Metro Attorney and visitor venues
- Advise on state and federal disability and accessibility-related topics to senior leadership, Council, staff, jurisdictional partners, consultants, and community partners.
- Ensure ADA compliance with Metro programs, activities, and services.
- Monitor and support the development and implementation of ADA transition plans and self-evaluations.
- Maintains and manages accessibility training curricula
- Provide support and guidance on the accessibility design standards and the code of federal regulations
 pertaining to non-discrimination based on disability.

Human Resources

Human Resources is dedicated to attracting and retaining an effective, engaged workforce that reflects the community Metro serves. Human Resources (HR) is a full-service department providing benefits, classification and compensation, employee and labor relations, organization development and training, department-specific recruitment and selection, and systems administration for the agency. Further, HR also establishes mandatory training requirements for staff and monitors compliance within the learning management system.

- Implements Titles I of the Americans with Disabilities Act (ADA) ensuring that job applications, interviews, and other hiring processes are accessible to individuals with disabilities
- Implements Title II of the ADA
- Receives and processes reasonable accommodation requests under the ADA for employees with documented disabilities

Finance and Regulatory Services

Finance and Regulatory Services (FRS) provides financial management, administrative, regulatory and operational services to Metro's elected officials, operating centers and services, employees and the public. In addition, Finance and Regulatory Services licenses small contractors, regulates private solid waste facilities and sets rates for public solid waste disposal facilities.

Each year, Metro spends millions of dollars on contracts with businesses that support efforts to provide public services for the residents of Clackamas, Multnomah and Washington counties. By actively involving historically underutilized firms and emerging small businesses (collectively referred to as COBID-certified firms) in the pool for business opportunities, Metro helps expand economic opportunities in the region. This department further advances Title VI compliance by the following:

- Including Federal non-discrimination clauses in appropriate business contracts
- Monitors and reports COBID certified firm utilization at Metro

Office of Metro Attorney

The Office of Metro Attorney (OMA) provides legal services to the entire Metro organization, including all departments, commissions, department directors, agency staff, the Chief Operating Officer, the Council and the Auditor. These legal services include research, evaluation, analysis, and advice regarding legal issues affecting Metro; review of contracts, requests for proposals, and bid documents; negotiations regarding contractual agreements; advice and assistance on legislative matters. They are a key partner in addressing Title VI compliance and offer the following support:

- Reviews Title VI Plan, Title VI Program, Limited English Proficiency Plan and Public Engagement guide before submission
- Co-manages complaint intake with Title VI program specialist
- Responds to, processes, and documents Title VI complaints as needed
- Offers technical assistance on reporting and processing Title VI complaints

Parks and Nature, Housing, Waste Prevention and Environmental Services

Staff from the listed departments follow implementation strategies found in Metro's Public Engagement Guide ensuring historically marginalized communities are not discriminated from participating in the

agency's program and activities. These department's business practices continuously assess communications, public engagement and language access strategies to ensure inclusion of historically marginalized populations. The guiding principles include:

- Public participations is very important in decision making
- Transparency around project outcomes and impact on community
- Meaningful public engagement and DEI w/ historically excluded communities
- Engagement and communications are timely and mindful
- Collaboration and capacity building is essential to address regional issues
- Intergovernmental collaboration
- Evaluation of engagement
- Adaptive project timelines allow meaningful engagement.

V. Subrecipient Review Procedures

Metro provides Title VI guidance and self-certification for local jurisdictions for regional plans; includes criteria in allocation decisions; and performs oversight for subrecipients.

I. Regional Transportation Plan

As part of its metropolitan planning organization function, Metro develops and maintains the Regional Transportation Plan tracking projects with committed federal funding. Metro provides guidance on public engagement and Title VI requirements to local jurisdictions and other agencies submitting projects to the Regional Transportation Plan. In 2023, Metro refined its Regional Transportation Plan public engagement and non-discrimination certification checklist, asking jurisdictions and agencies to certify their Title VI compliance efforts.

Form A provides documentation and a description of the public engagement opportunities that have been provided by Metro's subrecipients during the planning and development of projects and programs proposed for amendment to the Regional Transportation Plan (RTP). Completion of the form declares that the subrecipient has provided adequate opportunities for public engagement during the development of plans and projects, including identifying and engaging marginalized communities, including people with low income, people with disabilities, people with limited English proficiency, and Black, Indigenous and other people of color.

Form A: Public engagement and non-discrimination certification checklist for transportation system, subarea, topical, modal, and transit service plan or strategy development. The contents include:

- Section A: Public engagement checklist
- Section B: Documentation of source(s) of amendment
- Section C: Summary of engagement (for NEPA projects only)
- Section D: Signed certification statement

II. Subrecipient oversight

Subrecipients, such as those under the Regional Travel Options program, are monitored and supported in Title VI efforts by: 4

- notifying them of their responsibilities with under Title VI and other laws and regulations
- including Title VI in training on program and federal agency requirements
- requiring the posting of appropriate Title VI notices in their office
- requiring their quarterly invoice indicate how many complaints they have had in the quarter even if the number is zero.

⁴ 2025-27 Regional Flexible Funds Allocation program direction, <u>oregonmetro.gov/sites/default/files/2021/11/29/2025-27-RFFA-program-direction-adopted-by-council-20210909.pdf</u>; *see also* 2025-27 Regional Flexible Funds Allocation outcomes evaluation report, oregonmetro.gov/sites/default/files/2022/07/20/25-27_RFFA_OE%20Report_DRAFT%209_7-19-22.pdf.

Under its Title VI obligations, Metro requires all subrecipients to:

- name a Title VI coordinator
- proactively prevent discrimination as defined in Title VI and related authorities
- disseminate Title VI notifications and program information to the public
- include Title VI compliant language in all contracts to further subrecipients
- perform periodic self-assessments for Title VI compliance
- correct any deficiencies identified through self- assessment or complaint filed
- report quarterly to Metro on Title VI compliance.

Under its procedures to receive Title VI complaints, the subrecipient must:

- provide the public access to a defined complaint process and complaint form (subrecipient may use Metro's complaint form)
- maintain a complaint log with the:
 - o filing date of any complaint
 - o status of any investigation
 - o response taken by the subrecipient to resolve the complaint.
- notify Metro when a complaint is lodged against the subrecipient or further subrecipient

If a subrecipient is found to be out of compliance, Metro will, in accord with the procedures and timeframes of FTA C 4702.1B VI.2 and 3:

- notify subrecipient of its non-compliance
- require, review and approve a remedial action plan from the subrecipient
- monitor action plan and perform a follow up review
- if voluntary compliance is not reached, place subrecipients on deficiency status and suspend federal payments.

Correction period for deficiency status is not to exceed 90 days.

VI. Data Collection, Reporting and Analysis

Under the State of Oregon home rule charter, Metro is responsible for functions within its metropolitan planning area boundary including managing the urban growth boundary for the Portland metropolitan region.

I. Regional demographics: ethnicity, sex, age and income

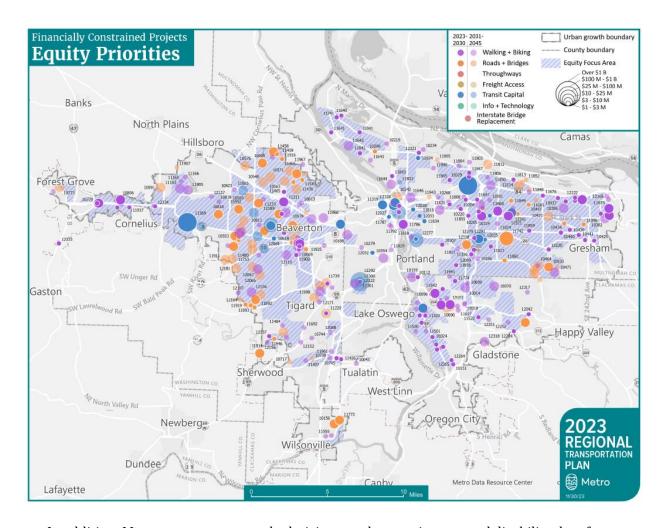

Metro continuously refines its data procedures to better understand the demographics of 1.7 million residents in the greater Portland region. Namely, the Title VI Coordinator/Specialist collaborates with Metro's planning, development and research department to gather data on historically marginalized communities in its jurisdiction. Results from these demographic data practices informs transportation project leaders on the potential benefits and impacts of Metro's programs and activities. Similarly, their perceived importance or severity, specifically in the areas of Metro's role as the metropolitan planning organization for the greater Portland region.

Metro developed a methodology to identify the demographic profile of both the Metro jurisdictional boundary and the metropolitan planning area. Metro further refines data regarding the demographic profiles of residents of color and the locations of communities of color. Metro's data methodology also identifies people who self-identified as more than one race/ethnicity in the 2020 U.S. Census to be included in each of their identified categories, with the exception of "White alone, not Hispanic,".

The chart below is based on the 2020 decennial U.S. Census for race/ethnicity, with the categories based on the 2019-2023 American Community Survey 5-year estimates. Note that the total population estimate is different for the two sources.

		Metro jurisdictional boundary		Metropolitan planning area	
Ethnicity (2019- 2023 ACS)	Population estimate	1,664,909		1,687,087	
White (alone, not Hispanic)		1,096,789	65.9%	1,112,653	66.0%
Black or African American		92,344	5.5%	92,651	5.5%
American Indian/Native American or Alaska Native		45,933	2.8%	46,525	2.8%
Asian or Asian American		196,131	11.8%	196,967	11.7%
Pacific Islander		20,124	1.2%	20,184	1.2%
Hispanic, Latino or Spanish origin		238,691	14.3%	243,241	14.4%
some other race		180,355	10.8%	183,041	10.8%
Sex (2019-2023 ACS)	Population estimate	1,664,909		1,687,087	
Female		836,211	50.2%	847,097	50.2%
Male		828,698	49.8%	839,990	49.8%
Age (2019-2023 ACS)	Population estimate	1,664,909		1,687,087	
younger than 18		330,782	19.9%	335,859	19.9%
18 to 24		129,622	7.8%	131,295	7.8%
25 to 34		271,857	16.3%	274,260	16.3%
35 to 44		267,785	16.1%	270,673	16.0%
45 to 54		222,585	13.4%	225,937	13.4%
55 to 64		190,786	11.5%	193,780	11.5%
65 to 74		154,193	9.3%	156,533	9.3%
75 and older		97,299	5.8%	98,749	5.9%
Income (2019- 2023 ACS)	Household estimate	683,04	45	690,866	
less than \$10,000		26,741	3.9%	26,918	3.9%
\$10,000 to \$19,999		35,251	5.2%	35,514	5.1%
\$20,000 to \$29,999		33,907	5.0%	34,191	4.9%
\$30,000 to \$49,999		78,735	11.5%	79,641	11.5%
\$50,000 to \$74,999		97,932	14.3%	99,148	14.4%
\$75,000 to \$99,999		86,452	12.7%	87,415	12.7%
\$100,000 to \$149,999		127,926	18.7%	129,672	18.8%
\$150,000 or more		196,102	28.7%	198,366	28.7%

The map below shows the distribution of people of color in the greater Portland region, based on 2020 U.S. Census data, compared to proposed investments from the 2018 Regional Transportation Plan.⁵

In addition, Metro requests race and ethnicity, gender, age, income and disability data from people who attend public events, public hearings, web surveys, and other tools. Providing this information is optional. To address public information request concerns and encourage participation, Metro has developed a form that does not identify individuals by name. Metro also collects information through web surveys and other comment tools. This information is analyzed to determine whose voices may not be heard on the issue to determine additional outreach methods to those communities, such as focused announcements through social media, discussion or focus groups, or specific consultation with community-based organizations serving those communities. Information is also used to assess engagement events and processes to remove barriers to participation.

⁵ *See* Appendix E of the 2023 Regional Transportation Plan on the 2023 RTP library page: <u>oregonmetro.gov/regional-transportation-plan</u>

VII. Title VI Training

Metro is developing its Title VI training efforts for internal and external civil rights compliance efforts. The Title VI Coordinator/Specialist attends monthly training sessions led by ODOT's Office of Equity and Civil Rights. These trainings support Title VI practitioners as they develop non-discrimination processes for an agency. Metro encourages staff to seek training to improve the agency's expertise in outreach to low income, communities of color, English language learners and underserved communities. Because of its role as a metropolitan planning organization, the agency often attracts guest speakers on planning topics that often address civil rights in their presentations.

Metro employees have tools at their disposal to better connect and engage with historically marginalized communities. Namely, the Public Engagement Guide⁶ strengthens Metro's engagement practices by describing preferred community engagement practices and reporting guidance. The guide includes best practices to relay captured community engagement feedback to policymakers help them make community-informed decisions. Altogether, the document is grounded in the following desired outcomes:

- People have accessible information and meaningful opportunities to participate in programs, services, or decision-making processes at Metro
- Metro creates welcoming spaces that encourage civic leadership and connection through community-led activities and building capacity for ongoing engagement
- The Metro Council makes decisions that are well-informed and responsive to the needs and perspectives of the diverse communities of greater Portland

The central communications department is a key leader in Title VI relevant trainings for internal staff who support language translation and interpretation services for community members. The communications team has created extensive pathways for staff to support community members in any of the 19 safe harbor languages found in the Portland metropolitan area. Staff have access to a language access internal hub site with directions for procuring language access vendors, assistive listening and live captioning, sign language and spoke interpretation, and written translation services. The language access hub also includes a recorded live demo for how to seamlessly procure language services for community members.

⁶ 2024 Public Engagement Guide: <u>oregonmetro.gov/publicengagement</u>

VIII. Complaint Procedures

Metro is committed to ensuring compliance with all civil rights laws and addresses complaints regarding discrimination on the basis of race, color and national origin. Metro provides instructions on how to file Title VI and ADA Title II discrimination complaints and follows specific procedures for referring or routing complaints to appropriate external agencies.

I. Instructions for filing Title VI complaints

The "Know your rights" and the "Complaint procedures" web pages found at <u>oregonmetro.gov/civilrights</u>,⁸ inform of the right to language services and other accommodations encouraging residents to participate in Metro programs and activities.

Under the heading, "Metro respects civil rights," it states:

Metro fully complies with Title VI of the Civil Rights Act of 1964 and subsequent statutes requiring no person be excluded from the participation in, be denied the benefits of, or be otherwise subjected to discrimination on the basis of race, color, national origin, age, sex, disability, income level or Limited English Proficiency under any program or activity for which Metro administers.

Metro fully complies with Title II of the Americans with Disabilities Act and Section 504 of the Rehabilitation Act that requires that no otherwise qualified individual with a disability be excluded from the participation in, be denied the benefits of, or be subjected to discrimination solely by reason of their disability under any program or activity for which Metro receives federal financial assistance.

(Civil Rights Act of 1964, 42 U.S.C. §2000d); sex (Federal-Aid Highway Act of 1973, 23 U.S.C. §324); age (Age Discrimination Act of 1975, as amended, 42 U.S.C. §6102); disability (Section 504 of Rehabilitation Act of 1973, 29 U.S.C §794 and Americans with Disabilities Act of 1990, as amended, 42 U.S.C. §12132);

⁸Full URL: oregonmetro.gov/civilrights

The "Know your rights" web page also includes the complaint instructions:

You have the right to file a complaint with Metro if you believe you have been discriminated against regarding the receipt of benefits or services because of race, color, national origin, sex, age, disability, income level, or limited English Proficiency. Every effort will be made to address complaints. Metro offers multiple options for submitting discrimination complaints.

For complaints based on race, color, national origin, sex, age, income level or Limited English Proficiency, you can:

- Submit an electronic complaint form
- Submit a pdf discrimination complaint form to civilrights@oregonmetro.gov
- Mail a complaint form to the Title VI Specialist, Metro, 600 NE Grand Ave., Portland, OR 97232
- Call 503-797-1555
- Visit Metro's administrative office at 600 NE Grand Ave. in Portland.

For complaints of discrimination because of disability, you can:

- Submit ADA discrimination complaint form
- Email accessibility@oregonmetro.gov
- Mail a complaint to Heather Buczek, ADA coordinator and Accessibility Program Manager, Metro, 600 NE Grand Ave., Portland, OR 97232
- Call 971-940-3157 or 503-797-1804 TDD
- Visit Metro's administrative office at 600 NE Grand Ave. in Portland.

II. Title VI complaint form

The Title VI complaint form is available on the webpage: oregonmetro.gov/civilrights.

	n to assist in processing your
complaint. If you need help completing th	is form, call 503-797-1932.

Metro's Title VI complaint form is formatted to gather information on the following:

- A written explanation of the alleged discriminatory actions;
- The complainant's contact information, including: full name, postal address, phone number, and email address;
- The basis of the complaint (e.g., race, color, national origin);
- The names of specific persons and respondents (e.g., agencies/organizations) alleged to have discriminated;
- Sufficient information to understand the facts that led the complainant to believe that discrimination occurred in a program or activity that receives Federal financial assistance; and
- The date(s) of the alleged discriminatory act(s) and whether the alleged discrimination is ongoing. The form uses an "electronic signature," informing users:

Complainants may send written materials or other information they think is relevant to the complaint to the Title VI designee via mail or email.

If a complainant chooses to file a complaint via email, by phone or in person, the Title VI Coordinator or designee will perform preliminary intake to answer these questions and fill out a version of this form that may be printed and then reviewed and signed by the complainant.

III. Procedures for Title VI complaints

Metro maintains a log of all complaints received with potential Title VI compliance implications. Complaints must be filed within 180 days of the alleged discriminatory event or practice. Metro encourages complainants to contact Metro's Title VI Coordinator/Specialist if they need assistance, alternate formats, or translation support. Metro will confirm receipt of complaint within 10 working days.

Formal Title VI compliant investigation procedures are conducted by external agencies, only. Metro routes all formal complaints to the Oregon Department of Transportation (ODOT) Office of Equity and Civil Rights. After ODOT review, each formal complaint routes through the Federal-aid highway oversight hierarchy until the complaint reaches the Federal Highway Administration Headquarters Office of Civil Rights (HCR).

- HCR conducts all determinations regarding whether to accept, dismiss, or transfer Title VI complaints filed against State DOTs or Subrecipients of Federal financial assistance.
- When HCR decides on whether to accept, dismiss, or transfer the complaint, HCR will notify the Complainant, the FHWA Division Office, State DOT, and Subrecipient (where applicable).
- Complainants have the right to file with external agencies, the right to appeal, and
 experience non-retaliation by Metro staff. External agencies are listed in the following
 section.

Accepting complaints in alternative languages and formats

Metro ensures that persons with limited English proficiency have meaningful access to its programs and activities, including its complaint procedures. Complaints in languages other than English will be translated and responded to in the language in which they were sent.

Metro ensures that people with disabilities have access to its programs, services and activities, including its complaint procedure in accordance with Title II of the Americans with Disabilities Act of 1990. Reasonable accommodations should be made to facilitate the complaint process for a person with a disability, including transcribing a verbal complaint, translating and responding in Braille, and holding any meetings needed to resolve the issue at an accessible location.

It is important to recognize the need to modify practices to serve complainants with limited English proficiency and those with disabilities may extend beyond the complaint intake stage. Throughout the complaint resolution process, Metro will ensure these individuals understand their rights and responsibilities as well as the status of their complaint.

If the complainant is represented by an attorney

Complainants represented by an attorney should provide a letter of representation.

Processing complaints

The timeframes provided below are calculated to meet the FHWA requirement that investigative reports must be submitted to FHWA within <u>60 days of Metro's receipt of the complaint</u>.

Reviewing Title VI complaints for completeness

The complaint should be reviewed within <u>five calendars days of receipt</u> to determine whether it contains all the necessary information required for acceptance.

- If the complaint is complete, no additional information is needed and Metro has jurisdiction, the complainant should be sent an acceptance letter along with the complainant consent/release form.
- If the complaint is incomplete, the complainant should be contacted in writing or by telephone to obtain the additional information. The complainant should be given 10 calendars days to respond to the request for additional information. To save time later, the complainant should also be sent a complainant consent/release form.
- If the complaint is in a language other than English, the complainant should be sent a translated letter of receipt with information of potential next steps. These include information needed to route complaint and notification that the FHWA holds all determinations for complaint acceptance, denial or transfer. This letter should also include and consent/release form to move the process forward as Metro translates the complaint.

Notification of acceptance of complaints

After determining that the complaint will be routed from Metro to ODOT and/or the FHWA:

- the complainant should be sent an acceptance letter along with the complainant consent/release form
- the respondent should be sent a notification letter; if needed, the respondent should also be sent a request for information.

The notification and acceptance letters should contain the following information:

- the basis for the complaint
- a brief statement of the allegations
- a brief statement that all formal complaints
- an indication of when parties will be contacted
- cautionary statement that respondents or other persons shall not intimidate, threaten, coerce
 or discriminate against any person because they have made a complaint, testified, assisted or
 participated in any manner in an investigation, proceeding or hearing under Title VI or any
 other laws or regulations related to non-discrimination
- notice of availability of alternative dispute resolution and early resolution, if appropriate
- the Title VI Coordinator/Specialist's contact information.

IV. Procedures for recording and reporting Title VI investigations, complaints and lawsuits

Recording complaints

To comply with the reporting requirements, federal guidelines require Metro to prepare and maintain a list of any of the following that allege discrimination on the basis of race, color, or national origin: active investigations conducted by entities other than FHWA; lawsuits; and complaints naming Metro. Upon initial receipt, a complaint should always be date stamped, assigned a case number and recorded as part of list of active investigations, lawsuits and complaints related to Title VI. The date of receipt by the receiving office is crucial for determining jurisdiction and timeliness. Case numbers should follow the convention "Metro-ORYY-##" (YY= year; ##=complaint number for that year). The following is a sample of Metro's recording form, which is also used to track inquiries regarding possible Title VI complaints and other discrimination complaints.

Name of complainant	Name of affected person (if different)	
Address	Address	
City, State, ZIP Code	City, State, ZIP Code	

Phone				
Basis of complaint (race, color, national origin, sex, age, disability, other (specify)):				
Summary of Allegations:				
Complaint recipient:	Date filed:			
Status of Investigation taken by ODOT/FHWA in Response:	Final Findings of Complaint:			

Notification of acceptance of complaints

After determining the complaint is complete, the Title VI Coordinator/Specialist or designee will notify:

- The Deputy Chief Operating Officer
- The Office of Metro Attorney
- The civil rights officer of the appropriate jurisdiction (ODOT)

IX. Dissemination of Title VI Information

Metro's Title VI notice to the public declares Metro's compliance with Title VI and related authorities and informs members of the public of the protections against discrimination afforded to them by Title VI.

A. Title VI notices

The paragraph below is posted at Metro's office facility and inserted in publications that are distributed to the public, including reports and agendas for Metro Council sessions and other meetings:

Metro fully complies with Title VI of the Civil Rights Act of 1964, Title II of the Americans with Disabilities Act , Section 504 of the Rehabilitation Act and other statutes that ban discrimination. If any person believes they have been discriminated against regarding the receipt of benefits or services because of race, color, national origin, sex, age or disability, they have the right to file a complaint with Metro. For information on Metro's civil rights program, or to obtain a discrimination complaint form, visit or call 503-813-7514. Metro provides services or accommodations upon request to persons with disabilities and people who need an interpreter at public meetings. If you need a sign language interpreter, communication aid or language assistance, call 503-797- 1790 or TDD/TTY 503-797-1804 (8 a.m. to 5 p.m. weekdays) 5 business days before the meeting. All Metro meetings are wheelchair accessible. Individuals with service animals are welcome at Metro facilities, even where pets are generally prohibited.

For up-to-date public transportation information, visit TriMet's website at trimet.org.

In addition, the posted notices and Metro Council and other meeting agendas include an abbreviated notice in languages that meet the Department of Justice Safe Harbor guidance on accessibility for people with limited English proficiency. ^{7,8} This notice translates to:

Metro respects civil rights. For information on Metro's civil rights program or to obtain a discrimination complaint form, visit <u>oregonmetro.gov/civilrights</u>.⁹

⁷ All recipients of Department financial assistance have a continuing obligation to comply with Title VI, all applicable Title VI implementing regulations, all applicable federal civil rights laws and nondiscrimination provisions. Recipients of federal financial assistance also have a continuing obligation under the Rehabilitation Act of 1973 to ensure that their communications with individuals with disabilities are as effective as communications with others and may need to provide qualified sign language interpreters for individuals who are deaf. Recipients of federal financial assistance, including subrecipients, are reminded that the denial of language assistance services can be evidence of discrimination on the basis of national origin or disability under certain circumstances. https://www.justice.gov/crt/media/1394191/dl?inline

⁸ As of May 2025, this notice is translated into 19 languages: Arabic, Cambodian, Chinese, Hindi, Hmong, Japanese, Korean, Laotian, Nepali, Persian, Romanian, Russian, Somali, Spanish, Tagalog, Telugu, Thai, Ukrainian and Vietnamese..

⁹ The web page <u>oregonmetro.gov/civilrights</u> has the information addressed in chapter 2, How to file a Title VI discrimination complaint, translated into the corresponding languages, including the discrimination complaint form.

B. Posting locations

Metro publishes the longer version of its Title VI notice in all significant transportation planning documents, including but not limited to: metropolitan area long range transportation plan (most recent update known as the 2023 Regional Transportation Plan), Metropolitan Transportation Improvement Program, Draft Environmental Impact Statements, funding allocation reports and public comment reports.

Since Metro does not provide public transit service, the agency does not post the notice in vehicles.

As of Jan. 20, 2012, Metro's Title VI notice appears on a web page for the topic, oregonmetro.gov/civilrights. ²⁰ This web page makes the document more accessible because it can be found through searches on the agency's web page and on common internet search engines. It is also linked from the homepage through a "Know your rights". The notice also has been posted at three locations in the agency's headquarters, the Metro Regional Center: the entrance to the Metro council chamber, the main entrance to the building near the security check-in desk and the Human Resources Department

As of Jan. 26, 2012, Metro published and posted the notice in English. Metro began including the translated versions in the agency's headquarters on March 16, 2012. Metro began including the translated notices on Metro Council and other meeting agendas in September 2014.

Metro's current translated Title VI notices are shown on the following pages.

C. Vital documents

The following vital documents have been translated into Arabic, Chinese, Hmong, Japanese, Korean, Khmer, Lao, Persian, Romanian, Russian, Somali, Spanish, Tagalog, Ukrainian and Vietnamese:²¹

- nondiscrimination and Title VI civil rights notice
- nondiscrimination and Title VI civil rights complaint procedures
- discrimination and Title VI civil rights complaint form
- information about Metro's language line
- language and accessibility assistance notice
- notice of potential real property impacts (to be translated during specific National Environmental Policy Act (NEPA) process)
- notice of right to participate in formal comment period (to be translated during NEPA process or formal land use action)
- description about Metro programs and services
- notice of how to provide public testimony.

X. Review of STA Directives

I. Program assessment and monitoring procedures

Program assessment and monitoring by Metro's Title VI Coordinator or designee includes biennial review and annual reporting to the ODOT Title VI Designated Official. In addition, any member of the public may inspect public reports, personnel rules, executive orders, resolutions and ordinances pertaining to public outreach, and non-discrimination.

Residents may also request such project and program records through each department.

II. Annual reporting procedures

Each year, the Title VI Coordinator/Specialist or reviews Metro's agency-wide Title VI program to ensure compliance with regulations. In addition, the coordinator reviews agency operational guidelines and publications, including those for contractors, to ensure Title VI language and provisions are incorporated, as appropriate.

The Title VI Coordinator/Specialist will prepare and submit a Title VI Annual Accomplishments report to ODOT as required. Content of the report will describe, at minimum:

- The previous year's Title VI-related activities and efforts, including accomplishments and program changes
- Changes in organizational structure or Title VI personnel
- An accounting of any Title VI complaints submitted to Metro
- Title VI-related goals and objectives for the coming year.

XI. Compliance and Enforcement Procedures

The Title VI Coordinator is responsible for monitoring compliance with Title VI requirements in all aspects of Metro's efforts to identify, engage and assess benefits and impacts for historically marginalized communities. The Title VI Coordinator will:

- develop and distribute information on Title VI rights and guarantees within Metro programs to the general public and provide such information in languages other than English, as appropriate
- include a Title VI notice to the public, either full or abbreviated, in all news releases, Metro Council and advisory committee meeting agendas and the Metro website
- ensure that methods to identify historically marginalized communities comply with Title VI requirements and follow or exceed current best practices
- ensure that communications and public engagement efforts comply with Title VI requirements and follow or exceed current best practices
- disseminate information to minority media and organizations representing historically marginalized communities to engage fully diverse interest groups in the planning process
- notify affected and protected groups of public hearings regarding proposed actions and make
 the hearings accessible to all residents, including the use of interpreters when requested or an
 authentic need has been otherwise identified
- ensure meeting rooms at Metro and other locations are accessible to all
- collect evaluative information about public meetings and comment opportunities to track how
 well different segments of the population are represented, determine where special efforts
 should be made to engage underrepresented voices, and seek continually improving outreach
 methods
- process Title VI complaints in accordance with the Title VI complaint processing procedure
- ensure that methods to assess the benefits and impacts for historically marginalized communities comply with Title VI requirements and follow or exceed current best practices
- if any area is found to be out of compliance, work with program staff and the Office of Metro Attorney to restore compliance and report status and corrective steps to the Deputy Chief Operating Officer

XII. Limited English Proficiency

A person with limited English proficiency is one who does not speak English as their primary language and who has a limited ability to read, speak, write or understand English. Metro refers to residents of the region with limited English proficiency as English-language learners. Metro developed its latest Limited English Proficiency Plan in 2024 to provide language assistance for English-language learners seeking meaningful access to programs. The LEP plan includes elements to ensure that English-language learners have access to the planning notices, processes and published information. Metro will also work toward ensuring multilingual material and documents and interpretation at meetings and events when needed.

In developing the Limited English Proficiency Plan, Metro conducted the four-factor analysis set out by the U.S. Department of Justice, which considers the following:¹⁰

- number or proportion of persons with limited English proficiency (LEP)
 eligible to be served or likely to be encountered by a program, project or
 service
- 2. frequency with which LEP individuals come in contact with the program, project or service
- 3. nature and importance of any proposed changes to people's lives
- 4. program, project or service resources available for language assistance and costs of language assistance.

The full four-factor analysis is available in Metro's Limited English Proficiency Plan.¹¹ There were several key findings revealed in the factor 1 analysis.

- 340,023 persons over the age of five, or 19.6 percent of the Metro region's over-5 population, speaks a language other than English at home.
- 118,398 persons over the age of five speak a language other than English at home and speak English less than "very well". This population is 6.8 percent of the Metro region's over-five population.
- Spanish is the second most predominant language, other than English, spoken in the region
- Sixteen languages within Metro's service area have limited English proficient populations that may meet or exceed 1,000 persons.

¹⁰ U.S. Department of Justice, Guidance to Federal Financial Assistance Recipients Regarding Title VI Prohibition Against National Origin Discrimination Affecting Limited English Proficient Persons, 67 FR 41455, June 18, 2002, issued pursuant to Executive Order 13166, Improving Access to Services for Persons with Limited English Proficiency, Aug. 11, 2000, incorporated by U.S. Department of Transportation,

Policy Guidance Concerning Recipients' Responsibilities to Limited English Proficient (LEP) Persons, 70 FR 74087, Dec. 14, 2005.

¹¹ oregonmetro.gov/sites/default/files/2022/03/31/2021 LEPplan-Metro%28Portland%2COre%29.pdf

• shows the languages that may meet or exceed 1,000 persons with limited English proficiency; no language exceeds 5 percent of the service area population.

Of all languages spoken in the region, the table below shows the languages that are very near or exceed the limited English proficiency threshold of 1,000 persons. No languages meet the 5 percent of the service area population threshold.

Table 1: Languages in Metro region that may exceed 1,000 LEP persons

Languages spoken at home	Population 5 and over speaking a language other than English at home	Population that is LEP, age 5 and over, by native language	Population that is LEP, age 5 and over, by native language, margin of error	Percent of total LEP population by native language	Percent of total Metro region population age 5 and over (1,735,490) , LEP, by language
Spanish	150,380	51,773	+- 2,986	43.7%	3.0%

Factor 1 analysis population data sources

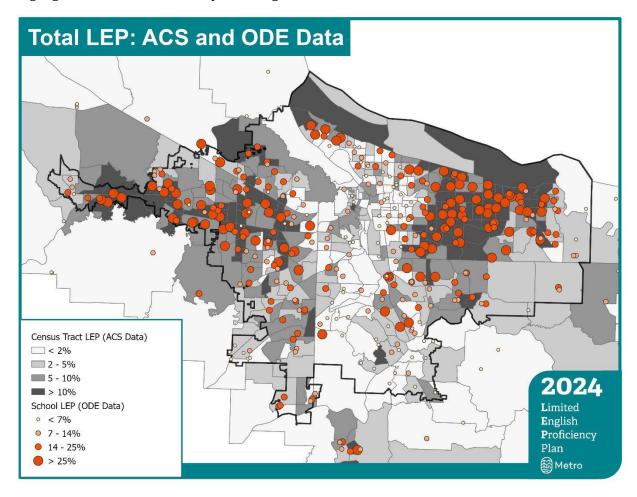

The data sources recommended by the FTA¹² include the sources used to conduct the Factor 1 analysis in Metro's service area in order to understand the number or proportion of English language learners eligible to be served by Metro or encountered by Metro programs or services:

• 2015-2019 American Community Survey (ACS) 5-Year estimates, aggregated by census public use microdata areas (PUMAs)

¹² Federal Transit Administration Office of Civil Rights, Implementing the Department of Transportation's Policy Guidance Concerning Recipients' Responsibilities to Limited English Proficient (LEP) Persons, a Handbook for Public Transportation Providers, April 13,2007.

- 2015-2019 American Community Survey (ACS) 5-Year estimates, aggregated by census tracts
- Oregon Department of Education (ODE): 2018-2019 school year enrollment data for school districts in Clackamas, Multnomah and Washington counties

The figure below shows the distribution of English-language learner populations for all languages in the Portland metropolitan region.

Source: 2015-2019 ACS, U.S. Census tract data, Table B16001; Oregon Department of Education, 2018-2019 enrollment data

Language assistance measures

Metro employs various methods and strategies to provide English-language learners with information critical to accessing programs and services. Metro's language assistance measures include:

Language resource guide Metro developed a language resource guide that outlines effective practice in written translation, helps staff identify steps to consider when translating materials for a program or a project, and provides resources for staff when an event calls for or a community member requires interpretation. The language resource guide is intended for Metro staff providing translation or interpretation services for community members who are English language learners.

Language line Metro maintains a contract with Certified Languages International for telephone interpretation services in up to 205 different languages.

Bilingual staff Metro continues to periodically update a list of volunteer staff interpreters who are available to provide language interpretation services on request. This list is made available to all Metro staff and provided during annual language training to administrative support and communications staff throughout the agency. The list currently identifies 15 employees who are available to help with interpretation of 13 spoken languages plus American Sign Language.

Metro's language hub (<u>oregonmetro.gov/languagehub</u>) Metro redesigned and launched a new website in May 2014. The new site has improved access for visitors that have a limited ability to understand English and connects them with key pages readable in, currently, 16 languages. There is a special emphasis on meeting the needs of the region's growing population of Spanish, Chinese, Vietnamese and Russian speakers.

Multilingual videos Metro contracted with Immigrant and Refugee Community Organization to hire local talent fluent in Spanish, Russian, Vietnamese and Chinese and produced four short videos to inform visitors about the various programs or services Metro provides. To view the videos, visit oregonmetro.gov/languagehub.

When issues or actions are known to affect areas where concentrations of English-language learners live, notices and announcements in the primary language(s) spoken in that area are placed in appropriate locations and community media. Key project or program information and questionnaires are translated. Interpreters will be present at events in which English-language learners affected by the project or program are expected to

participate or otherwise requested. Specific non-English-language discussion groups may be held to address project or program issues.³⁶

For regional programs, published notices for comment opportunities include translated notices on how to receive more information and participate, such as the one below for the Metropolitan Transportation Improvement Program. When appropriate and feasible, online engagement tools include translated options.

Tell us what you think | 30-day comment period

Give your thoughts on the schedule for investing federal and state transportation funds in the greater Portland region for 2021-24. The Metropolitan Transportation Improvement Program also demonstrates how the list of projects comply with federal regulations regarding air quality impacts and environmental justice.

XIII. Appendix A: DOT Standard Title VI Assurances

The United States Department of Transportation (USDOT) Standard Title VI/Non-Discrimination Assurances

DOT Order No. 1050.2A

The Portland Metropolitan Area (Metro) (herein referred to as the "Recipient"), **HEREBY AGREES THAT**, as a condition to receiving any Federal financial assistance from the U.S. Department of Transportation (DOT), through the **Federal Highway Administration (FHWA)**, is subject to and will comply with the following:

Statutory/Regulatory Authorities

- Title VI of the Civil Rights Act of 1964 (42 U.S.C. § 2000d et seq., 78 stat. 252), (prohibits discrimination on the basis of race, color, national origin);
- 49 C.F.R. Part 21 (entitled Non-discrimination In Federally-Assisted Programs Of The Department Of Transportation-Effectuation Of Title VI Of The Civil Rights Act Of 1964);
- 28 C.F.R. section 50.3 (U.S. Department of Justice Guidelines for Enforcement of Title VI of the Civil Rights Act of 1964);

The preceding statutory and regulatory cites hereinafter are referred to as the "Acts" and "Regulations," respectively.

General Assurances

In accordance with the Acts, the Regulations, and other pertinent directives, circulars, policy, memoranda, and/or guidance, the Recipient hereby gives assurance that it will promptly take any measures necessary to ensure that:

"No person in the United States shall, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity, "for which the Recipient receives Federal financial assistance from DOT, including the Federal Highway Administration (FHWA).

The Civil Rights Restoration Act of 1987 clarified the original intent of Congress, with respect to Title VI and other Non-discrimination requirements (The Age Discrimination Act of 1975, and Section 504 of the Rehabilitation Act of 1973), by restoring the broad, institutional-wide scope and

coverage of these non- discrimination statutes and requirements to include all programs and activities of the Recipient, so long as any portion of the program is Federally assisted.

Specific Assurances

More specifically, and without limiting the above general Assurance, the Recipient agrees with and gives the following Assurances with respect to its Federally assisted **Transportation Programs**:

- 1. The Recipient agrees that each "activity," "facility," or "program," as defined in §§ 21.23(b) and 21.23(e) of 49 C.F.R. § 21 will be (with regard to an "activity") facilitated, or will be (with regard to a "facility") operated, or will be (with regard to a "program") conducted in compliance with all requirements imposed by, or pursuant to the Acts and the Regulations.
- 2. The Recipient will insert the following notification in all solicitations for bids, Requests For Proposals for work, or material subject to the Acts and the Regulations made in connection with all **Transportation Programs** and, in adapted form, in all proposals for negotiated agreements regardless of funding source:

"The **Portland Metropolitan Area (Metro)**, in accordance with the provisions of Title VI of the Civil Rights Act of 1964 (78 Stat. 252, 42 U.S.C. §§ 2000d to 2000d-4) and the Regulations, hereby notifies all bidders that it will affirmatively ensure that any contract entered into pursuant to this advertisement, disadvantaged business enterprises will be afforded full and fair opportunity to submit bids in response to this invitation and will not be discriminated against on the grounds of race, color, or national origin in consideration for an award."

- 3. The Recipient will insert the clauses of Appendix A and E of this Assurance in every contract or agreement subject to the Acts and the Regulations.
- 4. The Recipient will insert the clauses of Appendix B of this Assurance, as a covenant running with the land, in any deed from the United States effecting or recording a transfer of real property, structures, use, or improvements thereon or interest therein to a Recipient.
- 5. That where the Recipient receives Federal financial assistance to construct a facility, or part of a facility, the Assurance will extend to the entire facility and facilities operated in connection therewith.
- 6. That where the Recipient receives Federal financial assistance in the form, or for the acquisition of real property or an interest in real property, the Assurance will extend to rights to space on, over, or under such property.
- 7. That the Recipient will include the clauses set forth in Appendix C and Appendix D of this Assurance, as a covenant running with the land, in any future deeds, leases, licenses, permits, or similar instruments entered into by the Recipient with other parties:

- a. for the subsequent transfer of real property acquired or improved under the applicable activity, project, or program; and
- b. for the construction or use of, or access to, space on, over, or under real property acquired or improved under the applicable activity, project, or program.
- 8. That this Assurance obligates the Recipient for the period during which Federal financial assistance is extended to the program, except where the Federal financial assistance is to provide, or is in the form of, personal property, or real property, or interest therein, or structures or improvements thereon, in which case the Assurance obligates the Recipient, or any transferee for the longer of the following periods:
 - a. the period during which the property is used for a purpose for which the Federal financial assistance is extended, or for another purpose involving the provision of similar services or benefits; or
 - b. the period during which the Recipient retains ownership or possession of the property.
- 9. The Recipient will provide for such methods of administration for the program as are found by the Secretary of Transportation or the official to whom he/she delegates specific authority to give reasonable guarantee that it, other recipients, sub-recipients, subgrantees, contractors, subcontractors, consultants, transferees, successors in interest, and other participants of Federal financial assistance under such program will comply with all requirements imposed or pursuant to the Acts, the Regulations, and this Assurance.
- 10. The Recipient agrees that the United States has a right to seek judicial enforcement with regard to any matter arising under the Acts, the Regulations, and this Assurance.

By signing this ASSURANCE, the **Portland Metropolitan Area (Metro)** also agrees to comply (and require any sub-recipients, sub-grantees, contractors, successors, transferees, and/or assignees to comply) with all applicable provisions governing the **Federal Highway Administration** access to records, accounts, documents, information, facilities, and staff. You also recognize that you must comply with any program or compliance reviews, and/or complaint investigations conducted by the **Federal Highway Administration**. You must keep records, reports, and submit the material for review upon request to the Federal Highway Administration, or its designee in a timely, complete, and accurate way. Additionally, you must comply with all other reporting, data collection, and evaluation requirements, as prescribed by law or detailed in program guidance.

The **Portland Metropolitan Area (Metro)** gives this ASSURANCE in consideration of and for obtaining any Federal grants, loans, contracts, agreements, property, and/or discounts, or other Federal-aid and Federal financial assistance extended after the date hereof to the recipients by the U.S. Department of Transportation under the **Transportation Programs**. This ASSURANCE is binding on Oregon, other recipients, sub-recipients, sub-grantees, contractors, subcontractors and their subcontractors', transferees, successors in interest, and any other participants in the Federal Transportation Program. The person(s) signing below is authorized to sign this ASSURANCE on behalf of the Recipient.

Portland Metropolitan Area (Metro)

DATED 4(30/25

APPENDIX A

During the performance of this contract, the contractor, for itself, its assignees, and successors in interest (hereinafter referred to as the "contractor") agrees as follows:

- 1. **Compliance with Regulations**: The contractor (hereinafter includes consultants) will comply with the Acts and the Regulations relative to Non-discrimination in Federally-assisted programs of the U.S. Department of Transportation, **Federal Highway Administration**, as they may be amended from time to time, which are herein incorporated by reference and made a part of this contract.
- 2. **Non-discrimination**: The contractor, with regard to the work performed by it during the contract, will not discriminate on the grounds of race, color, or national origin in the selection and retention of subcontractors, including procurements of materials and leases of equipment. The contractor will not participate directly or indirectly in the discrimination prohibited by the Acts and the Regulations, including employment practices when the contract covers any activity, project, or program set forth in Appendix B of 49 CFR Part 21.
- 3. **Solicitations for Subcontracts, Including Procurements of Materials and Equipment**: In all solicitations, either by competitive bidding, or negotiation made by the contractor for work to be performed under a subcontract, including procurements of materials, or leases of equipment, each potential subcontractor or supplier will be notified by the contractor of the contractor's obligations under this contract and the Acts and the Regulations relative to Non-discrimination on the grounds of race, color, or national origin.
- 4. **Information and Reports**: The contractor will provide all information and reports required by the Acts, the Regulations, and directives issued pursuant thereto and will permit access to its books, records, accounts, other sources of information, and its facilities as may be determined by the Recipient or the **Federal Highway Administration** to be pertinent to ascertain compliance with such Acts, Regulations, and instructions. Where any information required of a contractor is in the exclusive possession of another who fails or refuses to furnish the information, the contractor will so certify to the Recipient or the and **Federal Transit Administration**, as appropriate, and will set forth what efforts it has made to obtain the information.
- 5. **Sanctions for Noncompliance**: In the event of a contractor's noncompliance with the Non-discrimination provisions of this contract, the Recipient will impose such contract sanctions as it or the **Federal Highway Administration** may determine to be appropriate, including, but not limited to:
 - a. withholding payments to the contractor under the contract until the contractor complies; and/or
 - b. cancelling, terminating, or suspending a contract, in whole or in part.

6. **Incorporation of Provisions**: The contractor will include the provisions of paragraphs one through six in every subcontract, including procurements of materials and leases of equipment, unless exempt by the Acts, the Regulations and directives issued pursuant thereto. The contractor will take action with respect to any subcontract or procurement as the Recipient or the **Federal Highway Administration and** may direct as a means of enforcing such provisions including sanctions for noncompliance. Provided, that if the contractor becomes involved in, or is threatened with litigation by a subcontractor, or supplier because of such direction, the contractor may request the Recipient to enter into any litigation to protect the interests of the Recipient. In addition, the contractor may request the United States to enter into the litigation to protect the interests of the United States.

APPENDIX B

CLAUSES FOR DEEDS TRANSFERRING UNITED STATES PROPERTY

The following clauses will be included in deeds effecting or recording the transfer of real property, structures, or improvements thereon, or granting interest therein from the United States pursuant to the provisions of Assurance 4:

NOW, THEREFORE, the U.S. Department of Transportation as authorized by law and upon the condition that the **Portland Metropolitan Area (Metro)** will accept title to the lands and maintain the project constructed thereon in accordance with **Title 23**, **United States Code**, the Regulations for the Administration of **Transportation Programs**, and the policies and procedures prescribed by the **Federal Highway Administration** of the U.S. Department of Transportation in accordance and in compliance with all requirements imposed by Title 49, Code of Federal Regulations, U.S. Department of Transportation, Subtitle A, Office of the Secretary, Part 21, Non-discrimination in Federally-assisted programs of the U.S. Department of Transportation pertaining to and effectuating the provisions of Title VI of the Civil Rights Act of 1964 (78 Stat. 252; 42 U.S.C. § 2000d to 2000d-4), does hereby remise, release, quitclaim and convey unto the **Portland Metropolitan Area (Metro)** all the right, title and interest of the U.S. Department of Transportation in and to said lands described in Exhibit A attached hereto and made a part hereof.

(HABENDUM CLAUSE)

TO HAVE AND TO HOLD said lands and interests therein unto the **Portland Metropolitan Area** (Metro) and its successors forever, subject, however, to the covenants, conditions, restrictions and reservations herein contained as follows, which will remain in effect for the period during which the real property or structures are used for a purpose for which Federal financial assistance is extended or for another purpose involving the provision of similar services or benefits and will be binding on the **Portland Metropolitan Area** (Metro), its successors and assigns.

The **Portland Metropolitan Area (Metro)**, in consideration of the conveyance of said lands and interests in lands, does hereby covenant and agree as a covenant running with the land for itself, its successors and assigns, that (1) no person will on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination with regard to any facility located wholly or in part on, over, or under such lands hereby conveyed [,] [and]* (2) that the **Portland Metropolitan Area (Metro)** will use the lands and interests in lands and interests in lands so conveyed, in compliance with all requirements imposed by or pursuant to Title 49, Code of Federal Regulations, U.S. Department of Transportation, Subtitle A, Office of the Secretary, Part 21, Non-discrimination in Federally-assisted programs of the U.S. Department of Transportation, Effectuation of Title VI of the Civil Rights Act of 1964, and as said Regulations and Acts may be amended [, and (3) that in the event of breach of any of the abovementioned non-discrimination conditions, the Department will have a right to enter or re-enter said lands and facilities on said land, and that above described land and facilities will thereon revert to

and vest in and become the absolute property of the U.S. Department of Transportation and its assigns as such interest existed prior to this instruction].*

(*Reverter clause and related language to be used only when it is determined that such a clause is necessary in order to make clear the purpose of Title VI.)

APPENDIX C

CLAUSES FOR TRANSFER OF REAL PROPERTY ACQUIRED OR IMPROVED UNDER THE ACTIVITY, FACILITY, OR PROGRAM

The following clauses will be included in deeds, licenses, leases, permits, or similar instruments entered into by the **Portland Metropolitan Area (Metro)** pursuant to the provisions of Assurance 7(a):

- A. The (grantee, lessee, permittee, etc. as appropriate) for himself/herself, his/her heirs, personal representatives, successors in interest, and assigns, as a part of the consideration hereof, does hereby covenant and agree [in the case of deeds and leases add "as a covenant running with the land"] that:
 - 1. In the event facilities are constructed, maintained, or otherwise operated on the property described in this (deed, license, lease, permit, etc.) for a purpose for which a U.S. Department of Transportation activity, facility, or program is extended or for another purpose involving the provision of similar services or benefits, the (grantee, licensee, lessee, permittee, etc.) will maintain and operate such facilities and services in compliance with all requirements imposed by the Acts and Regulations (as may be amended) such that no person on the grounds of race, color, or national origin, will be excluded from participation in, denied the benefits of, or be otherwise subjected to discrimination in the use of said facilities.
- B. With respect to licenses, leases, permits, etc., in the event of breach of any of the above Non-discrimination covenants, **Portland Metropolitan Area (Metro)** will have the right to terminate the (lease, license, permit, etc.) and to enter, re-enter, and repossess said lands and facilities thereon, and hold the same as if the (lease, license, permit, etc.) had never been made or issued.*
- C. With respect to a deed, in the event of breach of any of the above Non-discrimination covenants, the **Portland Metropolitan Area (Metro)** will have the right to enter or re-enter the lands and facilities thereon, and the above described lands and facilities will there upon revert to and vest in and become the absolute property of the **Portland Metropolitan Area (Metro)** and its assigns.*

(*Reverter clause and related language to be used only when it is determined that such a clause is necessary to make clear the purpose of Title VI.)

APPENDIX D

CLAUSES FOR CONSTRUCTION/USE/ACCESS TO REAL PROPERTY ACQUIRED UNDER THE ACTIVITY, FACILITY OR PROGRAM

The following clauses will be included in deeds, licenses, permits, or similar instruments/agreements entered into by **Portland Metropolitan Area (Metro)** pursuant to the provisions of Assurance 7(b):

- A. The (grantee, licensee, permittee, etc., as appropriate) for himself/herself, his/her heirs, personal representatives, successors in interest, and assigns, as a part of the consideration hereof, does hereby covenant and agree (in the case of deeds and leases add, "as a covenant running with the land") that (1) no person on the ground of race, color, or national origin, will be excluded from participation in, denied the benefits of, or be otherwise subjected to discrimination in the use of said facilities, (2) that in the construction of any improvements on, over, or under such land, and the furnishing of services thereon, no person on the ground of race, color, or national origin, will be excluded from participation in, denied the benefits of, or otherwise be subjected to discrimination, (3) that the (grantee, licensee, lessee, permittee, etc.) will use the premises in compliance with all other requirements imposed by or pursuant to the Acts and Regulations, as amended, set forth in this Assurance.
- B. With respect to (licenses, leases, permits, etc.), in the event of breach of any of the above Non-discrimination covenants, **Portland Metropolitan Area (Metro)** will have the right to terminate the (license, permit, etc., as appropriate) and to enter or re-enter and repossess said land and the facilities thereon, and hold the same as if said (license, permit, etc., as appropriate) had never been made or issued.*
- C. With respect to deeds, in the event of breach of any of the above Non-discrimination covenants, **Portland Metropolitan Area (Metro)** will there upon revert to and vest in and become the absolute property of **Portland Metropolitan Area (Metro)** and its assigns.*

(*Reverter clause and related language to be used only when it is determined that such a clause is necessary to make clear the purpose of Title VI.)

APPENDIX E

During the performance of this contract, the contractor, for itself, its assignees, and successors in interest (hereinafter referred to as the "contractor") agrees to comply with the following non-discrimination statutes and authorities; including but not limited to:

Pertinent Non-Discrimination Authorities:

- Title VI of the Civil Rights Act of 1964 (42 U.S.C. § 2000d et seq., 78 stat. 252), (prohibits discrimination on the basis of race, color, national origin); and 49 CFR Part 21.
- The Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, (42 U.S.C. § 4601), (prohibits unfair treatment of persons displaced or whose property has been acquired because of Federal or Federal-aid programs and projects);
- Federal-Aid Highway Act of 1973, (23 U.S.C. § 324 et seq.), (prohibits discrimination on the basis of sex);
- Section 504 of the Rehabilitation Act of 1973, (29 U.S.C. § 794 et seq.), as amended, (prohibits discrimination on the basis of disability); and 49 CFR Part 27;
- The Age Discrimination Act of 1975, as amended, (42 U.S.C. § 6101 et seq.), (prohibits discrimination on the basis of age);
- Airport and Airway Improvement Act of 1982, (49 USC § 471, Section 47123), as amended, (prohibits discrimination based on race, creed, color, national origin, or sex);
- The Civil Rights Restoration Act of 1987, (PL 100-209), (Broadened the scope, coverage and applicability of Title VI of the Civil Rights Act of 1964, The Age Discrimination Act of 1975 and Section 504 of the Rehabilitation Act of 1973, by expanding the definition of the terms "programs or activities" to include all of the programs or activities of the Federal-aid recipients, sub-recipients and contractors, whether such programs or activities are Federally funded or not);
- Titles II and III of the Americans with Disabilities Act, which prohibit discrimination on the basis of disability in the operation of public entities, public and private transportation systems, places of public accommodation, and certain testing entities (42 U.S.C. §§ 12131-12189) as implemented by Department of Transportation regulations at 49 C.F.R. parts 37 and 38;
- The Federal Aviation Administration's Non-discrimination statute (49 U.S.C. § 47123) (prohibits discrimination on the basis of race, color, national origin, and sex);
- Executive Order 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations, which ensures Non-discrimination against minority populations by discouraging programs, policies, and activities with disproportionately high and adverse human health or environmental effects on minority and low-income populations;
- Executive Order 13166, Improving Access to Services for Persons with Limited English Proficiency, and resulting agency guidance, national origin discrimination includes discrimination because of Limited English proficiency (LEP). To ensure compliance with Title VI, you must take reasonable steps to ensure that LEP persons have meaningful access to your programs (70 Fed. Reg. at 74087 to 74100);
- Title IX of the Education Amendments of 1972, as amended, which prohibits you from discriminating because of sex in education programs or activities (20 U.S.C. 1681 et seq).

Public Engagement and Nondiscrimination Certification and **Documentation for Regional Transportation Plan Project or Program Amendments**

Purpose

This form provides documentation and a description of the public engagement opportunities that have been provided by project sponsors during the planning and development of projects and programs proposed for amendment to the Regional Transportation Plan (RTP).

Completion of the form declares that the project sponsor has provided adequate opportunities for public engagement during the development of plans and projects, including identifying and engaging marginalized communities, including people with low income, people with disabilities, people with limited English proficiency, and Black, Indigenous and other people of color.

Metro retains these forms to demonstrate compliance with federal (U.S. Department of Transportation, Federal Highways Administration and Federal Transit Administration) and state (Oregon Department of Transportation) guidance on public engagement and on Title VI of the Civil Rights Act and other civil rights requirements (see FTA Circular 4702.1B and Code of Federal Regulations 450.210 and 450.316). Documentation of the 3) Ensure records are form may be requested by federal or state regulators.¹

For questions, contact Metro regional transportation planning at transportation@oregonmetro.gov or 503-797-1750.

Instructions

- 1) Complete this form for all proposed RTP amendments.
 - **Section A:** Public **Engagement Checklist**
 - **Section B:** Documentation of Source(s) of Amendment
 - **Section C:** Summary of Engagement (for NEPA projects only)
 - Section D: Signed **Certification Statement**
- 2) Submit the completed form to Metro staff.
- retained by your agency in accordance with instructions in

Instructions

Sponsoring agencies must fill out each section of this form and submit the completed form to Metro staff along with other information needed to consider a proposed amendment to the RTP. Sponsoring agencies must keep referenced records on file in case of a request for information.

¹ If such a request is unable to be met, the Regional Transportation Plan itself may be found to be out of compliance, requiring regional corrective action.

Section A: Public Engagement Checklist

The checklist in this section outlines federal and state Title VI and engagement requirements for transportation planning and project development. By checking each box, project sponsors are confirming that the proposed amendment has met the associated requirements to support Title VI and engagement compliance for the RTP. The type of records that should be retained are listed where appropriate. These records do not need to be submitted to Metro, but must be retained by project sponsors as described above. The completed checklist may be included in the RTP Amendment materials.

Section B: Documentation of Source(s) of RTP Amendment

In this section, project sponsors provide a list of the adopted local transportation system plans, subarea plans or strategies, topical plans or strategies, modal plans or strategies, transit service plans or any other such plans or studies that were developed with opportunities for public feedback, in which the proposed RTP amendment is adopted and where additional information on public engagement may be found.

Section C: FOR NEPA PROJECTS ONLY - Summary of non-discriminatory, inclusive engagement for NEPA projects

In this section, project sponsors provide additional information on public engagement elements and activities that illustrate how requirements are being met and best practices that are being utilized for any projects subject to the <u>National Environmental Policy Act</u> (NEPA). These are typically large-scale, major projects, anywhere from \$100 to 500 million in cost (<u>CFR 40 1508.18</u>), may be constructed in multiple phases, have a high level of public, legislative or congressional interest and require more extensive public outreach and engagement. The completed checklist may be included in the RTP Amendment materials.

Requirements for Retention of Records

Records should be retained until the related local transportation system plan, subarea plan or strategy, topical plan or strategy, modal plan or strategy, transit service plan or other plan or study is superseded, or the submitted projects have been completed or removed from the RTP plus six years. Retained records do not have to be submitted unless requested by Metro, state regulators or federal regulators.

Section A. Public Engagement Checklist for RTP Amendment

This checklist outlines federal and state Title VI and engagement requirements for transportation planning and project development. By checking each box, project sponsors are confirming that the proposed amendment met the associated requirements to support engagement compliance for the RTP.

Sponsor Agency:

оp	onsor rigeriey.
Br	ief Description of Proposed RTP Amendment:
	The nominating agency or governing body has adopted a Title VI Plan and administrative procedures to implement it in compliance with Federal Title IV of the Civil Rights Act and implementing regulations. Provide a link to the adopted Title VI Plan if available online :
	Projects submitted for the 2023-30 implementation timeframe have conducted, or will conduct, documented project-specific public engagement and analyzed potential inequitable impacts for Black, Indigenous and other people of color, people with limited English proficiency and people with low income compared to those for other population groups.
	Retained records : Documentation of public engagement activities.
	Projects submitted for the 2031-45 implementation timeframe have conducted, or will conduct, project-specific public engagement and analyze potential inequitable impacts for Black, Indigenous and other people of color, people with limited English proficiency and people with low income compared to those for other population groups.
	 Retained records: Documentation of public engagement activities. A public engagement plan was developed for each of the plans, strategies, etc., listed in Section B, in compliance with Federal Title IV of the Civil Rights Act of 1964 and implementing regulations, including the following (check all that are true): A statement of non-discrimination. Public notices were published and requests for input were sent in advance of the project start, engagement activity or input opportunities. Timely, convenient and accessible forums for public input throughout the process. These forums included accommodations for people with disabilities (e.g., screen reader-compatible materials, ASL interpretation), people with limited English proficiency (e.g., translation) and other accommodations (e.g., hybrid meetings).

	Interested and affected groups were identified, and contact information maintained, in order to share plan information; updates were provided for key decision points; and opportunities to engage and comment were provided throughout the process.
	Efforts were made to engage marginalized populations, including Black, Indigenous and other people of color, people with limited English proficiency, people with low income, people with disabilities, older adults and youth. Meetings or events were held at times and locations that are convenient and accessible for marginalized populations with access to transit. Language assistance was provided, as needed, such as translation of key materials, use of a telephone language line service to respond to questions or take input in different languages, and interpretation at meetings or events.
	During project and/or plan development, a demographic analysis was completed to understand the locations of Black, Indigenous and other communities of color, people with limited English proficiency, people with low income and, to the extent reasonably practicable, people with disabilities, older adults and youth in order to include them in engagement opportunities, at the minimum consistent with Title VI requirements.
	Analysis was conducted to document potential inequitable impacts for Black,
	Indigenous and other communities of color, people with limited English
	proficiency and people with low income compared to those for other residents. Public comments were considered throughout the process, and comments received on the staff recommendation were compiled, summarized and
	responded to, as appropriate. Adequate notification was provided regarding final adoption of the plan,
J	including how to obtain more detailed information, at least 15 days in advance of adoption. Notice included information on providing public testimony.
	Other (please describe):
Retair checke	ned records : Public engagement plans and documentation of each element that is d.
One or	more projects or programs included in the proposed amendment identified
•	ial inequitable impacts through demographic analysis and public outreach. If
	checked, list each project and describe the response to identified potential
•	table impacts.
0	Project name
0	Project description Pagnense to notantial inequitable impacts
0	Response to potential inequitable impacts

Retained records: Summary of comments, key findings and changes made to final staff recommendation or adopted plan to reflect public comments (may be included in retained public engagement reports or legislative staff reports).

Section B. Documentation of Source(s) of Project or Program Amendment

Projects and programs in the Regional Transportation Plan must come from plans, strategies, or studies developed and adopted through a public process with opportunities for public input. In this section, project sponsors provide a list of the plans, strategies or studies in which the proposed amendment is adopted and where additional information on public engagement may be found.

Table 1. Adopted Transportation Plans, Strategies and Studies

Complete this table listing all adopted local transportation system plans, subarea plans or strategies, topical plans or strategies, modal plans or strategies, transit service plans, or other such plans or strategies, in which the proposed amendment is identified. Please include the plan, strategy, or study name, the adoption date and link to where the document can be accessed online. Add additional rows, if needed.

Plan/Strategy/Study name	Date adopted	Link

Retained records: Copies of all documents list in Table 1.

Section C. For NEPA Projects Only - Summary of non-discriminatory, inclusive engagement

In this section, the project sponsor provides additional information on public engagement elements and activities that illustrate how requirements are being met and best practices are being utilized for any projects subject to the National Environmental Policy Act (NEPA).

Provide a brief summary describing the engagement approach, practice and processes for <u>the RTP amendment</u> that is subject to the <u>National Environmental Policy Act</u> (NEPA). The summary may be included in the RTP Amendment materials. Please respond to each of the following:

- Project name
- Project sponsor and agency partner(s)
- Brief description of the overall public engagement process, including time period
- Description of compliance with Title VI and Oregon <u>Goal 1: Citizen Involvement</u> and Goal <u>12: Transportation Planning Administrative Rules, including:</u>

- Description of how the community has been involved to date and how community will continue to be involved through project design and/or development, including Black, Indigenous and other people of color, people with limited English proficiency and people with low income.
- O How input helped shape project or plan development and prioritization, including what changes came about because of community input particularly for Black, Indigenous and other people of color, people with limited English proficiency and people with low income; and what community stability and anti- displacement strategies have been or will be considered and included in the project and/or plan development.
- Any additional best practices that contributed to equity, transparency, and accountability.

Section D. Signed Certification Statement - Regional Transportation Plan Amendment

By signing this section, project sponsors certify:

- (1) that the RTP amendment complies with federal and state Title VI and engagement requirements;
- (2) their commitment to retaining records documenting this compliance; and
- (3) their commitment to conducting future project development processes for projects in the RTP that are compliant with federal and state Title VI and engagement requirements.

XV. APPENDIX C: Metro Transportation-Related Advisory Committees

Typically, Metro committees are made up of elected officials, technical staff from the three counties and dozens of cities inside Metro's boundaries, and subject matter experts. Most also have seats reserved for members of the community.

When appointments and confirmations to advisory committees do not require specific jurisdictional, geographical or expertise representation, recruitment efforts attempt to reflect the demographic profile of the region in committee membership.

The committees below have a role in Metro's transportation programs, policies and processes.

The Joint Policy Advisory Committee on Transportation (JPACT) makes recommendations to the Metro Council on transportation needs in the region. JPACT comprises 17 members that serve as elected officials or representatives of transportation agencies across the region.

The Metro Policy Advisory Committee (MPAC) advises the Metro Council on the amendment or adoption of the Regional Framework Plan. MPAC comprises 21 voting members representing cities, counties and special districts, three of which are held by residents directly representing the public. Three Metro Councilors also participate as non-voting liaisons.

The Bi-State Coordination Committee is a standing advisory committee on bi-state issues and makes recommendations to the Southwest Washington Regional Transportation Council, the Joint Policy Advisory Committee on Transportation and Metro. Membership includes six from Clark County and seven from the greater Portland region. Its principal charge is to sustain a regional dialogue, to share information and encourage collaboration.

The Transportation Policy Alternatives Committee (TPAC) provides technical input to the Joint Policy Advisory Committee on Transportation on transportation planning and funding priorities for the region. TPAC's 21 members consist of technical staff from the same governments and agencies as JPACT, plus a representative from the Southwest Washington Regional Transportation Council, and six community members appointed by the Metro Council. In addition, the Federal Highway Administration and C-TRAN have each appointed an associate non-voting member to the committee.

Metro Technical Advisory Committee (MTAC) is a 35-member committee of planners, citizens and business representatives that provides detailed technical support to the Metro Policy Advisory Committee. Three positions held by residents directly representing the public.

Public Engagement Review Committee (PERC) serves as a key component of Metro's efforts to develop successful public engagement processes. The committee includes at least three atlarge community members, three staff or board members from local community organizations and public involvement staff members from Clackamas, Multnomah and Washington counties.

The Transit-Oriented Development Steering Committee provides expert guidance, review and recommendations on Metro's transit-oriented development investment activities. The committee's mission is to create vibrant downtowns and main streets through public and private partnerships, investments and incentives for key development projects located near transit, and provide support for other alternative forms of transportation, such as walking and biking.

If you picnic at Blue Lake or take your kids to the Oregon Zoo, enjoy symphonies at the Schnitz or auto shows at the convention center, put out your trash or drive your car - we've already crossed paths.

So, hello. We're Metro – nice to meet you.

In a metropolitan area as big as Portland, we can do a lot of things better together. Join us to help the region prepare for a happy, healthy future.

Stay in touch with news, stories and things to do. oregonmetro.gov/news

METROPOLITAN PLANNING)	
ORGANIZATION'S TITLE VI PLAN AND)	Introduced by Chief Operating Officer
DELEGATING AUTHORITY TO THE CHIEF)	Marissa Madrigal in concurrence with
OPERATING OFFICER)	Council President Lynn Peterson
	,	

WHEREAS, Metro, working with the Joint Policy Advisory Committee on Transportation (JPACT), is the Metropolitan Planning Organization (MPO) for the Portland Metropolitan region and is authorized by the U.S. Department of Transportation (USDOT) to program federal transportation funds allocated by federal law to the Portland region; and

WHEREAS, Title VI of the Civil Rights Act of 1964 prohibits discrimination on the basis of race, color, and national origin in any programs and activities administered by agencies receiving federal financial assistance; and

WHEREAS, the USDOT requires recipients of federal aid to implement Title VI and prepare a Title VI plan; and

WHEREAS, the USDOT provided a Title VI checklist and reporting format for MPO Title VI plans; and

WHEREAS, the USDOT requires MPO approval for Title VI plans; and

WHEREAS, the MPO must submit the approved Title VI plan to the Oregon Department of Transportation and USDOT; and

WHEREAS, on ADD, 2025, Metro's Transportation Policy and Alternatives Committee recommended that JPACT approve this resolution; and

WHEREAS, on ADD 2025, JPACT approved and recommended that the Metro Council adopt this resolution; now therefore

BE IT RESOLVED that the Metro Council

- 1. Adopts the MPO's Title VI plan in a form substantially like the document attached as Exhibit A.
- 2. Delegates authority to Metro's Chief Operating Officer to revise the Title VI plan and any related documents as needed.

ADOPTED by the Metro Council this day o	f2025.

LOCALLY PREFERRED ALTERNATIVE FOR)	
THE MONTGOMERY PARK STREETCAR)	Introduced by Chief Operating Officer
EXTENSION)	Marissa Madrigal in concurrence with
)	Council President Lynn Peterson

WHEREAS, Metro is the directly elected regional government responsible for regional land use and transportation planning under state law and the federally designated metropolitan planning organization (MPO) for the Portland metropolitan area; and

WHEREAS, the Joint Policy Advisory Committee on Transportation (JPACT) and the Metro Council together serve as the MPO board for the region in a unique partnership that requires joint action on all MPO decisions, including endorsing locally preferred alternatives for major projects in the region; and

WHEREAS, Metro's adopted long-range blueprint for the region, the 2040 Growth Concept, reflects a commitment to create prosperous and sustainable communities for present and future generations and guides the region's land use and transportation development in alignment with it; and

WHEREAS, the Regional Transportation Plan (RTP) is a central tool for implementing the 2040 Growth Concept and emphasizes outcomes, system completeness and measurable performance in order to realize adopted land use plans, and hold the region accountable for making progress toward regional goals focused on climate, equity, safety, mobility and thriving economy; and

WHEREAS, in June 2010, the Metro Council adopted Ordinance No. 10-1241B, amending the 2004 Regional Transportation Plan (RTP) to comply with federal and state law, which included adoption of the Regional High Capacity Transit (HCT) System Plan; and

WHEREAS, the Regional HCT System Plan identified streetcar to Montgomery Park as part of the City of Portland's Draft Streetcar System Plan; and

WHEREAS, in 2018 the Metro Council adopted the Regional Transit Strategy (RTS), as a component of the RTP, via Resolution No. 18-4892, which established the regional vision to make transit more frequent, convenient, accessible and affordable for everyone; and

WHEREAS, the HCT Strategy is a component of the 2018 RTS which was updated by Resolution No. 23-5348 to include new high capacity transit-related policies and identified high capacity transit lines on the Regional Transit Network map to better reflect the RTS vision; and

WHEREAS, the HCT Strategy identified streetcar to Montgomery Park from the City of Portland's Draft Streetcar System Plan as a Tier 1 near-term priority investment which is included on the RTP 2030 financially constrained project list; and

WHEREAS, the most recent update to the RTP was completed on November 30, 2023, following adoption by JPACT and the Metro Council; and

WHEREAS, the Montgomery Park Streetcar Extension was identified in the 2023 RTP's financially constrained list of projects and programs; and

WHEREAS, from 2019 to 2023, the City of Portland developed the Montgomery Park to Hollywood Transit and Land Use Development Strategy (MP2H), which identified a preferred transit alignment for the Montgomery Park Streetcar Extension; and

WHEREAS, in 2024, the City of Portland published the Montgomery Park Area Plan, which included a description updated the MP2H name to better reflect the plan's focus in the Montgomery Park Area of Northwest Portland and included minor refinements to the preferred transit alignment to reduce capital costs and improve feasibility, as well as a description of the preferred transit alignment, an overview of the assessment of alternatives conducted toward its development, and proposed cross sections for the alignment; and

WHEREAS, on December 11, 2024, the Portland City Council adopted Resolution No. 37692 to adopt the Locally Preferred Alternative for the Montgomery Park Streetcar Transit Project; and

WHEREAS, on January 2, 2025, the Federal Transit Administration (FTA) approved the Montgomery Park Streetcar Extension to enter into the Project Development phase under the FTA's Capital Investments Grants Small Starts program; and

WHEREAS, at its June 18, 2025 meeting, the Metro Technical Advisory Committee (MTAC) received an overview of the LPA and recommended approval of Resolution No. 25-5505 to the Metro Policy Advisory Committee (MPAC); and

WHEREAS, at its meeting on June 25, 2025, MPAC recommended that Metro Council approve Resolution No. 25-5505; and

WHEREAS, at its meeting on June 6, 2025, Metro's Transportation Policy Alternatives Committee (TPAC) received an overview of the LPA and recommended that JPACT approve Resolution No. 25-5505; and

WHEREAS, at its meeting on June 26, 2025, JPACT approved Resolution No. 25-5505 and submitted the resolution to the Metro Council for approval; now therefore,

BE IT RESOLVED that the Metro Council hereby:

- 1. Endorses the Montgomery Park Streetcar Extension Locally Preferred Alternative, described in the attached Exhibit A.
- 2. Directs staff to prepare amendments to the 2023 Regional Transportation Plan to reflect the Montgomery Park Streetcar Extension Locally Preferred Alternative for consideration by JPACT and the Metro Council in 2026.

ADOPTED by the Metro Council this 31st day of Ju	ly, 2025.
	Lynn Peterson, Council President
Approved as to Form:	
Carrie MacLaren, Metro Attorney	

Montgomery Park Transit Project

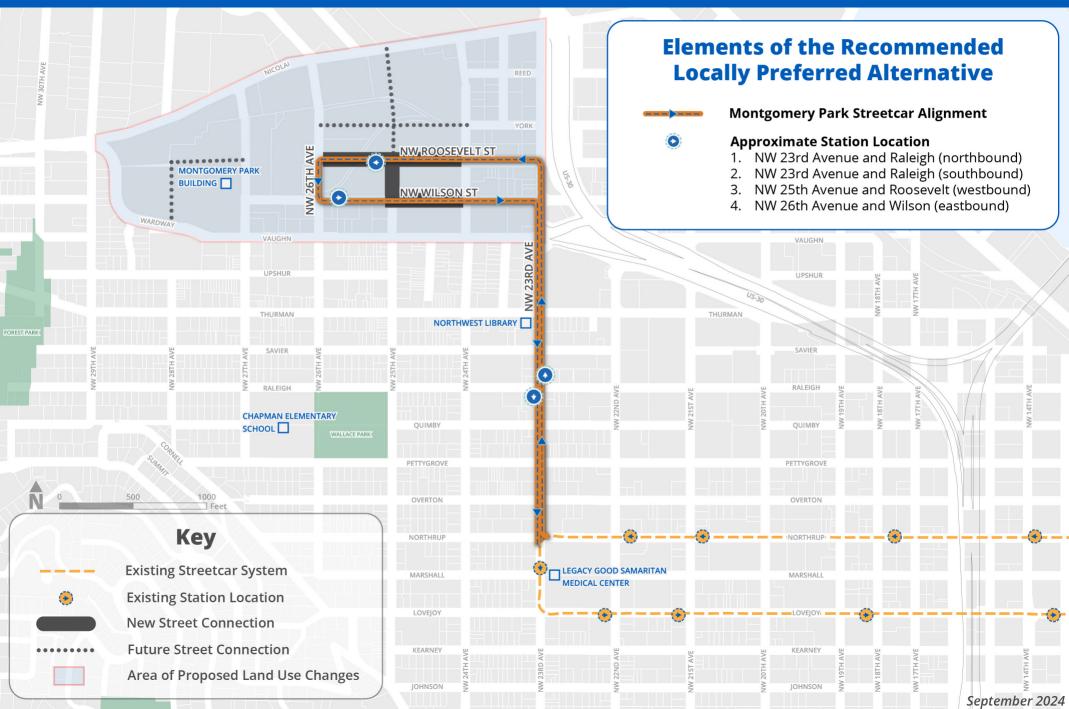

Recommended Locally Preferred Alternative | September 2024

The recommended Locally Preferred Alternative for high capacity transit to the Montgomery Park Area is streetcar transit with stations at the locations indicated on the attached map, operating as a .65 one-way route mile extension of the existing Portland Streetcar North-South (NS) Line from its existing terminus at NW 23rd Avenue and NW Northrup Street to a new terminus at NW 26th Avenue and NW Wilson Street near the Montgomery Park building in Northwest Portland. This extension will allow the NS Line to operate between the Montgomery Park Building and the South Waterfront. The route extension will operate on NW 23rd Avenue, as well as on a new one-way parallel couplet using NW Roosevelt Street, NW 26th Avenue, and NW Wilson Street.

Montgomery Park Transit Project RECOMMENDED LOCALLY PREFERRED ALTERNATIVE

STAFF REPORT

IN CONSIDERATION OF RESOLUTION NO. 25-5505 FOR THE PURPOSE OF ENDORSING THE LOCALLY PREFERRED ALTERNATIVE FOR MONTGOMERY PARK STREETCAR EXTENSION

Date: June 6,2025

Department: Planning, Development and

Research

Meeting Date: June 26, 2025

Prepared by: Alex Oreschak Alex.Oreschak@oregonmetro.gov Presenter(s), Alex Oreschak (he/him),

Senior Planner Length: 20 minutes

ISSUE STATEMENT

The Portland Streetcar Montgomery Park Extension Project will extend the existing Portland Streetcar North-South (NS) Line 0.65 miles one-way (1.3 miles round trip) from its existing terminus at NW 26th Avenue and NW Northrup Street to a new terminus at NW 26th Avenue and NW Wilson Street near Montgomery Park in Northwest Portland. The project will also rehabilitate NW 23rd Avenue between NW Vaughn and NW Lovejoy streets including streetscape improvements, as well as extend multimodal streets in the project area to support streetcar operations.

On December 11, 2024, the Portland City Council adopted Resolution No. 37692 to adopt the Locally Preferred Alternative for the Montgomery Park Streetcar Transit Project.

The recommended Locally Preferred Alternative for high capacity transit to the Montgomery Park Area is streetcar transit with stations at the locations indicated on the attached map, operating as a .65 one-way route mile extension of the existing Portland Streetcar North-South (NS) Line from its existing terminus at NW 23rd Avenue and NW Northrup Street to a new terminus at NW 26th Avenue and NW Wilson Street near the Montgomery Park building in Northwest Portland. This extension will allow the NS Line to operate between the Montgomery Park Building and the South Waterfront. The route extension will operate on NW 23rd Avenue, as well as on a new one-way parallel couplet using NW Roosevelt Street, NW 26th Avenue, and NW Wilson Street. The LPA is reflected in Exhibit A to Resolution No. 25-5505.

On June 6, 2025, the Transportation Policy Alternatives Committee (TPAC) recommended the Joint Policy Advisory Committee on Transportation (JPACT) approve Resolution No. 25-5505. Approval of the resolution endorses the Montgomery Park Streetcar Extension Locally Preferred Alternative (LPA) as recommended by JPACT and MPAC, and directs staff to prepare amendments to the 2023 Regional Transportation Plan to reflect the LPA.

ACTION REQUESTED

Approve Resolution No. 25-5505 as recommended by TPAC and submit to Metro Council for approval.

IDENTIFIED POLICY OUTCOMES

The project will support dense, equitable transit-oriented development west of US-30 between NW Nicolai and NW Vaughn streets, where predominantly vacant, low-density industrial land recently underwent land use changes to employment- and housing-focused mixed uses. The project will also support several indirect public benefits for the area, including new affordable housing, new middle-wage jobs onsite, a new public park, affordable commercial opportunities, and the commemoration of York—enslaved member of the Lewis and Clark Expedition who was critical to its success—through public art; these ancillary benefits are captured in a Public Benefits Agreement (PBA) between the City of Portland, property owners in the area, and Portland Streetcar, Inc.

In addition to spurring transit-oriented development, the project is intended to serve as a critical single occupancy vehicle (SOV) trip demand mitigation tool as the area redevelops over time. As such, it also includes improvements to the pedestrian and bicycle network to support non-driving options within, to, from, and through the new district.

The Montgomery Park Streetcar Extension has been identified by the region as a top priority for transit investment. It is called out in multiple adopted plans including the 2009 Metro Regional High Capacity Transit System (HCT) Plan, the 2018 Regional Transit Strategy, the 2023 Regional Transportation Plan (RTP), and the 2023 High Capacity Transit Strategy, which designates the Montgomery Park Streetcar Extension as a Tier 1: near-term HCT corridor, the highest priority for HCT investment in our region.

Project outcomes identified in the RTP are improved travel connecting with the existing streetcar network, as well as necessary safety and accessibility improvements, including rehabilitation of NW 23rd Avenue and new multimodal street connections on NW Roosevelt Street, NW Wilson Street, and NW 26th Avenue. This project also supports land use changes and housing development, including new affordable housing units, as identified in the Montgomery Park Area Plan, which was also adopted by Portland City Council in December 2024.

POLICY OPTIONS FOR COUNCIL TO CONSIDER

- 1. Approve Resolution No. 25-5505 as recommended by TPAC.
- 2. Do not approve Resolution No. 25-5505.

JPACT and Metro Council endorsement of the Locally Preferred Alternative will demonstrate regional consensus on the project parameters. Endorsement of the LPA is a

necessary step to a future adoption of the LPA into the financially constrained RTP project list, which is required to complete the Project Development phase of the Capital Investment Grant (CIG) program and be eligible to garner CIG discretionary funding. Metro Council and JPACT are anticipated to consider adoption of the LPA into the 2023 RTP in March 2026 as part of a package of RTP amendments which includes two other Tier 1 projects with recent LPA recommendations: Tualatin Valley Highway Transit Project and the 82nd Avenue Transit Project.

RECOMMENDED ACTION

Approve Resolution No. 25-25-5505. Approval of the resolution endorses the Locally Preferred Alternative adopted by the City of Portland and directs staff to prepare amendments to the 2023 Regional Transportation Plan to reflect the Montgomery Park Streetcar Extension LPA for consideration by JPACT and the Metro Council in 2026.

STRATEGIC CONTEXT & FRAMING COUNCIL DISCUSSION

The LPA advances Metro's 2040 Growth Concept and Regional Transportation Plan by connecting the Montgomery Park area in Northwest Portland to the existing streetcar network in the Portland Central City. It also complements land use and housing actions identified in the Montgomery Park Area Plan adopted by Portland City Council in December 2024, and supports changes Metro Council adopted to update the Urban Growth Management Functional Plan (UGMFP) "Title 4 Industrial and Other Employment Areas" Map in January 2025 through Ordinance 25-1522.

The project advances multiple objectives by promoting walkable communities; improving access to jobs, schools, retail places and other community places along the route; increasing transportation choices including active transportation and better access to transit; regional mobility; and safety. The project will support the development of over 3000 new housing units, over 4000 new jobs, and approximately 3000 new daily transit riders.

KNOWN OPPOSITION

Public input and partner endorsements demonstrate support for this LPA.

There were two opponents to the adoption of the Montgomery Park Area Plan:

- a. The Northwest Industrial Business Association opposed the adoption of the Montgomery Park Area Plan (MPAP) because of impacts to what was industrial land and potential impacts to low-barrier-to-entry middle wage jobs. The MPAP worked to address this by limiting land use changes to the area of greatest potential change and tying the development in the area to on-site middle-wage jobs in a variety of fields (target requirements with a fee charged if not met as agreed in the adopted Public Benefits Agreement).
- b. The Northwest District Neighborhood Association (NWDA) did not outright oppose the project, but opposed the adoption of the overall Montgomery

Park Area Plan because they felt the plan did not respond effectively enough to neighborhood input or concerns. The NWDA was critical to the MPAP's process, having representation on the Project Working Group and being part of dozens of conversations over the course of the planning process. A key issue with the project itself for the NWDA is the final alignment; while members varied in their perspective on the best route, there was concern expressed around parking and traffic impacts (which the project and plan sought to address by working to maintain as much parking as possible in the project area and minimizing the number of stations on 23rd Ave).

Extensive technical analysis was conducted to understand the benefits and tradeoffs of different LPA components. The analysis was shared with community members for feedback. Public engagement has been extensive and coordinated with outreach for the Montgomery Park Area Plan, which aims to transition the area from a somewhat underutilized industrial and employment-focused district into a mixed-use employment district that will support both job growth and housing development. More information on public engagement for the project can be found on the Montgomery Park Area Plan website: https://www.portland.gov/bps/planning/mp2h/mpap-recommended-draft.

ANTICIPATED EFFECTS

Approval of this resolution will allow project staff to continue working with City of Portland and TriMet on the project to:

- Amend the 2023 RTP to reflect the LPA and a high-level funding plan
- Pursue federal funding
- Complete federally-required National Environmental Policy Act (NEPA) documentation
- Refine design and costing
- Support the implementation and construction of the project
- Open the streetcar extension in 2030

The project is currently listed in the 2023 RTP. However, the 2023 RTP needs to be amended to reflect the LPA defining the mode, route, and general station locations and a high-level funding plan. The next steps and timeline for that future action include:

- Metro staff will coordinate to prepare amendments to the 2023 Regional Transportation Plan to reflect the Montgomery Park Streetcar Extension LPA, as well as the TV Highway and 82nd Avenue LPAs.
- An RTP amendment is necessary to be eligible for federal funding and action.
- The RTP amendment will require a recommendation from MPAC and adoption by JPACT and Metro Council. The amendment may include the following as needed to reflect the LPA:
 - o Amendments to Chapter 3 Transit Network Map
 - o Amendments to the Appendix A: Constrained priorities project list

- o Amendments to Appendix W: Status of Current Major Projects
- o Amendments to Appendix V: Future corridor refinement planning
- Create a new appendix: Montgomery Park Streetcar Extension Locally Preferred Alternative
- Updates to reflect the RTP funding strategy or any other chapter components, if applicable
- The amendment will be accompanied by findings that demonstrate consistency with:
 - o RTP goals, objections, and policies
 - o Metro's Public Engagement Guide
 - o Federal fiscal constraint requirements
 - Statewide planning goals
- Proposed RTP amendment schedule:
 - Fall 2025: Public comment period
 - Fall/Winter 2025: Review/discuss amendment and public comment at MTAC, TPAC, MPAC, JPACT, Metro Council
 - o Spring 2026: Seek adoption of RTP amendment

Budget Impacts: Adoption of this resolution has no budget impact. There will be future costs associated with implementation of the project. These costs will be shared by local, regional, state and federal partners.

Local Jurisdiction Actions

- The Portland City Council adopted Ordinance No. 192000 to adopt the Montgomery Park Area Plan including amendments to the Comprehensive Plan, Comprehensive Plan Map, Zoning Map, Zoning Code, Citywide Design Guidelines, and related amendments to the Guild's Lake Industrial Sanctuary and Northwest District plans (amend Code Title 33)
- The Portland City Council adopted Resolution No. 37692 to adopt the Locally Preferred Alternative for the Montgomery Park Transit Project
- The Portland City Council adopted Ordinance No. 192001 to authorize Agreement between the City, Portland Streetcar Inc, and 1535-A1 LLC for public benefits related to the Montgomery Park Area Plan

BEFORE THE METRO COUNCIL

FOR THE PURPOSE OF ENDORSING THE)	RESOLUTION NO. 25-5504
LOCALLY PREFERRED ALTERNATIVE FOR)	
THE TUALATIN VALLEY HIGHWAY TRANSIT)	Introduced by Chief Operating Officer Marissa Madrigal in concurrence with
AND SAFETY PROJECT)	Council President Lynn Peterson

WHEREAS, Metro is the directly elected regional government responsible for regional land use and transportation planning under state law and the federally designated metropolitan planning organization (MPO) for the Portland metropolitan area; and

WHEREAS, the Joint Policy Advisory Committee on Transportation (JPACT) and the Metro Council together serve as the MPO board for the region in a unique partnership that requires joint action on all MPO decisions, including endorsing locally preferred alternatives for major projects in the region; and

WHEREAS, Metro's adopted long-range blueprint for the region, the 2040 Growth Concept, reflects a commitment to create prosperous and sustainable communities for present and future generations and guides the region's land use and transportation development in alignment with it; and

WHEREAS, the Regional Transportation Plan (RTP) is a central tool for implementing the 2040 Growth Concept and emphasizes outcomes, system completeness and measurable performance in order to realize adopted land use plans, and hold the region accountable for making progress; and

WHEREAS, the 2009 High Capacity Transit System Plan identified Tualatin Valley (TV) Highway between Beaverton and Hillsboro as a Next Phase Regional Priority HCT Corridor and TV Highway between Hillsboro and Forest Gove as a Developing Regional Priority HCT Corridor; and

WHEREAS, the 2013 Tualatin Valley Highway Corridor Plan (TVCP), was a "mobility corridor refinement" plan between Cedar Hills Boulevard (Beaverton Regional Center) and SE 10th Avenue/Maple Street (Hillsboro Regional Center) that identified needs and improvements for all modes of transportation; and

WHEREAS, the 2023 RTP and the 2018 Regional Transit Strategy both identify the Tualatin Valley Highway corridor as a key area for major transit investment in infrastructure; and

WHEREAS, the 2019 Moving Forward TV Highway Plan is a multi-agency study to determine nature and feasibility of High Capacity Transit (HCT) in the Tualatin Valley Highway corridor between SW 160th Ave and Cornelius Pass Road; and

WHEREAS, the 2023 RTP identified the TV Highway Transit Project as a major high-capacity transit investment included in the 2030 Near-Term Constrained Project List; and

WHEREAS, the 2023 High Capacity Transit Strategy identified TV Highway as a Tier 1 corridor, the top level of regional prioritization for advancing in the near-term; and

WHEREAS, the Federal Transit Administration (FTA) awarded Metro a Helping Obtain Prosperity for Everyone (HOPE) grant in 2020 to fund initial planning, engineering and development of capital improvements for the TV Highway corridor and accelerate the implementation of infrastructure investments to enhance the speed, reliability and access to transit services in an area that greatly benefits communities within areas of persistent poverty; and

WHEREAS, in January 2022 Metro and TriMet convened a Steering Committee for the TV Highway Transit and Safety Project, consisting of agency leaders, elected officials, and community representatives, to develop and recommend a Locally Preferred Alternative and funding strategy for high-capacity transit on TV Highway; and

WHEREAS, in June 2023 a community-led effort identified actions that nonprofit, government and private sector partners can each take to stabilize and support community in parallel with the TV Highway Transit and Safety Project; and

WHEREAS, Metro and TriMet collaborated on Phase 1 of the Project, as set forth in the Intergovernmental Agreement identified as Metro IGA No. 967638, to develop regional agreement on the recommended mode, alignment, and general station locations of the future high-capacity transit service; and

WHEREAS, the TV Highway Transit and Safety Project is a partnership among Metro, TriMet, the Oregon Department of Transportation (ODOT), Washington County, and the cities of Forest Grove, Cornelius, Hillsboro, and Beaverton; and

WHEREAS, the TV Highway Transit and Safety Project Steering Committee met numerous times, heard public input and testimony, and unanimously recommended the LPA for adoption on February 14, 2025, including the mode of transportation, alignment, and general station locations; and

WHEREAS, the Project Steering Committee defined the LPA Project route between the city of Beaverton, in the east, and the city of Forest Grove in the west, as shown on the attached Exhibit A map and generally described herein as:

- From the Beaverton Transit Center along the TV Highway to the Hillsboro Transit Center;
- Continuing west along the TV Highway to the City of Cornelius; and
- Continuing west to terminate in the City of Forest Grove at 19th Avenue and B Street; and

WHEREAS, the Board of Washington County Commissioners unanimously adopted Resolution Number 25-26 on April 22, 2025, endorsing the LPA; and

WHEREAS, the Cornelius City Council unanimously adopted Resolution Number 2025-16 on May 5, 2025, endorsing the LPA; and

WHEREAS, the Hillsboro City Council unanimously adopted Resolution Number 2881 on May 6, 2025, endorsing the LPA; and

WHEREAS, the Forest Grove City Council unanimously adopted Resolution Number 2025-17 on May 12, 2025, endorsing the LPA; and

WHEREAS, the Beaverton City Council unanimously adopted Resolution Number 25084 on May 27, 2025, endorsing the LPA; and

WHEREAS, the TriMet Board of Directors unanimously adopted Resolution Number 25-05-25 on May 28, 2025, recommending confirmation of the LPA; and

WHEREAS, the LPA was endorsed by ODOT with a letter of support dated ____ (anticipated); and

WHEREAS, on June 12, 2025 (anticipated), JPACT approved Resolution No. 25-5504 and submitted the resolution to the Metro Council for approval; and

WHEREAS, on June 25, 2025 (anticipated), MPAC made a recommendation to the Metro Council on endorsing the TV Highway Transit and Safety Project LPA; and

WHEREAS, a public demonstration of local support for the Project LPA by TriMet, Metro, and collaborating local jurisdictions is essential to advance Project Development and funding from the Federal Transit Administration (FTA); and

WHEREAS, the Council's endorsement of the LPA as described in this Resolution and the attached Exhibit A map would allow Metro to continue working with TriMet and other project partners to advance the Project; now therefore,

BE IT RESOLVED, that Metro Council hereby:

- 1. Endorses the TV Highway Transit and Safety Project Locally Preferred Alternative as described in the attached Exhibit A.
- 2. Directs staff to prepare amendments to the 2023 Regional Transportation Plan to reflect the TV Highway Transit and Safety Project Locally Preferred Alternative for consideration by JPACT and the Metro Council in 2026.

ADOPTED by the Metro Council this	day of June 2025.

Approved as to Form:	
Carrie MacLaren Metro Attorney	

Exhibit A

Tualatin Valley Highway Transit and Safety Project Locally Preferred Alternative (LPA) Description

On February 13, 2025, the TV Highway Steering Committee recommended the TV Highway Transit and Safety Project Locally Preferred Alternative (LPA). The recommended LPA for high-capacity transit in the Tualatin Valley Highway corridor is bus rapid transit with stations at the general locations indicated on the attached map, operating between Beaverton Transit Center and 19th Avenue and B Street in Forest Grove. The route will generally follow the same alignment as TriMet's current Line 57 route.

Locally Preferred Alternative Map

IN CONSIDERATION OF RESOLUTION NO. 25-5504, FOR THE PURPOSE OF ENDORSING THE LOCALLY PREFERRED ALTERNATIVE FOR TUALATIN VALLEY HIGHWAY TRANSIT AND SAFETY PROJECT

Date: May 20, 2025

Department: Planning, Development and

Research

Meeting Date: June 26, 2025

Prepared by: Kate Hawkins, 503-449-3949, kate.hawkins@oregonmetro.gov

Presenter(s): Kate Hawkins (she/her),

Senior Transportation Planner

Length: 20 minutes

ISSUE STATEMENT

The TV Highway Transit and Safety Project seeks to improve speed, reliability, accessibility and safety for transit riders on TV Highway. Since 2022, the Metro and TriMet project teams have worked with partners to explore numerous options for bringing high-capacity transit to the TV Highway corridor. The work has been guided by a project Steering Committee consisting of elected officials, agency leaders, and community-based organization representatives, and supported through coordination at the staff level across the five corridor jurisdictions, Metro, TriMet and ODOT.

On February 13, 2025, the TV Highway Steering Committee recommended the TV Highway Transit and Safety Project Locally Preferred Alternative (LPA). The recommended LPA for high-capacity transit on the TV Highway corridor is bus rapid transit, operating between Beaverton Transit Center and 19th Avenue and B Street in Forest Grove. The route will generally follow the same alignment as TriMet's current Line 57 route. The LPA map with recommended mode, alignment, and general station locations is reflected in Exhibit A to Resolution No. 25-5504.

ACTION REQUESTED

Approve Resolution No. 25-5504 as recommended by the Joint Policy Advisory Committee on Transportation (JPACT) and Metro Policy Advisory Committee (MPAC). Approval of the resolution endorses the TV Highway Transit and Safety Project Locally Preferred Alternative (LPA) as recommended by JPACT and MPAC, and directs staff to prepare amendments to the 2023 Regional Transportation Plan to reflect the LPA.

IDENTIFIED POLICY OUTCOMES

The TV Highway corridor has been identified as a top priority for transit investment in numerous adopted regional plans. These include the 2009 Metro Regional High Capacity Transit System (HCT) Plan, the 2018 Regional Transit Strategy, the 2023 Regional

Transportation Plan (RTP), and the 2023 High Capacity Transit Strategy, which designates TV Highway as a Tier 1: near-term HCT corridor, the highest priority for near-term HCT investment in our region.

Project outcomes identified in the RTP include improving transit speed and reliability, making the bus more competitive with driving, improving corridor safety and accessibility, and providing a more dignified and attractive rider experience.

POLICY OPTIONS FOR COUNCIL TO CONSIDER

- 1. Approve Resolution No. 25-5504 as recommended by JPACT and MPAC.
- 2. Do not approve Resolution No. 25-5504 and refer it back to JPACT with a recommendation for amendment.

Metro Council endorsement of the Locally Preferred Alternative will demonstrate regional consensus on the project parameters. Endorsement of the LPA is a necessary step to a future adoption of the LPA into the financially constrained RTP project list, which is required to complete the Project Development phase of the Federal Transit Administration's Capital Investment Grant (CIG) program and be eligible to garner CIG discretionary funding. Metro Council and JPACT are anticipated to consider adoption of the LPA into the 2023 RTP in March 2026 as part of a package of RTP amendments which includes two other Tier 1 projects with recent LPA recommendations: the 82nd Avenue Transit Project and the Montgomery Park Streetcar Project.

If Council does not endorse the Steering Committee LPA recommendation the committee would need to restart to discuss changes, and all local jurisdictions would have to amend their endorsements of the LPA.

RECOMMENDED ACTION

Approve Resolution No. 25-5504 as recommended by MPAC and JPACT. Approval of the resolution endorses the Locally Preferred Alternative recommended by the TV Highway Transit Project Steering Committee and endorsed by the project partners, including TriMet, Beaverton, Cornelius, Forest Grove, Hillsboro, ODOT, and Washington County.

STRATEGIC CONTEXT & FRAMING COUNCIL DISCUSSION

The TV Highway Transit and Safety Project LPA is a collaboration between Metro, community organizations, and jurisdictional partners to implement regional priorities articulated in Metro's guiding policy plans including the 2023 Regional Transportation Plan. Corridor planning is central to Metro's core mission to expand transportation options and improve public transit service throughout the region. The LPA advances Metro's Strategic Framework by connecting regional and town centers with faster more reliable transit and safer and more comfortable pedestrian facilities. The project advances multiple objectives by promoting walkable communities; access to community places; transportation choices including active transportation and better access to transit; access to jobs; regional mobility; and safety.

KNOWN OPPOSITION

Public input and partner endorsements demonstrate support for this LPA. There is no known opposition.

The TV Highway Transit and Safety Project is supported by agencies partners, local jurisdictions, and community-based organizations throughout the corridor and across the region. Metro's agency partners on this work include TriMet, ODOT, Washington County, the Cities of Beaverton, Cornelius, Forest Grove, and Hillsboro. The project is also supported by community-based organizations including Adelante Mujeres, APANO, Centro Cultural, and Unite Oregon, as well as the TV Highway Equity Coalition.

Project engagement as well as past planning efforts in the corridor indicate that community members support the project purpose of bringing safer, more reliable, faster, and accessible transit to the TV Highway Corridor.

ANTICIPATED EFFECTS

Adoption of this resolution will allow project staff to continue working with TriMet and project partners to:

- Amend the 2023 RTP to reflect the LPA and a high-level funding plan
- Pursue federal funding
- Complete federally-required National Environmental Policy Act (NEPA) documentation
- Refine design and costing
- Coordinate with local agencies on construction and design for improvements along TV Highway
- Support the implementation and construction of the project
- Open a new FX bus line along Tualatin Vally Highway in 2030

The project is currently in the 2023 RTP. However, the 2023 RTP needs to be amended to reflect the recommended mode, route, and general station locations and a high-level funding plan.

Budget Impacts: Adoption of this resolution has no budget impact at this time. There will be future costs associated with implementation of the project. These costs will be shared by local, regional, state and federal partners.

LEGAL ANTECEDENTS

Federal laws and actions

- National Environmental Policy Act
- Clean Air Act, as amended [42 U.S. C. 7401 and 23 U.S.C. 109(j)], as amended]

17	of the transportation system to identify needs and improvements for all modes of transportation;		
18	and		
19	It appearing to the Board, the 2018 Regional Transportation Plan (RTP), and the 2018		
20	Regional Transit Strategy both identified the TV Highway corridor as a key area for major transit		

investment in infrastructure; and

It appearing to the Board, the 2019 Moving Forward TV Highway Plan was a multi-agency study to determine the nature and feasibility of HCT in the TV Highway corridor between SW 160th Avenue and Cornelius Pass Road; and

It appearing to the Board, the 2023 RTP identified the TV Highway Transit Project as a major HCT investment included in the 2030 Near-Term Constrained Project List; and that the 2023 High Capacity Transit Update identified TV Highway as a Tier 1 corridor, the top level of regional prioritization for advancing in the near term; and

It appearing to the Board, the Federal Transit Administration (FTA) awarded Metro a Helping Obtain Prosperity for Everyone (HOPE) grant in 2020 to fund the TV Highway Transit project; and that the grant supported initial planning, engineering and development of the Chapter 53 of Title 49-eligible transit components needed to complete a full capital program of improvements for the TV Highway Corridor and accelerate the implementation of much needed infrastructure investments to enhance the speed, reliability and access to transit services in an area that greatly benefits communities within areas of persistent poverty; and

It appearing to the Board, in January 2022 Metro and TriMet convened a Steering Committee for the TV Highway Transit and Safety Project, consisting of elected officials, agency leaders, and community representatives; and that the committee was charged with developing and recommending a Locally Preferred Alternative (LPA) and funding strategy for high capacity transit on TV Highway; and

It appearing to the Board, in June 2023 a community-led effort identified actions that nonprofit, government and private sector partners can each take to stabilize and support communities throughout the TV Highway corridor; and that the effort was developed in parallel with the TV Highway Transit and Safety Project and identified bus rapid transit in the corridor as a community priority action; and that the actions identified through this effort are being implemented by community partners with support from a Metro 2040 Planning and Development Grant; and

It appearing to the Board, that Metro and TriMet collaborated on Phase 1 of the Project, as set forth in the Intergovernmental Agreement identified as Metro IGA No. 967638; that Phase 1 focused on reaching regional agreement on the recommended mode, alignment, and general station locations of the future high-capacity transit service; and that Phase 1 concluded with the Steering Committee's unanimous recommendation of the LPA in February 2025; and

It appearing to the Board, the TV Highway Transit and Safety Project Steering Committee met numerous times, heard public input and testimony, and made recommendations for an LPA on February 13, 2025 as described in the attached Exhibit A description, including the mode of transportation, alignment, and general station locations; and

It appearing to the Board, the Project Steering Committee defined the LPA Project route between Beaverton, in the east, and Forest Grove in the west, as shown on the attached Exhibit B map and generally described herein as:

From the Beaverton Transit Center along TV Highway to the Hillsboro Transit Center;

	Continuing west along IV Highway to the City of Cornellus; and
2	Continuing west to terminate in the City of Forest Grove at 19th Avenue and B Street; and
3	It appearing to the Board, the TV Highway Transit and Safety Project is a partnership
4	between Metro, TriMet, ODOT, Washington County, and the cities of Forest Grove, Cornelius,
5	Hillsboro, and Beaverton; and
6	It appearing to the Board, a public demonstration of local support for the Project LPA by
7	TriMet, Metro, and the collaborating local jurisdictions is essential to advance Project
8	Development and funding from the Federal Transit Administration (FTA); and
9	It appearing to the Board, the Board's endorsement of the LPA as described in this
10	Resolution and in the attached Exhibit A description and Exhibit B map would allow the TriMet
11	Board to endorse the LPA, further allowing Metro to amend the Regional Transportation Plan to
12	include the Project; now therefore it is
13	RESOLVED AND ORDERED that the Board of County Commissioners endorses the Steering
14	Committee's recommended TV Highway Transit and Safety Project Locally Preferred Alternative
15	as described and depicted in Exhibits A and B attached hereto.

RESOLUTION NO. 2025-16

A RESOLUTION OF THE CORNELIUS CITY COUNCIL AFFIRIMING THE TUALATIN VALLEY HIGHWAY TRANSIT AND SAFETY PROJECT LOCALLY PREFERRED ALIGNMENT

WHEREAS, the 2009 High-Capacity Transit System Plan identified TV Highway between Beaverton and Hillsboro as a Next Phase Regional Priority HCT Corridor and TV Highway between Hillsboro and Forest Gove as a Developing Regional Priority HCT Corridor; and

WHEREAS, the 2013 Tualatin Valley Highway Corridor Plan (TVCP), was a "mobility corridor refinement" plan for a portion of the Beaverton to Forest Grove mobility corridor between Cedar Hills Boulevard (Beaverton Regional Center) and SE 10th Avenue/Maple Street (Hillsboro Regional Center). The TVCP was a joint effort between ODOT, Metro, the City of Hillsboro, the City of Beaverton and Washington County that focused an examination of the transportation system to identify needs and improvements for all modes of transportation; and

WHEREAS, the 2018 Regional Transportation Plan, and the 2018 Regional Transit Strategy both identify the Tualatin Valley Highway corridor as a key area for major transit investment in infrastructure; and

WHEREAS, the 2019 Moving Forward TV Highway Plan is a multi-agency study to determine nature and feasibility of High-Capacity Transit (HCT) in the Tualatin Valley Highway corridor between SW 160th Ave and Cornelius Pass Road; and

WHEREAS, the 2023 Regional Transportation Plan (RTP) identified the TV Highway Transit Project as a major high-capacity transit investment included in the 2030 Near-Term Constrained Project List. The 2023 High-Capacity Transit Update identified TV Highway as a Tier 1 corridor, the top level of regional prioritization for advancing in the near-term; and

WHEREAS, the Federal Transit Administration (FTA) awarded Metro a HOPE grant in 2020 to fund this project. The grant supported initial planning, engineering and development of the Chapter 53 of Title 49 eligible transit components needed to complete a full capital program of improvements for the TV Highway Corridor and accelerate the implementation of much needed infrastructure investments to enhance the speed, reliability and access to transit services in an area that greatly benefits communities within areas of persistent poverty; and

WHEREAS, in January 2022 Metro and TriMet convened a Steering Committee for the TV Highway Transit and Safety Project, consisting of agency leaders, elected officials, and community representatives. The committee was charged with recommending a Locally Preferred Alternative and funding strategy for high-capacity transit on TV Highway; and

WHEREAS, in June 2023 a community-led effort identified actions that nonprofit, government and private sector partners can each take to stabilize and support community throughout the TV Highway corridor. The effort was developed in parallel with the TV Highway Transit & Safety City of Cornelius

Resolution No 2025-16 TV HIGHWAY TRANSIT AND SAFETY PROJECT LOCALLY PREFERRED ALTERNATIVE ENDORSEMENT

Project identified bus rapid transit in the corridor as a community priority action. The actions identified through this effort are being implemented by community partners with support from a Metro 2040 Planning and Development Grant; and

WHEREAS, Metro and TriMet collaborated on Phase 1 of the Project, as set forth in the Intergovernmental Agreement identified as Metro IGA No. 967638. Phase 1 focused on reaching regional agreement on the recommended mode, alignment, and general station locations of the future high-capacity transit service. It concluded with the Steering Committee's unanimous recommendation of the Locally Preferred Alternative (LPA) in February 2025; and

WHEREAS, the TV Highway Transit and Safety Project is a partnership among Metro, TriMet, ODOT, Washington County, Forest Grove, Cornelius, Hillsboro, and Beaverton; and

WHEREAS, the TV Highway Transit & Safety Project Steering Committee met numerous times, heard public input and testimony, and made recommendations for a Locally Preferred Alternative (LPA) (Exhibit A) on February 14, 2025, including the mode of transportation, alignment, and general station locations; and

WHEREAS, the Project Steering Committee defined the Locally Preferred Alternative (LPA) Project route between the Beaverton, in the east, and Forest Grove in the west, as shown on the attached Exhibit B map and generally described herein as:

- From the Beaverton Transit Center along the TV Highway to the Hillsboro Transit Center,
- Continuing west along the TV Highway to the City of Cornelius, and
- Continuing west to terminate in the City of Forest Grove at 19th Avenue and B Street; and

WHEREAS, a public demonstration of local support for the Project LPA by TriMet, Metro, and collaborating local jurisdictions is essential to advance Project Development and funding from the Federal Transit Administration (FTA); and

WHEREAS, the Council's endorsement of the LPA as described in this Resolution and the attached Exhibit B map would allow the TriMet Board to endorse the LPA, further allowing Metro to amend the Regional Transportation Plan to include the Project;

NOW, THEREFORE, THE CITY OF CORNELIUS RESOLVES AS FOLLOWS:

- Section 1. The Cornelius City Council endorses the Steering Committee's TV Highway Transit and Safety Project Locally Preferred Alternative as shown on Exhibits A and B.
- Section 2. This resolution is effective immediately upon its enactment by the City Council.

INTRODUCED AND APPROVED by the Cornelius City Council at their regular meeting this 5th day of May, 2025.

City of Cornelius, Oregon

By: Jeffrey C. Dalin, Mayor

Attest: Rachael Bateman, City Recorder

[Placeholder for Attachment 1d: City of Forest Grove Resolution No. 2025-17]

RESOLUTION NO. 4912

A RESOLUTION ENDORSING THE TV HIGHWAY TRANSIT & SAFETY PROJECT STEERING COMMITTEE'S LOCALLY PREFERRED ALTERNATIVE FOR THE TUALATIN VALLEY HIGHWAY BUS RAPID TRANSIT PROJECT

RECITALS:

- A. The 2009 High Capacity Transit System Plan identified TV Highway between Beaverton and Hillsboro as a Next Phase Regional Priority HCT Corridor and TV Highway between Hillsboro and Forest Gove as a Developing Regional Priority HCT Corridor.
- B. The 2013 Tualatin Valley Highway Corridor Plan (TVCP), was a "mobility corridor refinement" plan for a portion of the Beaverton to Forest Grove mobility corridor between Cedar Hills Boulevard (Beaverton Regional Center) and SE 10th Avenue/Maple Street (Hillsboro Regional Center). The TVCP was a joint effort between ODOT, Metro, the City of Hillsboro, the City of Beaverton and Washington County that focused an examination of the transportation system to identify needs and improvements for all modes of transportation.
- C. The 2018 Regional Transportation Plan, and the 2018 Regional Transit Strategy both identify the Tualatin Valley Highway corridor as a key area for major transit investment in infrastructure.
- D. The 2019 Moving Forward TV Highway Plan is a multi-agency study to determine nature and feasibility of High Capacity Transit (HCT) in the Tualatin Valley Highway corridor between SW 160th Ave and Cornelius Pass Road.
- E. The 2023 Regional Transportation Plan (RTP) identified the TV Highway Transit Project as a major high-capacity transit investment included in the 2030 Near-Term Constrained Project List. The 2023 High Capacity Transit Update identified TV Highway as a Tier 1 corridor, the top level of regional prioritization for advancing in the near-term.
- F. The Federal Transit Administration (FTA) awarded Metro a HOPE grant in 2020 to fund this project. The grant supported initial planning, engineering and development of the Chapter 53 of Title 49 eligible transit components needed to complete a full capital program of improvements for the TV Highway Corridor and accelerate the implementation of much needed infrastructure investments to enhance the speed, reliability and access to transit services in an area that greatly benefits communities within areas of persistent poverty.
- G. In January 2022 Metro and TriMet convened a Steering Committee for the TV Highway Transit and Safety Project, consisting of agency leaders, elected officials, and community representatives. The committee was charged with recommending a Locally Preferred Alternative and funding strategy for high-capacity transit on TV Highway.
- H. In June 2023 a community-led effort identified actions that nonprofit, government and private sector partners can each take to stabilize and support community throughout the TV Highway corridor. The effort was developed in parallel with the TV Highway Transit & Safety Project identified bus rapid transit in the corridor as a community priority action. The actions identified through this effort are being implemented by community partners with support from a Metro 2040 Planning and Development Grant.
- I. Metro and TriMet collaborated on Phase 1 of the Project, as set forth in the Intergovernmental Agreement identified as Metro IGA No. 967638. Phase 1 focused on reaching regional agreement on the recommended mode, alignment, and general station locations of the future high-capacity transit service. It concluded with the Steering Committee's unanimous recommendation of the Locally Preferred Alternative (LPA) in February 2025.

- J. The TV Highway Transit and Safety Project is a partnership among Metro, TriMet, ODOT, Washington County, Forest Grove, Cornelius, Hillsboro, and Beaverton.
- K. The TV Highway Transit & Safety Project Steering Committee met numerous times, heard public input and testimony, and made recommendations for a Locally Preferred Alternative (LPA) on February 14, 2025, including the mode of transportation, alignment, and general station locations.
- L. The Project Steering Committee defined the Locally Preferred Alternative (LPA) Project route between the Beaverton, in the east, and Forest Grove in the west, as shown on the attached Exhibit B map and generally described as:
 - From the Beaverton Transit Center along the TV Highway to the Hillsboro Transit Center.
 - Continuing west along the TV Highway to the City of Cornelius, and
 - Continuing west to terminate in the City of Forest Grove at 19th Avenue and B Street.
- M. A public demonstration of local support for the Project LPA by TriMet, Metro, and collaborating local jurisdictions is essential to advance Project Development and funding from the Federal Transit Administration (FTA).
- N. The Council's endorsement of the LPA as described in this Resolution and the attached Exhibit A description would allow the TriMet Board to endorse the LPA, further allowing Metro to amend the Regional Transportation Plan to include the Project.

BE IT RESOLVED BY THE COUNCIL OF THE CITY OF BEAVERTON, OREGON:

Section 1. Endorsement. The Council endorses the Locally Preferred Alternative adopted by the TV Highway Steering Committee on February 13, 2025, and approved by the Council at its April 1, 2025, Work Session.

Section 2. Effective Date. This resolution takes effect immediately upon its passage.

Adopted by the Council this 27 th day, May 2025.						
Signed by the Mayor this 28 th day of May, 2025.

RESOLUTION NO. 25-05-25

RESOLUTION NO. 25-05-25 OF THE TRI-COUNTY METROPOLITAN TRANSPORTATION DISTRICT OF OREGON (TRIMET) RECOMMENDING THAT THE METRO COUNCIL ADOPT THE LOCALLY PREFERRED ALTERNATIVE FOR THE TUALATIN VALLEY HIGHWAY TRANSIT AND SAFETY PROJECT AS PART OF THE REGIONAL TRANSPORTATION PLAN

- **WHEREAS**, TriMet has authority under ORS Chapter 267 to plan, construct and operate the mass transit system within the TriMet District; and
- **WHEREAS**, the 2009 High Capacity Transit System Plan identified the section of the Tualatin Valley Highway (TV Highway) between Beaverton and Hillsboro as a Next Phase Regional Priority High Capacity Transit Corridor, and the section between Hillsboro and Forest Gove as a Developing Regional Priority High Capacity Transit Corridor; and
- **WHEREAS**, the 2013 Tualatin Valley Highway Corridor Plan, a joint effort among ODOT, Metro, Washington County and the cities of Hillsboro and Beaverton, examined the transportation system between Beaverton and Hillsboro to identify improvements for all modes of transportation along the TV Highway; and
- **WHEREAS**, the 2018 Regional Transportation Plan and the Regional Transit Strategy identify the TV Highway Corridor as a key area for major transit infrastructure investment; and
- **WHEREAS**, the 2019 Moving Forward TV Highway Plan evaluated the feasibility of High Capacity Transit along a portion of the TV Highway from SW 160th Avenue to Cornelius Pass Road, between Beaverton and Hillsboro; and
- **WHEREAS**, in 2020, the Federal Transit Administration (FTA) awarded a HOPE grant to Metro to support initial planning, engineering and development of capital improvements for the TV Highway Transit and Safety Project (Project); and
- WHEREAS, the HOPE grant accelerated the investment in infrastructure necessary to enhance the speed, reliability, and access to transit services to benefit communities of persistent poverty within the Project area; and
- **WHEREAS**, development of the Project is a collaborative effort among ODOT, Metro, TriMet, Washington County, Beaverton, Hillsboro, Cornelius, and Forest Grove; and
- **WHEREAS**, Metro and TriMet developed initial recommendations on the mode, alignment, and general station locations of future High Capacity Transit service within the Project; and
- WHEREAS, in January 2022, Metro and TriMet convened a Project Steering Committee consisting of elected officials, agency leaders, and community representatives, and charged it with recommending a funding strategy and a Locally Preferred Alternative (LPA) for the Project; and
- **WHEREAS**, the 2023 High Capacity Transit Update designated the TV Highway as a Tier 1 corridor, the top level of regional prioritization for near term advancement; and

WHEREAS, Metro's 2023 Regional Transportation Plan identified the Project as a major High Capacity Transit investment and included it in the 2030 Near Term Constrained Project List; and

WHEREAS, a June 2023 community-led effort proposed actions that nonprofit organizations, the private sector, and government entities could take to stabilize and support communities along the TV Highway Corridor, and recognized Bus Rapid Transit as a high priority community action; and

WHEREAS, on February 13, 2025, after conducting numerous meetings, receiving substantial and significant public comment and evaluating various recommendations, the Project Steering Committee defined the LPA route as beginning at the Beaverton Transit Center and terminating at 19th Avenue and B Street in Forest Grove, as described in the attached Exhibit A Description and Exhibit B Map; and

WHEREAS, demonstrations of local public support for the Project LPA through the adoption of similar Resolutions by the collaborating local jurisdictions are essential to advance Project Development and funding from the Federal Transit Administration (FTA); and

WHEREAS, the Board's adoption of the LPA as described in this Resolution would allow Metro to amend the Regional Transportation Plan to include the Project;

NOW, THEREFORE, BE IT RESOLVED:

1. That the Board hereby recommends that the Metro Council adopt the Locally Preferred Alternative for the Tualatin Valley Highway Transit and Safety Project, as described herein and on the attached Exhibit A Description and Exhibit B Map, as part of the Regional Transportation Plan.

Dated: May 28, 2025

TV Highway Transit and Safety Project

Fall 2024 Engagement

1. Engagement Summary

1.1. Report Purpose

In September and October 2024, the project team conducted various public engagement efforts to seek community feedback on proposed station locations, gauge community support for proposed investments, and allow space for open-ended comments. A variety of methods were used to ensure broad participation across different jurisdictions and groups.

1.2. Community Survey

The community survey was the main vehicle for receiving feedback and input during this outreach phase, and other activities described here supported and drove traffic to this tool. Between September 10 and October 13, 2024, the project team conducted an online survey to gather community input on proposed investments for the TV Highway Transit Project. More than 1,000 responses were submitted. The survey was available in English, Spanish, and Vietnamese and enabled individuals with access needs to participate by contacting the project team for assistance. It was promoted through various channels, including signage at Line 57 bus stops, flyer distribution at community destinations along the corridor, social media outreach, and onboard surveyors who engaged directly with Line 57 riders. Most of these promotional materials were provided in both English and Spanish and included QR code links to the online survey. A project StoryMap site complemented the survey, offering comprehensive details on the project's background, purpose, proposed improvements, and next steps. While the online survey received over 1000 responses from community members throughout the TV Highway corridor, this is not a representative sample of the population. Additionally, results reported in this summary are those that can be stated with confidence given the margin of error based on sample size.

1.3. In-Person Events

The project team attended six in-person events during the outreach period to share project information and promote the online survey. These events included El Grito in Hillsboro, the Aloha Community Farmers' Market, the Forest Grove Corn Roast, the Cornelius Farmers Market, the Hillsboro Farmers' Market, and the Beaverton Farmers Market. During these events, project team staff interacted with approximately 320 community members. Project staff provided tablets for individuals who opted to complete the survey at that time.

- El Grito: Saturday, September 14, 2024
- Aloha Community Farmers' Market: Thursday, September 19, 2024
- Forest Grove Corn Roast: Saturday, September 21, 2024
- Cornelius Farmers Market: Friday, September 27, 2024
- Hillsboro Farmers' Market: Saturday, September 28, 2024
- <u>Beaverton Farmers Market</u>: Saturday, October 5, 2024

1.4. Presentations to Community Groups

The project team engaged with various neighborhood and community organizations to inform residents about the project and promote the online survey. These included the Central Beaverton Neighborhood Association Committee (NAC), the TV Highway Equity Coalition, West Beaverton NAC, and Washington County Community Planning Organization (CPO) 6.

Members of these community groups generally expressed support for the project and the potential to bring safety improvements to TV Highway. Pedestrian safety and personal security concerns were common themes. Many people mentioned reliability issues with the Line 57 and were excited that Frequent Express (FX) service would result in faster, more frequent, and more reliable bus service. The project team heard mixed feedback regarding station spacing and stop consolidation, as some people said there are too many proposed stations while others were concerned about stop removal.

2. 2024 Community Survey

2.1. Survey Questions Overview

The online survey began with a description of the TV Highway Transit Project and the improvements that would come with Frequent Express (FX) bus service on TV Highway. Participants were asked a series of questions about their travel patterns and behavior: where they live, why they come to TV Highway, how they travel on or near TV Highway, and how frequently they ride Line 57.

The next section of the survey focused on station locations. It provided an overview of how the proposed station locations were determined and described the types of station amenities that the project would provide. Participants were then prompted to select one of the five corridor segments (Forest Grove, Cornelius, Hillsboro, Aloha, or Beaverton) and were shown a map of the proposed stations in that area. Respondents could provide feedback about as many of the five segments as they wished. After selecting a corridor segment, participants were asked to rate how well the proposed station locations meet their travel needs on a scale of 1 (not very well at all) to 5 (very well).

Those who responded with a 4 or 5 were asked why the proposed station locations meet their travel needs, choosing from the following options and selecting all that apply:

- Stations are at or near enough locations I need to go
- I will more easily be able to access stations with new crossings and sidewalks
- Stations will be more comfortable to wait for the bus
- Other (please describe)

Those who responded with a 1 or 2 were asked why the proposed station locations do not meet their travel needs, choosing from the following options and selecting all that apply:

- They are too far for me to get to
- My routes to the proposed stations include missing or unsafe sidewalks
- My routes to the proposed stations include unsafe street crossings
- Other (please describe)

Respondents who selected the Cornelius corridor segment were also asked which of the three current bus stops in downtown Cornelius they considered most important. They were then invited to choose one from the three options: 10th Avenue, 12th Avenue, and 14th Avenue.

Respondents had the option to provide additional open-ended comments about the proposed station locations within any of the five corridor segments. The survey concluded with an open-ended question in which participants could share any additional feedback they had regarding the transit project.

The final section of the survey consisted of optional demographic questions designed to collect additional information about the respondents and provide valuable context for the survey data, as described in the Demographic Results section below.

2.2. Survey Results

2.2.1. Travel Patterns and Behavior

Survey participants were asked why they come to TV Highway and to select their reasons for traveling there. 99% of respondents gave at least one answer to this question (1040 of 1048). Survey participants indicated that they primarily travel to TV Highway for work, groceries, and shopping for other essential goods. Many visit the corridor for leisure activities, including retail shopping (46 percent) and entertainment (36 percent). 39 percent reported traveling to TV Highway to connect to bus, MAX, airport, or other transit routes or services (see Table 1).

Table 1. Respondents' reason for travel on TV Highway

Why do you come to TV Highway? (select all that apply)						
Reason for travel # of respondents % of respondents						
Work	597	57%				
Grocery stores or essential shopping	580	55%				
Retail (not grocery)	482	46%				
Transit transfers	409	39%				
Entertainment	382	36%				
Visting family or friends	338	32%				
Public recreation areas	283	27%				
Healthcare services	279	27%				
Education	125	12%				
Religious services	98	9%				
Other	83	8%				
No answer	7	1%				

Most respondents travel on and near TV Highway using public transit (76 percent), followed by walking and rolling (42 percent). Other common travel modes include driving alone (26 percent) and driving with others (22 percent) (see Table 2).

Table 2. Travel modes among respondents

How do you travel on and near TV Highway? (select all that apply)				
Mode type	# of respondents	% of respondents		
Public transit	794	76%		
Walking and rolling	445	42%		
Driving alone	275	26%		
Driving with someone else	227	22%		
Bicycle	115	11%		
Ride-hailing services	100	10%		
Scooter	21	2%		
Other mode of transportation	17	2%		
No response	11	1%		

The majority of respondents (58 percent) reported using transit several times a week or more. Within this group, 38 percent are frequent riders who use transit almost every day, while 20 percent are regular riders who use transit several times a week. Only 6 percent of all respondents indicated that they do not use transit (see Table 3).

Table 3. Transit ridership among all respondents

Which category best indicates how often you rode the Line 57 in the past six months?					
Mode Type	# of respondents	% of respondents			
Frequent rider (I ride almost every day)	403	38%			
Regular rider (I ride several times a week)	214	20%			
Occasional rider (I ride several times a month)	188	18%			
Infrequent rider (I ride less than once a month)	141	13%			
Non-rider (I don't ride TriMet)	65	6%			
Prefer not to answer	37	4%			

2.2.2. Responses by Jurisdiction

The number of participants from each jurisdiction generally reflected the population size of that area. The most populated jurisdictions – Hillsboro, Beaverton and Forest Grove – each had the highest levels of participation. When asked about their place of residence, 29 percent of participants reported living in Hillsboro, 25 percent in Beaverton, 14 percent in Forest Grove, 12 percent in Aloha, 8 percent in Cornelius, and 4 percent in unincorporated Washington County. 8 percent of respondents reported they live elsewhere (See Table 5).

Table 5. Place of Residence among Respondents

Where do you live?					
Jurisdiction/Area # of respondents % of respondents					
Aloha	124	12%			
Beaverton	265	25%			
Cornelius	81	8%			
Forest Grove	151	14%			
Hillsboro	300	29%			
Unincorporated Washinton County	45	4%			
None of these	82	8%			

Survey participants had the opportunity to select each of the five corridor segments and provide feedback on the proposed station locations within them. The proposed stations within each corridor segment are listed in Table 6.

Table 6. Proposed Station Locations

2.2.2.1. Beaverton

The proposed station locations within the Beaverton segment received an average rating of 4.1 out of 5. A large majority of those who responded positively noted that the proposed stations were well-spaced and offered convenient access to their destinations (see Table 7). Many also supported the proposed improvements to stations, believing they would make waiting for the bus more comfortable. Additionally, respondents expressed that the new crossings and sidewalks would enhance accessibility to stations.

Respondents submitted 18 open-ended comments about the proposed stations in Beaverton. The majority expressed support for faster travel times and better connections around Beaverton and Hillsboro. Two comments raised concerns about stop consolidation, highlighting the challenges that greater distances between stops might pose for people with disabilities. Two respondents requested that three current Line 57 bus stops – Millikan, 178th, and 185th – remain in the transit project. At the time this summary report was produced, all three locations were included in the proposed station map.

In total, 265 Beaverton residents participated in the survey, including 106 frequent riders and 52 regular riders.

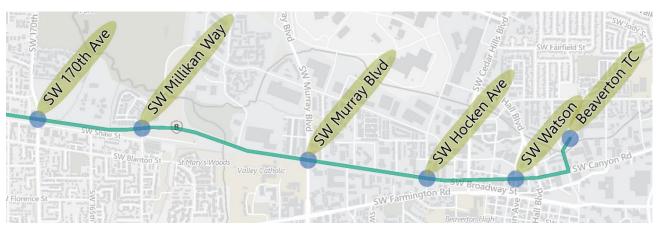

Table 7. Feedback on Station Locations in Beaverton

Station Location Feedback (Beaverton)					
"Stations are too far apart"	"Stations have unsafe crossings"	"Stations have missing or unsafe sidewalks"	"Stations are near enough"	"Stations will offer more comfort"	"Enhanced access with upgraded crossings and sidewalks"
26	10	12	209	156	122

2.2.2.2. Aloha and Unincorporated Washington County

The proposed station locations within Aloha and Unincorporated Washington County had the highest rating among all corridor segments, with an average score of 4.2. Most participants indicated that the stations were well-spaced (see Table 8). Many others noted that the station improvements would increase comfort and upgrades to sidewalks and crossing would enhance their access to stations.

There were 18 open-ended comments about the stations in this area, all of which focused on Aloha. The majority expressed support for the project and excitement about the improvements to travel time, reliability, and bus stations. Only 1 comment raised concern about stop consolidation, noting its potential impact on senior riders and those with disabilities.

A total of 169 residents in unincorporated Washington County, including Aloha, participated in the survey. 58 were frequent riders and 32 were regular riders

Figure 2. Proposed Station Locations in Aloha County and Unincorporated Washington County

"Stations are to far apart"	"Stations have unsafe crossings"	"Stations have missing or unsafe sidewalks"	"Stations are near enough"	"Stations will offer more comfort"	"Enhanced access with upgraded crossings and sidewalks"
10	6	5	153	103	92

2.2.2.3. Hillsboro

The proposed stations in Hillsboro earned an average rating of 4.1. A large majority of respondents supported the location and spacing of stations, as well as the planned improvements to stations (see Table 9). Only 17 respondents felt that the stations in Hillsboro were too far apart.

40 open-ended comments were submitted about the Hillsboro stations. Most raised concerns about equity, safety, access to transit and community destinations, and stop consolidation. Several comments specifically mentioned the need for improved access to retail and grocery stores, schools, and health clinics. Four of the comments were supportive of the new station platforms that would improve accessibility for people with disabilities. Others noted that there were not enough proposed stops in Hillsboro overall, or that all stops were spaced too far apart. Comments from frequent and regular riders were particularly focused on ensuring that the proposed stops would improve general access to other transit lines and community destinations.

300 Hillsboro residents participated in the survey, including 117 frequent riders and 67 regular riders.

Figure 3. Proposed Station Locations in Hillsboro

Table 9. Feedback on Station Locations in Hillsboro

"Stations are too far apart"	"Stations have unsafe crossings"	"Stations have missing or unsafe sidewalks"	"Stations are near enough"	"Stations will offer more comfort"	"Enhanced access with upgraded crossings and sidewalks"
16	6	9	272	191	169

2.2.2.4. Cornelius

The proposed stations in Cornelius received an average score of 4, the lowest rating among all corridor segments. 103 respondents were supportive of the station spacing, while only 6 indicated that the stations were too far apart (see Table 10). Additionally, only 5 respondents reported concerns about pedestrian facilities at or near the proposed stops. This was also the only segment of the corridor where stop consolidation was more obvious because of needing to ask for further detail about downtown locations.

There were 18 open-ended comments submitted in this section. Most comments highlighted the need for better access to grocery and retail stores at these locations, while one-third focused on specific intersections, including NW 331st Avenue, NW 336th Avenue, 20th Avenue and 26th Avenue. 3 comments mentioned that the proposed stops were too close together, while 2 suggested they were too far apart.

A total of 158 respondents answered the question about their preferred station between 10th, 12th, and 14th Avenue in central Cornelius. Among all respondents, 12th avenue was the preferred stop, followed by 10th Avenue and 14th Avenue (see Table 11).

There were 8 open-ended comments about the downtown Cornelius station locations. Most comments favored 14th Avenue and 10th Avenue. Those who preferred 14th Avenue appreciated its proximity to the Cornelius Library. None of the open-ended comments came from regular or frequent riders.

81 Cornelius residents participated in the overall survey, including 38 frequent riders and 15 regular riders.

39% (61 votes) 39% (62 votes) 22% (35 votes)					

2.2.2.5. Forest Grove

The proposed stations in Forest Grove received an average rating of 4.1. A large majority of the feedback about the stations was positive. The biggest concern among those who rated the stops poorly was that the stations were too far apart (see Table 12).

There were 22 open-ended comments submitted about these station locations. Most wished to see better transit connections throughout Forest Grove, particularly to retail destinations, medical clinics, and downtown. Many were supportive of consolidating bus stops, noting it would improve frequency and reliability.

151 total survey respondents lived in Forest Grove. Among them, 68 were frequent riders and 34 were regular riders.

15	4	7	133	82	68

3. Open-ended Comments

The online survey received a total of 266 open-ended comments. These responses touched on a wide range of topics related to the priorities and interests of community members throughout the TV Highway Corridor. The most prominent themes include comments related to bus service operations (29% of open-ended comments), support for the TV Highway Transit Project (27%), and bus stop amenities (19%) (see Table 14. Note: comments were coded for one or more themes as appropriate). A total of 45 open-ended comments were submitted in Spanish, while all other comments were in English (Table 13).

3.1. Bicycle and Pedestrian Safety

Safety for pedestrians and cyclists was a major concern, mentioned in 55 comments (See Table 15 & 16). The top priorities for improving safety were better sidewalks and protected bike lanes. Additional suggestions for improving safety included:

- Better lighting to enhance visibility at night
- Wider sidewalks to accommodate more pedestrians
- Safe access to transit stations through infrastructure investments and dedicated walking and biking routes.

Respondents also emphasized the importance of creating continuous protected bike lanes throughout the entire corridor, addressing gaps in sidewalks, and providing safe crossings at railroad tracks. Below are some comments we received:

- "I walk TV Hwy a lot. And I have seen very often people having to access bus stops on the south (eastbound) side in unsafe ways...I always pray when I see pedestrians trying to cross TV Hwy."
- "Some of the changes would increase walk time, but if there's a safe place to walk and to cross at all stations, that is good enough."
- "FX, dedicated protected bike lanes, and safety features to help disincentivize unsafe driving will go a long way to build a new road that works for everyone."

3.2. Bus Frequency and Reliability

Just over one quarter of all open-ended responses (26 percent) addressed various aspects of bus service operations, such as service hours, frequency, speed, and reliability. Out of the 69 total comments about bus frequency and reliability, 22 specifically requested extended service hours, including early morning, latenight, and 24-hour options (See Table 17). Many commenters expressed enthusiasm for improving bus frequency, reliability, and speed along TV Highway. While many others also voiced frustrations about late or delayed buses, calling for greater reliability to support timely commutes and transit connections. Extending service hours is outside the scope of discussions for this project, but the input has been shared with TriMet's service planning team. Frequency, reliability and speed are service elements that would be addressed by this project.

The following comments summarize some of the opinions expressed:

- "They need more 57 buses in the evening, it can get overcrowded easily."
- "Having buses run more frequently and also have more room for them will help tremendously with being able to get to work on time easier even when it gets busy."

3.3. Bus and Station Amenities

Nearly 20 percent of all comments (51) emphasized the need to improve amenities at bus stations. Commenters expressed strong interest in improving bus shelters, lighting at and near stations, and adding more seating at stations and on buses (see Table 18). Several were eager for shelter improvements, seeing them as important for their comfort and wellness. Others highlighted safety concerns related to insufficient lighting. Calls for cleaner and better-maintained stations were also a recurring theme. Below are some of the comments received:

- "Lighting is a problem when I go out to catch the bus at 6am. No sidewalks and the buses don't always see me."
- "Shelters should be at every stop, the weather is harsh & being someone who rides due to disability I need to be able to sit down."
- "More frequent buses and shelters will better protect us from the elements. Many of us are sick, poor or injured and this will help greatly."

3.4. Personal Safety

14 commenters highlighted personal safety concerns while waiting for the bus. While many called for improved security measures, they did not explicitly share their specific concerns. Many recommended adding security personnel to stops to enhance their sense of safety (see Table 19). Below is some of the feedback we received:

- "Nice stations are great, but security is still a serious problem and the major reason I don't ride more often."
- "There are times when I have felt generally uncomfortable at these stops."
- "Place security personnel on buses and trains at night. It can be very dangerous to travel at this time."

Total comments about personal security	14	

3.5. Equity

Over half of the comments about equity focused on issues related to disability (see Table 20). Many noted the lack of sufficient seating on buses and at stations, which made riding Line 57 particularly difficult for people with disabilities. Other comments stated that faster, more reliable busses with improved station amenities will benefit seniors, low-income riders, and others who depend on transit to get around. Comments about language accessibility recommended providing more multilingual materials, including signs and emergency phones, to better serve non-English speaking riders. Below are some of the comments received:

- "More busses are needed, I'm disabled and use a walker, I'm past [sic] up due to no availability to sit"
- "Some stops I have to sit on the ground because I cannot physically stand long enough to wait for the bus."
- "I think the project is excellent since there are many people who do not have a way to get around and this would help them a lot."

4. Demographics of Survey Respondents

More than 95 percent of participants answered optional demographic questions about their race, gender, age, income, and household size. Over 70 percent of participants responded to a question about physical difficulties and 35 percent indicated they spoke a language other than English. All demographic data in this report is specific to those who participated in the TV Highway Community Survey. It is not intended to represent the demographics of the surrounding community.

4.1. Race and Language

Among those who responded to the demographic questions, 45 percent identified as white and 35 percent identified as Hispanic or Latino/a/x (see Table 21). Smaller percentages of participants identified as Asian or Asian American (6 percent), American Indian or Alaska Native (5 percent), and Black or African American (5 percent).

Most respondents reported that their primary language was English, followed by Spanish (32 percent). See Table 22.

Table 21. Race/Ethnicity

Race	# of respondents	% of respondents
White (Non-Hispanic)	471	45%
Hispanic or Latino/a/x	363	35%
Asian or Asian American	61	6%
American Indian or Alaska Native	52	5%
Black or African American	49	5%
Middle Eastern or North African	10	1%
Native Hawaiian or Pacific Islander	5

55-64	128	12%
65-74	70	7%
75+	28	3%
Prefer not to answer	30	3%

4.4. Income and Household Size

The largest group of respondents reported a total household income of less than \$30,000 (28 percent) (see Table 25). 20 percent reported household incomes between \$30,000 and \$50,000, and 9 percent reported household incomes between \$50,000 to \$70,000.

Household sizes were evenly distributed among respondents. The largest group reported living alone (29 percent), followed by two-person households (24 percent), and three to four-person households (27 percent) (see Table 26).

Table 25. Household Income

Income Range	# of respondents	% of respondents
Less than \$30,000	286	27%
\$30,000 to just under \$50,000	206	20%
\$50,000 to just under \$70,000	94	9%

3	167	16%
4	112	11%
5	63	6%
6 or more	48	5%
Prefer not to answer/ no answer	113	11%

4.5. Disability status

The following question was asked: "Do you have difficulty doing any of the following activities?" The word disability was not used in the survey. See Table 27.

Among those who responded to the demographic question about difficulty doing various activities, 20 percent reported having a walking disability, 13 had a visual impairment, and 5 percent had a hearing disability (see Table 27). 12 percent indicated they had difficulties other than the options provided.

Table 27. Demographic information on physical and other difficulties

Activity respondent has difficulty doing	# of respondents	% of respondents
Walking or climbing steps	154	15%
Seeing, even when you are wearing glasses	104	10%
Hearing, even when you are using a hearing aid	36	3%
Using fine motor skills to interact with smartphone screens	18	2%
Other difficulties	97	9%

Number of difficulties	# of respondents	% of respondents		
0	742	71%		
1	238	23%		
2	43	4%		
3	18	2%		
4	4	0%		
5 or more	3	0%		

4.6. Survey Language

The majority of respondents took the survey in English (85%), while 156 respondents (15%) used the Spanish version of the survey (see Table 28). Only 2 respondents (0.2%) opted for the Vietnamese version.

Table 28. Survey Language

Language	# of respondents	% of respondents
English	890	85%
Spanish	156	15%
Vietnamese	2	0.2%

5. Next Steps

The results of this survey will be shared with decision-makers and used to inform the next phase of design. In early 2025, the TV Highway Transit Project Steering Committee will recommend a list of general station locations that will then be approved by local jurisdictions along the TV Highway corridor. All project partners will continue working throughout 2025 to secure funding for project construction. If funding is secured, construction could start in 2027 and the new bus service could open in 2030.

BEFORE THE METRO COUNCIL

FOR THE PURPOSE OF AMENDING OR)	RESOLUTION NO. 25-5503
ADDING THREE I-5 INTERSTATE BRIDGE)	
REPLACEMENT PROGRAM PROJECTS TO)	Introduced by: Chief Operating Officer
THE 2024-27 MTIP TO MEET FEDERAL)	Marissa Madrigal in concurrence with
PROJECT DELIVERY REQUIREMENTS)	Council President Lynn Peterson
)	·

WHEREAS, the Metropolitan Transportation Improvement Program (MTIP) prioritizes projects from the Regional Transportation Plan (RTP) to receive transportation-related funding; and

WHEREAS, the U.S. Department of Transportation (USDOT) requires federal funding for transportation projects located in a metropolitan area to be programmed in an MTIP; and

WHEREAS, in July 2023, the Joint Policy Advisory Committee on Transportation (JPACT) and the Metro Council approved Resolution No. 23-5335 to adopt the 2024-27 MTIP; and

WHEREAS, the 2024-27 MTIP includes Metro approved RTP and federal performance-based programming requirements and demonstrates compliance and further progress towards achieving the RTP and federal performance targets; and

WHEREAS, pursuant to the USDOT MTIP amendment submission rules, JPACT and the Metro Council must approve any subsequent amendments to the MTIP to add new projects or substantially modify existing projects; and

WHEREAS, Interstate 5 provides a critical connection between Oregon and Washington that supports local jobs and families, and is a vital trade route for regional, national and international economies; and

WHEREAS, bridge users are impacted by heavy congestion, safety issues, limited public transit options, and inadequate active transportation facilities; and

WHEREAS, the Washington State Department of Transportation (WSDOT) and the Oregon Department of Transportation (ODOT) are working together to design, replace, and construct a new I-5 Interstate Bridge across the Columbia River; and

WHEREAS, the I-5 Interstate Bridge Replacement (IBR) Program will also include system upgrades that include reconstructed interchanges, new auxiliary lanes, active transportation upgrades, and an extension of the TriMet MAX light rail system line to Vancouver; and

WHEREAS, benefits from the new I-5 bridge are anticipated to provide earthquake resilience to the I-5 corridor, improve, safety, congestion, and reliability, improve freight movement and connections, expand transit options and alternatives to single-occupancy vehicles, plus support tens of thousands of jobs in the region; and

WHEREAS, the I-5 IBR Program's Supplemental Environmental Impact Statement is expected to receive its required Record of Decision from the Federal Highways Administration and Federal Transit Administration by early 2026 which will allow the construction phases to move forward; and

WHEREAS, the MTIP formal amendment adds new approved funding for the preliminary engineering phase, adds a new right-of-way and utility relocation phases, and new construction phases for the Columbia River Bridge Replacement package and pre-completion tolling signage project; and

WHEREAS, the IBR Program's 2023 Financial Plan estimates the total project will cost between \$5 billion to \$7.5 billion dollars; and

WHEREAS, the total amendment programming will result in three I-5 IBR projects and increase the total funding programmed from \$103,112,407 to \$2,057,861,000; and

WHEREAS, the I-5 IBR Program is will utilize bridge tolling expected to begin in 2027 to help generate required bridge revenues to cover part of the replacement bridge's costs and future maintenance funding needs; and

WHEREAS, approval for the new funding is required from the Oregon Transportation Commission (OTC) and is anticipated to occur on July 31, 2025; and

WHEREAS, the programming updates to the three projects are stated in Exhibit A to this resolution; and

WHEREAS, on July 11, 2025, Metro's Transportation Policy and Alternatives Committee recommended that JPACT approve this resolution; and

WHEREAS, on July 17, 2025, JPACT approved and recommended the Metro Council adopt this resolution; now therefore

BE IT RESOLVED that the Metro Council adopts this resolution to amend one existing and add the two new projects as stated within Exhibit A to the 2024-27 Metropolitan Transportation Improvement Program to meet federal project delivery requirements.

ADOPTED by the Metro Council this day of	2025.

Exhibit A June 2025, Formal/Full MTIP Amendment Summary Formal Amendment #: JU25-11-JUN

The June 2025 MTIP Formal Amendment contains three projects. All three are related to the I-5 Interstate Bridge Replacement (IBR) Program. The IBR Program is a bi-state initiative being delivered by ODOT and WSDOT. According to the IBR 2023 Financial Plan, the total estimate project cost is between \$5 billion to \$7.5 billion dollars. The WSDOT STIP project version is included on page 5 (ID# 400519A06) for reference.

Key 21570 is the existing MTIP and STIP project that contains a planning and preliminary engineering phase. The funding for both phases were obligated prior to the approval of the 2024-27 MTIP. The formal amendment updates PE and adds new right-of way (ROW) and utility relocation (UR) phases. The action will change the project to be an active project in the 2024-27 MTIP. The remaining two projects are new construction phase segment packages being added to the MTIP.

The new funding requires approval from the Oregon Transportation Commission (OTC). This will occur during their May and July 2025 meetings. The formal MTIP amendment is proceeding concurrently with OTC approval actions. Additional summary details are shown below for the three projects.

Key 21570 (Existing Project) - I-5: Columbia River (Interstate) Bridge (ODOT and WSDOT): This project contains the non-construction phases for the IBR Program. The Planning and initial PE phase funding was obligated prior to development of the 2024-27 MTIP. This part of the overall project has initiated planning and design and will also provide funding for the right of way, and utility relocation activities for early construction packages, as well as continuing overall program management and development work. Replacing the bridge is anticipated to improve traffic and mobility for freight and the public traveling across the river. Through the amendment Key 21570:

- Updates the Planning phase to reflect the current phase of funding obligations
- Adds \$210,720,416 of funding to continue PE.
- Adds a ROW phase with \$231,699,000 in FFY 2026.
- Adds a UR phase with \$10,000,000 in FFY 2026.

<u>Key 23876 (New Project) - I-5 OR & WA Pre-completion Tolling Signage (ODOT & WSDOT):</u> The new project will Install signage, related structures, and electrical systems in preparation of new tolling operations on and near the I-5 Interstate Bridge in Oregon and Washington. Preliminary engineering is covered within K21570 shown above. The formal amendment:

- Adds a construction phase with \$22,090,000 in funding.
- Adds an "Other" phase with \$2,500,000.
- Total project programming is \$24,590,000.
- Note: The Other phase includes project scope elements related to completing the construction phase but are not classified as construction phase scope activities and must be programmed separately from the construction phase.

<u>Key 23877 (New Project) - I-5: Columbia River Bridge Replacement (ODOT & WSDOT):</u> The new project will advance post-NEPA design and construction activities for the I-5 Interstate Bridge replacement over the Columbia River between Oregon and Washington, downstream of the existing structure. Work will support construction of two new bridges to accommodate highway, transit, and active transportation modes. The formal amendment:

- Adds a new PE phase to complete final design type actions and contains a total of \$221,797,000.
- Adds a Construction phase with \$1,256,845,000.
- Total project programming is \$1,478,642,000.

Exhibit A Table (MTIP Worksheets) follow on the next pages and contain the specific project changes for the FFY 2025 June Formal MTIP Amendment. A copy of the WSDOT project page in WSDOT's STIP also is included for reference. Additional amendment details concerning each project will be included in the Metro June TPAC and JPACT agendas.

I-5/Columbia River Interstate Bridge - Replacement

The project will update Interstate 5 with a seismically resilient replacement of the I-5 bridge over the Columbia River, connecting Vancouver, Washington to Portland, Oregon. The new bridge will include transit improvements such as additional light-rail transit service, enhanced zero-emission express bus service and the expansion of active transportation networks.

Federal discretionary funds are a FY 2023-2024 National Infrastructure Project Assistance (Mega) Program award.

See Oregon STIP Project I-5: Columbia River (Interstate) Bridge.

Summary of Amendment Changes Occurring:

The formal amendment increases the authorized funding to the preliminary engineering phase plus adds non-construction right-of-way (ROW) and utility relocation (UR) phases. Construction phases will be programmed as separate stand-alone projects based on the approved delivery schedule. OTC approval was required to approve the funding. OTC approval occurred during their May and July 2025 meetings. Separate construction phase programming and delivery segments are approved by FHWA for the I-5 IBR Program.

Project Name:	I-5: Columbia	5: Columbia River (Interstate) Bridge

Certified Agency Delivery: No			Non-Certified A	gency Delivery:	No	Delivery as Dire	ct Recipient:	YES				

Short Description:

Planning and design, right of way, and utility relocation activities for the replacement of the I-5 Interstate Bridge between Oregon and Washington. Replacing the bridge is anticipated to improve traffic and mobility for freight and the public traveling across the river.

MTIP Detailed Description (Internal Metro use only):

On I-5 across the Columbia River between Washington and Oregon impacting bridges 01377A and 07333 from MP 306.70 to MP 308.72, initiate and complete Preliminary Engineering activities including NEPA and design to determine alternatives for the replacement of the two bridges in a cooperative action with WSDOT and complete ROW plus UR to improve mobility, safety, and travel for motorists and goods movements between the two states.

STIP Description:

Planning, design, right of way, and utility relocation for the replacement of the I-5 Interstate Bridge between Oregon and Washington. Replacing the bridge is anticipated to improve traffic and mobility for freight and the public traveling across the river.

Notes:

- 1. NHPP (Y001) in PE are changed from 100% federal to 80/20% with the match from Local funds in PE.
- 2. HIP-BIP reflect federal Bridge Investment Program funds which are tied/allocated from the larger Highway Infrastructure Program. Match is from local funds.
- 3. BIP are federal Bridge Investment Program Planning category awarded funds with the match split between State and Local Funds.
- 4. Use of general Advance Construction (ADVCON) funds expands and is re-coded as general federal advance construction funds. The expected conversion code is not yet identified, but may end up being from prior awarded CDS 2024 earmark now committed to the project. See committed funding plan section for additional details.

Notes:

- 1. State match in Planning phase to the State STBG is based on a federal share of 80% with the required match at 20%
- 2. State funds cover the NHPP match requirement in PE to fund code Z0E1.
- 3. State matching funds to ADVCON in ROW are based on a 80% federal share and 20% required minimum match.

Fiscal Constraint Consistency Review

- 1. What is the source of funding? Various sources from ODOT state bonds, federal awarded funds and WSDOT state funds.
- 2. Does the amendment include changes or updates to the project funding? Yes.
- 3. Was proof-of-funding documentation provided to verify the funding change? Yes, via the May and June 2025 OTC actions.
- 4. Level of funding approval? FHWA, Oregon Legislature approval, and OTC approvals.
- 5. Has the fiscal constraint requirement been properly demonstrated and satisfied as part of the MTIP amendment? Yes.

	Last Amendment The admin mod combines the BIP Planning grant award (Key 23456) into this main I-5 IBR project, updates the committed funds, and reconciles the programming to match up with the FMIS mod report.										

RTP Air Quality Conformity a	nd Transportation Modeling Designations						
Is this a capacity enhancing or non-capacity enhancing project?	Capacity enhancing project						
Is the project exempt from a conformity determination per 40 CFR 93.126, Table 2 or 40 CFR 93.127, Table 3?	No. The project is not exempt per 40 CFR 93.126, Table 2 from air quality conformity analysis						
Exemption Reference: Not Applicable							
Was an air analysis required as part of RTP inclusion?	Yes for the 2023 RTP. Also see the Performance Assessment Evaluation (PAE) results as part of this amendment bundle						
If capacity enhancing, was transportation modeling analysis completed as part of RTP inclusion?	No. Not applicable. The project is not capacity enhancing						
RTP Constrained Project ID and Name:	RTP ID - 10866: I-5 Interstate Bridge Replacement Program						
RTP Project Description:	Replace I-5/Columbia River bridges, add auxiliary lanes and improve interchanges on I-5, extend light rail transit from Expo Center to Vancouver, WA., add protected/buffered bikeways, cycle tracks and a new trail/multiuse path or extension and implement variable rate tolling.						

Additional RTP Consistency Check Areas

- 1. Is the project designated as a Transportation Control Measure? **No**.
- 2. Is the project identified on the Congestion Management Process (CMP) plan? Yes
- 3. Is the project included as part of the approved: UPWP? No. Not applicable.
- 3a. If yes, is an amendment required to the UPWP? No.
- 3b. Can the project MTIP amendment proceed before the UPWP amendment? Yes.
- 3c. What is the UPWP category (Master Agreement, Metro funded stand-alone, Non-Metro funded Regionally Significant)? Not applicable

4. Applicable RTP Goals:

Goal # 1 - Mobility Options:

Objective 1.1 - Travel Options: Plan communities and design and manage the transportation system to increase the proportion of trips made by walking, bicycling, shared rides and use of transit, and reduce per capita vehicle miles traveled.

Goal #2 - Safer System:

Objective 2.1 - Vision Zero: Eliminate fatal and severe injury crashes for all modes of travel by 2035.

Goal #3 - Equitable Transportation:

Objective 3.2 - Eliminate barriers that people of color, low income people, youth, older adults, people with disabilities and other marginalized communities face to meeting their travel needs

Goal 4 - Thriving Economy:

Objective 4.1 - Connected Region: Focus growth and transportation investment in designated 2040 growth areas to build an integrated system of throughways, arterial streets, freight routes and intermodal facilities, transit services and bicycle and pedestrian facilities, with efficient connections between modes and communities that provide access to jobs, markets and community places within and beyond the region

5. Does the project require a special performance assessment evaluation as part of the MTIP amendment? Yes. The amendment adds implementation phases which are capacity enhancing and has a total project cost that exceeds \$100 million. A full PAE is required as part of the amendment.

Public Notification/Opportunity to Comment Consistency Requirement

- 1. Is a 30-day/opportunity to comment period required as part of the amendment? Yes.
- 2. What are the start and end dates for the comment period? Estimated to be May 14, 2025 to June 13, 2025
- 3. Was the comment period completed consistent with the Metro Public Participation Plan? Yes.
- 4. Was the comment period included on the Metro website allowing email submissions as comments? Yes.
- 5. Did the project amendment result in a significant number of comments? Comments are expected
- 6. Did the comments require a comment log and submission plus review by Metro Communications staff and to Council Office? Yes. A comment log will be established for email comment submission. Metro's Communication department will coordinate receipt, review, and evaluation of all other comments submitted

	Fund Codes References
BIP	The federal Bridge Investment Program is a competitive, discretionary program that focuses on existing bridges to reduce the overall number of bridges in poor condition, or in fair condition at risk of falling into poor condition
CDS22 or CDS24	A Congressionally Directed Spending (CDS) (or earmark) federally funded award. CDS22 refers to the award occurring from the FFY 2022 year while CDS24 indicates the award is from the FFY 2024 cycle
Advance	A funding placeholder tool. This fund management tool allows agencies to incur costs on a project and submit the full or partial amount later for
Construction	Federal reimbursement if the project is approved for funding. Advance construction can be used to fund emergency relief efforts and for any project
ADVCON	listed in the STIP, including surface transportation, interstate, bridge, and safety projects. The use of Advance Construction is normally only by the state
(AC funds)	DOT to help leverage their funding resources and keep projects on their respective delivery schedules.

AC-STBGS	Advance Construction funds being programmed with the expected later conversion code to be State STBG
HIP	Highway Infrastructure Program (HIP) funds. The funds resulting from this apportionment for (1) activities eligible under 23 U.S.C. 133(b), and to provide necessary charging infrastructure along corridor-ready or corridor-pending alternative fuel corridors designated pursuant to 23 U.S.C. 151, and (2) the bridge replacement and rehabilitation program are available for obligation until September 30, 2024. HIP funds are normally apportioned to the State DOT for their use. Under certain circumstances, a portion may be sub-allocated to the MPOs for geographic urban needs.
HIP-BIP	Federal Bridge investment Program funding that is a component of the HIP funding program
Local	General Local funds committed by the lead agency that normally cover the minimum match requirement to the federal funds
NHPP	A federal funding source (FHWA based) appropriated to the State DOT. The purposes of this program are: to provide support for the condition and performance of the National Highway System (NHS); to provide support for the construction of new facilities on the NHS; to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in a State's asset management plan for the NHS; and [NEW] to provide support for activities to increase the resiliency of the NHS to mitigate the cost of damages from sea level rise, extreme weather events, flooding, wildfires, or other natural disasters. [§ 11105(1); 23 U.S.C. 119(b)]
Other	General local or state funds committed to the project above the required minimum match to the federal funds. Other funds may also represent the lead agency's ability to fund the entire phase with local funds. For this project, the use of Other funds represent Washington DOT's funding contribution to the project. This is called out by the inclusion of "WSDOT" with the Other fund type code designation.
STBG	Surface Transportation Block Grant funds. A federal funding source (FHWA based) appropriated to the State DOT. The Surface Transportation Block Grant Program (STBG) promotes flexibility in State and local transportation decisions and provides flexible funding to best address State and local transportation needs.
State STBG	Appropriated STBG that remains under ODOT's management and commitment to eligible projects.

Upcoming STIP Request

According to the 2023 financial plan, the IBR Program is estimated to cost between \$5 billion to \$7.5 billion. During the 2022 and 2023 legislative sessions, Oregon and Washington committed to providing the IBR Program with \$1 billion from each state. The IBR Program will also rely on toll funding to provide between \$1.1 billion to \$1.6 billion for capital construction costs. In addition to state funds and toll funds, the IBR Program has secured a \$1.5 billion FHWA Bridge Investment Program (BIP) Grant, a \$600 million USDOT Mega Grant, and a \$30 million USDOT Reconnecting Communities Pilot (RCP) Grant. The IBR Program has also applied for and been admitted into the first phase (Project Development) of the FTA's Capital Investment Grant (CIG) program and plans to apply for approximately \$1 billion. The CIG program has a multi-phase, multi-year grant application process with FTA approval required for entry into each phase, which provides increased confidence in successfully receiving funding at the end of the process. Under the current schedule, the Program is anticipated to complete the phases and receive a grant award in 2028.

Modeling Network, NHS, and Performance Measure Designations

Note: The I-5 IBR MTIP full Amendment requires the completion of a formal Performance Assessment Evaluation (PAE). The PAE will be included as an attachment to the amendment staff report.

Summary of Amendment Changes Occurring:

The formal amendment adds the new tolling signage project on I-5 to the MTIP. OTC approval was required to approve the funding. OTC approval occurred during their May and July 2025 meetings. PE activities were completed in Key 21570. This new project adds a construction and other phase as follows:

- Other Phase: Establish the other phase and program approximately \$2.5 million in funding for the Program to begin early procurement work for toll gantries and cantilever sign structures which have long lead times. It is anticipated that this amount will be sufficient for the Pre-completion Tolling Signage and Electrical package.
- Construction Phase: Establish construction phases and program funding for Pre-Completion Tolling (approximately \$22 million) and the Columbia River Bridge (CRB) Replacement (approximately \$1.3 billion) packages. According to the 2023 Financial Plan, it is anticipated that the amount requested will be sufficient for costs associated with the construction of the CRB and Pre-Completion Tolling Signage and Electrical packages.

Project Name:	Project Name: I-5 OR & WA Pre-completion Tolling Signage										
Lead Agency:	ODOT (& \	ODOT (& WSDOT) Applicant: ODOT Administrator: ODOT & WSDOT

Short Description:

Install signage, toll gantries, electrical systems and related structures in preparation of new tolling operations for the I-5 Interstate Bridge in Oregon and Washington. Preliminary engineering is covered under K21570.

MTIP Detailed Description (Internal Metro use only):

As part of the I-5 Columbia River Interstate Bridge Replacement Project from Portland to Vancouver between MP 286.19 to MP 308.38, install signage, toll gantries, electrical systems and related equipment in preparation of new tolling operations on and near the I-5 Interstate Bridge in Oregon and Washington. Preliminary engineering is covered under K21570.

STIP Description:

Install signage, toll gantries, electrical systems and related structures in preparation of new tolling operations for the I-5 Interstate Bridge in Oregon and Washington. Preliminary engineering is covered under K21570.

Fiscal Constraint Consistency Review

- 1. What is the source of funding? Various sources from ODOT state bonds, federal awarded funds and WSDOT state funds.
- 2. Does the amendment include changes or updates to the project funding? Yes.
- 3. Was proof-of-funding documentation provided to verify the funding change? Yes, via the May and June 2025 OTC actions.
- 4. Level of funding approval? FHWA, Oregon Legislature approval, and OTC approvals.
- 5. Has the fiscal constraint requirement been properly demonstrated and satisfied as part of the MTIP amendment? Yes.

RTP Air Quality Conformity ar	nd Transportation Modeling Designations
Is this a capacity enhancing or non-capacity enhancing project?	Capacity enhancing project
Is the project exempt from a conformity determination per 40 CFR 93.126, Table 2 or 40 CFR 93.127, Table 3?	No. The project is not exempt per 40 CFR 93.126, Table 2 from air quality conformity analysis
Exemption Reference:	Not Applicable
Was an air analysis required as part of RTP inclusion?	Yes for the 2023 RTP. Also see the Performance Assessment Evaluation (PAE) results as part of this amendment bundle
If capacity enhancing, was transportation modeling analysis completed as part of RTP inclusion?	No. Not applicable. The project is not capacity enhancing
RTP Constrained Project ID and Name:	RTP ID - 10866: I-5 Interstate Bridge Replacement Program
RTP Project Description:	Replace I-5/Columbia River bridges, add auxiliary lanes and improve interchanges on I-5, extend light rail transit from Expo Center to Vancouver, WA., add protected/buffered bikeways, cycle tracks and a new trail/multiuse path or extension and implement variable rate tolling.
Additional RTF	Consistency Check Areas

- Is the project designated as a Transportation Control Measure? No.
- Is the project identified on the Congestion Management Process (CMP) plan? Yes
- Is the project included as part of the approved: UPWP? No. Not applicable.
- 3a. If yes, is an amendment required to the UPWP? No.
- 3b. Can the project MTIP amendment proceed before the UPWP amendment? Yes.
- 3c. What is the UPWP category (Master Agreement, Metro funded stand-alone, Non-Metro funded Regionally Significant)? Not applicable

4. Applicable RTP Goals:

Goal #1-Mobility Options:

Objective 1.1 - Travel Options: Plan communities and design and manage the transportation system to increase the proportion of trips made by walking, bicycling, shared rides and use of transit, and reduce per capita vehicle miles traveled.

Goal #2 - Safer System:

Objective 2.1 - Vision Zero: Eliminate fatal and severe injury crashes for all modes of travel by 2035.

Goal #3 - Equitable Transportation:

Objective 3.2 - Eliminate barriers that people of color, low income people, youth, older adults, people with disabilities and other marginalized communities face to meeting their travel needs

Goal 4 - Thriving Economy:

Objective 4.1 - Connected Region: Focus growth and transportation investment in designated 2040 growth areas to build an integrated system of throughways, arterial streets, freight routes and intermodal facilities, transit services and bicycle and pedestrian facilities, with efficient connections between modes and communities that provide access to jobs, markets and community places within and beyond the region

5. Does the project require a special performance assessment evaluation as part of the MTIP amendment? Yes. The amendment adds implementation phases which are capacity enhancing and has a total project cost that exceeds \$100 million. A full PAE is required as part of the amendment.

Public Notification/Opportunity to Comment Consistency Requirement

- 1. Is a 30-day/opportunity to comment period required as part of the amendment? Yes.
- 2. What are the start and end dates for the comment period? Estimated to be May 14, 2025 to June 13, 2025
- 3. Was the comment period completed consistent with the Metro Public Participation Plan? Yes.
- 4. Was the comment period included on the Metro website allowing email submissions as comments? Yes.
- 5. Did the project amendment result in a significant number of comments? Comments are expected
- 6. Did the comments require a comment log and submission plus review by Metro Communications staff and to Council Office? Yes. A comment log will be established for email comment submission. Metro's Communication department will coordinate receipt, review, and evaluation of all other comments submitted

	Fund Codes References
Other	General local or state funds committed to the project above the required minimum match to the federal funds. Other funds may also represent the lead agency's ability to fund the entire phase with local funds. For this project, the use of Other funds represent Washington DOT's funding contribution to the project. This is called out by the inclusion of "WSDOT" with the Other fund type code designation.

Upcoming STIP Request

According to the 2023 financial plan, the IBR Program is estimated to cost between \$5 billion to \$7.5 billion. During the 2022 and 2023 legislative sessions, Oregon and Washington committed to providing the IBR Program with \$1 billion from each state. The IBR Program will also rely on toll funding to provide between \$1.1 billion to \$1.6 billion for capital construction costs. In addition to state funds and toll funds, the IBR Program has secured a \$1.5 billion FHWA Bridge Investment Program (BIP) Grant, a \$600 million USDOT Mega Grant, and a \$30 million USDOT Reconnecting Communities Pilot (RCP) Grant. The IBR Program has also applied for and been admitted into the first phase (Project Development) of the FTA's Capital Investment Grant (CIG) program and plans to apply for approximately \$1 billion. The CIG program has a multi-phase, multi-year grant application process with FTA approval required for entry into each phase, which provides increased confidence in successfully receiving funding at the end of the process. Under the current schedule, the Program is anticipated to complete the phases and receive a grant award in 2028.

Modeling Network , NHS, and Performance Measure Designations

Note: The I-5 IBR MTIP full Amendment requires the completion of a formal Performance Assessment Evaluation (PAE). The PAE will be included as an attachment to the amendment staff report.

Summary of Amendment Changes Occurring:

The formal amendment adds the bridge replacement final design PE phase and construction phase to the MTIP and STIP. The construction phase is one of several delivery segments that will be programmed for the I-5 IBR Program. The IBR Program estimates that a total of 28 construction phase segments may be required. Some will be consolidated based on their delivery efficiency. Key 23877 represents only a partial picture of the total construction phase delivery requirement. OTC approval was required to add the project and funding. OTC approval occurred during their May and June 2025 meetings. Added notes: The bridge replacement funding and construction delivery actions are occurring as a two state effort between ODOT and WSDOT. Finally, the stated project limits reflect the Oregon side only. The total project limits on I-5 extend into Washington and up into North Vancouver.

Certified Agency Delivery: No			Non-Certified Agency Delivery: No			Delivery as Dir	ect Recipient:	YES			

Short Description:

Advance post-NEPA design and construction activities for the I-5 Interstate Bridge replacement over the Columbia River between Oregon and Washington, downstream of the existing structure. Work will support construction of two new bridges to accommodate highway, transit, and active transportation modes. Replacing the bridge is anticipated to improve traffic and mobility for freight and the public traveling across the river. Early project design is covered under K21570.

MTIP Detailed Description (Internal Metro use only):

In northern Portland for this construction segment on I-5 between MP 307.98 to MP 308.38: Advance post-NEPA design and construction activities for the I-5 Interstate Bridge replacement over the Columbia River between Oregon and Washington, downstream of the existing structure. Work will support construction of two new bridges to accommodate highway, transit, and active transportation modes. Replacing the bridge is anticipated to improve traffic and mobility for freight and the public traveling across the river. Early project design is covered under K21570. One of multiple construction package segments to be programmed in the MTIP and STIP to complete the full construction phase delivery requirements.

STIP Description:

Advance post-NEPA design and construction activities for the I-5 Interstate Bridge replacement over the Columbia River between Oregon and Washington, downstream of the existing structure. Work will support construction of two new bridges to accommodate highway, transit, and active transportation modes. Replacing the bridge is anticipated to improve traffic and mobility for freight and the public traveling across the river. Early project design is covered under K21570.

Fiscal Constraint Consistency Review

- 1. What is the source of funding? Various sources from ODOT state bonds, federal awarded funds and WSDOT state funds.
- 2. Does the amendment include changes or updates to the project funding? Yes.
- 3. Was proof-of-funding documentation provided to verify the funding change? Yes, via the May and June 2025 OTC actions.
- 4. Level of funding approval? FHWA, Oregon Legislature approval, and OTC approvals.
- 5. Has the fiscal constraint requirement been properly demonstrated and satisfied as part of the MTIP amendment? Yes.

RTP Air Quality Conformity a	nd Transportation Modeling Designations
Is this a capacity enhancing or non-capacity enhancing project?	Capacity enhancing project
	No. The project is not exempt per 40 CFR 93.126, Table 2 from air quality
per 40 CFR 93.126, Table 2 or 40 CFR 93.127, Table 3?	conformity analysis
Exemption Reference:	Not Applicable
Was an air analysis required as part of RTP inclusion?	Yes for the 2023 RTP. Also see the Performance Assessment Evaluation (PAE)
was an all allalysis required as part of Kir illiciusion:	results as part of this amendment bundle
If capacity enhancing, was transportation modeling analysis completed as	No. Not applicable. The project is not capacity enhancing
part of RTP inclusion?	No. Not applicable. The project is not capacity chilaneing
RTP Constrained Project ID and Name:	RTP ID - 10866: I-5 Interstate Bridge Replacement Program
RTP Project Description:	Replace I-5/Columbia River bridges, add auxiliary lanes and improve interchanges on I-5, extend light rail transit from Expo Center to Vancouver, WA., add protected/buffered bikeways, cycle tracks and a new trail/multiuse path or extension and implement variable rate tolling.

Additional RTP Consistency Check Areas

- 1. Is the project designated as a Transportation Control Measure? **No**.
- 2. Is the project identified on the Congestion Management Process (CMP) plan? Yes
- 3. Is the project included as part of the approved: UPWP? No. Not applicable.
- 3a. If yes, is an amendment required to the UPWP? No.
- 3b. Can the project MTIP amendment proceed before the UPWP amendment? Yes.
- 3c. What is the UPWP category (Master Agreement, Metro funded stand-alone, Non-Metro funded Regionally Significant)? Not applicable

4. Applicable RTP Goals:

Goal # 1 - Mobility Options:

Objective 1.1 - Travel Options: Plan communities and design and manage the transportation system to increase the proportion of trips made by walking, bicycling, shared rides and use of transit, and reduce per capita vehicle miles traveled.

Goal #2 - Safer System:

Objective 2.1 - Vision Zero: Eliminate fatal and severe injury crashes for all modes of travel by 2035.

Goal #3 - Equitable Transportation:

Objective 3.2 - Eliminate barriers that people of color, low income people, youth, older adults, people with disabilities and other marginalized communities face to meeting their travel needs

Goal 4 - Thriving Economy:

Objective 4.1 - Connected Region: Focus growth and transportation investment in designated 2040 growth areas to build an integrated system of throughways, arterial streets, freight routes and intermodal facilities, transit services and bicycle and pedestrian facilities, with efficient connections between modes and communities that provide access to jobs, markets and community places within and beyond the region.

5. Does the project require a special performance assessment evaluation as part of the MTIP amendment? Yes. The amendment adds implementation phases which are capacity enhancing and has a total project cost that exceeds \$100 million. A full PAE is required as part of the amendment.

Public Notification/Opportunity to Comment Consistency Requirement

- 1. Is a 30-day/opportunity to comment period required as part of the amendment? Yes.
- 2. What are the start and end dates for the comment period? Estimated to be May 14, 2025 to June 13, 2025
- 3. Was the comment period completed consistent with the Metro Public Participation Plan? Yes.
- 4. Was the comment period included on the Metro website allowing email submissions as comments? Yes.
- 5. Did the project amendment result in a significant number of comments? Comments are expected
- 6. Did the comments require a comment log and submission plus review by Metro Communications staff and to Council Office? Yes. A comment log will be established for email comment submission. Metro's Communication department will coordinate receipt, review, and evaluation of all other comments submitted

	Fund Codes References
Advance Construction ADVCON (AC funds)	A funding placeholder tool. This fund management tool allows agencies to incur costs on a project and submit the full or partial amount later for Federal reimbursement if the project is approved for funding. Advance construction can be used to fund emergency relief efforts and for any project listed in the STIP, including surface transportation, interstate, bridge, and safety projects. The use of Advance Construction is normally only by the state DOT to help leverage their funding resources and keep projects on their respective delivery schedules.
Other	General local or state funds committed to the project above the required minimum match to the federal funds. Other funds may also represent the lead agency's ability to fund the entire phase with local funds. For this project, the use of Other funds represent Washington DOT's funding contribution to the project. This is called out by the inclusion of "WSDOT" with the Other fund type code designation.

State

Key 21570 Updated Commitments: \$

General state funds used normally to satisfy the minimum match requirement to the federal funds. For this project, the State funds are used this way and to provide the difference in the 50%-50% contribution requirement between ODOT and WSDOT.

Upcoming STIP Request

According to the 2023 financial plan, the IBR Program is estimated to cost between \$5 billion to \$7.5 billion. During the 2022 and 2023 legislative sessions, Oregon and Washington committed to providing the IBR Program with \$1 billion from each state. The IBR Program will also rely on toll funding to provide between \$1.1 billion to \$1.6 billion for capital construction costs. In addition to state funds and toll funds, the IBR Program has secured a \$1.5 billion FHWA Bridge Investment Program (BIP) Grant, a \$600 million USDOT Mega Grant, and a \$30 million USDOT Reconnecting Communities Pilot (RCP) Grant. The IBR Program has also applied for and been admitted into the first phase (Project Development) of the FTA's Capital Investment Grant (CIG) program and plans to apply for approximately \$1 billion. The CIG program has a multi-phase, multi-year grant application process with FTA approval required for entry into each phase, which provides increased confidence in successfully receiving funding at the end of the process. Under the current schedule, the Program is anticipated to complete the phases and receive a grant award in 2028.

Modeling Network, NHS, and Performance Measure Designations

Note: The I-5 IBR MTIP full Amendment requires the completion of a formal Performance Assessment Evaluation (PAE). The PAE will be included as an attachment to the amendment staff report.

Memo

Date: May 29, 2025

To: TPAC and Interested Parties

From: Ken Lobeck, Funding Programs Lead

Subject: June 2025 MTIP Formal Amendment & Resolution 25-5503 Approval Request –

JU25-11-JUN

FORMAL MTIP AMENDMENT STAFF REPORT

Amendment Purpose Statement

FOR THE PURPOSE OF AMENDING OR ADDING THREE I-5 INTERSTATE BRIDGE REPLACEMENT PROGRAM PROJECTS TO THE 2024-27 MTIP TO MEET FEDERAL PROJECT DELIVERY REQUIREMENTS

What is the requested action?

No action is requested at the June 2025 TPAC Meeting. TPAC is receiving an amendment notification and project information during the June meeting. The approval recommendation to JPACT for Resolution 25-5503 will follow during TPAC's July 2025 meeting.

BACKROUND

What This Is - Amendment Summary:

The June 2025 Formal Metropolitan Transportation Improvement Program (MTIP) Formal/Full Amendment contains three projects. All three are related to the ongoing I-5 Interstate Bridge Replacement (IBR) Program effort to replace and reconstruct the existing I-5 Columbia River bridge and related interchanges within the five-mile corridor with a new bridge and interchange improvements. Project delivery is a combined two-state effort between the Oregon Department of Transportation (ODOT) and the Washington State Department of Transportation (WSDOT). The project is currently in the design stage with a Draft Supplemental Environmental Impact Statement (SEIS) anticipated to be completed by the end of 2025. Initial construction phases will be obligated shortly after the federal Record of Decision (ROD) is obtained in early 2026.

The I-5 IBR Program MTIP amendment contains funding updates and added phases to the non-construction phases project in Key 21570, plus adds two new segment or "package" construction phase projects. The new construction phase projects do not represent the entire required construction phase for the project. Additional construction phase segments will be added to support the delivery effort for the I-5 IBR Program.

The funding net change through this amendment will increase the total programmed funding from a current \$103,112,407 to \$2,057,861,000. A summary of the specific changes to the projects are included in this memo.

Staff Report Included Sections and Items:

- a. Metro and Oregon Transportation Commission (OTC) Summary Approval Steps.
- b. Project Assessment and Evaluation (PAE) Requirement.
- c. Project Funding and Amendment Summary Overview.
- d. Proposed Tolling Overview Summary
- e. Construction Phase Delivery Overview
- f. Metro Consistency Review Requirements and Processing Timeline
- g. Analysis and Information
- h. Included attachments:
 - 1. OTC May 8, 2025, IBR Update Item
 - 2. I-5 IBR Program Major Project Assessment Evaluation (PAE) Summary
 - 3. Construction Phase Delivery Segments

A. Metro and OTC Summary Approval Steps:

The I-5 IBR Program amendment will follow a "two-touch" approval requirement through Metro's Transportation Policy Alternatives Committee (TPAC) and the Joint Policy Advisory Committee on Transportation (JPACT). TPAC will receive an amendment overview during their June 6, 2025, meeting. JPACT will receive an amendment overview at a special JPACT meeting on June 26, 2025.

TPAC's approval recommendation to JPACT will be requested during TPAC's July 11, 2025, meeting. JPACT will consider TPAC's approval request to approve Resolution 25-5503 during their July 17, 2025, meeting. Assuming JPACT approves the I-5 IBR Program MTIP amendment under Resolution 25-5503, final amendment approval from Metro Council is proposed to occur on July 24, 2025.

OTC Approval Steps:

OTC will complete a two-touch approval process as well. OTC received an I-5 IBR Program overview during their May 8, 2025, meeting. OTC approval of the new funding for the I-5 IBR Program is scheduled to occur during their July 31, 2025, meeting. The I-5 IBR Program MTIP Formal Amendment will process through Metro via "concurrent" process with the expectation that OTC will approve the fund programming to the project on July 31st. Because Metro's Council approval date is scheduled prior to the OTC approval date, the Metro amendment approval request will include a condition that final Metro approval is predicated upon OTC's July 31st approval.

Submission to ODOT and FHWA/FTA of the final Metro approved MTIP formal amendment bundle under approved Resolution 25-5503 will be delayed until OTC provides their final funding award approval on July 31st. This is necessary as part of the fiscal constraint demonstration requirement for the amendment.

B. Project Assessment and Evaluation (PAE) Requirement:

A completed PAE is required as part of the MTIP formal amendment. A PAE is required for projects that include construction phase capacity enhancement scope elements (e.g. auxiliary lanes, new through lanes, extension of a light rail line, purchase of service expansion buses, etc.) and exceeds a total project cost of \$100 million dollars. The I-5 IBR Program includes interchange bridge reconfigurations, new auxiliary lanes, and an extension of the MAX light rail system across the new bridge and into Vancouver. See Attachment 1, Modified Local Preferred Alternative (LPA) for more information in what is included in the I-5 IBR Program's Modified LPA. Per the 2023 Financial Plan Analysis, the current total project cost is estimated between \$5 billion and \$7.5 billion dollars.

The completed PAE reviews and evaluates a complete build of the IBR project. A complete IBR build was included in the 2045 fiscally constrained model for the 2023 Regional Transportation Plan (RTP). This assessment is provided to inform the amendment decision process regarding consistency with investment priority policies.

Metro used three main tools to evaluate the 2024-2027 MTIP investment package and complete the PAE:

- Regional Travel Demand Model (RTDM).
- Motor Vehicle Emissions Simulator (MOVES) Model.
- Geographic Information Systems (GIS).

The outputs for this analysis are for the entire area within the Metro jurisdiction or MPA and the year modeled was 2027. This analysis does not include the level of detail covered by a full corridor study. Table 1 provides a summary of the evaluation results based on the RTP investment priorities. The complete PAE is included as Attachment 3 is provided Table 1 below and in Attachment 3 to the staff Report.

Table 1. Summary of RTP Investment Priorities Evaluation – Interstate Bridge Replacement Program Complete Build

Table 1. Summary of RTP Investment Priorities Evaluation – Interstate Bridge Replacement Project Complete Build

RTP Priority	Measure Description	Model Result
	Weighted average household access to jobs within a 30-minute driving commute or 45-minute transit commute.	О
Equitable Transportation	Weighted average household access to community places within a 20-minute driving commute or 30-minute transit commute.	o
	Miles and percentage of active transportation infrastructure added to the completeness of the regional active transportation work.	o
	1. Projected daily metric tons of greenhouse gas emissions reduction per capita.	0
Climate Action	2. Projected daily metric tons of greenhouse gas emissions reduction	О
and Resilience	Miles and percentage of active transportation infrastructure added to the completeness of the regional active transportation work.	+
	Amount of investment of safety activities which address fatalities and serious injuries crashes.	^
Safe System	 Amount of investment of safety activities which address fatalities and serious injuries crashes on high injury corridors, equity focus areas, and high injury corridors in equity focus areas. 	^
	1. Mode split	О
Mobility Options	2. Miles traveled by mode	0
Thriving	1. Is the project located in an area that is prioritized for future job growth?	+
Economy	2. Is the project located in an area with higher-than-average job activity?	+

Key:

- o neutral or no significant change
- ^ not directly addressing the region's desired outcome; has other related benefits
- + trending towards the desired outcome for that priority
- trending away from the desired outcome for that priority
- +/o potential to trend toward desired outcome but still to be determined until further details are known
- -/o risk to trend away from desired outcome but still to be determined until further details are known

C. Project Funding and Amendment Summary Overview

- ODOT Key 21570 (Existing Project):
 - o Name: I-5: Columbia River (Interstate) Bridge
 - Project Description: Planning and design, right of way, and utility relocation activities for the replacement of the I-5 Interstate Bridge between Oregon and Washington. Replacing the bridge is anticipated to improve traffic and mobility for freight and the public traveling across the river.
 - Notes and changes:

The existing project includes the planning phase and preliminary engineering (PE) phase. The source of the funding for this project originates from federal, state, and local sources from both ODOT and WSDOT as shown below in Table 2.

DATE: MAY 29, 2025

- Decreases the Planning phase from \$9,112,407 to \$8,209,584 based on actual phase fund obligations.
- Increases the PE phase from a MTIP programming level of \$94,000,000 to \$304,720,416.
- Adds a right-of way (ROW) phase with \$231,699,000.
- Adds a utility relocation (UR) phase with \$10,000,000.
- The project programming increases from \$103,112,407 to \$554,629,000. The complete changes are shown in the project MTIP Worksheet which are included separately from the staff report as Exhibit A to Resolution 25-5503.

Key 21570 Update	ed Programming:	Ś	170.555.500	Ś	192,647,500	Ś	191,426,000	Ś	554.629.000	TPC = \$5B to \$7.5B

Note: To avoid double counting between the ODOT and WSDOT STIP, WSDOT's committed federal, state, and local project funds are being programmed as "local Other" funds in the Oregon MTIP and STIP. The WSDOT funding contribution does contain a mix of federal, state, and local funds.

- ODOT Key 23876 (New Project):
 - o Name: I-5 OR & WA Pre-completion Tolling Signage
 - Project Description: Install signage, toll gantries, electrical systems and related structures in preparation of new tolling operations for the I-5 Interstate Bridge in Oregon and Washington. Preliminary engineering is covered under K21570.
 - Notes and changes:

 This is a new project. The amendment is adding a new construction and "Other" phase that will support the required precompletion tolling signage actions.

DATE: MAY 29, 2025

- For this project, the required PE activities have been completed as part of the PE phase in project Key 21570. A new PE phase is not required for Key 23876.
- ODOT State funds of \$12,295,000 are being programmed to the construction phase with an obligation year of FFY 2026. WSDOT is is contributing \$9,975,000 an additional into construction resulting in a total construction phase amount of \$22,090,000.
- The amendment adds a new Other phase with a WSDOT contribution of \$2,500,000.
- The total project programming is \$24,590,000.

Table 1. Key 23876: (New Project) I-5: OR & WA Pre-Completion Tolling Signage

SDOT Contributions Total PE F	Other Chase Commitments:	\$ \$	-	\$ \$	-	\$ \$	2,500,000 2,500,000	*******	2,500,000 2,500,000	Add WA MAW funding

• ODOT Key 23877 (New Project):

- o Name: I-5: Columbia River Bridge Replacement
- Project Description: Advance post-NEPA design and construction activities for the I-5 Interstate Bridge replacement over the Columbia River between Oregon and Washington, downstream of the existing structure. Work will support construction of two new bridges to accommodate highway, transit, and active transportation modes. Replacing the bridge is anticipated to improve traffic and mobility for freight and the public traveling across the river. Early project design is covered under K21570.
- Notes and changes:
 - This is a new project. The amendment is adding a new PE and construction phase that will support post-NEPA/final design and construction activities.
 - ODOT is utilizing the Advance Construction fund type code to enable ODOT to maximize fund leveraging to the project When ODOT obligates the federal funds through FHWA, they will identify the expected eligible federal fund type the project will utilize.
 - The new PE phase continues the preliminary engineering actions completed in Key 21570 and finishes final design and post NEPA activities.

- For the new PE phase:
 - ➤ ODOT is programming \$177,437,000 of federal Advance Construction funding (plus match) in FFY 2026.
 - ➤ WSDOT is contributing \$22,180,000.
 - Together, the new PE phase totals \$221,797,000.
- The amendment adds a new construction phase with funding from both ODOT and WSDOT:
- ODOT is programming \$1,005,474,000 of federal Advance Construction funds (plus \$22,180,000 of matching funds) in FFY 2026.
- WSDOT's contribution totals \$31,725,970.
- Future tolling funds of \$187,919,060 also are being programmed.
- The construction phase programming totals \$1,256,845,000.
- The total project programming totals \$1,478,642,000.

Summary of I-5 IBR Program Funding Sources and Cost Estimate

According to the IBR Program's 2023 Financial Plan Analysis, the current total project cost is estimated between \$5 billion and \$7.5 billion dollars and multiple funding sources have been awarded, committed, or are in development towards the project. Table 5 summarizes the anticipated funding sources across all project phases.

The I-5 IBR Program plans to release an updated cost estimate and financial plan later this year that reflects the work the Program has advanced to this point. The cost estimate will account for current market conditions along with potential risks and cost savings opportunities, and includes costs associated with constructing the replacement bridge and other Program components.

Table 3: Summary of I-5 IBR Program Funding Sources Across All Project Phases

Notes:

D. Proposed Tolling Overview:

and Oregon Transportation Commissions.

Tolling is an integral part of the funding strategy for the IBR Program and the proposed amendment includes programming tolling funding.

The IBR Program plans to implement pre-completion tolling on the existing Interstate Bridge while the new bridge is under construction. Establishing pre-completion toll operations before the new bridge opens will provide a source of revenue to pay current interest on the debt, thereby minimizing capitalized interest costs while also providing direct capital funding on a pay-as-you-go basis. All-electronic, time of-day variable-rate tolling will follow a fixed schedule and is assumed for both travel directions. Additionally, program partners have adopted time-of-day variable-rate tolling as a key component of the Modified LPA, which is currently undergoing NEPA analysis. Figure 1 shows the preliminary schedule for approving toll rates.

The May 8, 2025, OTC staff report (Attachment 1) provides the following summary: "(The) final SEIS will be published by the end of 2025, followed by an amended Record of Decision (ROD). The ROD will allow the Program to move into construction, with corridor construction beginning in 2026.

¹Combines \$1 million BIP Planning Grant (2022) and \$1.488 billion Construction Grant (2024)

²Legislative authorization to toll has been secured in both Oregon and Washington toll funding at

\$1.24 billion. This has been confirmed by both states at toll rates assumed in the 2023 Financial Plan
under a base case financing scenario. Toll rates and policies will be jointly set by the Washington State

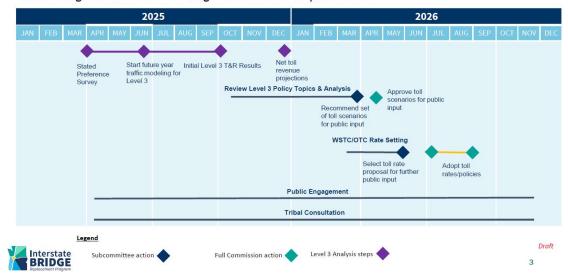

³ The IBR Program is pursuing a FTA New Starts grant that will support the light rail Vancouver, WA. The IBR Program was accepted into the Project Development phase of the CIG process in September 2023.

With the updated environmental timeline, pre-completion tolling is anticipated to begin in 2027, allowing time to hire a contractor, install tolling equipment, and conduct the rate-setting process. The Washington State Department of Transportation Toll Division is currently conducting the Level 3 Toll Traffic and Revenue Study with results anticipated toward the end of 2025. Once the results are available, the Bi-State Tolling Subcommittee will review the results and identify which scenarios will move forward for public input, as well as discuss potential options such as a low-income discount and a tribal exemption or discount. The ratesetting process would occur following the commissions' review and feedback and is currently anticipated to conclude during the summer of 2026".

Figure 1: Preliminary Schedule for Tolling Rate (May 2025)

Interstate Bridge Rate Setting – Preliminary Schedule

Rate setting schedule assumes a tolling start date of second quarter 2027.

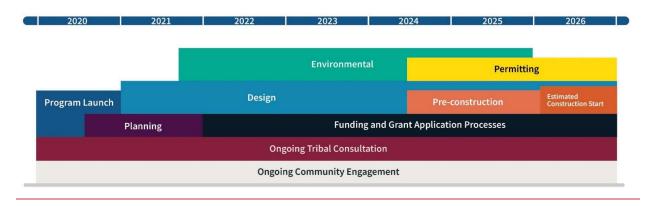

E. Construction Phase Delivery Overview

The proposed MTIP Amendment includes the first of more than two dozen potential construction packages administered by WSDOT that the I-5 IBR Program plans to issue for construction. The May 8, 2025, OTC staff report (Attachment 1) provides the following summary about the construction packages:

"The Columbia River Bridge package will include the construction of the replacement I-5 bridge downstream of the existing bridge shore-to-shore over the Columbia River to accommodate highway, active transportation and transit modes. This also includes the construction of shoulders on I-5 to accommodate Bus on Shoulder and improve safety. The Bridge Approaches package (administered by WSDOT) will construct roadways and bridges that connect the existing I-5 to the Columbia River replacement bridge. In Washington, this includes the reconstruction of the SR-14 and City Center interchanges and reconstructing I-5 up to Evergreen Boulevard, including a structure for an active transportationcentered community connector/lid in Washington. It also includes connecting the

new replacement bridge to the existing I-5 alignment and modifying on- and offramps to and from Hayden Island in Oregon. Follow-up packages will be sequenced throughout the Program area following the SR 14A and Evergreen Boulevard construction packages (administered by WSDOT). The IBR Program is also in the process of refining the details of draft construction packages to share with the industry. Construction of the IBR Program could last more than 15 years."

Attachment 3 lists the draft, conceptual packages with an illustrative map A summary project schedule and a conceptual overview of the Portland side of the project proposed improvements are shown below.

F. Metro Consistency Review Requirements and Processing Timeline

In accordance with 23 CFR 450.316-328, Metro is responsible for reviewing and ensuring MTIP amendments comply with all federal programming requirements. Each project and their requested changes are evaluated against multiple MTIP programming review factors that originate from 23 CFR 450.316-328. They primarily are designed to ensure the MTIP is fiscally constrained, consistent with the approved RTP, and provides transparency in their updates, changes, and/or implementation.

Metro Code of Federal Regulations Consistency Review Items

Metro's approval process for a formal amendment includes multiple steps. The required approvals for the June 2025 Formal MTIP amendment (JU25-11-JUN) will include the following actions:

- Are eligible and required to be programmed in the MTIP.
- Properly demonstrate fiscal constraint.
- Pass the RTP consistency review which requires a confirmation that the project(s) are identified in the current approved constrained RTP either as a stand- alone project or in an approved project grouping bucket.
- Are consistent with RTP project costs when compared with programming amounts in the MTIP.
- If a capacity enhancing project, the project is identified in the approved Metro modeling network and included in transportation demand modeling for performance analysis.

Tanget Date

- Supports RTP goals and strategies.
- Contains applicable project scope elements that can be applied to Metro's performance requirements.
- Verified to be part of the Metro's annual Unified Planning Work Program (UPWP) for planning projects that may not be specifically identified in the RTP.
- Verified that the project location is part of the Metro regional transportation network, and is considered regionally significant, or required to be programmed in the MTIP per USDOT direction.
- Verified that the project and lead agency are eligible to receive, obligate, and expend federal funds.
- Does not violate supplemental directive guidance from FHWA/FTA's approved Amendment Matrix.
- Reviewed and evaluated to determine if Performance Measurements will or will not apply.
- Successfully completes the required 30-day Public Notification/Opportunity to Comment period.
- Meets other MPO responsibility actions including project monitoring, fund obligations, and expenditure of allocated funds in a timely fashion.

Proposed Processing and Approval Actions:

A ation

<u>Action</u>	<u>l'arget Date</u>
IBR Program overview to OTC	May 8, 2025
Initiate the public notification/comment process	May 12, 2025
TPAC June meeting agenda mail-out	May 30, 2025
TPAC amendment overview - no recommendation	June 6, 2025
End Public comment period	June 13, 2025
Metro Council amendment overview - no action	June 24, 2025
JPACT amendment overview - no recommendation	June 26, 2025
TPAC July meeting agenda mail-out	July 3, 2025
TPAC July meeting - approval recommendation to JPACT	July 11, 2025
JPACT July meeting – approval request	July 17, 2025
Metro Council final approval	July 24, 2025
Final OTC approval	July 31, 2025
	IBR Program overview to OTC

Notes:

- * Metro will monitor all submitted comments and necessary responses in accordance with Metro's Public Participation Plan.
- ** OTC approval is required for the funding award to the project. Final OTC approval will occur after Metro Council meets to provide their approval for the amendment. As a result, fiscal constraint demonstration will not occur until OTC approves the funding award on July 31, 2025. The final approve MTIP amendment cannot be transmitted to ODOT and FHWA for their final approval until OTC provides their funding award approval on July 31, 2025.

FROM: KEN LOBECK

DATE: MAY 29, 2025

USDOT Approval Steps. The below timeline is an estimation only and assume no changes to the proposed JPACT or Council meeting dates occur:

Action Target Date

- Final amendment package submission to ODOT & USDOT...... Early August 2025
- USDOT clarification and final amendment approval..... Late August 2025

G. ANALYSIS/INFORMATION

1. **Known Opposition:** Four groups are known to have submitted a significant number of past comments about the I-5 IBR Program. They include a number of groups have expressed opposition to elements of the I-5 IBR Program through past comments. This includes the Bridgeton Neighborhood Association, Vote Before Tolls, Neighbors for a Better Crossing, and the Just Crossing Alliance. Reasons for opposition have included concerns about tolling, project costs, bridge type, number of travel lanes, active transportation, visual design of the bridge, and project impacts.

2. Legal Antecedents:

- a. Amends the 2024-27 Metropolitan Transportation Improvement Program adopted by Metro Council Resolution 23-5335 on July 20, 2023 (FOR THE PURPOSE OF ADOPTING THE 2024-2027 METROPOLITAN TRANSPORTATION IMPROVEMENT PROGRAM FOR THE PORTLAND METROPOLITAN AREA)
- b. Oregon Governor approval of the 2024-27 MTIP on September 13, 2023.
- c. 2024-2027 Statewide Transportation Improvement Program (STIP) Approval and 2024 Federal Planning Finding on September 25, 2023.
- 3. **Anticipated Effects:** Enables the new and amended projects to be added and updated into the MTIP and STIP. Follow-on fund obligation and expenditure actions can then occur to meet required federal delivery requirements.
- 4. **Metro Budget Impacts:** There are no fiscal impacts to the Metro budget. The approved funding for the project originates from ODOT and WSDOT. There are no Metro funds committed to the project

RECOMMENDED ACTION:

No action is requested at the June 2025 TPAC Meeting. TPAC is receiving their amendment notification and project during their June meeting. The approval recommendation to JPACT for Resolution 25-5503 will follow during TPAC's July 2025 meeting.

- **H.** Four attachments are included:
 - 1. Modified Locally Preferred Alternative
 - 2. OTC May 8, 2025, IBR Update Item

MODIFIED LOCALLY PREFERRED ALTERNATIVE RECOMMENDATION

MAY 27, 2022

After regional support is reached on a Modified Locally Preferred Alternative for the Interstate Bridge Replacement (IBR) Program, the program commits to continuing work with the partner agencies and community to identify and refine program elements that have yet to be finalized. The **IBR Program** recommends the following components for the Modified LPA:

- 1. A replacement of the current I-5 Bridge with a seismically sound bridge.
- 2. A commitment to increase and implement attractive transit options across the Columbia River by supporting a variety of transit services that meet the needs of customers traveling between varied markets through:
 - Continuation of C-TRAN express bus service from markets north of the Bridge Influence Area (BIA) to the downtown Portland area utilizing new bus on shoulder facilities, where available, within the BIA.
 - ii. Continuation of C-TRAN's current and future Bus Rapid Transit lines as described in adopted regional plans and known as the Vine.
 - iii. New Light Rail Transit (LRT) service as the preferred mode for the dedicated High-Capacity Transit improvement within the BIA.
 - iv. An alignment of LRT that begins with a connection at the existing Expo Center LRT station in Portland, OR, extends north, with a new station at Hayden Island, continues across the Columbia River on a new I-5 bridge, and generally follows I-5 with an interim Minimum Operable Segment not extending north of E. Evergreen Boulevard, in Vancouver, WA. There will be multiple stations in the City of Vancouver to be decided by the Vancouver City Council in consultation with C-TRAN, the Port of Vancouver, and TriMet.
- 3. Active transportation and multimodal facilities that adhere to universal design principles to facilitate safety and comfort for all ages and abilities. Exceptional regional and bi-state multi-use trail facilities and transit connections will be created within the BIA. Opportunities will be identified to enhance active transportation facilities, with specific emphasis on local and cross-river connections between the region's Columbia River Renaissance Trail and the 40-mile Loop.
- 4. The construction of a seismically sound replacement crossing for the North Portland Harbor Bridge with three through lanes, northbound and southbound.
- 5. The construction of three through lanes northbound and southbound on I-5 throughout the BIA.

- 6. The inclusion of one auxiliary lane northbound and one southbound between Marine Drive in Portland and E. Mill Plain Boulevard in Vancouver to accommodate the safe movement of freight and other vehicles.
- 7. A partial interchange at Hayden Island, and a full interchange at Marine Drive, designed to minimize impacts on the Island's community; and improve freight, workforce traffic, and active transportation on Marine Drive.
- 8. A commitment to study improvements of other interchanges within the BIA.
- 9. Variable Rate Tolling will be used for funding, such as constructing the program, managing congestion, and improving multi-modal mobility within the BIA. The Program will study and recommend a low-income toll program, including exemptions and discounts, to the transportation commissions.
- 10. A commitment to establish a GHG reduction target relative to regional transportation impact, and to develop and evaluate design solutions that contribute to achieving program and state-wide climate goals.
- 11. A commitment to evaluate program design options according to their impact on equity priority areas with screening criteria such as air quality, land use, travel reliability, safety, and improved access to all transportation modes and active transportation facilities. The Program also commits to measurable and actionable equity outcomes and to the development of a robust set of programs and improvements that will be defined in Community Benefits Agreement.

COUNCIL MEETING STAFF REPORT

IN CONSIDERATION OF RESOLUTION NO. 22-5273, FOR THE PURPOSE OF ENDORSING THE MODIFIED LOCALLY PREFERRED ALTERNATIVE FOR THE INTERSTATE BRIDGE REPLACEMENT PROGRAM

Date: June 27, 2022

Department: Planning, Development, and

Research

Meeting Date: July 14, 2022 Prepared by: Matt Bihn, matt.bihn@oregonmetro.gov Presenter(s): Margi Bradway, Deputy Director, Planning, Development, and

Research; Matt Bihn, Principal Transportation

Planner

Length: 30 minutes

WORK SESSION PURPOSE

Purpose: Consider endorsement of the Interstate Bridge Replacement Program (IBRP) Modified Locally Preferred Alternative (LPA).

BACKGROUND

The IBRP has worked with project partners to develop a Modified LPA with project components that reflect changes since the Columbia River Crossing LPA was approved over a decade ago, with the goal of submitting the Modified LPA to the US Department of Transportation. The Modified LPA was developed with input of the project staff and was informed by technical analysis and ongoing community engagement including feedback from the Community Advisory Group (CAG) and Equity Advisory Group (EAG).

On May 5, 2022 the Executive Steering Group (ESG) supported agreement to bring the Modified LPA to their eight respective boards and councils for consideration. On June 3, 2022 TPAC recommended endorsement of Resolution No. 22-5273, and on June 16, 2022, JPACT endorsed Resolution No. 22-5273.

Below is the anticipated schedule for the eight IBR partners' endorsement of the Modified LPA:

June 22	TriMet Board of Directors
July 11	Vancouver City Council
July 12	CTRAN Board of Directors
July 12	Port of Vancouver Board of Commissioners
July 13	Port of Portland Board of Commissioners
July 13	Portland City Council
July 14	RTC Board of Directors
July 14	Metro Council

Later this summer the ESG will consider a consensus recommendation to move the Modified LPA forward to the Supplemental Environmental Impact Statement process.

QUESTION FOR COUNCIL CONSIDERATION

• Does Council agree to endorse the IBRP Modified Locally Preferred Alternative, with Conditions of Approval adopted by Council in advance of this decision?

5

• Does Council have questions about the next steps in the overall LPA process?

Page 1 of 2

PACKET MATERIALS

- Would legislation be required for Council action X Yes \square No
- If yes, is draft legislation attached? X Yes ☐ No
- What other materials are you presenting today?
 - o Resolution No. 22-5273
 - o Exhibit A: IBR Recommended Modified LPA

Oregon Transportation Commission

Office of the Director, MS 11 355 Capitol St NE Salem, OR 97301-3871

DATE: April 24, 2025

TO: Oregon Transportation Commission

with W. Stim

FROM: Kristopher W. Strickler

Director

SUBJECT: Agenda Item K – Interstate Bridge Replacement Update

Requested Action:

Receive an update on the Interstate Bridge Replacement Program, including details about the Program schedule, preparing for delivery of Program improvements, and the upcoming proposed Statewide Transportation Improvement Program (STIP) amendment for the IBR Program.

Background:

The Interstate Bridge Replacement (IBR) Program will replace the existing Interstate Bridge with a modern, earthquake resilient, multimodal structure that will improve safety and keep people and the economy moving into the future. The IBR Program is currently in the federal environmental review phase. The 60-day public comment period for the Draft Supplemental Environmental Impact Statement (SEIS) concluded in November 2024 and the IBR Program received more than 3,600 public comment submissions that included nearly 10,000 individual <u>public comments</u>. The public input received during the comment period will help inform the technical analysis and design options and refine the preferred alternative that will move into the Final SEIS. The Final SEIS will document all public comments received and their responses.

IBR Schedule Update

The Federal Highway Administration (FHWA) and Federal Transit Administration (FTA) have provided the IBR Program with an updated schedule that allows time for them to review responses to the large number of public comments received on the Draft SEIS, any updated technical analysis, and any refinements to the preferred alternative. FHWA and FTA anticipate that the Final SEIS will be published by the end of 2025, followed by an amended Record of Decision (ROD). The ROD will allow the Program to move into construction, with corridor construction beginning in 2026.

With the updated environmental timeline, pre-completion tolling is anticipated to begin in 2027, allowing time to hire a contractor, install tolling equipment, and conduct the rate-setting process. The Washington State Department of Transportation Toll Division is currently conducting the Level 3 Toll Traffic and Revenue Study with results anticipated toward the end of 2025. Once the results are available, the Bi-State Tolling Subcommittee will review the results and identify which scenarios will move forward for public input, as well as discuss potential options such as a low-income discount and a tribal exemption or discount. The rate-setting process would occur following the commissions' review and feedback and is currently anticipated to conclude during the summer of 2026.

In addition to the environmental and tolling work, the IBR Program also plans to release an updated cost estimate and financial plan later this year that reflects the work the Program has advanced to this point. The cost estimate will account for current market conditions along with potential risks and cost saving opportunities, and includes costs associated with constructing the replacement bridge and other Program components.

Transitioning to Delivery

As the IBR Program advances through the federal environmental review process over the coming months, the Program will begin to transition from planning and preliminary design to final design, right of way acquisition, utility relocation, and construction.

During the upcoming biennium, the first of more than two dozen construction packages will be let and awarded. Construction is anticipated to begin with contracts that help prepare for the Columbia River Bridge Replacement construction package which will be administered by WSDOT. The Columbia River Bridge package will include the construction of the replacement I-5 bridge downstream of the existing bridge shore-to-shore over the Columbia River to accommodate highway, active transportation and transit modes. This also includes the construction of shoulders on I-5 to accommodate Bus on Shoulder and improve safety. The Bridge Approaches package (administered by WSDOT) will construct roadways and bridges that connect the existing I-5 to the Columbia River replacement bridge. In Washington, this includes the reconstruction of the SR-14 and City Center interchanges and reconstructing I-5 up to Evergreen Boulevard, including a structure for an active transportation-centered community connector/lid in Washington. It also includes connecting the new replacement bridge to the existing I-5 alignment and modifying on- and off- ramps to and from Hayden Island in Oregon. Followup packages will be sequenced throughout the Program area following the SR 14A and Evergreen Boulevard construction packages (administered by WSDOT). The IBR Program is also in the process of refining the details of draft construction packages to share with the industry. Construction of the IBR Program could last more than 15 years.

Upcoming STIP Request

According to the 2023 financial plan, the IBR Program is estimated to cost between \$5 billion to \$7.5 billion. During the 2022 and 2023 legislative sessions, Oregon and Washington committed to providing the IBR Program with \$1 billion from each state. The IBR Program will also rely on toll funding to provide between \$1.1 billion to \$1.6 billion for capital construction costs. In addition to state funds and toll funds, the IBR Program has secured a \$1.5 billion FHWA Bridge Investment Program (BIP) Grant, a \$600 million USDOT Mega Grant, and a \$30 million USDOT Reconnecting Communities Pilot (RCP) Grant. The IBR Program has also applied for and been admitted into the first phase (Project Development) of the FTA's Capital Investment Grant (CIG) program and plans to apply for approximately \$1 billion. The CIG program has a multi-phase, multi-year grant application process with FTA approval required for entry into each phase, which provides increased confidence in successfully receiving funding at the end of the process. Under the current schedule, the Program is anticipated to complete the phases and receive a grant award in 2028.

The majority of the funds awarded to the Program through federal discretionary grant programs will be used for the construction phase of the Program. The grant agreements required to access federal funds for the Mega and BIP grants were fully executed and signed earlier this year by ODOT/WSDOT and FHWA. A portion of the funds from these grants has already been obligated; future obligations will occur for the remaining funds once the Program enters the construction phase, as required by the grants.

The IBR Program has secured the necessary funding to advance the Program towards construction and will be nearing the final stages of the federal environmental review process later this year; and as such, will request to program about \$2B of additional funds and phases in the Statewide Transportation Improvement Program (STIP) later this year. Specifically, the request will include:

- Preliminary Engineering Phase: Program approximately \$430 million in additional funding to continue to share the planning costs equally with the State of Washington through the 2025-27 biennium. According to the 2023 Financial Plan, this amount will cover costs associated with continuing PE work for early construction packages, as well as continuing overall program management and development work through the 2025-27 biennium. It also includes \$89 million in Oregon GO bond reimbursement for PE phase activities undertaken to date paid for by WSDOT. Additional funding will be needed as PE extends through the entire duration of the IBR Program.
- **Right of Way Phase:** Establish the right of way phase and program approximately \$230 million in funding to begin the initial acquisition of properties. Depending on the package schedule, the ROW acquisition process could begin for some parcels as early as this year. Programing these funds will ensure that IBR has the funds available to begin the acquisition process starting this fall and into mid-2026. According to the 2023 Financial Plan, it is anticipated that the amount requested will be sufficient for the costs associated with ROW acquisition initiated in the 2025-27 biennium. Additional funding will be needed as construction packages progress.
- Utility Relocation Phase: Establish the utility relocation phase and program approximately \$10 million in funding for payments to eligible utilities who need to relocate because of construction of the IBR Program. The Program anticipates sharing preliminary designs with utility companies later this year, at which point some may need to begin their redesign work for the Program's first construction packages. It is anticipated that the amount requested will be sufficient for the costs associated with UR needs for IBR's initial construction packages. Additional funding may be needed as construction packages progress.
- Other Phase: Establish the other phase and program approximately \$2.5 million in funding for the Program to begin early procurement work for toll gantries and cantilever sign structures which have long lead times. It is anticipated that this amount will be sufficient for the Precompletion Tolling Signage and Electrical package.
- Construction Phase: Establish construction phases and program funding for Pre-Completion Tolling (approximately \$22 million) and the Columbia River Bridge (CRB) Replacement (approximately \$1.3 billion) packages. According to the 2023 Financial Plan, it is anticipated that the amount requested will be sufficient for costs associated with the construction of the CRB and Pre-Completion Tolling Signage and Electrical packages.

Due to various constraints regarding the duration of the STIP amendment process and Program schedule, this STIP amendment is needed before the Program will have the results of the updated cost estimate

Oregon Transportation Commission Page 4

and financial plan, anticipated later this year. Therefore, the IBR Program will likely need to amend the STIP amounts for construction and ROW accordingly later during the 2025-27 biennium and again in 2028 contingent upon the FTA CIG award. Following the 2025-27 biennium, the Program plans to advance STIP amendments once per biennium to add funds for subsequent construction packages.

Program Accountability Measures

To provide transparency into Program spending and delivery progress, the IBR Program will provide a report to the Commission as part of the Agency's quarterly Operations Report. The report will include an overview of the Program spending to date and performance on individual project schedules, budgets, delivery timelines, and a preview of future work.

Outcomes:

This is an informational update on the IBR Program designed to provide context for the Commission for ongoing decision-making related to tolling and financial decisions about the Program.

Memo

Date: Friday, May 30, 2025

To: Transportation Policy Advisory Committee (TPAC) and Interested Parties

From: Blake Perez, Associate Transportation Planner

Jean Senechal Biggs, Resource Development Section Manager

Subject: 2024-27 MTIP Formal Amendment Request: Interstate Bridge Replacement Program

Major Project Assessment Summary

Purpose: The purpose of this assessment is to document how the proposed Metropolitan Transportation Improvement Program (MTIP) amendment performs in accordance with local, regional, and state transportation policies, as well as how the project addresses the five goal areas of the 2023 Regional Transportation Plan (RTP).

Introduction and Background:

The MTIP is a federally required document that helps track and manage regionally significant transportation investments. The MTIP is a list of transportation projects and programs that are scheduled to receive federal transportation money for the four-year reporting period. An active MTIP may be amended if additional funding becomes available. The Metro Council adopted the 2024-27 MTIP in July 2023.

The proposed formal amendment to the 2024-27 MTIP adds funding to the preliminary engineering phase and adds the right of way, utility relocation, and construction phases to the Interstate Bridge Replacement Program (IBR). In 2021, a 2021-2024 MTIP amendment was made to include preliminary engineering for the IBR Program. As part of that 2021 amendment process, Metro completed a similar project assessment.

The proposed amendment includes pre-completion tolling work. Beginning in 2027, the IBR Program plans to implement pre-completion tolling on the existing Interstate Bridge while the new bridge is under construction. Establishing pre-completion toll operations before the new bridge opens will provide a source of revenue to pay current interest on the debt, thereby minimizing capitalized interest costs while also providing direct capital funding on a pay-as-you-go basis. All-electronic, time of-day variable-rate tolling will follow a fixed schedule and is assumed for both travel directions. Additionally, Program partners have adopted time-of-day variable-rate tolling as a key component of the Modified Locally Preferred Alternative, which is currently undergoing NEPA analysis.

The Modified LPA refers to an agreed upon set of components that will be further evaluated through the federal environmental review process. It is not the replacement bridge's final design but rather a key milestone setting the Program's direction as further analysis evaluates the plans for a replacement multimodal river crossing system.

This Major Project Assessment models, reviews, and evaluates a complete build of the IBR Program against local, regional, and state transportation policies, and the five goals of the adopted 2023 Regional Transportation Plan (RTP). This evaluation shows how adding the IBR program funds to the 24-27 MTIP

influences the full package of investments in the 24-27 MTIP (Note: Metro included a complete build of the IBR Program in the 2045 fiscally constrained model for the 2023 RTP.)

The Oregon Department of Transportation (ODOT) and IBR Program staff provided project information, such as, but not limited to, project plans, finance, cost estimates, and programming, that supported this assessment. This assessment is provided to inform the amendment decision process regarding consistency with investment priority policies.

History of Interstate Bridge Replacement Program and Proposed MTIP Amendment

The Interstate (I-5) Bridge is a critical connection linking Oregon and Washington across the Columbia River. With one span now 108 years old, it is at risk of collapse in the event of a major earthquake and no longer satisfies the needs of modern commerce and travel.

In 2004, regional leaders identified the need to address the I-5 corridor, including the Interstate Bridge, through previous bi-state, long-range planning studies. In response, the Washington and Oregon Departments of Transportation (WSDOT and ODOT respectively) formed the joint Columbia River Crossing (CRC) project. The intent of this project was to improve safety, reduce congestion, and increase the mobility of motorists, freight traffic, transit riders, bicyclists, and pedestrians. This project was active between 2005 and 2014 and successfully received a federal Record of Decision (ROD) in December 2011. However, the CRC project did not secure adequate state funding to advance to construction and was discontinued in 2014.

In 2019, former Oregon Governor Kate Brown and former Washington Governor Jay Inslee signed a Memorandum of Intent directing ODOT and the WSDOT to relaunch efforts to replace the aging Interstate Bridge. Both governors, as well as the bi-state legislative committee, provided clear direction that the IBR Program must build upon past work from the former CRC project that remains valid to maximize the past investment and ensure efficient decision-making, while also considering the physical and contextual changes that have occurred since the CRC project was discontinued.

Proposed MTIP Amendment Phases

The proposed MTIP amendment includes programming by phase for the activities listed below:

Preliminary Engineering Phase

- Program additional funds for the 2025-27 biennium in the Preliminary Engineering (PE) phase from a variety of sources.
- Complete NEPA work (anticipated in late 2025) followed by obtaining a ROD.
- Continue design work for the first several construction packages, including the Columbia River Bridge replacement, SR 14 package A, Evergreen Blvd. replacement, and Columbia River Bridge Approaches packages.

Right of Way Phase

• Establish the Right of Way (RW) phase and program funding from a variety of sources to begin the initial acquisition of properties.

Utility Relocation Phase

 Establish the Utility Relocation (UR) Phase and program funding from a variety of sources to provide payments to eligible utilities that need to relocate because of construction of the IBR Program.

Other Phase

• Establish the Other (OT) phase and program Washington's Move Ahead Washington (WA MAW) funding to begin early procurement work for toll gantries and cantilever sign structures.

Construction: Columbia River Bridge Replacement Package

Establish a new key number and the construction phase for the Columbia River Bridge
Replacement package to construct the replacement I-5 bridge downstream of the existing bridge
shore to shore over the Columbia River. This includes the construction of two new bridges to
accommodate highway, active transportation, transit modes and construction of shoulders on I-5
to accommodate Bus on Shoulder and improve safety. (Note: This work is contingent upon
completing the federal NEPA process and receiving a ROD.)

Construction: Pre-Completion Tolling Phase I Package

• Establish a new key number and a construction phase for the Pre-Completion Tolling Signage construction package to implement pre-completion tolling on the existing Interstate Bridge while the new bridge is under construction. Programming the funding in this MTIP amendment would allow for the purchase and installation of permanent traffic control and illumination systems to include new toll signage in both Oregon and Washington in the vicinity of the Interstate Bridge.

Consistency with the Congestion Management Process and Oregon Highway Plan Policy 1G and Action 1G.1

Regional and State policies give direction on prioritizing investments and when to consider adding motor vehicle capacity to the transportation system. Oregon Highway Plan (OHP) Policy 1G and Action 1G.1 direct ODOT to maintain highway performance and improve safety by improving system efficiency and management before adding capacity.

In the materials provided to Metro, the Interstate Bridge Replacement project has documented consistency with the state and regional policy by focusing the project scope on the first three steps of the Oregon Highway Plan (OHP) Action 1G.1. These three steps are:

- 1. Protect the existing system. The highest priority is to preserve the functionality of the existing highway system by means such as access management, local comprehensive plans, transportation demand management, improved traffic operations, and alternative modes of transportation.
- 2. Improve efficiency and capacity of existing highway facilities. The second priority is to make minor improvements to existing highway facilities such as widening highway shoulders or adding auxiliary lanes, providing better access for alternative modes (e.g., bike lanes, sidewalks, bus shelters), extending or connecting local streets, and making other off-system improvements.

3. Add capacity to the existing system. The third priority is to make major roadway improvements to existing highway facilities such as adding general purpose lanes and making alignment corrections to accommodate legal size vehicles.

Consistency with RTP Congestion Management Process

The IBR project is consistent with the RTP Congestion Management Process, in prioritizing four of the six strategies as part of the project outcomes, which includes:

- 1. TSMO strategies, including localized Travel Demand Management (TDM), safety, operational and access management improvements. The IBR Program's Modified Locally Preferred Alternative (LPA) features integrated multimodal improvements with transportation management elements. The Program developed safety and operational improvements to I-5 to work in conjunction with high-capacity transit, active transportation facilities, variable rate tolling, transportation demand management and transportation systems management. The non-highway elements of the IBR Program (transit, active transportation, tolling, TDM and TSM) would all help provide multimodal choices and management tools to help reduce demand. They would also be tools the region could dynamically adjust over time to manage higher levels of highway demand if they were to occur.
- 2. Transit, bicycle and pedestrian system improvements. The IBR Program is adding transit only lanes for buses and an extension of the MAX light rail to Vancouver, Washington. New bike lanes and sidewalks are included in the project. Investments also include a system of shared use paths, bikeways, and sidewalks within the IBR Program area. Active transportation design is also expected to be ADA compliant and include other features, such as barriers, illumination, signing, and striping to enhance user experience, safety, comfort, and route directness.
- 3. Connectivity improvements to provide parallel arterials, collectors or local streets that include pedestrian and bicycle facilities, consistent with the connectivity standards in section 3.3.4 and design classifications in Table 3.9 of the 2023 RTP, to provide alternative routes and encourage walking, biking and access to transit. The IBR Program proposed construction packages to incorporate alternative corridors that bypass busy freight and vehicle interchanges. For example, a shared-use path along the proposed extension of Expo Road provides an alternative route that bypasses the Marine Drive Interchange. Where separate corridors for active transportation use are impractical, active transportation facilities are designed in accordance with state and local agency standards for safety. Active transportation design is also expected to be ADA compliant and include other features, such as barriers, illumination, signing, and striping to enhance user experience, safety, comfort, and route directness.
- 4. Motor vehicle capacity improvements, consistent with the RTP Regional motor vehicle network vision and policies in Table 3.8 and section 3.3.3 of the 2023 RTP, only upon a demonstration that other strategies in this subsection are not appropriate or cannot adequately address identified transportation needs. The addition of one auxiliary lane in each direction will improve both the safety and efficiency of the three through travel lanes by providing drivers with more distance to speed up or slow down before entering or exiting mainline I-5, reducing bottlenecks and helping to optimize traffic flow by giving drivers space to merge safely. The addition of full safety shoulders will provide faster crash recovery, improve access for emergency vehicles, and provide a safe space for travelers recovering from an incident. The

safety shoulders will also be able to accommodate express bus service, while dedicated space for light rail transit will further ensure that transit operations are separated from general purpose traffic to improve the efficiency of operations.

Consistency with Statewide Land Use Planning Goal 12.

In Oregon's Statewide Land Use Planning Goals, Goal 12 requires cities, counties and the state to create a transportation system plan that considers all relevant modes of transportation: mass transit, air, water, rail, highway, bicycle and pedestrian. The resulting plan should support a variety of transportation modes so residents are not limited in the ways they can access the jobs, goods, or services available in different parts of their community. A well-designed transportation plan conserves energy while also minimizing adverse social and economic impacts for disadvantaged areas. The IBR project aligns with these goals by:

- Serving statewide, regional, and local transportation needs.
- Serving the mobility and access needs of those who cannot drive and other underserved populations.
- Providing for affordable, accessible and convenient transit, pedestrian, and bicycle access and circulation, with improved connectivity.
- Helping to reduce pollution from transportation to meet statewide goals to reduce climate pollution.
- Facilitating the safe flow of freight, goods, and services within regions and throughout the state.

Consistency with Local Plans

Metro's Regional Transportation Plan is a blueprint to guide investments for all forms of travel – motor vehicle, transit, bicycle and walking – and the movement of goods and freight throughout the Portland metropolitan region. The plan identifies current and future transportation needs, investments needed to meet those needs and what funds the region expects to have available over the next 25 years to make those investments a reality. On Nov. 30, 2023, Metro Council adopted the 2023 Regional Transportation Plan, via Ordinance No. 23-1496. Metro included a complete build of the IBR Program in the 2045 fiscally constrained model for the 2023 RTP.

The City of Portland's 2035 Comprehensive Plan is built on the 2012 Portland Plan, the Climate Action Plan and Portland's 1980 Comprehensive Plan, which was Portland's first Comprehensive Plan developed under the statewide land use planning system. The new Plan continues the commitment to link land use and transportation decisions. The Plan continues Portland's commitment to compact development, with active employment centers, expanded housing choice, and access to parks and open space. The IBR Program advances multiple goals articulated by the Transportation component of the Comprehensive Plan, including:

- Create a coordinated, efficient, more affordable multimodal transportation system.
- Reduce service disparities and achieve equitable access to all types of facilities and transportation modes.
- Ensure safety of the most vulnerable users (people with disabilities, young people, the elderly).
- Guide the location and design of new street, pedestrian, bicycle, and trail infrastructure.

The City of Portland's 2035 Transportation System Plan, adopted in March 2020, is the City's 20-year plan to guide transportation policies and investments in Portland. The TSP helps implement the City's 2035 Comprehensive Plan. The 2035 TSP lists the Columbia River bridge replacement and interchange improvements as a financially constrained project to be completed within 1 to 10 years.

The IBR Program would provide transportation infrastructure to support the land use plans for Hayden Island. Specifically, the project would support the City of Portland's Hayden Island Plan, adopted in 2009, which seeks to protect the interests of the island, provide guidance to the former CRC project, as well as ensure that the amount and type of development on Hayden Island would not overload the proposed freeway improvements. The Hayden Island Plan was developed during the former CRC project and is referenced in its plan. The IBR Program's Modified LPA is consistent with the Hayden Island plan, supporting specific goals such as:

- Light-rail transit to, and a station on, Hayden Island.
- A light-rail transit alignment adjacent to the west side of I-5 instead of a separate alignment to minimize the barrier effects.
- Access to local street systems south of North Portland Harbor without using the freeway.

The IBR Draft SEIS evaluates consistency with additional local plans in Chapter 3.4- Land use and Economics, which can be found online at: https://www.interstatebridge.org/media/wy2hwg4g/chapter-3-04-land-use-and-economic-activity.pdf.

Consistency with RTP Investment Priorities

Metro staff assessed how the proposed MTIP project amendment advances the RTP investment priorities of Mobility Options, Thriving Economy, Safe System, Equitable Transportation, and Climate Action and Resilience and how the project impacts the package of MTIP investments towards those RTP goals. Metro staff completed a similar assessment as part of the initial evaluation and adoption process for the 2021-24 MTIP. (Note: Thriving Economy was recently included in the 2023 RTP but was not part of the 2024-27 MTIP assessment process. It has been included in this assessment.)

Metro staff used three main tools to evaluate the 2024-2027 MTIP investment package and to prepare the PAE:

- the Regional Travel Demand Model (RTDM).
- The Motor Vehicle Emissions Simulator (MOVES) Model; and
- Geographic Information Systems (GIS).

The outputs for this analysis are for the entire area within the Metro jurisdiction or Metropolitan Planning Area (MPA) and the year modeled was 2027 (the last year of the current 2024-27 MTIP). This analysis does not include the level of detail covered by a full corridor study which typically includes current and future operating characteristics of the corridor and detailed impacts of the project at the corridor level.

In addition to evaluating the three projects included in the proposed amendment, staff performed a full build analysis of the IBR Program, even though a full build won't be completed during the current MTIP timeframe, to ensure consistency with the RTP. Table 1 summarizes the evaluation results based on the RTP investment priorities. An analysis by RTP investment priority for each performance measure, with detailed definitions, is outlined in summary tables that follow.

Table 1. Summary of RTP Investment Priorities Evaluation – Interstate Bridge Replacement Project Complete Build

RTP Priority	Measure Description	Model Result
	1. Weighted average household access to jobs within a 30-minute driving commute or 45-minute transit commute.	0
Equitable Transportation	2. Weighted average household access to community places within a 20-minute driving commute or 30-minute transit commute.	0
	3. Miles and percentage of active transportation infrastructure added to the completeness of the regional active transportation work.	0
	1. Projected daily metric tons of greenhouse gas emissions reduction per capita.	0
Climate Action	2. Projected daily metric tons of greenhouse gas emissions reduction	0
and Resilience	3. Miles and percentage of active transportation infrastructure added to the completeness of the regional active transportation work.	+
	1. Amount of investment of safety activities which address fatalities and serious injuries crashes.	۸
Safe System	2. Amount of investment of safety activities which address fatalities and serious injuries crashes on high injury corridors, equity focus areas, and high injury corridors in equity focus areas.	٨
Mahilitu Outiona	1. Mode split	0
Mobility Options	2. Miles traveled by mode	0
Thriving	1. Is the project located in an area that is prioritized for future job growth?	+
Economy	2. Is the project located in an area with higher-than-average job activity?	+

Key:

- o neutral or no significant change
- ^ not directly addressing the region's desired outcome; has other related benefits
- + trending towards the desired outcome for that priority
- trending away from the desired outcome for that priority
- +/o potential to trend toward desired outcome but still to be determined until further details are known
- -/o risk to trend away from desired outcome but still to be determined until further details are known

Equitable Transportation

To measure equity in the context of the project, Metro staff evaluated whether the project increases access to travel options in Equity Focus Areas and how the project has been identified as a priority transportation improvement by BIPOC and low-income persons or communities.

Desired Outcome	Performance Measures	IBR Completion
Increase Access to jobs	Weighted average household access to jobs within a 30-minute driving commute or 45-minute transit commute.	Results from the RTDM indicates a very small decrease (<-1%) of access via auto trips to medium wage jobs across the entire MPA area, non-equity focus areas, and equity focus area. There is a small increase (<1%) in access to medium wage jobs via transit across all areas.
Increase access to community places	2. Weighted average household access to community places within a 20-minute driving commute or 30-minute transit commute.	RTDM results indicate no change in access to community places such as grocery stores, medical facilities, and community gathering places.
Complete any gaps in the active transportation system in an equity focus area	3. Miles and percentage of active transportation infrastructure added to the completeness of the regional active transportation work.	Per GIS analysis, some gaps will be completed in this project in the vicinity of Marine Drive and on Hayden Island surface streets. While the areas studied in Oregon are not located in an Equity Focus Area, they are in Equity Focus Areas on the Washington side of the IBR Program.

Climate Action and Resilience

To measure climate action and resilience in the context of the project, Metro staff evaluated how the project aligns with Metro's RTP climate goals and polices and whether the project includes elements that will increase access to and use of multi-modal options or increase motor vehicle travel.

Desired Outcome	Performance Measures	IBR Completion
Reduction of greenhouse gas emissions per capita	Projected daily metric tons of greenhouse gas emissions reduction per capita.	Using a combination of the RTDM and MOVES, results indicate a very small decrease in GHG per capita (-0.3%) at the regional level.
Reduction in daily metric tons of greenhouse gas emissions	2. Projected daily metric tons of greenhouse gas emissions reduction	Using a combination of the RTDM and MOVES, results indicate a very small decrease in daily tons of GHG (12,566 to 12,533) at the regional level.
Improves system completeness of active transportation network	3. Miles and percentage of active transportation infrastructure added to the completeness of the regional active transportation work.	Gaps in the bicycling network are addressed in the Marine Drive Package through a new path that connects Marine Drive to Expo Road. Additionally, gaps in the pedestrian network are addressed in Hayden Island Surface Streets and Marine Drive Interchange.

Safe System

To measure safety in the context of the project, Metro staff evaluated whether the project includes scope elements, including recognized safety counter measures, to address documented safety issues that contribute to crashes that result in fatal and serious injuries. Metro staff also assessed the scope of work against the region's high injury corridor network to better understand whether the project is addressing the locations with a propensity of crashes leading to fatalities and serious injuries. IBR project staff provided additional relevant safety related information that is summarized in the table below.

Desired Outcome	Performance Measures	IBR Completion
Increase level of investment to address fatalities and serious injuries	Amount of investment of safety activities which address fatalities and serious injuries crashes.	A GIS analysis of the project indicates Marine Dr & MLK Blvd. are high-injury corridors. Neither of these projects are included at this time in the current proposed amendment but are part of the full build. The IBR Program Modified LPA proposes substantial changes to the configuration of the roadway network within the five-mile corridor, including but not limited to new or removed ramps, reconfigured interchanges, and access point changes. These changes would make I-5 more consistent with modern design standards and would reduce weaving, thereby improving safety According to information from the IBR Program, the IBR Program is anticipated to reduce crashes by 13-17% in 2045 compared to the No-Build Alternative.
Increase level of safety investment on high injury corridors, and high injury corridors in equity focus areas	2. Amount of investment of safety activities which address fatalities and serious injuries crashes on high injury corridors, equity focus areas, and high injury corridors in equity focus areas.	Many of the projects within the IBR Program, including those in the proposed amendment, are not located in a high injury corridor. Nor are the projects located in an equity focus area on the Oregon side of the project. However, the project is within an equity focus area on the Washington side.

Mobility Options

To measure mobility options in the context of the project, Metro staff assessed whether the project influences changes to mode split (e.g. driving, transit, bike) and miles traveled by mode per capita.

Desired Outcome	Performance Measures	IBR Completion
Achieve a more equitable mode split amongst driving, transit, and biking	1. Mode split	Results from the RTDM indicate no significant change in mode split.
Decrease miles traveled by vehicle and increase miles done by bike and transit	2. Miles traveled by mode	RTDM results indicate a very small increase in personal vehicle driver miles traveled (0.13%), personal vehicle passenger miles traveled (0.07%), and pedestrian miles traveled (0.09%). Model results show a small decrease in bike miles traveled (-0.11%) and transit miles traveled (-0.02%).

Thriving Economy

To measure economic vitality in the context of the project, Metro staff assessed whether the project is in an area that is prioritized for future job growth and if the project is in an area with higher-than-average job activity.

Desired Outcome	Performance Measures	IBR Completion
Increase transportation option in areas prioritized for future job growth.	1. Project is located in an area that is prioritized for future job growth	Multiple census tracts that are considered regionally significant industrial areas are located within the project area. Within the project area there are identified station communities, planned high-capacity transit, corridors, and employment land all identified in the 2040 Growth Concept Map.
Increase transportation options in an area with higher-than-average job activity	2. Project is located in an area with higher-than-average job activity	According to Metro's 2022 Economic Value Atlas, the Census Tracts that are within the project area have job activity that are greater than the regional average. The two Census Tracts have a score of 8.9 and 5.2 compared to the regional average of 5.0.

Potential Construction Packages

Major construction is anticipated to begin with the Columbia River bridge and approaches and be sequenced throughout the program area. Early construction activities may occur in the program area to prepare for the bridge replacement work. Construction of the packages identified could last more than 10 years.

All projected cost ranges listed include design, right of way, and construction, and are based on the program's 2023 financial plan and will be updated as additional detail is identified and cost estimates are refined. Sequencing, packages, delivery methods, and delivery agency listed below are initial proposals and may change as the program advances toward construction. The program is continuing to seek feedback and identify opportunities to create smaller contract packages.

Bridge Approaches | 6-7 years | \$720 million - 1.1 billion | Design Build or Progressive Design Build | WSDOT

Construct roadways and bridges that connect existing I-5 to the Columbia River replacement bridge. In Washington, this includes reconstruction of the SR-14 and City Center interchange and reconstructing I-5 up to Evergreen Boulevard, including a structure for an active transportation-centered community connector/lid in Washington. This includes connecting the new replacement bridge to the existing I-5 alignment and modifying on- and off-ramps to and from Hayden Island. Includes construction of shoulders on I-5 to accommodate bus on shoulder and improve safety, and construction of active transportation connections between the shared-use-path on the replacement bridge and the local streets in Oregon and Washington. Also constructs the structures for the light rail extension from the Columbia River Bridge to the terminus at Evergreen Blvd. and the structures that support the new transit stations at the waterfront and Evergreen Blvd.

Bus and BRT Infrastructure | 1-1.5 years | \$3-5 million | Design Bid Build | C-TRAN

Install bus shelters along C-TRAN bus routes that will be adjusted to improve transit system connections.

Bus and Bus Rapid Transit Infrastructure | Less than a year | \$30-45 million | Two-step Sealed Bid | C-TRAN

To purchase new C-TRAN express buses for additional express bus services.

Columbia River Bridge | 5-6 years | \$1-1.5 billion | Design Build or Progressive Design Build | WSDOT

Construct the replacement I-5 bridge downstream of the existing bridge shore to shore over the Columbia River. This will include the construction of two new bridges to accommodate highway, active transportation and transit modes. Light Rail Track, System and Stations package will construct rail and system needs for transit. Includes construction of shoulders on I-5 to accommodate Bus on Shoulder and improve safety.

Columbia River Bridge Removal | 2.5-3 years | \$120-180 million | Design Bid Build | WSDOT/ODOT

Remove the existing Interstate Bridge, including foundations below the riverbed, after traffic is shifted onto the replacement bridge.

Evergreen Boulevard Bridge | 2.5-3 years | \$9-14 million | Design Bid Build | WSDOT

Replace the East Evergreen Boulevard overpass that crosses I-5 to allow for construction of follow-on projects and the realignment of I-5 during and after construction. Work on mainline I-5 under Evergreen Boulevard will occur as part of the Bridge Approaches package.

Evergreen Park and Ride | 1-1.5 years | \$90-140 million | Design Build | WSDOT

Potential Park and Ride locations are being studied in the environmental process. Decisions regarding the locations of Park and Rides will be made after the public comment period of the Draft Supplemental Environmental Impact Statement. The program is considering options that include zero, one, or two Park and Rides. Package reflects conceptual underground multi-story parking structure.

Hayden Island Package A | 2-2.5 years | \$55-85 million | CM/GC or Design Bid Build | ODOT/TriMet

Construct the structure that supports the light rail line extension and the new transit station on Hayden Island. This package also includes the I-5 southbound off-ramp adjacent to the light rail line and the on-ramp to southbound I-5.

Hayden Island Surface Streets | 2-2.5 years | \$53-80 million | Design Bid Build | ODOT

Construction of the new extension of North Tomahawk Island Drive connection under the new I-5 alignment. Realignment of North Hayden Island Drive, North Jantzen Drive and North Center Avenue. Construction of the local road connection to the new local arterial bridge over North Portland Harbor. Includes construction of connections to active transportation and the shared use path on the replacement Columbia River Bridge.

Light Rail Overnight Facility | 1.5-2 years | \$9-14 million | CM/GC | TriMet

Includes the construction of a new light rail overnight facility to provide storage and facilities for cleaning and minor maintenance for vehicles that will be purchased to support the extension of light rail as part of the IBR program. The location for this facility is still under consideration.

Light Rail Track, System and Stations | 3 years | \$190-290 million | CM/GC | TriMet

Construct light rail tracks and systems from Expo Road to Evergreen Boulevard. This also includes construction of three new transit stations at Hayden Island, Vancouver waterfront and Evergreen Boulevard and reconstruction of the existing station at Expo Center.

Light Rail Vehicle Procurement | \$190-290 million | Two-step Sealed Bid | TriMet

TriMet will purchase new light rail vehicles to provide service along the extension of the existing light rail line and to the new stations identified.

Marine Drive Interchange | 3-3.5 years | \$240-360 million | CM/GC or Design Build | ODOT

Reconstruct the Marine Drive interchange with I-5. Work includes construction of on- and off-ramps between Marine Drive and I-5, construction of the on- and off-ramps leading to the arterial bridge and the partial interchange at Hayden Island, construction of local roadway and bike/pedestrian facilities under I-5 to connect Expo Road to North Marine Drive, relocation of ramps between MLK Blvd and Marine Drive, and connections to local roads and construction

of active transportation facilities. This package completes reconstruction of the Marine Drive Interchange, which begins with Marine Drive Package A.

Marine Drive Package A | 2-2.5 years | \$38-58 million | CM/GC or Design Build | ODOT/TriMet

Raise the section of Marine Drive immediately west of I-5, including the ramps, to accommodate the new alignment of light rail under Marine Drive. Work includes connections to I-5/Marine Drive, new light rail guideway, and revisions to N Expo Road, including active transportation connections.

Mill Plain | 3.5-4 years | \$550-830 million | Design Build | WSDOT

Reconstruct the Mill Plain Interchange, including the northbound off-ramp to Fourth Plain Boulevard and replace the I-5 bridges over McLoughlin Boulevard. Includes construction of shoulders on I-5 to accommodate Bus on Shoulder and improve safety, and construction of active transportation facilities along Mill Plain Boulevard and Fourth Plain Boulevard.

North Expo Road | 2-2.5 years | \$14-21 million | Design Bid Build | ODOT

Construct shared-use-path along the west edge of North Expo Road between the Expo Center light rail station and North Victory Boulevard. The package includes a long retaining wall on the west side, but no transit elements.

North Portland Harbor Bridge Removal | 2-2.5 years | \$32-48 million | Design Bid Build | ODOT

Remove the existing I-5 bridges over the North Portland Harbor.

North Portland Harbor Transit Bridge | 2-2.5 years | \$35-53 million | CM/GC - TriMet

Construct the bridge that will support the light rail extension across the levee and over the North Portland Harbor to Hayden Island where it connects with the light rail structure in Hayden Island Package A.

Oregon I-5 Northbound | 3-3.5 years | \$700 million- \$1 billion | CM/GC or Design Build | ODOT

Reconnect ramps from North Victory Boulevard, North Denver Avenue to northbound I-5 and construct the ramp from Marine Drive over the North Portland Harbor to northbound I-5. This package also includes the ramp from Hayden Island to northbound I-5, the local arterial bridge with active transportation facilities over North Portland Harbor to Hayden Island and the northbound I-5 bridge over the North Portland Harbor. Includes construction of shoulders on I-5 to accommodate Bus on Shoulder and improve safety.

Oregon I-5 Southbound | 3-3.5 years | \$640-960 million | CM/GC or Design Build | ODOT

Constructs the I-5 southbound alignment between the Columbia River replacement bridge and Victory Boulevard. The package includes the new I-5 bridge southbound over the North Portland Harbor, portions of the Marine Drive interchange and the braided ramp between Marine Drive and Victory Boulevard. Includes construction of shoulders on I-5 to accommodate Bus on Shoulder and improve safety.

Oregon Station Finishes | 1-1.5 years | \$1-2 million | Design Bid Build | TriMet

Includes non-structural elements at one reconstructed station and one new light rail station in Oregon including way finding, ticketing, vending, signage, furniture, wind barriers, enclosures etc.

Pre-completion Tolling Signage | less than one year- \$5-\$6M | Design Bid Build | WSDOT/ODOT

Pre-completion tolling is targeted to start as early as the start of construction. To prepare for this, tolling signage will be installed throughout the corridor.

Ruby Junction TriMet Facility | 2 years | \$45-65 million | CM/GC | TriMet

Modify TriMet's existing Ruby Junction facility in Gresham to have enough space to maintain the additional light rail vehicles needed for the extension of the existing light rail line that is part of the IBR program.

65th Street C-TRAN Operations & Maintenance Bus Facility | 1-1.5 years | \$8-12 million | Design Bid Build | C-TRAN

Improvements to C-TRAN's existing operations and maintenance facility to maintain new express buses needed to accommodate expected increased ridership resulting from IBR program transit investments.

SR 14 Package A | 2.5-3 years | \$8-12 million | Design Bid Build | WSDOT

Install permanent retaining walls along the east side of I-5, temporarily adjust SR-14 and City Center existing ramps including their connections to local streets. This package facilitates the temporary shift of I-5 traffic eastward to ensure continued movement of traffic during construction of the I-5 Bridge Approaches contract.

Washington North | 4-4.5 years | \$180-270 million | Design Build | WSDOT

Constructs the new braided ramp along southbound I-5 between SR 500 and Fourth Plain Blvd. Package includes replacing the 29th Street and 33rd Street overpasses, including active transportation elements. Includes construction of shoulders on I-5 to accommodate Bus on shoulder and improve safety.

Waterfront Park and Ride | 1-1.5 years | \$30-45 million | Design Build | WSDOT

Potential Park and Ride locations are being studied in the environmental process. Decisions regarding the locations of Park and Rides will be made after the public comment period of the Draft Supplemental Environmental Impact Statement. The program is considering options that include zero, one, or two Park and Rides. Package reflects conceptual above ground multi-story parking structure.

Washington Station Finishes | 1-1.5 years | \$1-2 million | Design Bid Build | WSDOT

Includes non-structural elements on the two new light rail stations in Washington including way finding, ticketing, vending, signage, furniture, wind barriers, enclosures etc.

Attachment 4 - Potential Construction Phase Packages

Potential Construction Packages

All packages are draft, conceptual packages and subject to change.

OREGON

For ADA (Americans with Disabilities Act) or Civil Rights Title VI accommodations, translation/interpretation services, or more information call 503-731-4128, TTY 800-735-2900 or Oregon Relay Service 7-1-1.

WASHINGTON

Accommodation requests for people with disabilities in Washington can be made by contacting the WSDOT or by calling toll-free, 855-362-4ADA (4232). Persons who are deaf or hard of hearing may make a request by calling the Washington State Relay at 711. Any person who believes his/her Title VI protection has been violated, may file a complaint with WSDOT's Office of Equity and Civil Rights (OECR) Title VI Coordinator by contacting (360) 705-7090.

Memo

Date: Friday, May 30, 2025

To: Transportation Policy Alternatives Committee and Interested Parties

From: Grace Cho, Principal Transportation Planner

Jean Senechal Biggs, Resource Development Section Manager

Subject: 2028-2030 Regional Flexible Fund Step 2 – Allocation Package Options and Draft

Legislative Materials

Getting to a Step 2 Staff Recommendation and Allocation Decision

The 28-30 Regional Flexible Fund Step 2 allocation process is nearing an end. Metro staff are preparing to develop a Step 2 staff recommended allocation package for TPAC consideration and action on July 11, 2025.

At the upcoming TPAC meeting on June 6th, Metro staff seek feedback from TPAC members on three (3) RFFA Step 2 allocation package options, as well as draft legislative materials. Metro staff will also present an update on the RFFA funding forecast which now projects a Step 2 allocation of approximately \$49 million.

Metro staff will carry forward TPAC's input to the Metro Council work session on June 17th and the JPACT meeting on June 26th.

RFFA Step 2 Allocation Package Options: Each package totals approximately \$49 million, which is the estimated amount of the Regional Flexible Funds available in the 28-30 cycle. (See tables 1-3 on pages 4 and 5.)

To develop the package options, Metro staff used an assessment applying the four components to inform the development of a Step 2 allocation package:

- 1. Meeting the 2028-30 RFFA Program Direction objectives, including advancing RTP goals, investing across the region, and honoring prior commitments of Regional Flexible Funds, and funding leverage
- 2. Project technical scores, based on the results of the Outcomes Evaluation
- 3. Public support, based on the results of the public comment project ratings
- 4. Input from TPAC and JPACT on the illustrative concepts, along with additional considerations shared in their May 2025 meetings

The assessment includes a placeholder for a fifth component to account for county coordinating committees and City of Portland priorities, which Metro expects to receive around June 3, 2025.

The assessment results are provided in **Attachment 1**.

Draft Legislative Materials: To prepare for the July committee actions, **Attachment 2** shares a preview of the legislative package with a draft Resolution and draft Conditions of Approval.

The adopting Resolution establishes policy and expresses intent on the Step 2 Regional Flexible Fund Allocation to projects. It identifies the awarded projects and the total amount awarded. The Resolution also includes the allocation of funds to Step 1A and Step 1B for payment towards debt service and regional planning and program investments. [Note: Approval of the Step 1A.1 new project bond will occur through action on a separate resolution.]

Conditions of approval are mechanisms to ensure Regional Flexible Fund projects are planned, designed and built consistent with the project applications approved by JPACT and the Metro Council, meet federal regulations, and with regional program policies.

Discussion Items

- 1. Coordinating committee and City of Portland priorities were not available at the time of this mailing. TPAC reps are asked to share their priorities to the committee.
- 2. Option 1 best reflects TPAC's May 2025 feedback to prioritize the results of Outcomes Evaluation (technical scores). Is this option the foundation of a package that TPAC would recommend to JPACT?
- 3. Are there questions regarding the Step 2 allocation draft legislative materials?

Background & Current Place in Development:

The 28-30 Regional Flexible Fund Step 2 allocation process began in Fall 2024 with a call for projects. Metro received 24 applications requesting a total of just over \$140 million in Regional Flexible Funds.

Metro conducted two technical evaluations of the proposed projects. The Outcomes Evaluation assessed how well each project advances the 2023 Regional Transportation Plan goals. The Project Risk Assessment identified the potential project delivery challenges each project may encounter as a federal aid project. Metro issued the final results of the technical evaluations on April 15, 2025.

Metro conducted a five-week public comment period from March 26th through April 30th. Participants navigated to individual projects in an interactive online map and once the project of interest selected, prompted to participate in a survey rated the project on a scale of 1 (no support) to 5 (high support). Participants also had the option to provide written comments. Metro issued the Step 2 public comment report on May 16, 2025.

At the May meetings of TPAC and JPACT, Metro staff presented different concepts or factors with which to build Step 2 package options. Input from the regional committees included:

- Weigh equally the five Regional Transportation Plan (RTP) goals in the development of the Step 2 package, rather than prioritizing only one or more goals, to remain consistent with the adopted Program Direction
- Prioritize projects that have other funding committed and that the Regional Flexible Funds will help close the project's funding gap
- Consider the needs of the small jurisdictions, where the ability to secure other transportation funding is scarce or simply not possible, and the Regional Flexible Funds are the only likely source for capital investments
- Support developing a pipeline of candidate projects with both project development and construction awards
- Provide the methodology for creating the Step 2 allocation packages and outline how each factor was utilized as part of the selection for inclusion in a package
- Consider the potential to leverage adjacent investments funded through Regional Flexible Fund Step 1A.1 bond
- Consider the economic development potential a Step 2 application can help unlock

Step 2 Estimated Available Funds Update

As part of the competitive Step 2 allocation process, Metro staff develops a revenue estimate of available Regional Flexible Funds at two different points of the process. The first estimate of Regional Flexible Funds precedes the opening the Call for Projects to give potential applicants an idea of the amount of funding available. The second estimate of Regional Flexible Funds is ahead of the development of the Step 2 allocation package to inform the staff recommended package.

This spring, Metro staff reviewed the Regional Flexible Fund revenue estimates according to the most recent annual federal appropriations. The updated forecast shows a total estimate of Regional Flexible Funds available for federal fiscal years 2028 – 2030 at approximately \$161 million. This is an increase of \$8 to \$11 million in Regional Flexible Funds than the spring 2024 estimate of \$150 to \$153 million. The increase in revenues can be attributed to:

- 1) higher Regional Flexible Funds carryover of unallocated funds from previous funding cycles; and
- 2) an updated ODOT forecast of Congestion Mitigation and Air Quality (CMAQ) formula funds, sub-allocated to the Metro as the MPO and one of the federal funds programs to comprise the Regional Flexible Funds.

The Regional Flexible Fund carryover reflects the difference between Metro's Regional Flexible Fund estimate as of summer 2022 and the annual federal appropriations through today. The mildly conservative Regional Flexible Fund revenue estimates for previous fiscal years leading up to 2025 relative to the annual federal appropriations yielded \$6 million in unallocated Regional Flexible Funds over the near three-year timeframe.

An updated ODOT forecast of CMAQ formula funds made available in spring 2025 resulted in an increase of approximately \$700,000 of CMAQ funds annually to add to the Regional Flexible Funds beginning in 2025. Part of this increased amount is now accounted for in the calculation of the carryover of unallocated Regional Flexible Funds through 2027 into the 2028-30 funding cycle. With this increased amount of CMAQ, Metro can also assume a similar increased level of funding for years 2031 through 2039. Metro staff continues to use a moderately conservative approach in estimating the CMAQ formula funds available by not projecting any increased growth to the CMAQ sub-allocation beyond 2025.

Metro staff initially assumed an advance of Regional Flexible Funds available in years 2028 through 2030 to apply to debt servicing beginning with the first bond issuance in year 2026 or 2027. However, with the additional Regional Flexible Funds estimated to be available, there will be adequate funding to support initial payments to the Step 1A.1 bond without having to advance funding capacity from years 2028-30.

The change in forecasted funds unencumbers approximately \$7 million of advanced Regional Flexible Funds from the Step 2 allocation. Metro staff proposes to utilize the increase from the updated revenue estimate to offset the amount of funds needed from Step 2 for debt service for this cycle and allocate \$49 million in the Step 2 competitive process, up from the \$42 million initially estimated.

Step 2 Allocation Package Options

Building a Step 2 allocation package among a competitive pool of applications is challenging. Metro staff's assessment across the four components—Program Direction objectives, technical evaluation, public comment, and illustrative concepts input from TPAC and JPACT—highlights the individual and different strengths of each Step 2 application project. Tables 1 - 3 present three Step 2 allocation package options. Each package option emphasizes various parts of the four components.

Allocation Package Option 1

Allocation Package Option 1 emphasizes high performance across the four components: Program Direction, technical evaluation, public support, and responsiveness to concepts input. Most Option 1 projects met more than half of the objectives of the Program Directions and Concepts and projects were within the top 10 scoring projects in the Outcomes Evaluation. Option 1 is most consistent with input from TPAC and JPACT to respect the outcome of the technical evaluation results.

Table 1. 28-30 Regional Flexible Fund Step 2 - Allocation Package Options 1

Project Name	Applicant	Requested Amount
NE 223rd Ave: NE Glisan to NE Marine Dr Safety Corridor Planning	Multnomah County	\$897,300
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland	\$7,577,698
NW Division Street Complete Street: Gresham-Fairview Trail - Birdsdale Avenue	Gresham	\$4,067,495
NE MLK Jr Blvd Safety and Access to Transit	Portland	\$4,879,517
Cedar Mill Better Bus and Access to Transit Enhancements	Washington County	\$5,252,300
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland	\$7,732,932
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks & Recreation District	\$6,000,000
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	\$8,721,932
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	\$2,707,217
	Total	\$47,836,391

Allocation Package Option 2:

Allocation Package Option 2 emphasizes high performance in the Outcomes Evaluation and the Program Direction objectives while taking into consideration JPACT input from the Illustrative Concepts to include projects that complement recently built, currently active, or Step 1A.1 bond capital transportation projects. All Option 2 projects scored in the top half (top 12) of applications in the Outcomes Evaluation and a majority meet over half of the Program Direction objectives.

Table 2. 28-30 Regional Flexible Fund Step 2 – Allocation Package Options 2

Project Name	Applicant	Requested Amount
NE 223rd Ave: NE Glisan to NE Marine Dr Safety Corridor Planning	Multnomah County	\$897,300
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland	\$7,577,698
NW Division Street Complete Street: Gresham-Fairview Trail - Birdsdale Avenue	Gresham	\$4,067,495
Cedar Mill Better Bus and Access to Transit Enhancements	Washington County	\$5,252,300
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland	\$7,732,932
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks & Recreation District	\$6,000,000
Beaverton Downtown Loop: SW Hall Blvd - 3rd to 5th St	Beaverton	\$4,649,687
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	\$12,026,118
	Total	\$48,203,530

Allocation Package Option 3

Allocation Package Option 3 emphasizes high performance in the Outcomes Evaluation, the public comment project ratings, and Program Direction objectives. The majority of Option 3 projects met more than half of the objectives of the Program Direction and are responsive to TPAC and JPACT input on the Illustrative Concepts. Option 3 gives additional consideration to the public comment by including the highest rated Step 2 application that also performed highly in the technical evaluation and meets the Program Direction objectives.

Table 3. 28-30 Regional Flexible Fund Step 2 – Allocation Package Options 3

Project Name	Applicant	Requested Amount
NE 223rd Ave: NE Glisan to NE Marine Dr Safety Corridor Planning	Multnomah County	\$897,300
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland	\$7,577,698
NW Division Street Complete Street: Gresham-Fairview Trail - Birdsdale Avenue	Gresham	\$4,067,495
NE MLK Jr Blvd Safety and Access to Transit	Portland	\$4,879,517
Beaverton Creek Trail: Merlo Road Improvements	Washington County	\$6,640,700
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks & Recreation District	\$6,000,000
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	\$8,721,932
North Dakota Street (Fanno Creek) Bridge Replacement	Tigard	\$8,000,000
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	\$2,707,217
	Total	\$49,491,859

Next Steps

Table 4. outlines the next steps in the 28-30 Regional Flexible Fund Step 2 allocation process.

<u>Table 4. 2028-2030 Regional Flexible Funds Step 2 – Next Steps and Key Dates</u>

Activity	Date
Coordinating committee and City of Portland priorities submission (optional)	June 3, 2025
 TPAC: 28-30 Regional Flexible Funds Step 2 allocation package options Opportunity to provide input on preferred Step 2 allocation package to inform a Metro staff recommendation. Draft Step 2 legislation 	June 6, 2025
Metro Council: Updates on Step 2 and input to develop staff recommendation	June 17, 2025
 JPACT: 28-30 Regional Flexible Funds Step 2 allocation package options Opportunity to provide input on preferred Step 2 allocation package to inform a Metro staff recommendation. Draft Step 2 legislation 	June 26, 2025
TPAC: Staff recommendation on 28-30 RFFA Step 2 allocation package. Request recommendations to JPACT.	July 11, 2025
JPACT: Carry forward TPAC recommendation. Request action on 2028-2030 RFFA Step 2 and recommendation to Metro Council adoption	July 17, 2025
Metro Council: Adoption of 2028-2030 Regional Flexible Fund Step 2 Allocation	July 31, 2025

Attachment 1 – 28-30 Regional Flexible Fund Step 2: Allocation Package Development Assessment Rubric

Program Direction Objectives

Strategic Regional Funding Approach

- Eligible in the Strategic Regional Funding Approach

Honors prior commitments

- Received previous Project Development allocation from RFFA?

Leverages additional funding

- Greater than the local minimum match?
- Is there another previous allocation from a different program?

State Implementation Plan (SIP) commitments

- Is a CMAQ eligible project

Achieve multiple transportation policy objectives

- See Technical Evaluation

Efficient and effective use of federal transportation funds

- Overall Risk Assessment rating is at or above average (25.5)

Technical Evaluation

Technical evaluation score greater than 50

Public Comment

Received project rating response above average (4.15)

Concepts Input

Complementary project to a currently active or recently completed larger or adjacent capital transportation project

Project Readiness

- Project Management Risk Assessment score is at or above average (8)

Limited local funding options

- RFFA is the most accessible transportation funding source

Economic development potential

- Higher than average Thriving Economy score (50)

Coordinating Committee/City of Portland Identified Priority

Identified as a coordinating committee or City of Portland priority

Step 2 Allocation Package Specific Criteria

Program Direction: Invests in all parts of the region

- Investment in the four main areas without sub-allocation consideration

Concepts Input: Project Pipeline

- Package includes project development application(s)

	Project Activity Applicant Coordinating Committee		Overall		Total Cost	Technical Evaluation	Public Comment	Program Direction Objectives Total	Concepts Input Total	Coordinating Committee or City of Portland Priority	Total Building Components	
Project	Activity	Applicant	Coordinating Committee	Score	Flexible Fund Request	Estimate	Overall score above 50	Rating above average (4.15)	Meets more than half of the objectives	Meets more than half of the concepts	Indicated submitted	Number of components addressed
									Objectives	subcomponents	TBD	auuresseu
NE 223rd Ave: NE Glisan to NE Marine Dr Safety Corridor Planning	Project Development	Multnomah County	East Multnomah County	81.41	\$ 897,300	\$ 1,000,000	Yes	No	No	No		1 of 4

BEFORE THE METRO COUNCIL

FOR THE PURPOSE OF ALLOCATING \$142)	RESOLUTION NO. 25-XXXX
MILLION OF REGIONAL FLEXIBLE FUNDING)	
FOR THE YEARS 2028-2030, PENDING)	Introduced by Chief Operating Officer
ADOPTION OF THE 2027-2030 MTIP)	Marissa Madrigal in concurrence with
)	Council President Lynn Peterson

WHEREAS, Metro is the regional government responsible for regional land use and transportation planning under state law and the federally-designated metropolitan planning organization (MPO) for the Portland metropolitan area; and

WHEREAS, approximately \$161 million is forecast to be appropriated to the metropolitan region through the federal Surface Transportation Block Grant Program (STBG) and Congestion Mitigation – Air Quality (CMAQ) transportation funding programs; and

WHEREAS, the Metro Council and Joint Policy Advisory Committee on Transportation (JPACT) are authorized per federal regulation 23 CFR 450.324 to allocate these funds to projects and programs in the metropolitan region through the Regional Flexible Fund Allocation (RFFA) process; and

WHEREAS, the Metro Council and JPACT have provided policy guidance to Metro staff to conduct a two-step allocation process to Region-wide Program Investments and Capital Project Investments for funding by Metro Resolution No. 24-5415, For the Purpose of Adopting the 2028-2030 Regional Flexible Funds Program Direction for the Portland Metropolitan Area, adopted July 11, 2024; and

WHEREAS, the Metro Council and JPACT have committed by Metro Resolution No. 24-5415 to the allocation of \$92.3 million in Regional Flexible Funds for Step 1A, High Capacity Transit Bond Repayments, and Step 1B Region-wide Programs and Regional Planning Investments and as shown in Exhibit A: and

WHEREAS, as adopted by Metro Resolution No. 24-5415, the Metro Council and JPACT directed Metro staff to develop a new Regional Flexible Fund bond proposals with an expanded focus on transit and is as part of Metro Resolution No. 25-XXXX; and

WHEREAS, pending action on Metro Resolution 25-XXXX, the remaining 2028-2030 Regional Flexible Funds are for Capital Project Investments as known as Step 2; and

WHEREAS, criteria used to select projects for the 2028-2030 RFFA Step 2 followed policy direction adopted by Metro Council in the 2023 Regional Transportation Plan by Ordinance No. 23-1496, For the Purpose of Amending the 2018 Regional Transportation Plan (RTP) to Comply with Federal and State Law and Amending the Regional Framework Plan; and

WHEREAS, the 2023 RTP directed the region to invest in transportation projects which advance five goal areas: equitable transportation, safe system, climate action and resilience, mobility options and thriving economy; and

WHEREAS, in addition to the 2023 RTP direction, the allocation of Regional Flexible Funds for Capital Projects Investments meet the adopted objectives of Metro Resolution 24-5415, the public comments received on the proposed capital investments, and local prioritization; and

WHEREAS, TPAC and JPACT provided additional input of considerations aside from the RTP goals which include prioritizing projects with other committed funding, considering small jurisdictions ability to secure other funding sources, continue to invest in project development to develop a pipeline of projects, leverage adjacent investments funded through Resolution 25-XXXX (Step 1A.1 bond proposal), and economic development potential; and

WHEREAS, an extensive regional public process provided opportunities for comments on the merit and potential impacts of the project and program applications between March 26 and April 30, 2025, and is summarized in Exhibit C, attached to this resolution; and

WHEREAS, TPAC considered the list of projects and programs recommended for funding by Metro staff, and recommended JPACT forward that list to the Metro Council for adoption; and

WHEREAS, JPACT considered the list of projects and programs recommended by TPAC, attached as Exhibit A, to the Metro Council for adoption with a recommendation to allocate funding consistent with RTP policy direction and the 2028-2030 RFFA Program Direction, and in consideration of local prioritization processes and public comments; and

WHEREAS, JPACT approved this legislation to submit to the Metro Council for adoption; and

WHEREAS, receipt of these funds is conditioned on completion of requirements listed in Exhibit B to this resolution; now therefore

BE IT RESOLVED that the Metro Council hereby adopts the recommendation of JPACT on the programs and projects to be funded through the 2028-2030 Regional Flexible Fund Allocation process as shown in Exhibit A.

ADOPTED by the Metro Council this 31st day of July, 2025.

	Lynn Peterson, Council President	
Approved as to Form:		
Carrie MacLaren, Metro Attorney

2028-2030 RECOMMENDED REGIONAL FLEXIBLE FUND AWARDEE CONDITIONS OF APPROVAL

Conditions of approval are mechanisms to ensure that projects are planned, designed, and built consistent with the project applications as approved by JPACT and Metro Council, with federal regulations and with regional program policies. Projects can be reviewed at any point in the process for consistency with the conditions of approval and action taken if they are not adhered to.

There are two sets of conditions which apply to Regional Flexible Fund-awarded projects: 1) conditions which address all projects; and 2) project-specific conditions.

The conditions for all projects outline expectations pertaining to the use of funds, project delivery, process, etc. The project-specific conditions outline expectations to create the best project possible in accordance to regional program policies and federal regulations. Recognizing that projects are at different stages of development (i.e. some are in planning phases while others are ready for construction), Metro may choose to waive or modify certain conditions for a project based on what is appropriate for the project's stage in development.

Conditions applied to all projects and programs:

- 1. Funding is awarded to the project as outlined in the JPACT-approved and Metro Counciladopted 2028-2030 Regional Flexible Fund Allocation (RFFA). If any project is determined to be unfeasible or is completed without expending all of the Regional Flexible Funds awarded, any remaining Regional Flexible Funds for that project shall revert back to Metro to the regional pool for the 2031-2033 Regional Flexible Fund allocation, to be distributed among the region, per the RFFA Program Direction. Or the project sponsor/local jurisdiction receiving the flexible funds for the project may request reallocation of the funds per the Metropolitan Transportation Improvement Program (MTIP) amendment process. Reallocation may necessitate JPACT and Metro Council approval.
- 2. The award amount is the total amount of Regional Flexible Funds provided to deliver the awarded project as it is defined in the project application and as approved by JPACT and Metro Council. The project sponsor/local jurisdiction is expected to resolve any cost overruns or unexpected costs to emerge. It is understood by the project sponsor/local jurisdiction that Metro and the Regional Flexible Fund program does not have any further financial commitment/responsibility beyond providing the amount awarded.
- 3. Project scopes will include what is written in their project application narrative and project refinements in response to comments. Project schedules and budget will include what is determined during the pre-implementation phase to take place after adoption of the 2028-2030 RFFA. Changes in project scopes, schedules, and budget must be requested and made in writing to the MTIP Project Manager utilizing the amendment procedures adopted in the MTIP (Please see 2024-2027 MTIP Administration section.) Changes in project scopes must be approved by Metro to ensure the original intent of the project is still being delivered.
- 4. All projects will follow the design approach and decision-making process as defined in the <u>Designing Livable Streets and Trails Guide</u>¹ (Metro; 3rd edition; October 2019) and any updates in effect at the time a funding intergovernmental agreement is signed. Other street and trail design guidelines, including those developed by local jurisdictions, the National

¹ https://www.oregonmetro.gov/tools-partners/guides-and-tools/guidelines-designing-livable-streets-and-trails

Association of City Transportation Officials, the Institute of Transportation Engineers, the Oregon Department of Transportation, the American Association of State Highway and Transportation Officials, and the Federal Highway Administration, may also be referred to as long as the design approach and decision making process used are consistent with Metro's guidelines.

- 5. All projects will update local network maps and provide relevant network data to Metro. Metro will provide guidelines on network data submissions upon request. Additionally, all bicycle and pedestrian projects will implement sufficient wayfinding signage consistent with Metro sign guidelines (Ex. Metro's Intertwine Design Guidelines.)² and the Manual on Uniform Traffic Control Devices.
- 6. All projects with ITS elements will be consistent with National ITS Architecture and Standards and Final Rule (23 CFR Section 940) and Regional ITS Architecture. This includes completing a systems engineering process during project development to be documented through the systems engineering form and submitted to Metro for inventory purposes. For further guidance, consult ODOT's ITS compliance checklist.³
- 7. All projects implementing Transportation System Management and Operations (TSMO) elements will provide information to Metro on the TSMO elements for inventory purposes. Metro will provide guidelines on how to provide TSMO data submissions.
- 8. All local jurisdiction/project sponsors shall acknowledge Metro as a funding partner. Acknowledgement will attribute credit to Metro on all project materials (print or electronic), such as reports, newsletters, booklets, brochures, web pages, and social media posts. Attribution on materials must read "Made possible with support from Metro." If marketing is done with audio only, spoken attribution language must be "This project is made possible with support from Metro." The local jurisdiction/sponsor delivering the project will include the Metro logo on all print ads, banners, flyers, posters, signage, and videos. Grantee will include the Metro logo on all marketing and advertising materials, both print and online (size permitting). Metro will provide partners with Metro logos and usage guidelines. Lastly, the local jurisdiction/project sponsor will extend invitations to Metro Councilors to attend events or engagements pertaining to the project.
- 9. All projects will carry out public involvement processes that meet federal Title VI and environmental justice requirements. As appropriate, local data and knowledge shall be used to supplement analysis and inform public involvement. Metro guidelines for public involvement can be found in the Public Engagement Guide Appendix G: Local Engagement and Non-Discrimination Checklist.
- 10. All projects will implement transportation demand management strategies/activities in conjunction with the delivery and opening of the project to enhance the success and performance of the project. Local jurisdiction/project sponsors must request and receive Metro approval to waive the requirement for transportation demand management activities.
- 11. All projects are expected to measure the progress and performance of the RFFA-funded project. Local jurisdictions/project sponsors will identify a set of indicators for data collection and pre-and post-project monitoring. Metro will provide input and feedback into

³ https://www.oregon.gov/odot/Maintenance/Documents/ITS-QualityPlan.pdf

⁴ http://www.oregonmetro.gov/sites/default/files/final draft public engagement guide 112113.pdf

- the indicators and datasets, especially to help respond to regional transportation performance measures. Indicators can be determined during the pre-implementation phase of the project.
- 12. Non-Certified agencies receiving Regional Flexible Funds to deliver a project will be expected to work directly with a certified agency or ODOT to determine the administration and delivery of the project. Such agencies will comply with ODOT Local Agency Liaison (LAL) project pre-implementation requirements (e.g. completion of detailed scope of work, budget, project prospectus, etc.). The ODOT LAL requirements are expected to be in the proper format as part of the federal delivery process to facilitate MTIP & STIP programming, initiate development and execution of the Intergovernmental Agreement (IGA), and obligate and expend awarded federal funds for the project.

The awarded lead agency is required to complete or participate in the following project delivery & monitoring activities:

- Kick-off Meeting Coordination.
- MTIP/STIP programming to a realistic project delivery schedule that accounts for meeting funding obligation targets.
- Participate in project coordination meetings and reviews as called for and scheduled.
- Completing project pre-implementation (Pre-Preliminary Engineering or Planning phase obligation) actions and milestones to ensure project proceeds on schedule, including completing a project scoping document with a thorough scope, schedule and budget with milestones and deliverables.
- Complete and execute a project IGA in time to obligate funds as programmed
- Participation in Project Delivery Actions, including attending Project Development Team (PDT) review meetings, completing and submitting project Milestone Reports and Progress Updates, providing any performance measurement project data, providing project delivery status updates, and addressing questions raised by the Metro advisory committees.
- Providing project close-out/final reports and billings.

Conditions applied to specific projects and programs:

To be developed as part of the July 2025 committee materials.

Engagement report

Public comments on proposed projects for Step 2 2028-30 Regional Flexible Funds.

May 2025

Metro respects civil rights

Metro fully complies with Title VI of the Civil Rights Act of 1964 that requires that no person be excluded from the participation in, be denied the benefits of, or be otherwise subjected to discrimination on the basis of race, color or national origin under any program or activity for which Metro receives federal financial assistance.

Metro fully complies with Title II of the Americans with Disabilities Act and Section 504 of the Rehabilitation Act that requires that no otherwise qualified individual with a disability be excluded from the participation in, be denied the benefits of, or be subjected to discrimination solely by reason of their disability under any program or activity for which Metro receives federal financial assistance.

If any person believes they have been discriminated against regarding the receipt of benefits or services because of race, color, national origin, sex, age or disability, they have the right to file a complaint with Metro. For information on Metro's civil rights program, or to obtain a discrimination complaint form, visit oregonmetro.gov/civilrights or call 503-797-1536.

Metro provides services or accommodations upon request to persons with disabilities and people who need an interpreter at public meetings. If you need a sign language interpreter, communication aid or language assistance, call 503-797-1700 or TDD/TTY 503-797-1804 (8 a.m. to 5 p.m. weekdays) 5 business days before the meeting. All Metro meetings are wheelchair accessible. For up-to-date public transportation information, visit TriMet's website at trimet.org.

Metro is the federally mandated metropolitan planning organization designated by the governor to develop an overall transportation plan and to allocate federal funds for the region.

The Joint Policy Advisory Committee on Transportation (JPACT) is a 17-member committee that provides a forum for elected officials and representatives of agencies involved in transportation to evaluate transportation needs in the region and to make recommendations to the Metro Council. The established decision-making process strives for a well-balanced regional transportation system and involves local elected officials directly in decisions that help the Metro Council develop regional transportation policies, including allocating transportation funds. Together, JPACT and the Metro Council serve as the MPO board for the region in a unique partnership that requires joint action on all MPO decisions. This means JPACT approves MPO decisions and submits them to the Metro Council for adoption. The Metro Council will adopt the recommended action or refer it back to JPACT with a recommendation for amendment.

Appendix F: 2028-2030 RFFA applicant community involvement application questions

INTRODUCTION

Every three years, Metro leads a discussion among the region's residents, jurisdictional and public agency staff, and elected officials to select which transportation needs are to be funded with the region's allotment of federal transportation dollars, known as the Regional Flexible Funds Allocation (RFFA).

Regional Flexible Funds comprise of two federal grant programs:

- Surface Transportation Block Grant funds may be used for projects to preserve and improve conditions and performance on public roads, pedestrian and bicycle infrastructure, and transit capital projects.
- Congestion Mitigation/Air Quality Program funds may be used for surface transportation projects and other related efforts that reduce air pollution from transportation sources and provide congestion relief.

Metro is currently deciding how to invest federal funding available in the federal fiscal years 2028 through 2030. A portion of these funds – approximately \$42 million – is targeted towards local jurisdiction led improvements to streets and trails throughout the region through a competitive process. This targeted part is known as the Step 2 of the Regional Flexible Fund Allocation.

The estimated total funding to be allocated in this process is between \$150 - \$153 million. While this amount of regional funding is small relative to the scale of all the dollars spent on transportation in the region, the Regional Flexible Funds are eligible to be spent on a wide range of transportation system needs. As such, they are a critical part of fulfilling the vision, goals, and objectives of the 2023 Regional Transportation Plan (RTP).

From March 26th through April 30th, 2025, residents of the Portland metropolitan region were asked to provide comment on the 24 applications competing in the Step 2 Regional Flexible Fund Allocation process. These comments will help decide how an estimated \$42 million in Step 2 Regional Flexible Funds will be spent on projects that will help make the region's transportation system more equitable, safer, cleaner and more reliable.

During this public comment period:

• Participants provided 1,683 project rating responses through an online interactive map and survey available in English and Spanish. One project rating response was submitted in Spanish. See Figure 1.

- Of the 1,683 participants, 332 provided responses on optional demographic questions.
- A JPACT public hearing was held on April 17, 2025.
 - 4 people testified through oral testimony, commenting on 3 projects, several of which were the same project.
 - 3 emailed testimonies were received, not including testimonies emailed by public agencies.
- 4 email comments, not including those emailed comments from public agencies, were received.
- No mailed letters or voicemail comments were received.

In addition, public comments were received via 2 emails, and 6 testimony (oral and written) from public agency partners.

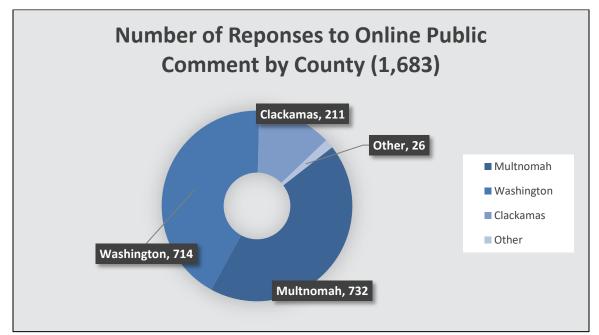

Fig. 1. Number of Responses to the Online Public Comment by County

NOTICE AND INVITATION TO PARTICIPATE

The notice and invitation to participate were distributed through several channels:

 Email to community involvement offices and community participation organizations*

- An email to Metro's transportation interested persons email list
- CORE members email*
- Metro News (https://www.oregonmetro.gov/news/public-notice-opportunity-comment-transportation-projects-submitted-2028-30-regional-flexible)
- Metro News public hearing announcement
 (https://www.oregonmetro.gov/news/public-hearing-notice-comment-2028-30-regional-flexible-funding-allocation-process-jpact)
- Metro's social media channels on Facebook and Instagram
- Oregon Trails Coalition email list
- Metro Parks & Nature Department hosted Quarterly Trails Forum announcements*
- Email invitation to committee members and interested persons for the Metro Council, Joint Policy Advisory Committee on Transportation, Metro Policy Advisory Committee, Transportation Policy Alternatives Committee and Metro Technical Advisory Committee

See Appendix A: Notices and invitations to participate. Those denoted with * are not included in Appendix A.

People were invited to learn about the projects via:

- The 2028-2030 Regional Flexible Funds web page (oregonmetro.gov/rffa), which featured the technical scoring results of the applications and project factsheets for the 24 proposed projects.
- An interactive public comment survey available in English and Spanish. The online
 public comment survey provided an introduction of the Step 2 allocation and see a
 map of the proposed projects. Each proposed project had a short summary available
 when selected. Participants were able to choose which projects they wanted to learn
 more about and then rate and comment on their projects of interest.

Comments were accepted through:

- the interactive comment survey, linked from the Metro website
- by email to transportation@oregonmetro.gov or rffa@oregonmetro.gov or rffa@oregonmetro.gov
- by letters to 600 NE Grand Ave., Portland, OR, 97232
- by phone at 503-797-1750 or TDD 503-797-1804

Translation

The interactive public comment tool was translated into Spanish.

To increase the visibility of the public comment period, Metro posted on social media (Facebook and Instagram) in Spanish and English. The posts reached a total of 2,686 people and garnered 59 link clicks and interactions. The social media posts are included in Appendix A: Notices and invitations to participate.

Of the total public comment survey participants, one person participated in the Spanish survey.

COMMENTS

From March 26th through April 30th, 2025, residents of the Portland metropolitan region were asked to comment on the 24 candidate projects competing for the estimated \$42 million in Step 2 Regional Flexible Funds available.

Metro received:

- Participants provided 1,683 project rating responses through an interactive comment map available in English and Spanish. There was one response in Spanish.
- 4 email comments, not including public agencies, were received.
 - o 1 provided general, non-project specific comments and 3 provided project specific comments. The majority were concerned and 1 was supportive.
- No phone calls, voicemails or post was received.

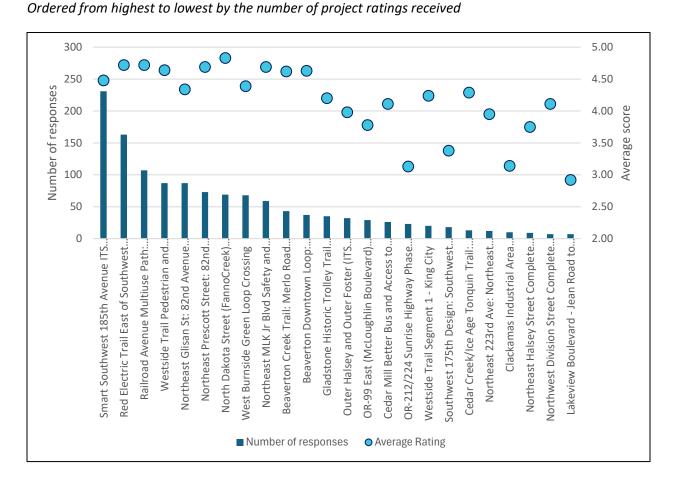

For the full text of these comments, see Appendices B through E.

Summary of Project Comments

The online tool asked participants to rate any number of the 24 projects on a scale of one to five, with five being "highly supportive" and one being "lesser support." Participants were also given the option to provide additional written comments on the projects. Of the respondents who rated projects, 75.1% took the extra time to provide written comments. Those written comments are included in Appendix E. In total, Metro received 1,683 project rating responses through the online survey and 1,265 in online written comments.

Across all projects, the average rating is 4.15 with 85% of the project rating responses receiving a four (4) or a five (5). Figure 2 outlines the number of responses and the average score for each of the individual projects.

Figure. 2: Number of Project Rating Responses with Average Rating Score

Overall, almost all the comments people provided through the online survey, emails, and letters supported specific projects. That said, 14.6% of the project rating responses gave a score of three (3) or less, indicating neutral to lesser support for a project.

Among the supportive written comments Metro received across the Step 2 applications, the common themes to emerge include:

- The impact of the project on transportation safety for all users, but with a particular focus on pedestrians;
- The impact of the project on making more seamless connections for people traveling to and from places regardless the form of travel taken.

Among the concerned comments received across the Step 2 applications, the common theme to emerge include:

• The concern of prioritizing specific types of projects or using public funds on certain types of projects over other competing transportation needs.

ONLINE TOOL PARTICIPANTS

People who responded using the online public comment survey were asked to respond to demographic questions that help Metro and others looking at the public comment results determine whether we heard from a representative group of people reflecting the region's diverse communities and broad range of experiences. The questions are optional for the online public comment survey participants.

There is typically an opt-in bias that occurs with online engagement opportunities like this one. This often results in an over-representation of people who have the time, comfort and access to participate. Participation skews toward higher income people who speak English and have a level of trust in governments. Groups that are underrepresented in respondent information by four (4) percent or more are indicated in red. Demographic comparisons are from demographic data from the U.S. Census Bureau American Community Survey (ACS) 5-year estimates and the 2020 Decennial Census for the Portland metropolitan region.

In total 332 participants responded to the optional the demographic questions. This is less than 20% response rate compared to the total 1,683 project rating responses received in the online public comment survey. The participants who opted-in shared 40 different zip codes as their residence as shown in Figure 3.

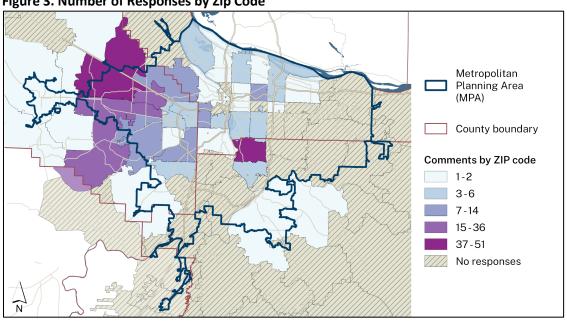

Figure 3. Number of Responses by Zip Code

Table 1. Income (327 respondents)

Annual household income	Survey Percent	ACS 2016- 2020
Less than \$10,000	1%	
\$10,000 to \$19,999	1%	5%
\$20,000 to \$29,999	1%	6%
\$30,000 to \$39,999	2%	7%
\$40,000 to \$49,999	3%	14%
\$50,000 to \$74,999	11%	17%
\$75,000 to \$99,999	16%	13%
\$100,000 to \$149,999	21%	19%
\$150,000 or more	26%	20%
Don't know/prefer not to answer	18%	

Table 2. Gender (327 respondents)

Gender	Survey Percent**
Woman	51%
Man	38%
A gender not listed here	1%
Prefer not to answer	10%

^{**} ACS 2016-2020 asks about sex, not gender

Table 3. Race/ethnic identity (326 respondents)

Racial or ethnic identity	Survey Percent*	2020 census
American Indian/Native American or Alaska Native	1%	3%
Asian or Asian American	6%	11%
Black or African American	3%	5%
Hispanic, Latino or Spanish origin	6%	14%
Native Hawaiian, or other Pacific Islander	1%	1%
White	76%	66%
An ethnicity not included above	2%	
Prefer not to answer	13%	

^{*} Participants could select as many race/ethnicity identities as applicable. Therefore, the total is greater than 100%.

Table 4. Age (329 respondents)

Age	Survey Percent*

No	72%
Prefer not to answer	11%

PROJECT APPLICATION PUBLIC COMMENT PROFILES

Beaverton Creek Trail: Merlo Road Improvements | Washington County | \$6,640,700

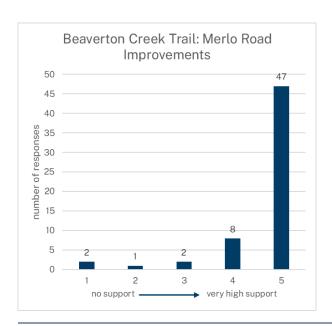

Number of letter, email and voice mail comments: 0

Total number of project rating responses: 60

Average project rating: 4.6

Number of online survey written comments: 43

The comments were mostly positive, emphasizing the community benefits of pedestrian and bicycle safety improvements.

"This link between Trimet, Waterhouse Trail and the alternative high school, as well as the developing areas west of 170th Ave, have generated more demand for active transportation in this area."

"Merlo Station...has a lot of students who take transit, including young parents with their children. Anything we can do to make this road safer for them is a plus."

Beaverton Downtown Loop: Southwest Hall Boulevard – 3rd Street to 5th Street | Beaverton | \$4,649,687

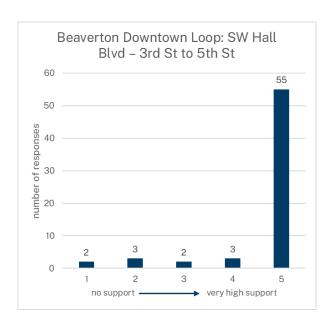

Number of letter, email and voice mail comments: 0

Total number of project rating responses: 65

Average project rating: 4.6

Number of online survey written comments: 37

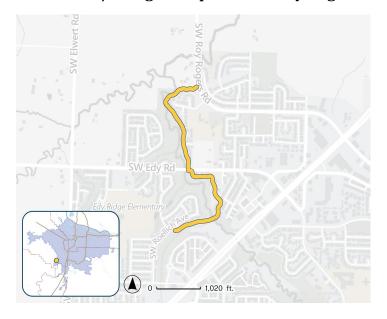

Comments were mostly supportive. Commenters appreciated the safety, accessibility and economic benefits, with some concern over project cost and how to implement it.

"This starting project will help be a demonstration and a catalyst for what we can do to improve our downtowns into places that everyone can feel safe, not only those on cars."

"I think this could be one of the most important, impactful projects on this list to demonstrate our regional shift away from prioritizing cars in our downtown areas. This could be an example of what's possible for others to follow."

Cedar Creek/Ice Age Tonquin Trail: Roy Rogers - OR-99 West | Sherwood | \$8,860,030

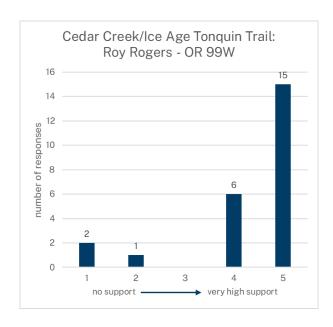

Number of letter, email and voice mail comments: 0

Total number of project rating responses: 24

Average project rating: 4.3

Number of online survey written comments: 13

Comments were mostly positive, noting enhanced safety for pedestrians and cyclists. There is concern around the cost of the project.

"What makes THIS project GREAT is that it connects with two other off road trails, lengthening the opportunity for people to really get out and walk a good distance off road."

"How does a walking path cost \$9m? Is that really good use of Tax Payer funds?"

"It will connect neighborhoods via now missing walking and biking paths and allow kids to take bikes to school."

"Nice to have but more pressing problems to solve/alleviate."

Cedar Mill Better Bus and Access to Transit Enhancements | Washington County | \$5,252,300

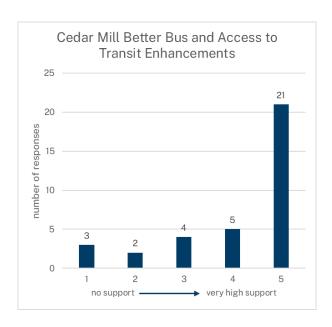

Number of letter, email and voice mail comments: 1

Total number of project rating responses: 35

Average project rating: 4.1

Number of online survey written comments: 26

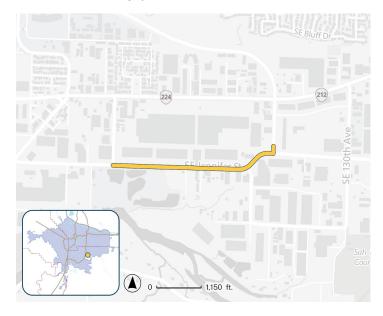

Comments were mostly positive, noting the need for improved transit infrastructure and improvements in public transit service. There were concerns about traffic and congestion for all modes.

"This would be great for folks along this corridor, which is dense for mostly single family homes with a good mix of retail and restaurants that are walkable on the path."

"I grew up taking the bus to the Cedar Mill library, and I know first hand how much the delays can impact the bus lines there. I also think it's key that we maintain the neighborhood center feel of Cedar Mill...This solution of using tools within the space that we already have is the most sensible solution.

Clackamas Industrial Area Improvements: Southeast Jennifer Street Multi-use Path | Clackamas County | \$7,228,290

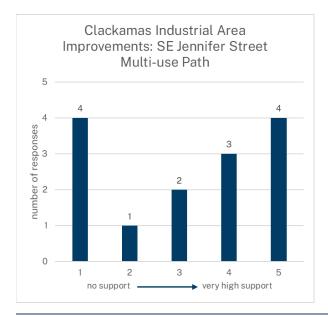

Number of letter, email and voice mail comments: 0

Total number of project rating responses: 14

Average project rating: 3.14

Number of online survey written comments: 10

Comments were mixed with concerns of project prioritization and a lack of connectivity to the proposed infrastructure.

"I do think it has some merit in that it supports the Veterans' Village and Clackamas Village transitional housing. "

"There are many workers in the area who are forced to walk in the street with semis. This important connection will increase safety."

"The county should focus its transportation funding on existing population centers...rather than directing resources toward unincorporated areas that encourage further sprawl. Prioritizing urban infrastructure benefits more residents and supports sustainable growth."

Gladstone Historic Trolley Trail Bridge Construction | Gladstone | \$8,721,932

Number of letter, email and voice mail comments: 0

Total number of project rating responses: 51

Average project rating: 4.2

Number of online survey written comments: 35

Comments were mostly positive expressing excitement at the historic connection. Concerns were primarily related to project prioritization.

"I would appreciate this bridge as a local resident, but I'm not certain how necessary it is given that there is another bike/ped bridge a few blocks away."

"This bridge would allow
Gladstone residents to easily
come and use them. It would
make the area more
connected and help to make
individuals more healthy by
increasing walking loop
options. I do believe good
walking loops would bring
visitors from elsewhere in the
metro area, and it would be a
positive addition for all."

"I see it as a missing link; I have walked and biked the trails nearby many times on both sides of the river, from Milwaukie to Oregon City and this would really be a valuable link."

Lakeview Boulevard - Jean Road to McEwan Road | Lake Oswego | \$983,000

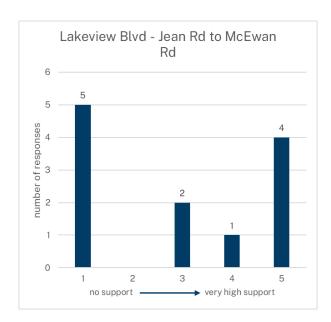

Number of letter, email and voice mail comments: 0

Total number of project rating responses: 12

Average project rating: 2.92

Number of online survey written comments: 7

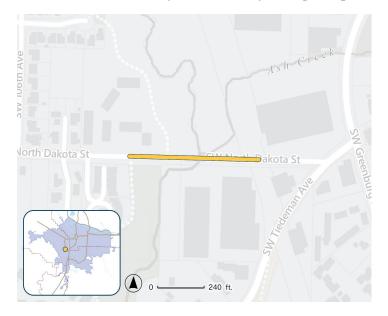

Sentiment was mixed. The benefits of the project were acknowledged with concern about project prioritization.

"This is an important project for students getting to LO's largest new elementary school that does not have safe bike or walk areas."

"This is a small street with an easily accessible parallel route. Traffic calming and shared facilities would be much better than expanding the roadway"

"Deliver a cycle track or a bike/ped trail adjacent to the project. Road widening by itself is a horrible waste of funds."

North Dakota Street (FannoCreek) Bridge Replacement | Tigard | \$8,000,000

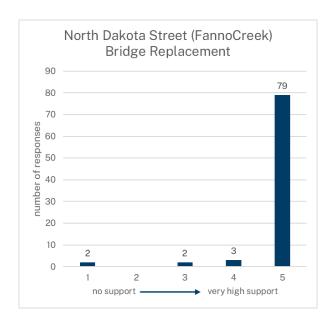

Number of letter, email and voice mail comments: 0

Total number of project rating responses: 89

Average project rating: 4.8

Number of online survey written comments: 69

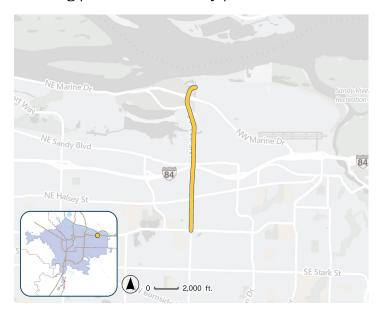

Comments are overwhelmingly supportive, emphasizing the heavy use of this narrow bridge. Safety for commuters for all modes was a theme.

"Replacement of this bridge is of utmost importance to continue to support appropriate efficiency of travel and appropriate traffic flow. If the bridge is not replaced, it will create traffic bottlenecks; over congestion in some parts of the city, and longer travel times for all. Please place high priority on this project to promote continued livability in our community."

"The Fanno Creek trail is a major foot traffic arterial that crosses this road, near the bridge. The wetland, creek and Tualatin River will benefit greatly from an improved crossing, drainage and water management."

Northeast 223rd Ave: Northeast Glisan to Northeast Marine Drive Safety Corridor Planning | Multnomah County | \$897,300

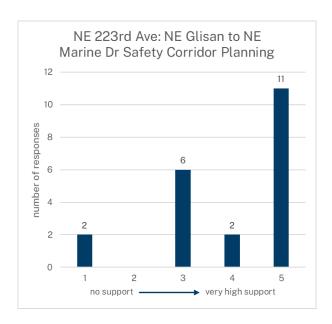

Number of letter, email and voice mail comments: 0

Total number of project rating responses: 21

Number of online survey written comments: 12

Average project rating: 4.0

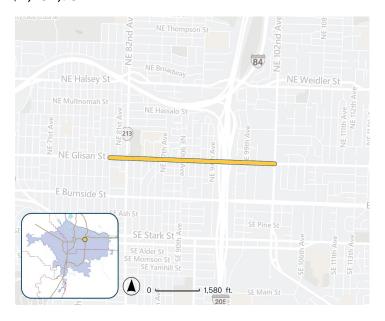

Comments were mostly supportive and overwhelmingly focused on safety for bicyclists and pedestrians.

"223rd desperately needs safety improvements with lack of sidewalks or adequate bike lanes in many areas. This road is primary access to both Blue Lake Park and Chinook Landing boat launch as well as the Marine Drive bike path."

"I lead a group bike ride on this section monthly and it's the scariest part of our day. Wider bike lanes/shoulders, bike signage would help."

"People are having to walk in the road! Please fund this project."

Northeast Glisan St: 82nd Avenue Multimodal Safety and Access | Portland BOT | \$7,732,932

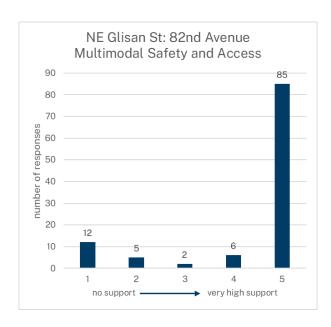

Number of letter, email and voice mail comments: 0

Total number of project rating responses: 110

Average project rating: 4.3

Number of online survey written comments: 87

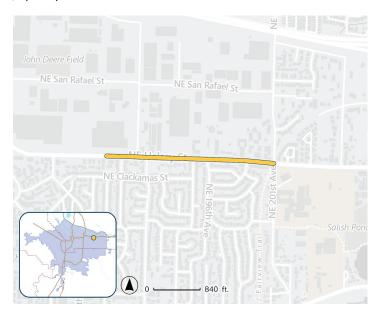

The majority of comments were supportive, voicing support for improved safety for all modes of travel along the corridor. Concerns were about whether bicycle infrastructure will be used if invested in.

"NE Glilsan St. is 30 mph. Do NOT put bicycle lanes on NE Glisan St. This portion of NE Glisan St. is used by freight semi-trucks to travel to I-205. It is a steep hill from NE 87th Ave. to NE 90th Ave."

"I have clients and co-workers with visual impairments that live/work along this stretch of Glisan. Prioritzing this portion of Glisan would impact their ability to safely and independently travel along this stretch of Glisan."

"No one uses the existing bike infrastructure on Halsey, so continuing to waste money on additionally pointless 'investments' makes no sense."

Northeast Halsey Street Complete Street: 192nd Avenue - 201st Avenue | Gresham | \$9,420,793

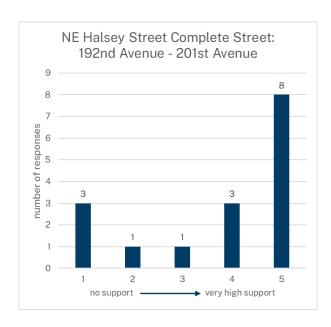

Number of letter, email and voice mail comments: 0

Total number of project rating responses: 16

Average project rating: 3.8

Number of online survey written comments: 9

Comment sentiment was mixed, the need for bicycle and pedestrian safety was affirmed, with concerns highlighting project prioritization and distance from town.

"This road desperately needs protection for bikes and pedestrians. Please fund this project."

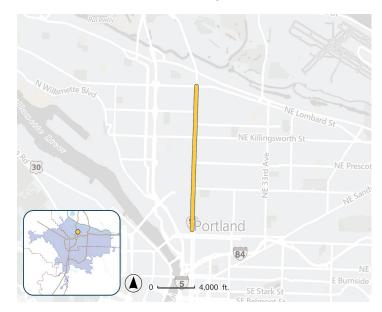

"This is a massive amount of money for a small amount of impact. There is not good connectivity in this area so what is the point of all this work?"

"This is a great project as this part of Halsey has needed improvements for quite a while. The proposed solution is a great fit for what is needed here."

"I am so tired of seeing so much money spent on bike lanes that are not used."

"Why sidewalks so far out from town, when there are lots of places with no sidewalks closer in?"

Northeast MLK Jr Blvd Safety and Access to Transit | Portland BOT | \$4,879,517

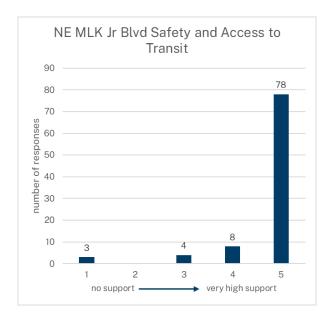

Number of letter, email and voice mail comments: 0

Total number of project rating responses: 93

Average project rating: 4.7

Number of online survey written comments: 59

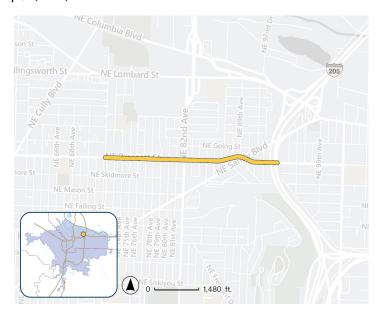

The majority of comments were supportive. Comments frequently touched on the need for safer crossing and reduced vehicle speeds.

"I know this project came out of partnership with the Soul District and it has been long wanted by the Black community. Please fund this so it's easier to walk across MLK and access local businesses."

"I live on a block right off MLK Jr. and often drive, bike, and walk down this corridor. With the proposed improvements, I would be much more inclined to walk and bike over choosing my car to go get food at the food carts, pick up my medication at the Walgreens, and even walk over to go volunteer at the Oregon Humane Society."

Northeast Prescott Street: 82nd Avenue Multimodal Safety and Access | Portland BOT | \$7,577,698

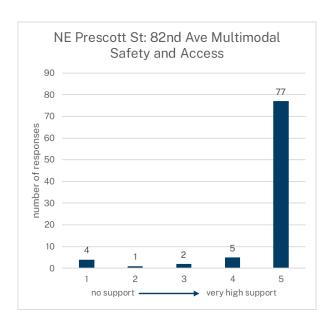

Number of letter, email and voice mail comments: 0

Total number of project rating responses: 89

Average project rating: 4.7

Number of online survey written comments: 73

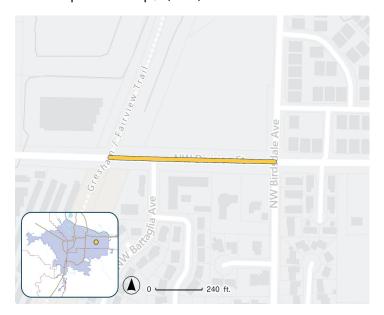

The majority of comments were positive, emphasizing bicycle safety, traffic calming, connectivity and the need for sidewalk infill.

"The 82nd project has been through very extensive community engagement with formal groups and engaged community organizations and I think a lot of folks have been able to weigh in so these are well considered changes."

"Prescott is one of the few ways for cyclists to cross 205, and one of only three that is not a High Crash Corridor. It's the only way to traverse 205 north of Rocky Butte. It's also one of the few ways for people to access Gateway Green. These upgrades will improve the safety of this route. If we're serious about climate change we need to make it safer for everyone to traverse across 205"

Northwest Division Street Complete Street: Gresham-Fairview Trail - Birdsdale Avenue | Gresham | \$4,067,496

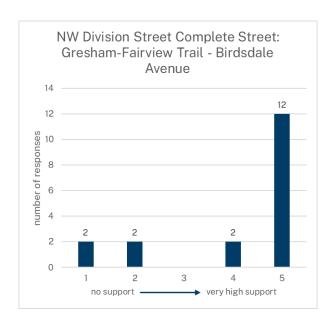

Number of letter, email and voice mail comments: 0

Total number of project rating responses: 18

Average project rating: 4.1

Number of online survey written comments: 7

Comment sentiment was mixed, with a focus on improving safety for pedestrians and bicyclists.

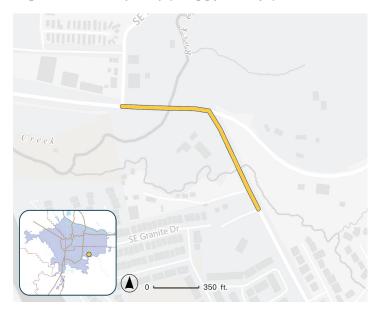

"Fully in support of sidewalks, completely against adding bike lanes. Division is a heavily travelled road and cyclists should be discouraged from traveling down this highly congested area."

"Makes life safer for those outside of a car, makes our planet healthier, makes our communities more economically resilient."

"This seems like an easy win. Let's help pedestrians and cyclists make their way down NW Division Street off the Fairview Trail. Very cool."

"I ride the Fairview-Gresham trail occasionally. The utility of this improvement is not clear to me."

OR-212/224 Sunrise Highway Phase 2: Bike/Pedestrian Facilities and Interchange Improvements (CON) | Happy Valley | \$12,026,120

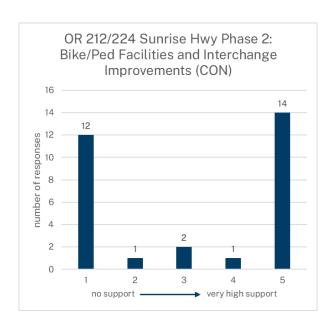

Number of letter, email and voice mail comments: 0

Total number of project rating responses: 30

Average project rating: 3.13

Number of online survey written comments: 23

Comments were mixed in sentiment, with many concerns about prioritization and alignment with regional goals.

"The county should not be prioritizing transportation funding in unincorporated areas."

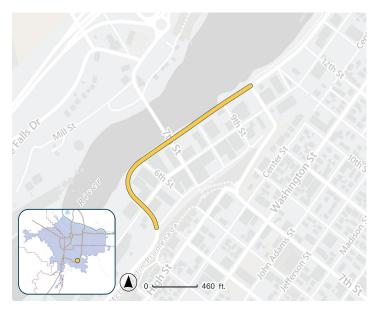

"Very dangerous intersection that is car-centric...very helpful for the thousands of residents in the area. It's the only connection between the commercial area and the many neighborhoods to the south of the intersection"

"Please do not fund this project that is part of a larger freeway/expressway project that is contrary to so many regional policy goals"

"It's regionally significant as it is the primary East-West route through northern Clackamas County. The people living in this community deserve to be safe and separated from commuter traffic."

"More lanes for cars? No thank you."

OR-99 East (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development | Oregon City | \$3,832,341

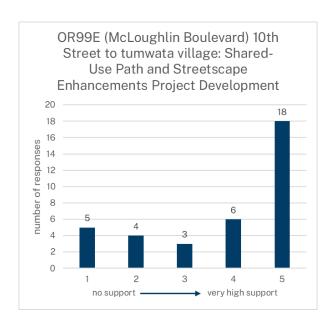

Number of letter, email and voice mail comments: 0

Total number of project rating responses: 36

Average project rating: 3.78

Number of online survey written comments: 29

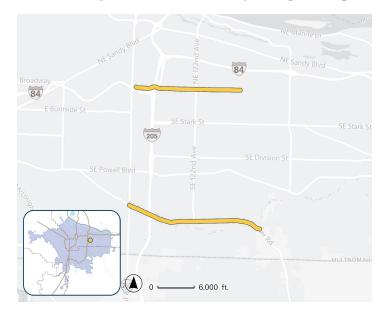

Comments were mostly positive, noting safety, economic significance and benefit to tribes. There was some concern about impact on the environment.

"Could be a great draw for the community in addition to provide respectful and fitting integration for local tribes: i.e. Improved fishing access, tourism."

"Oregon City 99E Enhancements and Trails is an interesting concept but it has not addressed the issues of a loss of a riverside forest or serious impacts to that forest. Oregon City has no riverside forest on the Willamette and this is the only heavily vegetated area that has emerged over the last 100 years. The forest is inhabited by American Bald Eagles and Osprey nests and numerous Great Horned Owl nests over its 2000 ft length area."

Outer Halsey and Outer Foster (ITS Signal Improvements) | Portland BOT | \$4,416,999

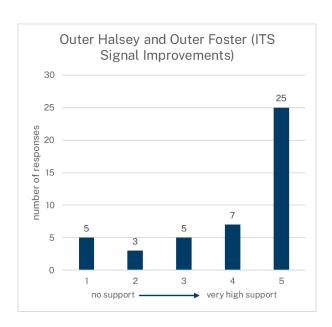

Number of letter, email and voice mail comments: 0

Total number of project rating responses: 45

Average project rating: 4

Number of online survey written comments: 32

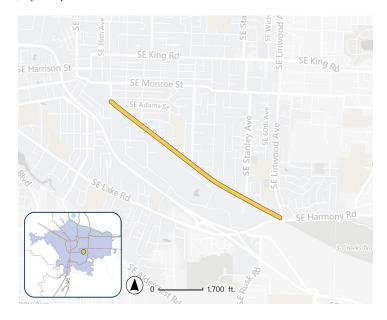

Comments are mostly positive, the need for traffic management in order to enhance pedestrian safety and support transit is clear.

"Coupled with the Glisan through street, I think this will open up opportunity east of 205 and allow for more pedestrian traffic to move towards the greenlines and Mall 205."

"I feel very concerned for my safety when walking, driving or biking around SE. There are many confusing intersections, and blind turns."

"The Lents Town Center
Monument is actually
currently broken because cars
keep hitting it. On SE Foster
and SE 92nd, you can still see
the crumbling building where
a Tesla crashed into the
building. Refuge Coffee House
on SE Foster is missing a
window because someone
crashed into the building."

Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue | Milwaukie | \$2,707,217

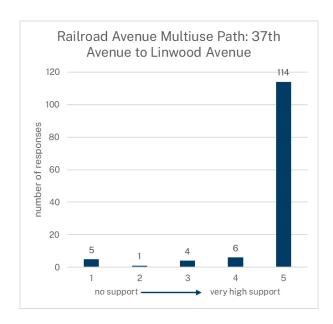

Number of letter, email and voice mail comments: 0

Total number of project rating responses: 130

Average project rating: 4.7

Number of online survey written comments: 107

The majority of comments are supportive and enthusiastic about improving connectivity. Concerns were about further delaying traffic as well as the project cost.

"Right now getting to CCC's
Harmony Campus and the N.
Clackamas Aquatic Center is
either dangerous or
extremely meandering. These
are important parts of our
community that are currently
really hard to access except
via car! Adding a multiuse
path will make a huge
difference and make those
spaces much more accessible"

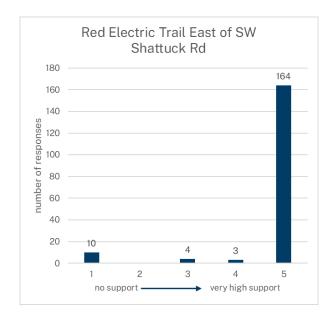

"It is no secret that the intersection of Harmony, Linwood, and Railroad is extremely heavily used. The railroad crossing adds further delays for traffic. Adding the path would be unsafe and would add additional, unnecessary delays for motorists."

Red Electric Trail East of Southwest Shattuck Road | Portland Parks | \$3,938,250

Number of letter, email and voice mail comments: 1
Total number of project rating responses: 181
Average project rating: 4.7

Number of online survey written comments: 163

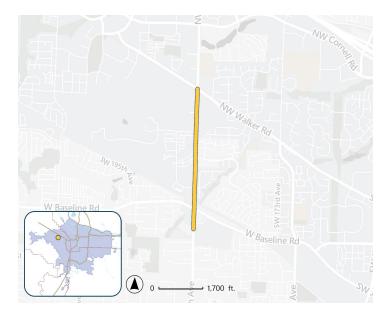

The majority of comments are supportive with concerns coming from residents who live near the proposed trail or see downsides to greater access to schools and parks. There was general support for safety and accessibility, community connectivity and active transportation.

"My wife and I have enjoyed walking the trails in southwest Portland for decades. As she gradually becomes more disabled, however, we can no longer manage most of them. None are ADA-accessible, and the area does not have many sidewalks, so it's hard to find a good place for us to stroll.

That's what is so exciting about the Red Electric Trail. It will be ADA-compliant, run on relatively level terrain, and my wife will be able to walk along it with her walker. That makes it unique in this area."

"Frankly, I don't really want a ton of people having easier access to the unattended back side of our school grounds."

Smart Southwest 185th Avenue ITS and Better Bus Project | Hillsboro | \$4,572,738

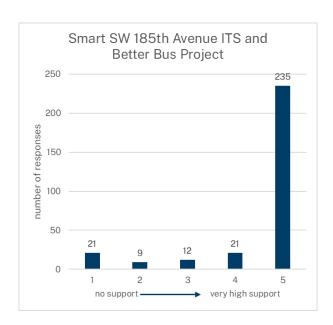

Number of letter, email and voice mail comments: $\boldsymbol{0}$

Total number of project rating responses: 298

Average project rating: 4.5

Number of online survey written comments: 231

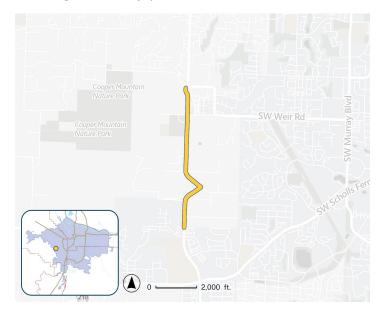

Comments were mostly positive, highlighting traffic congestion and safety and the effect of the MAX on traffic. There was mixed sentiment on using artificial intelligence (AI) in traffic management.

"Would love to see more integration of technology to help improve traffic flow around Hillsboro."

"As Hillsboro continues to grow, we need to ensure all people in different modes of transit (car, bike, walking, bus, light rail, etc.) have safe and predictable ways to travel 185th.

"Build better infrastructure to support non-car-oriented travel, such as separated bike and ped paths. This intersection is a nightmare to cross on foot or bike. "AI" will not help with this."

Southwest 175th Design: Southwest Condor Lane to Southwest Kemmer Road | Washington County | \$2,593,196

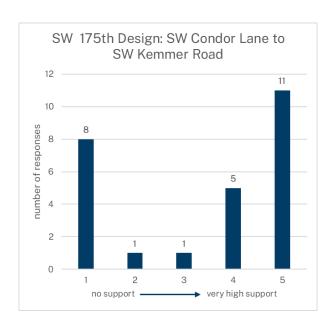

Number of letter, email and voice mail comments: 0

Total number of project rating responses: 26

Average project rating: 3.4

Number of online survey written comments: 18

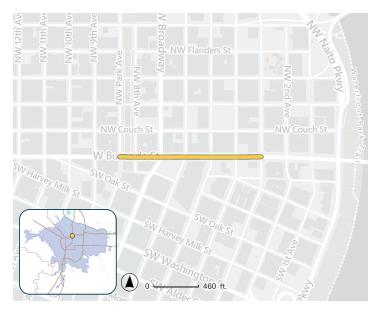

Comment sentiment was mixed. While the need for road improvements was a theme, many questioned whether the project would ultimately support active transit or achieve regional goals.

"Straight roads encourage people to drive fast. I'd prefer to leave this turn in there to force people drive slower."

"This is a dangerous curve, especially with teens driving to MHS. However, I worry about speeds if the road is realigned."

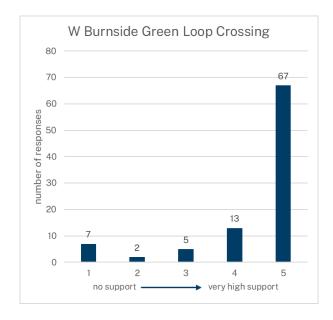

"This section of road and this intersection is dangerous, particularly at night. I am supportive of doing studies and coming up with alternative designs for this stretch."

West Burnside Green Loop Crossing | Portland BOT | \$7,677,446

Number of letter, email and voice mail comments: 0
Total number of project rating responses: 94
Average project rating: 4.4

Number of online survey written comments: 68

Comments were mostly supportive, emphasizing the need for pedestrian and cyclist safety improvements and expressing excitement for the Green Loop.

"This project combines the many needs of the people who live and work near the park blocks (and will continue moving to these areas as they continue to grow) to help provide a better public space for everyone."

"Because this project is between the very busy Burnside crossing intersections of both Old Town and the Pearl District, pedestrians are much more likely to be utilizing this area now and in the future."

"Removing car traffic lanes in support of this project is a terrible idea."

"Removing traffic lanes to add in bike lanes will ALWAYS be a good thing!!"

Westside Trail Pedestrian and Bicycle Bridge Over Highway 26 | Tualatin Hills PRD | \$6,000,000

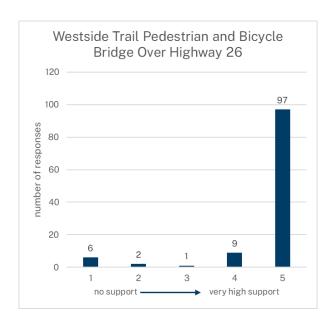

Number of letter, email and voice mail comments: 0

Total number of project rating responses: 115

Average project rating: 4.6

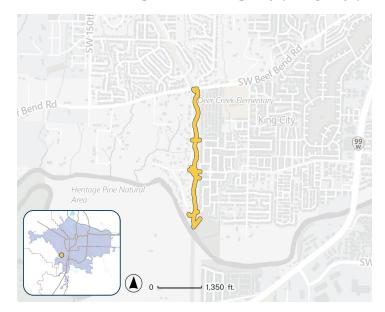

Number of online survey written comments: 87

Comments were overwhelmingly supportive, emphasizing the need for pedestrian and bicycle safety, especially for students and recreators.

"Sunset High School cross country and track runners (100+ students) run in this vicinity, their routes often taking them across the Murray Rd or Cornell Rd overpasses during rush hour traffic. Construction of this pedestrian bridge over Hwy 26 would create a much safer alternate route for these students. I'm certain the bridge would also be utilized by the greater community as biking, walking, and running our common activities throughout the trail systems north of Hwy 26."

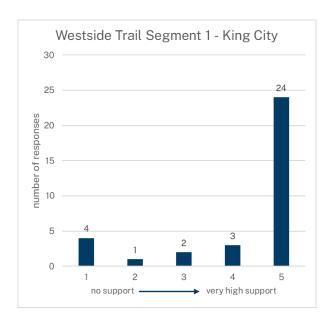

Westside Trail Segment 1 - King City | King City | \$7,841,343

Number of letter, email and voice mail comments: 1
Total number of project rating responses: 34

Average project rating: 4.2

Number of online survey written comments: 20

Comments were mixed in sentiment. There is excitement about the potential for extensive connectivity, with concern for local support and environmental impact.

"With the UGB recently expanded to the west side of this corridor and new urban development on the way, now is a perfect time to fund this project... In King City, it would be the only continuous active transportation route between Beef Bend Rd. and Tualatin River as 99W still has several serious gaps for pedestrians and cyclists."

"I'm in favor of power line trails on principle and it would be great to be able to bike from Tualatin to Bethany someday but...this stretch of the river and the natural resources around it need to be protected."

If you picnic at Blue Lake or take your kids to the Oregon Zoo, enjoy symphonies at the Schnitz or auto shows at the convention center, put out your trash or drive your car - we've already crossed paths.

So, hello. We're Metro - nice to meet you.

In a metropolitan area as big as Portland, we can do a lot of things better together. Join us to help the region prepare for a happy, healthy future.

Stay in touch with news, stories and things to do.

Metro News

Public notice: Opportunity to comment on transportation projects submitted for the 2028-30 Regional Flexible Funding Allocation process

March 26, 2025 11:59 a.m.

Share your feedback on transportation projects seeking federal funding to invest in roadways and trails and make it easier and safer to walk, bike and use transit. Comment now through Wednesday, April 30.

From safer sidewalks and bikeways to trails and road crossings, you can help decision-makers choose the projects that will receive money through the Regional Flexible Funding Allocation (RFFA).

Regional flexible funds are federal dollars that can be used for a wide range of transportation projects across the Metro region. These funds represent just a small piece – less than five percent – of the region's total funding but help address crucial gaps and long-awaited fixes.

There are two separate opportunities to provide feedback on the different parts of the 2028-30 Regional Flexible Fund Allocation.

New bond proposal

As part of RFFA Step 1A.1, Metro is seeking input on a bond that would help fund regionally significant transit projects proposed by cities, counties and transit providers throughout the Metro region. Decision-makers are considering awarding up to \$88.5 million dollars to five proposed projects across Clackamas, Multnomah and Washington counties.

Learn more about the new project bond →

Step 2

With each regional flexible funds cycle, cities, counties and other transportation providers across the region submit applications for community transportation projects to compete for limited funds available in Step 2. There are 24 projects requesting funding to improve trails,

sidewalks and roadways in communities across the region. There is an estimate of up to \$42 million available. Your input is valuable in selecting projects for these highly competitive funds.

Learn more about the proposed projects ——

How to comment

Let decision makers know what you think about the proposed bond and local projects. The public comment period is open now through April 30, 2025.

There are a variety of opportunities for comment:

- **Take surveys** for both the transit-focused Step 1A.1 bond and the local transportation projects competing for Step 2 flexible funds
 - Step 1.A1 bond survey
 - Step 2 survey in English and Spanish
- **Email** transportation@oregonmetro.gov
- Mail to Transportation Planning, 600 NE Grand Ave., Portland, OR, 97232
- Call 503-797-1757 or TDD 503-797-1850
- **Provide public testimony** in the presence of decision-makers at the Joint Policy Advisory Committee on Transportation meeting on Thursday, April 17.

Your input will be considered by decision makers alongside technical evaluations and regional and federal policies.

Hi All,

There are a number of regional trails projects competing along with other on-street projects in the current Regional Flexible Funds cycle. **JPACT will be accepting public testimony at the April 17th meeting, and the public comment period is open through April 30th.**

Dear Portland metro area trails supporters,

The online public comment for the 2028-2030 Regional Flexible Fund Allocation is open to receive community input through April 30th, 2025. The public comment period provides the opportunity to provide feedback on both the Regional Flexible Fund bond proposal and the competitive Step 2 applications. In addition to the online options for comment, community members and interested parties can provide public testimony before decision-makers at the April 17th meeting of the Joint Policy Advisory Committee on Transportation (JPACT).

With each Regional Flexible Funds cycle, cities, counties and other transportation providers across the region submit applications for community transportation projects to compete for limited funds available in Step 2. For the 2028-2030 cycle, there are 24 projects requesting a total of \$140 million in Regional Flexible Funds to improve trails, sidewalks and roadways in communities across the region. There is an estimate of up to \$42 million available. To comment on individual project applications, please visit the Step 2 website and navigate to the dynamic mapping tool to search for projects in your area.

We encourage you to share these commenting opportunities with your networks. For more information on the bond proposal, Step 2, or details on how to comment at the April 17th JPACT meeting, please visit the <u>Regional Flexible Fund webpage</u>.

Subject: [External sender]Burnside Bridge Replacement

Date: Tuesday, April 8, 2025 1:37:20 PM

CAUTION: This email originated from an External source. Do not open links or attachments unless you know the content is safe.

I am responding to the request for public input about the proposed construction of a new Burnside Bridge. I grew up in Portland, and have seen a lot of changes, some of which I regard as unfortunate. The state engineer who designed the Marquam Bridge wanted to run an off-ramp to a proposed freeway that would replace Powell Blvd. Fortunately that plan for replacing Powell Blvd. occurred at a time when we did not assume that highway engineers knew best. The off-ramp to Powell was discarded.

We are now considering new construction to replace the Burnside Bridge across the Willamette River. It is regrettable that we are still trying to design around the Marquam Bridge and the ugly, slow-moving freeway snake that runs along the east side of the river. The consequence for the new bridge plan is that the bridge must be stretched to accommodate the freeway. This is not only ugly and expensive. It is ignores the facts that:

- 1) traffic now crawls across the Marquam Bridge and along the east side;
- 2) most of the drivers are headed for areas that they could reach faster by using the Fremont Bridge, but they don't know how to do that;
- 3) before committing to spending money on a new bridge, the re-routing of I-5 traffic to the Fremont Bridge would move traffic more effectively and remove the ugly nonsense along the east bank of the river. It reminds me that San Francisco had an ugly two-layer ramp along the bay that they could not decide to get rid off -- until an earthquake knocked it down.

I know this has been argued before, but you are planning new construction that is expensive and unnecessary. It will also cost a lot, achieve nothing in expediting traffic, defers to another generation a difficult decision, and preserves one of the ugliest developments in the history of Portland.

I tried several times to complete the survey questions on the 82d project, but the survey page won't accept the county name so I can't submit my response. Clearly glitchy. Here is what I want to say.

Rank 5/5

I live west of that area. I ride Prescott to the 205 multiuser trail but it does not feel safe! This project will be terrific.

Any project that makes it safer for cyclists and walkers will get people out of cars, make traffic flow quicker, reduce deaths and reduce tailpipe pollution.

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

As a longtime resident and real estate broker in the Happy Valley area, I'm writing to express my enthusiastic support for the Sunrise Gateway Corridor Project.

This is far more than just a transportation improvement — it's a visionary investment in the future of our region. The emphasis on placemaking, safe and accessible bike and pedestrian pathways, increased connectivity between neighborhoods, and thoughtfully planned green spaces will make a lasting, positive impact on both livability and economic opportunity in East Clackamas County.

Our community is growing rapidly, and with that comes the responsibility to grow smart. This project reflects a proactive approach to regional equity, safety, and sustainable infrastructure. It can reduce congestion, expand multimodal transit options, and support job creation — all while preserving the character and charm that makes Happy Valley such a desirable place to live and work.

I strongly encourage your continued investment in this initiative and urge approval of the funding to move the next phase of design forward. This is the kind of bold, thoughtful planning our community needs — and deserves.

Thank you for considering this important step forward for our region.

Warm regards,

Roger Hough Principal Broker

Re: Sunrise Gateway Corridor Project

I am in favor of improvements to Hwy 212, and I believe that it is urgently needed. It is a popular highway in Clackamas County which connects from I-205 out east into the country north of Carver all the way past Boring into Sandy. Traffic is quite backed up during rush hours am and PM from I-205 to Damascus. It is difficult to turn onto from side streets. There should be improved lighting and some room in the center with left turn lanes in it. Also, some sort of raised dividers to help prevent traffic collisions. There has been loss of life on Highway 212 over the past few years due to head on collisions. A bike path or sidewalk on the south side would be helpful. Dividers of some sort would be good between left turn lanes between intersections.

Thank you for listening to concerned citizens of Oregon Rose Causey

I live in the Happy Valley area and enjoy the area very much. Schools, Park walking trails throughout the area. The Sunrise corridor/Highway offers a unique opportunity for development that would add a unique charm to the area, with some residences, some community activity centers and walking trails. Presence of Adrien C. Nelson high school presence offers a real livable community to the area.

I whole heartedly support the critical funding for the Sunrise Gateway corridor/Highway project.

Sincerely,

Prad Shah

JPACT and Metro Transportation,

I am submitting this in support of the Sunrise Corridor Gateway project, as it increases multimodal transportation options, helps create more jobs in the area, and protects and enhances the existing neighborhoods in the region.

As a former long-time resident of Clackamas County (just above the corridor), I saw firsthand how the area grew, yet struggled to improve as financial inputs were always constrained. It was always disappointing that there were no easy access points to the Clackamas River, very few parks and greenspaces and serious congestion. I am heartened to think that this funding may be the jumping off point to some great improvements for the region.

I hope that this is just the first investment to improve the region.

Thank you for your consideration.

Dear Metro Transportation Team,

As a resident of Clackamas County who lives adjacent to and uses the Sunrise Gateway Corridor in my everyday life and as the State Director for AARP Oregon, I am writing to strongly encourage Metro to invest in the Sunrise Gateway Corridor/Highway 212. This investment is crucial for enhancing the safety and accessibility of the corridor for all modes of transportation. Furthermore, it will improve access to jobs, neighborhoods, transit options, and parks and open spaces for our region.

I had the privilege of serving on the Metro Local Investment Team for Get Moving 2020, where we heard from local residents, elected officials, and businesses and learned about the needs and opportunities for improving safety and transit access in the Sunrise Corridor. This experience brought home to me the importance of making strategic investments in this rapidly growing area.

The Sunrise Gateway Corridor is one fastest-growing areas in the metro region and is expected to continue growing with new homes, businesses, and residents. To support this growth and ensure that it is the right type of growth, it is essential to make critical investments to ensure this area remains a great place for people of all ages to live, work, and thrive. By investing in this corridor, Metro will support families, foster economic development, and help to create a community where people can age in place with the necessary transportation options, access to amenities and supportive environments that enhance quality of life.

RE: Comments on Metro's 2028-30 Regional Flexible Fund Step 1A.1 Draft Bond Allocation

Dear Metro Council President Peterson and Metro Councilors:

Thank you for the opportunity to provide feedback on the proposed 2028-30 Regional Flexible Fund Step 1A.1 Draft Bond Allocation. The City of Hillsboro supports the proposed bond as an opportunity to leverage federal and state funds, advance local and regional transit priorities, and support building projects that meet our community's urgent transportation needs.

I am grateful and pleased to see the bond proposal would invest in the Tualatin Valley (TV) Highway Safety and Transit Project — a collaborative multi-jurisdictional effort to make travel safer, enhance transit rider experience, and improve service speed and reliability along this well-traveled corridor. The TV Highway corridor supports one of the highest ridership bus lines in the region, while serving many communities of color, limited English proficiency speakers, and lower income communities. It is also a designated High Injury Corridor that desperately needs investments to improve safety.

The bond package demonstrates strong regional support to leverage significant federal, state and local funding. However, the draft bond allocation proposes \$28 million dollars for the TV Highway Safety and Transit Project instead of its requested \$30 million dollars. I appreciate that the proposed bond allocation strives to provide financial support to five regional projects. Still, I must emphasize the need for the full requested regional contribution amount for the TV Highway Safety and Transit Project.

Although the Oregon Department of Transportation (ODOT) could fill the \$2 million dollar deficit, the uncertainty of those funds introduces many risks for the TV Highway Safety and Transit Project in maintaining expected local funding contributions and in applying for federal funding.

Request: Revise the Metro proposal to include a full regional award amount of \$30 million dollars for the TV Highway Safety and Transit Project securing this project and our communities' future.

Thank you for consideration, and I know that together we can advance our shared goal of improving transportation safety and equity for everyone in our community.

Sincerely,

Mayor Beach Pace

Hello,

I whole heartedly support the Sunrise Gateway Project. Parallel/alternative/main routes are desperately needed in northern Clackamas County to relieve congestion, spread traffic out and provide a safe and fast route/avenue for emergency services.

If Metro has its eye on increasing the population around the 212 corridor, then a balanced transportation system is essential with adequate roads to prevent grid lock and move commerce.

Thank you,

Hello JPACT Team,

The Sunrise Corridor/Hwy 212 Project is a worthy recipient of the Regional Flexible Funds Allocation dollars. Jamie Stasney and her incredible team have done more public outreach than any project I have witnessed or been involved in over the past 15 years.

Please allocate funds in Clackamas County, it's long overdue!

Thank you, Diana

Facebook @SwTrailsPortland Follow @swtrailspdx

April 15, 2025

Dear RFFA Committee,

To appreciate the importance of the Hayhurst segment of the Red Electric Regional Trail it is crucial to keep in mind that this neighborhood has very few sidewalks. Only 14% of area streets have a sidewalk, making Hayhurst one of the neighborhoods with the least sidewalk coverage in Portland.

This means that schoolchildren walk to Hayhurst Elementary School in the road, alongside cars. And the problem will only become more urgent once the Raleigh Crest development builds <u>263 new residences</u> on the Alpenrose site.

Portland Parks & Recreation's proposed RFFA project connects the Alpenrose site to the elementary school and to Pendleton Park, and has the potential to become a car-free, safe route to school for many young children.

The regional importance

The <u>Red Electric Regional Trail</u> will become a key connector for local, short distance trips within and between the many neighborhoods it passes through. And giving residents a safe way to walk across their neighborhoods is important! But the bigger significance of the RERT is that it is regional. It will provide a 16-mile, family-friendly walking and cycling route from Garden Home to the Willamette River and downtown Portland. Heading the other direction, from Garden Home to the south, trail users would be able to connect to Tigard's Fanno Creek multi-use Trail for a total 24-mile trip.

Because of this, both the Portland City Council and the Metro Council conferred the trail with the "regional" designation in 2007 and 2008, respectively. The new Raleigh Crest development of the Alpenrose site will be building a segment of the Red Electric trail across their property. If Metro were to fund the Hayhurst/Pendleton Park segment of the trail, the combined private public-private dollars would anchor the western end of the Red Electric to the Fanno Creek Trail and would be a gap-free extension of this walking and cycling path.

Equitable transportation

Finally, having a safe route to walk or roll would be transformative for those who do not drive—children, the disabled, people living on low incomes and the elderly. Because it is a multi-use path, the Red Electric Trail would be particularly helpful to disabled people or others who rely on a scooter or other wheeled device. In this way, the Red Electric multi-use path would reduce car trips and help non-drivers achieve independence. Please keep in mind, the area does *not* have safe access to the bus stops on Beaverton-Hillsdale Highway, Shattuck Road does not have a sidewalk (and there was a pedestrian death crossing BHH at Shattuck a few years back).

Evaluation scoring

One last comment about the evaluation report scoring. It is an impressive and comprehensive set of criteria, and obviously Metro put a lot of work into evaluating the projects. As we review the Red Electric scoring, we have some comments which might clarify southwest's existing conditions, several of which seem invisible to this framework.

Residents of Southwest Portland live with a dearth of infrastructure—the area has the least sidewalk coverage, the least number of planned bike routes that have

actually been built, and the worst bus coverage and frequency in Portland. Only 33% of our biggest roads, the collectors and arterials, have sidewalks.

SWTrails has built and maintains our 55 miles of trails as a safe *alternative* to roads which lack basic infrastructure. The point is to *avoid* high crash corridors and intersections where possible. The Hillsdale-Hayhurst segment of the Red Electric Trail is a good example of this. It runs near, and parallel, to the Beaverton-Hillsdale Highway high crash corridor, which has a bike lane, but no sidewalks. Confident cyclists will ride on BHH—no one else will; the Red Electric offers children and less confident riders the only alternative route.

The first several Safe System criteria don't capture our reality of needing an avoidance and safe alternative strategy, and a few other questions seem to be evaluated incorrectly. (For example, MO4. "Does the project provide a safer alternative to a high-crash location?" was scored 0.0) Our infrastructure is so minimal that the need isn't registering.

In closing

SWTrails has worked closely with the Portland Bureau of Transportation, PP&R and Metro over the decades to make the Red Electric Regional Trail a reality. We hope that Metro will continue to support this worthy project. Thank you for your consideration.

Sincerely,

Lisa Caballero Vice-President <u>lisac@me.com</u>

Don Baack Founder donbaack@gmail.com

Milestones in the Red Electric Regional Trail project

1995-1997 Multimodal trail on the old red electric route conceived by SWTrails,
 PP&R and Metro;
 PP&R receives funding from Metro for feasibility study;

2000 Urban Trails Plan adopted by Portland City Council (including *Trail*

2, a portion of the Red Electric route);

- The 1998 feasibility study results in this route being approved as a multimodal regional trail by Portland City Council with subsequent approval in **2008** by Metro Council. The "regional" status means the route requires public right-of-way dedication from future development along its length.
- State Senator Ginny Burdick secures a \$750,000 State grant, "covid funding," for PP&R to design a multi-use path along the Hayhurst segment;
- 2022 Red Electric Trail Pedestrian and Bicycle Bridge over the Fanno Creek headwaters in Hillsdale opens. This multimodal bridge connects Hillsdale business area with "Little Bertha" area immediately west of Hillsdale a key connection for the overall trail.
- Metro recognizes the transportation potential of the Red Electric Trail in its <u>Regional Trails Prioritization Tool Report</u>, ranking it "Very High."
- Portland approves the Land Use plan for the Raleigh Crest development. Includes design for the Red Electric multi-use path across the property.

Hi My name is Kay Duncan and we live in the Happy Valley . when we found out that there is a Sunrise Corridor Project along the Hwy 212, we were happy to find out there is an infrastructure plan to improve the traffic along these neighborhood. Having improved transportation along 212 will improve the Gridlock along the Sunnyside as well..

WE need infrastructure improvements as much as we can support and my husband John and I are all for it and will do what we can.

Thank you

To Joint Policy Advisory Committee on Transportation

Here is the testimony for the April 17th meeting

Gary Woods

King City, Oregon

Date: April 13, 2025

To: Joint Policy Advisory Committee on Transportation

Emailed to: rffa@oregonmetro.gov

And transportation@oregonmetro.gov

From: Gary Woods Resident of King City

Regarding: Project ID CFP6 "Westside Trail Segment 1 - King City"

The RFFA Step 2 application for this project contained errors and omissions. I believe it is important for Metro to have accurate information before making a decision on which projects receive funding.

Summary

The errors and omissions are:

 The grant application omits King City's plan to 'stub' the Capulet and Fischer Road extensions, and to not complete the connection with SW 137th Avenue until some time in the future.

Line 41 states "This project includes the street connections from SW Capulet Lane, SW Montague Way, and SW Fischer Rd." King City staff have told the King City City Council, and the community, that the connections to 137th will not be made until the improvements to SW 137th Avenue (to collector status). The improvements to 137th are identified in the King City TSP project list as "Unconstrained Tier 3 -the last phase of projects to be implemented, should additional funding become available."

The Westside Trail Layout (Grant Exhibit A) shows that the extension of SW Montague Way is stubbed. The future connection that is shown is through a park owned by Rivermeade Community Club, a 501(c)(7) organization that is vigorously opposed to King City building a road through their community park.

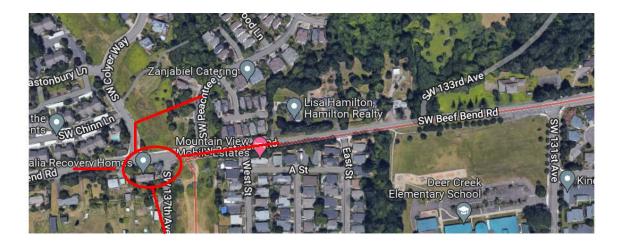

It is not a responsible use of the grant funds to build roads that will not be connected until some unidentified time, likely many years in the future.

2. The grant application states all property sellers are 'amenable'. This is not true.

The Edgewater on the Tualatin HOA owns approximately 30% of the property covered by this project. I live in Edgewater and have been talking with many of my neighbors. The Edgewater HOA is not 'amenable' to selling their property to King City. In fact, this is very controversial. King city staff knew this when they wrote the grant application.

Metro.pdf

dropbox.com

Realign 137th Avenue and Peachtree Drive with Signal

This alternative is illustrated in the figure below. Analysis of the alternative revealed that it would successfully meet County operational standard of V/C= 0.99 in the 2040 PM peak hour. The worst movement (westbound through/right) at the intersection is estimated to have a v/c ratio of 1.00 but the overall intersection is estimated to have a v/c ratio of 0.96 (using quick output from HCM 2000). This scenario would meet the County's standard.

5.8 Fischer Road Improvement Needs

Table 20 presents a summary of 2040 Average Daily Traffic projections on three of the approach legs for the intersection of Fischer Road with 131st Avenue. These projections were prepared for both the Alternative 1, 2 and/or 3 South scenarios or the No Direct Connection scenario and compares the projections with existing daily volumes. ADT estimates were based on the PM peak hour projections prepared as part of the Alternatives Analysis and rely on a K factor reflecting the relationship between daily and peak hourly counts as observed on Fischer Road near OR 99W.

As indicated in the table, Fischer Road is currently estimated to carry about 7,000 daily vehicles east of the intersection with 131st Avenue, and about 6,400 vehicles on 131st Avenue north of Fischer Road. Existing traffic patterns on these two streets include a relatively heavy movement between Fischer and 131st Avenue to/from the north. This movement includes motorists making a cut-through maneuver

SCJ Alliance September 2022 | Page 53

Road

Avenue

Fischer Road west of 131st

from Beef Bend Road to/from OR 99W south of Fischer Road as this pathway is shorter and quicker than using the intersection of Beef Bend Road with OR 99W. Existing daily traffic volumes on Fischer Road west of 131st Avenue average about 1,800 vehicles.

As further illustrated in the table, traffic volumes are expected to increase on either Fischer Road or 131st Avenue with the two Kingston Terrace east/west alignment alternatives, with an approximate 4,000 daily vehicle difference between the two scenarios on either Fischer Road or 131st Avenue. While the expected increases are significant, they are anticipated to affect the intersection of Fischer Road with 131st Avenue regardless of scenario. It is recommended that this intersection be signalized as signal warrants are expected to be met.

2040 ADT with Alternatives 2040 ADT with No Direct 1, 2 or 3 South (with Fischer **Connection (No Fischer** 2021 ADT Connection) Connection) Location Fischer Road east of 131st 12,900 8,900 7,000 Avenue 131st Avenue north of Fischer 6,400 5,800 9,800

8,600

1,900

Table 20. Comparison of Fischer Road Volumes

The east/west alignment alternatives that include a direct connection to Fischer Road would see a substantial increase in daily traffic along the segment of Fischer Road to the west of 131st Avenue, growing from approximately 2,000 ADT to over 8,000 ADT.

1,800

Fischer between 131st and 137th Avenues has a 61-foot wide right of way and a 36-foot curb-to-curb width which includes on-street parking. There are very few driveways along this street segment and relatively few intersecting streets. Analysis conducted of the existing roundabout at 136th Avenue indicates that it is expected to continue to operate acceptably with this traffic growth. Consideration will need to be given to the provision of bicycle facilities through this corridor which could be developed as a bike lane couplet placing westbound bicyclists on Fischer Road (and restricting on-street parking to one side of the street) and eastbound bicyclists on King Lear Way (a parallel street to the south) where such an opportunity is available. Complete removal of on-street parking could occur between King Lear Way and 131st Avenue because the parking demand and usage is much lower than further west. Pedestrian crossings could continue to be provided at the intersections of Fischer Road with 136th Avenue and King Lear Way/134th Terrace.

SCJ Alliance September 2022 | Page 54

Letter from Chuck Watson, Rivermeade Community Club

April 12, 2025

To: Portland Metro

(Attn: Joint Policy Advisory Committee on Transportation)

From: Chuck Watson, President, Rivermeade Community Club

I am the President of a small Community Club, consisting of 57 home sites, adjacent to the western edge of King City, Oregon. Our community club is a registered 501(c)(7) organization and wholly own a park at the end of our singular street.

Recently, a private citizen of King City brought to my attention that King City has plans to extend Montague Way Road (through the existing power lines separating King City and our park) up to the physical boundary of our park for purposes of extending said road through our park into our neighborhood, at some point in the future. Currently we are unincorporated Washington County. This person also explained King City was in the process of requesting funds for this future project. This sounds like a road to nowhere.

This is why I am writing this letter.

- 1. King City has not once mentioned this potential intrusion of our organization/neighborhood. I found this information out from a conversation with an individual, not a government official or employee. I find this insulting and unprofessional.
- 2. If King City makes the decision to build this road and "stub it out" until a future date, there is no chance our community will be more accepting of selling our private land/park. Not one member of the Rivermeade Community Club wants to sell or lose our park. King City, Washington County, Metro,...whomever; will have to use the very unpopular process of "eminent domain" to "steal" our land from us.
- 3. Our Community Bylaws state if a landowner sells their property to a developer to be subdivided, the new owners and residents of the said property, release any right to vote or have use of this park. They no longer are members of the Rivermeade Community Club. So, time is not something that will soften the sentiment. Once again, "eminent domain" is the only way King City currently or in the future will acquire the park abutting to the "road to nowhere".

Rivermeade Community Club is not against growth. Are we against wasteful use of government resources and our own tax dollars to fund projects that don't make sense?...you bet.

Site/Application Information

Existing Use: Low-density residential

Proposal: The applicant proposes subdividing four existing tax lots into \pm 87 lots for

future residential development.

Site Size: ±7.16-Acres

Site Address: 13970 & 14060 SW Beef Bend Road, 16305 SW 137th Avenue

County Right-of-Way: SW Beef Bend Road

Washington County

Assessor's Map(s): 2S116B, Tax Lots 800 and 1000 and 2S116BB, Tax Lots 2700 and 2701

ACRONYM DEFINITIONS:

"WCCO" means Washington County Code of Ordinances

"TSP" Washington County's Transportation System Plan

"RDCS" means Washington County's Road Design and Construction Standards

"CDC" means Washington County's Community Development Plan

"AASHTO" means American Association of State Highway and Transportation Officials

"ESAL" means Equivalent Single Axle Load

"MUTCD" means Manual on Uniform Traffic Control Devices

"ITE" means Institute of Transportation Engineers

"ORS" Oregon Revised Statute

COMMENTS AND DESIGN REQUIREMENTS

Consistent with ORS Chapters 368 and 810, these comments are intended to fulfill Washington County's role as the owner of public right-of-way impacted by a proposed development. The roadway subject to the provided comments is confirmed to be under the jurisdiction of Washington County, as per county road records, Washington County's Transportation System Plan (TSP), and King City's TSP.

Washington County's roadway design comments are based on the County's Transportation System Plan (TSP) and Roadway Design Criteria Standards (RDCS). Resolution and Order 86-95 provides the basis for determining when safety improvements are necessary.

Project Background

These comments address the Kensington Square preliminary subdivision application currently under review by the City of King City as part of land use case file LU-2024-07. The proposed subdivision will divide 7.16 acres currently occupied by four tax lots (Washington County Assessor's Map 2S116B, Tax Lots 800 and 1000, and Map 2S116BB, Tax Lots 2700 and 2701) into ±87 lots for future residential development. The development site has ±515 linear feet of frontage along SW Beef Bend Road.

The current subdivision layout anticipates that the future lots will be accessed via a local street network that ties into an intersection with SW 137th Avenue. SW 137th Avenue is currently a ± 22-foot-wide, two-lane paved road that extends south from an intersection with SW Beef Bend Road, serving as the only connection to the transportation network for approximately 40 existing dwellings in the area. King City has identified SW 137th Avenue as a collector in their Transportation System Plan (TSP). Based on the current design, all new traffic generated by the proposed subdivision will travel through the intersection of SW 137th Avenue and SW Beef Bend Road.

Road Existing Conditions and Classifications

According to the most recent county survey (Survey Number: 31771), the right-of-way width for SW Beef Bend Road varies substantially. Along the site's frontage, the right-of-way is 58 feet wide, 25 feet from the monumented centerline to the subject property boundary. SW Beef Bend Road transitions from two to three lanes with a center turn lane to accommodate three offset intersections east of the project site's frontage.

The Functional Classification and Lane Number Designation Maps in Washington County's TSP identify SW Beef Bend Road as a 2-3 lane arterial roadway. A regional trail is planned to extend from the

intersection between SW 137th and SW Beef Bend Road to the west across the frontage of the subject project site.

According to the Functional Design Parameters for roadways provided in Table 3 of the Washington County Transportation System Plan (TSP), arterial roads that are expected to be three lanes require a minimum of 90 feet of right-of-way, which corresponds to the A-4 designation in the Roadway Design Criteria Standards (RDCS).

Safety Hazard

The Transportation Impact Study, prepared by Lancaster Mobley and submitted as part of the proposed subdivision, has been reviewed by Washington County traffic engineers to determine the impact of the proposed development on the county right-of-way. These comments are consistent with the Washington County TSP, Road Design and Construction Standards, and R&O 86-95.

The submitted application will establish a new subdivision with 87 lots for future residential dwellings. As proposed, a local street network will connect the future lots to the existing roadway system via a single intersection with SW 137th Avenue.

SW 137th Avenue is the only outlet for an existing neighborhood of low-density, single-detached dwellings. Currently, the road has a single connection point to the larger transportation network through an intersection with SW Beef Bend Road. According to the TIS, the proposed subdivision will add ±624 daily vehicle trips to SW 137th Avenue, directly impacting its intersection with SW Beef Bend Road.

R&O 86-95 defines the impact area of a specific development where the applicant may be responsible for improvements, and it categorizes safety hazards as existing or predicted. According to Appendix B, Section A of R&O 86-95, existing hazards refer to those identified on the Safety Priority Index System List, and predicted hazards can be identified as locations where safety improvements are warranted. The impact area is defined under Section A as road links where site-generated traffic equals or exceeds 10 % of the existing average daily traffic.

The TIS did not analyze the current traffic volume on SW 137th Avenue. However, based on the existing development pattern of single-detached dwellings that use SW 137th Avenue for access, the current traffic volumes on SW 137th Avenue are unlikely to exceed 6,240 vehicle trips. Therefore, the additional 624 trips produced by the proposed subdivision would exceed the 10% threshold used to define an impact area in R&O 86-95.

Per R&O 86 95, Appendix B, Section D.2.2.2, warranted improvements are considered a predicted hazard. Subsection 2 specifies that left turn lanes at intersections within an impact area may be regarded as a predicted hazard safety improvement, provided volume warrants indicate the need for an improvement.

Based on the information provided in the applicant's Traffic Impact Study (TIS) and analysis by Washington County's traffic engineering team, the additional vehicle trips generated by this subdivision warrant a dedicated left turn lane for westbound traffic at the intersection of SW Beef Bend Road and SW 137th Avenue.

The intersection between SW 137th Avenue and SW Beef Bend Road is one of three offset intersections within a ±400-foot stretch of SW Beef Bend Road. SW Colyer Way and SW Peachtree Drive intersect on

the north side of SW Beef Bend Road, located west and east of the SW 137th Avenue intersection. The SW Colyer Drive intersection is to the west, and the SW Peachtree Drive intersection is approximately 150 feet to the east. An existing two-way center-left turn lane, extending between the two intersections, allows eastbound and westbound traffic to make left-turning movements onto the respective streets.

Based on the expected left-turning PM peak volumes and 85th percentile speed, the dedicated left-hand turn lane's total required length (taper and turn lane) is 240 feet.¹ This exceeds the 150-foot distance between the intersections of SW 137th Avenue and SW Peachtree Drive with SW Beef Bend Road. Therefore, the current alignment of the SW 137th Avenue and SW Beef Bend Road intersection cannot safely accommodate the increased westbound traffic from SW Beef Bend Road, which is making left-turning movements onto SW 137th Avenue.

The county understands that resolving the issues at this intersection may not be feasible as a part of this project. The County Engineer may be willing to support a Design Exception to establish an interim access consistent with the access management provisions in Washington County's TSP. This option would provide the proposed subdivision direct access onto SW Beef Bend Road until the existing intersection is improved and can safely accommodate additional traffic.

Any improvements to existing county facilities will require a Washington County Facility Permit. The County Engineer must approve designs that deviate from the county's Road Design and Construction Standards through the Design Exception process.

-

¹ Washington County's Road Design and Construction Standards, Section 15.08.320.050 determines the design requirements for a dedicated left-turn lane.

Washington County Facility Permit Requirements

I. GENERAL REQUIREMENTS

A. Permit Requirements

- 1. A Facility Permit is required for all improvements within Washington County's right-of-way. Facility Permits must follow the submittal requirements outlined in WCCO, Title 15.08.210.
- 2. An early access permit is required for site work where construction traffic will utilize the county's right-of-way.
- 3. Submit a construction access and traffic circulation/control plan.
- 4. Construction access will be from the city's right-of-way. No rural properties can be used for construction staging.
- 5. Per WCCO, Title 15.08.3.40.070, and CDC Section 501-8.5.B(4), new private driveway entrances onto an arterial road are restricted. In cases where access to an arterial road is necessary, a design exception may be submitted to the county engineer for review. Applications for a design exception must conform to the submittal requirements in WCCO, Title 15.08.220.020.2. Applicants are required to demonstrate that the request conforms to the review criteria in Title 15.08.220.020 of the WCCO.
- 6. Provide a Pavement Report prepared by a Professional Engineer. The report will include recommendations for new full-depth pavement and/or pavement repair for existing roadway sections affected by the project. The report shall include but is not limited to the following recommendations: Existing pavement condition analysis, Grind and Inlay/Overlay, pavement repair, "Wet Weather" pavement construction, ESAL calculations, AASHTO pavement design calculations, soil classification, modulus, and laboratory test results.

B. Improvements

- 1. New impervious areas that expand beyond the UGB boundary must follow rural drainage practices.
- 2. Impacts to private driveways on neighboring properties shall be considered when creating new intersections, including offsets that could result in unsafe ingress/egress turning movements within the right-of-way.
- 3. Existing driveways within the project site's boundary that provide access to SW Beef Bend Road will be closed.
- 4. According to WCCO, Title 15.08.340.110, retaining walls supporting private property are not permitted within the right-of-way.
- 5. Construction activity that impacts existing survey monuments in the right-of-way shall conform to the standards in WCCO, Title 15.08.310.020. Any new survey monuments within the right-of-way shall follow the requirements in WCCO, Title 15.08.310.030.

6. Coordinate with private property owners and the Postmaster General to relocate mailboxes as needed.

C. Utilities

- Per WCCO, Title 15.08.340.160.1, Dry utilities should be located outside the paved road
 where feasible. Underground utilities intended to provide direct service to adjacent
 properties with future connection shall not be located within the paved section of a
 constructed road unless approved by county staff. To reduce impacts on infrastructure, it
 is generally preferred that utilities be located outside of the right-of-way whenever
 possible.
- 2. Above-ground utilities shall meet the minimum clear zone requirements in WCCO Title 15.08.320.070.
- 3. Wet utilities shall be designed in accordance with the relevant service provider's requirements, and the county engineer shall review their potential impacts on the roadway.
- 4. When locating lighting and signal poles, the contractor shall coordinate with Portland General Electric and the Bonneville Power Administration to confirm the required clearance distances from power lines and other equipment.

II. PRIOR TO ISSUANCE OF A PUBLIC IMPROVEMENT OR EQUIVALENT PERMIT BY THE CITY OF KING CITY

Submit to Washington County Public Assurance Staff: A completed "Design Option" form (original copy), the City's Notice of Decision (NOD), and the County's Revised Letter dated April 9th, 2025.

\$ 28,000 Administration Deposit.

NOTE: The Administration Deposit, a cost-recovery account, is used to pay for County services provided to the developer, including plan review and approval, field inspections, as-built approval, and permit processing. This deposit is an estimate of the cost of these services. If, during the project, the Administration Deposit account is running low, additional funds will be requested to cover the estimated time left on the project. If there are any unspent funds at project closeout, they will be refunded to the applicant. Any point of contact with County staff can be a chargeable cost. If project plans are incomplete or do not comply with County standards and codes, costs will be higher. There is a charge to cover the cost of every field inspection. Costs for enforcement actions will also be charged to the applicant.

Electronic submission of engineering plans, geotechnical/pavement reports, engineer's estimates, final sight distance certifications, and the "Engineer's Checklist" (Appendix E of County Road Standards) for the construction of the following public improvements.

NOTE: Improvements within the ROW may require relocation or modification to permit the construction of public improvements. All public improvements and modifications shall meet current County and ADA standards. Public improvements that do not meet County standards shall submit a design exception to the County Engineer for approval.

A. SW Beef Bend Road

- 1. Half Street Improvements
 - Half-street improvements along SW Beef Bend Road shall meet the minimum standards for the A-4 designation in Exhibit 1 of Washington County's Road Design and Construction Standards. This includes at least 45 feet of right of way to

- accommodate 12-foot travel lanes and a 6-foot bike lane. The county will defer to the city's conditions regarding facilities beyond the curb line. City requirements may exceed the county's minimum standards.
- b. Road design shall be completed per the standards outlined in WCCO, Title 15.08.320.
- c. Bikeways shall be designed in accordance with Washington County's Bike Toolkit. The minimum standards are outlined in WCCO Title 15, Section 8.340.010. Exceeding the minimum requirements to provide safer facilities is encouraged.
- d. Sidewalks shall be designed to meet the minimum requirements in WCCO, Title 15.08.340.060. Designs that exceed these minimum requirements to satisfy the standards provided by the local land use authority are allowed. However, the county engineer will be the final authority regarding design and safety concerns.
- e. Pedestrian facilities must comply with the ADA Design Standards specified in the memo titled "Clarification of Americans with Disabilities Act (ADA) Design Standards," signed by the County Engineer on May 26, 2022.
- f. Street lighting and conduit shall be installed along the site's SW Beef Bend Road's frontage. Each fixture shall include a shield, which shall be installed in accordance with the applicable requirements in WCCO, Title 15.08.350.
- g. Washington County will defer to the local land use authority regarding landscape design requirements within the right-of-way. If landscaping is not required, Washington County's minimum design standards will apply. Plantings must follow the specific installation requirements in WCCO, Title 15.08.340.130.3.
- 2. Interim Access Intersection (optional)
 - a. Submit a Design Exception form in accordance with WCCO Title 15.08.350.040 justifying the need for an interim direct access onto an arterial roadway.
 - b. Intersections shall meet the minimum intersection design requirements in WCCO, Title 15.08.320.
 - c. The intersection design may incorporate turn lanes consistent with the recommendations in the Traffic Impact Analysis, provided that the applicable warrants are met. Additional improvements may be required when indicated by a supplemental warrant analysis.
 - d. Intersections must meet the minimum illumination standards in WCCO, Title 15.08.350.030.4.
 - e. Striping and signage must meet the Oregon MUTCD standards and any applicable Washington County standards.
 - f. Submit a Preliminary Sight Distance Certification and mitigation for the intersection Road.
- 3. Dedication of Right-of-Way
 - a. Right-of-way dedication shall be incorporated on the final plat submitted to the Washington County Survey Office for final review.

- b. Dedication resulting in a minimum of 45 feet right-of-way from the monumented centerline on the south side of SW Beef Bend Road.
- c. Additional right-of-way shall be provided as needed to permit the construction of city and county public improvements and ensure accessibility for future maintenance.
- d. Dedication at intersections with county roads shall extend to the curb return of the intersecting road.

III. PRIOR TO CERTIFICATE OF OCCUPANCY

- A. Either a final plat or dedication deed incorporating the necessary right-of-way dedication to accommodate all public improvements shall be recorded with Washington County.
- B. Washington County shall complete and accept all road and frontage requirements, including final sight distance certification for any intersections affected by work within the right-of-way.

Please contact Tony Mills, Associate Planner, at 503-846-3837 or by email at tony mills@washingtoncountyor.gov with any questions.

Testimonio en Apoyo al Financiamiento Regional para el Proyecto de Tránsito y Seguridad de la Carretera TV

Buenos días, presidente González y miembros del comité, mi nombre es Maria Rodríguez Cuamatzi. Soy embajadora comunitaria en la ciudad de Beaverton por parte de Unite Oregon y he vivido en esta comunidad por más de 15 años. Hoy estoy aquí para expresar mi fuerte apoyo al financiamiento completo del Proyecto de Tránsito y Seguridad de la Carretera Tualatin Valley, también conocida como TV Highway.

Durante el último año, he tenido el privilegio de participar en el desarrollo de comunicaciones para la Estrategia de Desarrollo Equitativo para la TV Highway, un proyecto que busca asegurar que las decisiones de infraestructura se tomen con la participación activa de las comunidades que históricamente han sido excluidas. Hemos recibido entrenamientos para poder involucrarnos en la abogacía, para poder ser un megáfono para nuestras comunidades a lo largo de la autopista.

Muchas personas en nuestra comunidad—especialmente inmigrantes, trabajadores esenciales, familias de bajos ingresos y personas mayores—dependen del transporte público a lo largo de esta carretera. Este proyecto no solo mejorará el acceso al tránsito, sino también la seguridad, la experiencia del usuario y la confiabilidad del servicio. Se trata de tener aceras seguras, cruces accesibles, paradas de autobús dignas y un sistema de transporte que realmente funcione para todos nosotros.

Pido que se aprueben los \$30 millones solicitados por TriMet para este proyecto. La propuesta asegura una inversión completa para que este trabajo tenga el mayor impacto posible y verdaderamente refleje las necesidades de nuestras comunidades.

Gracias por su tiempo y por considerar esta inversión tan importante para el bienestar de quienes vivimos y transitamos por esta región.

Subject: [External sender] Testimony to Support Sunrise Gateway Corridor/Highway 212

Date: Monday, April 28, 2025 11:47:10 AM

Attachments: image003.png

image005.png image008.png image009.png

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

Good morning,

I live, work, and spend meaningful time in the Sunrise Corridor. This is my community—it's where I raise my family, run my business, and invest my time and energy.

I'm here today to express my strong and unwavering support for the Sunrise Gateway Corridor / Highway 212 project. This is not just a transportation upgrade—it's a once-in-a-generation opportunity to transform a region that has waited far too long for real investment.

For decades, the people of Clackamas County—have called for safer roads, better access, and more reliable infrastructure. The Sunrise Corridor Community Visioning project captures that collective voice, and this project is the tangible next step.

This isn't just about getting from point A to point B. It's about unlocking access to jobs, reducing daily traffic headaches, and giving working families the safe, affordable, and efficient transportation options they deserve. It's about making sure our region grows in a way that's sustainable and inclusive.

The Sunrise Corridor is brimming with potential—it's a vital hub for future economic development. But that potential won't be realized without infrastructure that supports it. Right now, we're holding back opportunity. With this project, we can open the door to growth that benefits everyone: families, workers, developers, and local businesses.

This is a win-win for our community and for Oregon. I urge you—with deep conviction—to support the Sunrise Gateway Corridor project. Let's invest in a future that's safer, stronger, and more connected for everyone who calls this place home.

Thank you for your time, Jill Rundle

Testimony in Support of Regional Funding for the TV Highway Transit and Safety Project

Good morning chair Gonzalez and members of the committee, my name is Juan Pedro, and I'm a lifelong resident of Hillsboro, Oregon. I'm here today to voice my strong support for funding of the TV Highway Transit and Safety Project, which is currently being considered for \$28 million in regional funds—which is just short of TriMet's \$30 million request.

For almost the last three years, I have been directly involved in efforts to develop and promote the TV Highway Equitable Development Strategy, working alongside passionate community members and community based organizations to ensure that future development reflects the needs and voices of those who live, work, play and travel along this corridor—particularly those who have historically been excluded from infrastructure planning and decision-making spaces.

The TV Highway corridor is home to many immigrants, families who are financially burdened, and essential workers who rely on public transportation every day. This project represents more than just infrastructure—it's about safety, dignity, and access. It's about making sure that transit is fast, reliable, and safe for people walking, biking, or riding the bus.

By fully funding this project, you are helping ensure that improvements to the corridor are equitable, community-driven, and responsive to the lived experiences of those who know it best. Continued investment in TV Highway is an investment in our people, our neighborhoods, and our shared future.

I urge you to allocate the full \$30 million requested. Let's not fall short of a transformational opportunity for our corridor—and our community.

Thank you for your time,

Juan Pedro Moreno Olmeda

Dear Project Committee,

You are asking for my opinion on this project;

You are not addressing what should be the number one priority in my opinion. The most dangerous intersection on Hwy 212 just east of your project.

The intersection of Hwy 212/ E Foster Rd/E Sunnyside Rd.

This intersection is primitive and being overlooked. The options are not easy today and will be even more difficult as time goes on.

As growth happens, as Urban Growth Boundaries expand, we still have this choke hold on efficiency and safety.

This project will only improve transportation into the most dangerous and overlooked intersection on Hwy 212.

Make this intersection priority #1.

Sincerely,

Gerald Murphy

[External sender]Sunrise Community Visioning Project/Hwy. 212-224 (Rock Creek Junction) RFFA applications Monday, April 28, 2025 1:40:53 PM

CAUTION: This email originated from an External source. Do not open links or attachments unless you know the content is safe.

Greetings,

Per comments and testimonials submitted at many public meetings – please also consider my written testimony in support of these critical grant applications for projects in Clackamas County. The impact of a failing intersection (Rock Creek Junction) and the greater Sunrise Community Visioning Project for the future of community connectivity, housing and economic development in the greater Happy Valley area is of paramount concern to the City of Happy Valley, Clackamas County, and the regional multi-modal transportation system in this is part of the Portland metropolitan area.

Regards,

Michael D. Walter, AICP | Economic & Community Development Director O: 503-783-3839 | M: 503-886-8439 | happyvalleyor.gov

Subject: [External sender]Comment on proposed bond
Date: Wednesday, April 30, 2025 4:49:47 PM

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

Dear Metro Councilors:

I am writing to submit a brief comment on the proposed transit bond.

First, debt is not a desirable way to pay for capital projects. By borrowing against future funding, Metro will incur debt service that will cannibalize future revenue. There is no immediate crisis that requires such action. Metro and its partner agencies should learn to live within their means.

Second, most of the proposed projects are seriously flawed. Transit in general is losing market share and TriMet in particular is in a financial death spiral. There is no reason to plan for expansion when operating costs are skyrocketing and ridership is in decline.

Telecommuting is a permanent new feature of the workplace and there is no reason for transit agencies to fight it. In most respects, telecommuting is a good thing and we should encourage more of it.

In addition, the success of unsubsidized transportation network entities such as Lyft and Uber has fundamentally changed the market. Many people prefer on-demand, door-to-door service, which public transit districts do not serve. People who have become regular customers of ridesharing companies will not be returning to TriMet regardless of how much public money you pour into shiny new projects.

Most of the projects being proposed within the bond are flawed and not worthy of public funding. For instance, the 82nd Avenue project "vision" statement on pages 18-19 of the PBOT project summary document states that "the vision maintains two travel lanes in each direction", but also includes "potential transit priority lanes."

Those two concepts are in conflict. If you have one you can't have the other. But the PBOT preference is clear from the graphic on page 18, which shows only one thru lane in each direction as the transit priority lanes force drivers to make right turns. This is clearly going to be a "bait-and-switch" that will result in massive congestion and diversion, with the transit lanes being under-utilized most of the time.

It also seems apparent that the new Burnside Bridge will result in a subtraction of lane capacity for motor vehicles in favor of a busway. The notion that we will spend close to \$1 billion to build a new bridge that actually makes congestion worse is indefensible. TriMet ridership is in decline and there is no reason to think it will come back. The new bridge should be planned for the travel patterns we have, not the ones planners dream of.

Finally, there is no reason to extend the moribund Streetcar system to Montgomery Park. The Streetcar is a low-speed, low-capacity, high-cost mode that became obsolete more than 100 years ago. Try and learn from experience and cancel any more public funding for this urban relic.

I appreciate that Metro's public involvement on this project has been far superior to that of the Portland School Board on its much larger bond proposal of \$1.83 billion. But the substance of Metro's bond concept is lacking and should not be advanced.

Sincerely,

John A. Charles, Jr. President & CEO Cascade Policy Institute

Testimony to the Joint Policy Advisory Committee on Transportation re: 2028-30 Regional Flexible Funding Allocation

April 30, 2025

Kristopher Fortin Grijalva, Transportation Program Director Oregon Environmental Council

Founded in 1968, the Oregon Environmental Council (OEC) is a nonprofit, nonpartisan, membership-based organization. We advance equitable, innovative, and collaborative solutions to Oregon's environmental challenges for today and future generations.

Re: Oregon Environmental Council Support for RFFA Funding Request for Earthquake Ready Burnside Bridge Project

Dear Co-chairs Gorsek and McLain, Vice chairs Starr and Boshart Davis, and members of the committee,

Oregon Environmental Council would like to express support for Multnomah County's Regional Flexible Funding Allocation (RFFA) funding request for the Earthquake Ready Burnside Bridge Project. This project will result in a modern bridge that advances multimodal safety and enhances one of the highest ridership bus routes in the Portland Metropolitan region. A rebuilt Burnside Bridge will be one of the only central city bridges standing post-earthquake, making this project critical in supporting community safety, response, and economic recovery after a major earthquake.

The new bridge will provide safer, modern multimodal transportation facilities, serving all modes and communities accessing the downtown core, especially adjacent neighborhoods which are located in equity focus areas. This includes building ADA-compliant sidewalks to adjacent transit stops and social service providers, safer and better-protected pedestrian and bicycle facilities on the bridge, preserving the existing bus-only lane, providing permanent bicycle/pedestrian street improvements adjacent to the bridge and preparing the bridge for a future streetcar line. This multifaceted infrastructure project addresses many urgent community needs including the safety and resiliency of the bridge, and upgrades to support the region's plans for high capacity transit.

The Burnside Bridge is used by three TriMet bus lines - Line 12, 19, and 20 - and carries nearly 15% of the total bus ridership in the region. The Line 20 has the second-highest bus ridership in the entire region. The transit improvements that this regional funding would support would allow local communities to have safer, and more accessible access to these services, and would put necessary infrastructure in place to reduce delays. In order to support our region for generations to come, the new, seismically-resilient bridge will be well-prepared for future bus rapid transit development, as well as potential streetcar expansion.

Making the Burnside Bridge seismically resilient will also improve the reliability of the nearly 19-mile Burnside St. regional emergency lifeline route, stretching from Washington County to Gresham across the heart of the metro region.

The project will support regional economic development through short and long-term job creation by providing over 6,200 job years of employment, including for apprentices, women, and people of color. A safe and resilient bridge will better support the reliable movement of goods and services in and across Portland and the region.

Transportation accounts for roughly 35 percent of Oregon's greenhouse gas emissions. One of the key strategies for Oregon to hit these targets is to reduce the miles traveled by gas powered vehicles, and a core component of this strategy is our transit system. Increasing easy and safe access to transit in this region must be a priority. We strongly support including the Earthquake Ready Burnside Bridge project as

part of this RFFA bond package, and encourage decision-makers to substantially fund the transit elements included in the project proposal. These transit improvements will make the bridge safer, more climate resilient, reliable, and accessible for communities for decades to come.

Sincerely,

Re: Cedar Mill Better Bus and Access to Transit Enhancements Project

Dear Councilor Gonzales, Councilor Lewis, and members of the committee,

We are writing today in support of funding for the Cedar Mill Better Bus and Access to Transit Enhancements Project. For 150 years, Providence St. Vincent Medical Center has been providing high quality, award-winning health care. The emergency department at Providence St. Vincent Medical Center is the busiest in the Portland metro area, accommodating more than 90,000 visits per year. The hospital is both the local community hospital for the west side and a destination for patients needing our specialized care in areas such as cardiovascular disease, stroke, behavioral health and pediatrics.

Anticipating the need to serve more than 100,000 patients annually, we just completed a \$45M project expanding and modernizing our Emergency Department, including additional treatment rooms and equipment, and enhanced safety and security measures. We understand these investments are necessary to provide the best care.

We believe investment in local infrastructure is an essential step towards developing sustainable urban environments. Not only will transit improvements along Cedar Mill and adjacent streets enhance mobility and accessibility for the entire community - including patients, caregivers, and emergency responders - it also aligns perfectly with Providence's commitment to environmental stewardship. Such improvements can significantly reduce traffic congestion, leading to decreased travel time and lower emissions, which benefit everyone.

Thank you for the opportunity to provide comment in support of the requested funding for this project.

Respectfully,

Raymond Moreno, M.D.

Chief Executive

Re: Sunrise Corridor

Dear Councilor Gonzales, Councilor Lewis, and members of the committee,

For more than a decade Providence has been participating in conversations with Clackamas County on the next phase of transportation improvements for Highway 212, commonly known as the Sunrise Corridor. For the past 16 months, Providence has had the opportunity to have a representative on the steering committee for the Sunrise Corridor Community Visioning process. Our director of land use and planning found this committee to be well informed, engaged with the community, and thoughtful. Providence is supportive of the planning direction that the steering committee recommended, and we are writing now in support of the \$12.5 million funding request from Metro for the next phase of the project.

Providence has a long tradition of investing in the Happy Valley community. In 2009 we opened, Providence Medical Group – Happy Valley on Sunnyside Road where we offer family medicine primary care, immediate care, diagnostic imaging, and physical therapy services. In 2024, more than 29,000 patients were served by these clinics, many multiple times.

Providence also owns land adjacent to Nelson High School at 162nd and Highway 212 for future development. Over the years we have considered a variety of options for this property. With the current and projected growth of Happy Valley, we are excited to be looking at opportunities to increase access to primary care, ambulatory surgical services, and other outpatient medical services. Future plans for the property will be finalized once decisions about the Sunrise Corridor are made and we know exactly how the parcel is impacted.

Thank you for the opportunity to provide comment in support of the requested funding. We look forward to continuing to serve the Happy Valley community.

Respectfully,

Brad Henry / Chief Executive

Providence Milwaukie Hospital

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

To Whom It May Concern:

As the author of *The Portland Bridge Book*, first published in 1989 by the Oregon Historical Society Press, I have been writing and teaching about the big river bridges located across the lower Willamette River for more than three decades.

Most recently (since 2017), I have been a volunteer member of a series of citizen committees dedicated to getting at least one big river bridge designed and built to remain standing after the subduction zone earthquake that we all know is coming — not if, but when.

I urge Metro to approve the Regional Flexible Funds' bond measure that would assist in the realization of that bridge, i.e., a new and earthquake ready Burnside Bridge — the city's lone designated Lifeline Corridor bridge — and in the full amount of \$25 million as requested by Multnomah County.

I have seen the drawings for the proposed life-saving Burnside Bridge. My question is how can lives be saved if the forces of short-sightedness prevail at this critical design juncture?

Sincerely, Sharon Wood Wortman 3270 SW Fairmount Blvd. Portland, OR 97239

Subject: [External sender] Support for RFFA Funding Request for Earthquake Ready Burnside

Bridge Project

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

I would like to express support for Multnomah County's Regional Flexible Funding Allocation (RFFA) funding request for the Earthquake Ready Burnside Bridge Project. This project will result in a modern bridge that advances multimodal safety and enhances one of the highest ridership bus routes in our region. A rebuilt Burnside Bridge will be one of the only central city bridges standing post-earthquake, making this project critical in supporting community safety, response, and economic recovery after a major earthquake.

Making the Burnside Bridge seismically resilient will also improve the reliability of the nearly 19- mile Burnside St. regional emergency lifeline route, stretching from Washington County to Gresham across the heart of the metro region.

Increasing easy and safe access to transit in this region must be a priority, so I strongly support including the Earthquake Ready Burnside Bridge project as part of this RFFA bond package, and encourage decision-makers to substantially fund the transit elements included in the project proposal. These transit improvements will make the bridge safer, more reliable, and more accessible for communities for decades to come.

Sincerely, April Atwood

There will be a quake.

All the current bridges across the Willamette in Portland will fail.

Countless hours of study & participation by staff and public have been spent to address those 2 facts. They have found a solution.

Now is your opportunity to honorably, morally respond to their request for assistance: Fund the new Burnside Bridge.

Thank you for your attention to this urgent matter.

Subject: [External sender]Burnside Bridge and Water Pipeline under the Willamette.

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

I believe the most important projects to fund are:

A. The Burnside Bridge. To have 1 bridge that is seismically designed with ramps built to the same codenot cut corners.

So it can withstand earthquake and provide a safe thoroughfare - is essential. I understand the other bridges have ramps that would collapse even if their bridge stood.

B. The main water pipe, where water flows under the Willamette and delivers essential water from the Eastside to the Westside

is critical! The pipe is old, not in good shape and must be addressed right away.

First things first Oregon! Priorities.

This must be funded and construction started asap.

We have the money. Let's get going.

CAUTION: This email originated from an External source. Do not open links or attachments unless you know the content is safe.

To whom it may concern

Multnomah County is requesting \$88 million for several projects. As a resident, I do not support the request.

Clearly an earthquake proof Burnside Bridge is a worthy project. That is a \$28 million request. The remaining projects are questionable. The most questionable is extending the streetcar to Montgomery Park. Sadly, one should not fund five when only one is worthy.

The city, county and state are in a financial downward spiral, as noted by state economists. Further, existing infrastructure is in horrible shape. The departments of transportation need to address this reality.

Thank you for the opportunity to comment.

One out of 5 cars on the roads in east county, Portland and other parts of this area have no valid Registration on their vehicles, I took my daughter to the store today and I sat in my car while she was in there. There is a pot store by where she shops. There must have been 30 cars pull in to buy the drugs and only one car had valid registration.

This is supposed to be the way you get the money for the bridge; I am totally against you getting any money for these projects! So, if you want to make up for this tell the County Sheriff and Police force to get off their big butts and go after these people. Then and only then will support any thing for the City of Portland.

An East County Taxpayer

Mike

If you can afford Drugs then you can Pay for your registration!

JPACT TRANSCRIPT

00:00:00.000 --> 00:00:09.000

Thanks, Ramona. All right. Good morning, everyone. Wonderful to see you. I'm going to begin our meeting by calling roll.

00:00:09.000 --> 00:00:13.000

Multnomah County Commissioner Shannon Singleton. Good morning. Washington County Commissioner Nafisa Fai.

00:00:13.000 --> 00:00:17.000

President, good morning.

00:00:17.000 --> 00:00:19.000

Present good morning.

00:00:19.000 --> 00:00:24.000

President, good morning. Let's see. Clackamas County Commissioner Paul Savas.

00:00:24.000 --> 00:00:26.000

President.

00:00:26.000 --> 00:00:33.000

City of Portland Mayor Keith Wilson. Cities of Multnomah County Mayor Travis Stovall Morning. Cities of Washington County Mayor Jeff Delane.

00:00:33.000 --> 00:00:39.000

Good morning, President.

00:00:39.000 --> 00:00:40.000

President.

00:00:40.000 --> 00:00:45.000

Cities of Clackamas County Mayor Joe Buck. Maureen. Odot, Ryan Winsheimer.

00:00:45.000 --> 00:00:51.000

Here, good morning.

00:00:51.000 --> 00:00:52.000

I'm here.

00:00:52.000 --> 00:00:56.000

Learning. Trimet, Sam D'Soux. Morning. Port of Portland, Curtis Robinhold.

00:00:56.000 --> 00:01:06.000

Good morning, President.

00:01:06.000 --> 00:01:09.000

Dq Ali Mirzakalili.

00:01:09.000 --> 00:01:10.000

President, good morning.

00:01:10.000 --> 00:01:22.000

Metro Council, Christine Lewis. Metro Council, Ashton Simpson.

00:01:22.000 --> 00:01:28.000

Good morning. Wsdot Carly Francis.

00:01:28.000 --> 00:01:31.000

This is to have them on Carly's behalf present.

00:01:31.000 --> 00:01:37.000

Oh, hi, Devin. Great to have you here. Devin is Carly's alternate.

00:01:37.000 --> 00:01:40.000

City of Vancouver, Mayor Anne McEnany Ogle. Morning. C-tran.

00:01:40.000 --> 00:01:45.000

Good morning, present.

00:01:45.000 --> 00:01:50.000

Leanne Caver.

00:01:50.000 --> 00:02:01.000

Okay, great. So, and I do want to acknowledge that Portland Councillor Angelina Murillo is here as alternate for Mayor Wilson.

00:02:01.000 --> 00:02:06.000

So welcome, Counselor. And I also got a message from Emerald Bogue.

00:02:06.000 --> 00:02:16.000

That is waiting to be let in. If staff can connect with Emerald. Okay, there she is.

00:02:16.000 --> 00:02:29.000

So before we start on public communications on the agenda, I do want to Remind folks that we have a public hearing scheduled for the regional flexible funds allocation proposals.

00:02:29.000 --> 00:02:39.000

For record keeping purposes, we're asking the public to hold their testimony on RAFA Step 1a and step two until the public hearing begins at 7.50.

00:02:39.000 --> 00:02:45.000

For all other agenda items, I'll ask Ramona to provide instructions on public communications.

00:02:45.000 --> 00:02:47.000

So Ramona, please.

00:02:47.000 --> 00:03:00.000

Thank you, Chair. If you have not done so in advance, please sign up to testify by raising the raise hand function In the reactions or more menus or dialing star nine.

00:03:00.000 --> 00:03:04.000

When it's your turn to testify, I'll call your name or phone number.

00:03:04.000 --> 00:03:09.000

For those on Zoom, click accept to be promoted to a panelist.

00:03:09.000 --> 00:03:13.000

Your Zoom window will close briefly before you rejoin as a panelist.

00:03:13.000 --> 00:03:19.000

You can turn on your camera if you like. Testimony is limited to three minutes.

00:03:19.000 --> 00:03:29.000

And the timer begins when you begin speaking. Please state your name for the record before testifying. You do not need to give your physical address.

00:03:29.000 --> 00:03:35.000

We do have some folks who have signed up to speak today.

00:03:35.000 --> 00:03:36.000

Great.

00:03:36.000 --> 00:03:38.000

And I'm going to start With...

00:03:38.000 --> 00:03:53.000

Ramona, is this for... Is this for regular testimony or for testimony regarding Rafa?

00:03:53.000 --> 00:03:54.000

Okay. Perfect.

00:03:54.000 --> 00:04:01.000

This is for just regular testimony on agenda items. And at the top of the item, the chair did specify to comment if you are speaking on RFFA items.

00:04:01.000 --> 00:04:06.000

Great. And the folks who have their hands raised are signed up to speak for RFA. So we'll just hold tight on that right now.

00:04:06.000 --> 00:04:12.000

I'm going to start with Councillor Brett Sherman, if I can find him here.

00:04:12.000 --> 00:04:16.000

Councillor Brett Sherman is speaking on behalf of Brefa. Olive.

00:04:16.000 --> 00:04:20.000

Oh, we've asked him to wait. That's right. All of those folks have waited.

00:04:20.000 --> 00:04:25.000

I'm going to start calling on the people whose hands are raised.

00:04:25.000 --> 00:04:26.000

I'm going to promote. Those are all Rafa folks.

00:04:26.000 --> 00:04:30.000

Those folks are also speaking on behalf of RAFA.

00:04:30.000 --> 00:04:46.000

Okay, go ahead and put your hands down if you're speaking, if you're here to speak on Rafa, please Leave your hand up if you're here to speak on something other than Rafa that's on the agenda today.

00:04:46.000 --> 00:04:51.000

All right. I'm promoting to panelist Amy Ferrara.

00:04:51.000 --> 00:04:56.000

Ramon, I think we also have Bob Hastings with us here.

00:04:56.000 --> 00:05:00.000

Hi, Bob. Are you here to testify or are you here as an alternate? Sorry, I'm not sure if

00:05:00.000 --> 00:05:03.000

I'm here to testify for Rafa.

00:05:03.000 --> 00:05:11.000

Okay. We're holding testimony for Rafa at 750, so apologize for the logistical mishap here.

00:05:11.000 --> 00:05:16.000

Hi, Amy. Thank you for joining us this morning.

00:05:16.000 --> 00:05:23.000

Hi, and I apologize if this is correct or not correct, but I want to testify or on behalf of the Sunrise Corridor.

00:05:23.000 --> 00:05:24.000

Is that? Sorry about that. Okay, okay.

00:05:24.000 --> 00:05:31.000

Yeah, that's held for 750. Sorry about that. That's okay. No, thank you for your patience. We'll hear you soon.

00:05:31.000 --> 00:05:37.000

All right, Chair, it doesn't look like anyone is signed up to speak on any other agenda items.

00:05:37.000 --> 00:05:51.000

Okay. Thank you. Thank you, Ramona. See no further testimony on open items. I will close this public hearing. And a reminder that we will have A hearing for RFFA at 7.50.

00:05:51.000 --> 00:06:19.000

I will ask staff, I think Ted is joining us to provide an update on safety in fatal crashes on our system since our last meeting.

00:06:19.000 --> 00:06:33.000

Wonderful. I did see Ted put his hand up.

00:06:33.000 --> 00:06:42.000

There we go. There we go. Okay. I see myself now. Good morning, everybody. Ted Liebold, Transportation Policy Director with Metro.

00:06:42.000 --> 00:06:49.000

Each month, we acknowledge the people killed in traffic crashes in Clackamas, Multnomah, and Washington County since our last meeting.

00:06:49.000 --> 00:06:56.000

We do this to remind ourselves of the impact of our work on transportation and the lives of the people in our community.

00:06:56.000 --> 00:07:05.000

Whereas we have been reading the names of people killed. That information is no longer available from the ODOT crash and analysis and reporting unit.

00:07:05.000 --> 00:07:11.000

But we will continue to share the age of the victims and the locations of the fatal crashes each month.

00:07:11.000 --> 00:07:17.000

Since our last meeting, at least 11 people have died in a traffic crash.

00:07:17.000 --> 00:07:31.000

We have a person aged 40 driving in Clackamas County. Vehicle passenger age 32 in washington county a person age 29 driving in Clackamas County.

00:07:31.000 --> 00:07:38.000

A person driving in the city of portland a person driving in Clackamas County.

00:07:38.000 --> 00:07:57.000

A person age 67 driving in Multnomah county a person age 39 motorcycling in washington county A person aged 86 walking in portland a person age 69 walking in Hillsborough.

00:07:57.000 --> 00:08:02.000

A vehicle passenger aged 45 In Clackamas County.

00:08:02.000 --> 00:08:15.000

And a vehicle passenger in the city of Gresham. Thank you, Chair. That's our report for today. Oh, sorry. We have another slide. Next slide, please.

00:08:15.000 --> 00:08:26.000

It is helpful to remember that the actions we are committed to to prevent future traffic crashes and deaths our safe streets, safe speeds.

00:08:26.000 --> 00:08:35.000

Safe people, safe vehicles, and post-crash care. Next slide, please.

00:08:35.000 --> 00:08:43.000

And Georgia or Ramona will add web links for the following information about this month's safety projects to the Zoom chat.

00:08:43.000 --> 00:08:49.000

That you can click on for further information. We're going to highlight three of those today.

00:08:49.000 --> 00:08:54.000

The Portland Bureau of Transportation has activated seven new signalized crossings.

00:08:54.000 --> 00:09:00.000

Including new full traffic signals, pedestrian hybrid beacons, and rapid flashing beacons.

00:09:00.000 --> 00:09:07.000

Most of these locations were identified through Safe Routes to Schools outreach to improve access to 12 local schools.

00:09:07.000 --> 00:09:16.000

With funding from Portland's Fixing Our Streets, system development charges. And cannabis tax revenue.

00:09:16.000 --> 00:09:28.000

The Portland Police Bureau and law enforcement partners conducted a four-day high visibility traffic enforcement mission over St. Patrick's day weekend through the Metro Area Traffic Enforcement Collaboration.

00:09:28.000 --> 00:09:37.000

Resulting in 1,200 traffic stops. 730 citations, 85th and 85 arrests, including 58 impaired drivers.

00:09:37.000 --> 00:09:44.000

This collaborative effort is part of an ongoing Vision Zero effort to eliminate traffic fatalities throughout the region.

00:09:44.000 --> 00:09:54.000

And finally today, the Oregon Department of Transportation is installing new rectangular rapid flashing beacons at three high priority locations on Southeast Boulevard in Portland.

00:09:54.000 --> 00:09:59.000

Tualatin Valley Highway in Aloha. And Hall Boulevard in Tigard.

00:09:59.000 --> 00:10:04.000

Each project includes enhanced lighting. High visibility striping.

00:10:04.000 --> 00:10:11.000

Upgraded Americans with Disability Act curb ramps and other complementary safety improvements.

00:10:11.000 --> 00:10:23.000

And construction is underway at all locations. Also in the chat, we've provided additional information for five additional safety projects focused on focused on safety.

00:10:23.000 --> 00:10:26.000

Thank you, Chair. That's our report for this month.

00:10:26.000 --> 00:10:30.000

Thanks, Ed. Commissioner Fies, your hand raised for this section. Do you have a question?

00:10:30.000 --> 00:10:41.000

Yeah, I did. Sorry, I raised earlier and then it was accident that time, but this one, I do have a question for the presenter. I was wondering.

00:10:41.000 --> 00:11:04.000

If you could go back to the first slides of the people that were killed in our roads, there was an identified person At the age of 32 that It said in a vehicle where the different categories were a passenger, driver, walking. So I wasn't sure

00:11:04.000 --> 00:11:21.000

Did you get that information from the entities that record these data or Or it's just we just don't know that the person was killed by a car or They were in the car like how do we disaggregate that piece of this just caught my attention and i appreciate

00:11:21.000 --> 00:11:36.000

Also, while this is really sad data that we present, I appreciate the the improvements we made to this process to follow up with some of the crucial safety elements that are being implemented in our roads to save lives. So I do want to recognize that piece.

00:11:36.000 --> 00:11:43.000

But just for my own edification, I was wondering if you could just elaborate what in a vehicle.

00:11:43.000 --> 00:12:08.000

Yeah, so the data comes from the Oregon Department of Transportation Analysis and Crash Unit, which combs through the police reports and reports from follow-up reports from hospitals and uh such places when it says in a vehicle, we're interpreting that to mean there was a passenger in the vehicle as opposed to the driver.

00:12:08.000 --> 00:12:14.000

And if they're a driver that is identified driving there on the slide.

00:12:14.000 --> 00:12:16.000

Is that helpful in terms of what you were asking about?

00:12:16.000 --> 00:12:23.000

Yeah, so we just don't know if they were the passenger driver they were just part of the occupancy in the vehicle.

00:12:23.000 --> 00:12:24.000

Is that how we're? Okay. Okay, thank you.

00:12:24.000 --> 00:12:28.000

Correct. Yep.

00:12:28.000 --> 00:12:31.000

Commissioner Savas?

00:12:31.000 --> 00:12:44.000

Yeah, thank you. It seems appropriate. I just want to um share with you in my tenure and even recently, which is why I'm bringing this up today, is that some of the emergency responders that I know in parts of the county

00:12:44.000 --> 00:12:50.000

That respond a number of these accidents, whether they're fatalities or whether they're just injuries.

00:12:50.000 --> 00:12:57.000

Either way, they can be life changing. So I don't want to diminish the fact that injuries are not important.

00:12:57.000 --> 00:13:16.000

But I do want to point out that you know, I want to thank ODOT for addressing and evaluating some of these accidents that happen and you know You know, Ryan, you're here with us today, but I want to point out that there are improvements being made in certain areas where accidents and fatalities have happened.

00:13:16.000 --> 00:13:33.000

And we had one corridor in South County that, you know, ODOT and the Oregon State Police helped put a safety corridor in place. However, some of these accidents are elsewhere and we are seeing urban level traffic, congestion.

00:13:33.000 --> 00:13:48.000

And frankly, a little frustration apparently he's like emergency responders say that with people trying to, when you have bumper to bumper traffic going out to a rural city, people lose their patience and they try some more aggressive moves. I don't know. I'm not saying that's the cause of these things because I'm not

00:13:48.000 --> 00:14:07.000

To the investigations. Some of these things, but I just want to let people know that we are doing everything we can with our resources in areas that have the highest incidence and we are cash constrained, but we are spending a lot of money on Stafford Road, which is mitigating diversion and spillage off the interstate.

00:14:07.000 --> 00:14:19.000

And in South County, where some of these accidents are listed today, we have unique problems where there's only one way and that's what that's a rural highway that happens to be owned by the state. And if it's our responsibility, we get behind it as well but

00:14:19.000 --> 00:14:28.000

Just want to point out that we are seeing urban level congestion and traffic and instances on our rural roads.

00:14:28.000 --> 00:14:31.000

Thank you.

00:14:31.000 --> 00:14:36.000

Thanks, Commissioner. Yeah, lots of safety needs, a lot of transportation needs for sure.

00:14:36.000 --> 00:14:48.000

I'm going to ask Allie Holmphist to join us now to present on the transit minute. Transit is also one of our major priorities here at JPACT and for the region.

00:14:48.000 --> 00:14:54.000

And we want to see how we're continuing to support the return of ridership.

00:14:54.000 --> 00:15:22.000

And those outcomes so far. So Ali, if you could join us.

00:15:22.000 --> 00:15:32.000

Thanks, Georgia.

00:15:32.000 --> 00:15:38.000

Great. Thank you very much. So today in the Transit Minute, next slide, please.

00:15:38.000 --> 00:15:45.000

In February, we had almost 5.5 million rides in the Metropolitan Statistical Area.

00:15:45.000 --> 00:15:49.000

You'll probably notice from the graph that's a little bit less than we saw last year.

00:15:49.000 --> 00:15:56.000

But last February was a leap year. So if we adjust that to be a little bit more typical, next slide, please.

00:15:56.000 --> 00:16:01.000

You get a trend line that looks more like this. Oh, sorry, previous slide.

00:16:01.000 --> 00:16:12.000

Yes, two graphs. So it's just a little bit lower that we saw this February due to that severe winter storm that caused some school closures and travel advisories.

00:16:12.000 --> 00:16:20.000

Now, next slide, please. And for transit news, I just wanted to highlight some resources available through our Better Bus program.

00:16:20.000 --> 00:16:31.000

Trimet and Metro have developed a map showing the transit route segments experiencing the most delay, which you can see are all over the region in this snapshot.

00:16:31.000 --> 00:16:38.000

And that's paired with a toolkit providing a menu of solutions for improving speed and reliability through infrastructure in the road.

00:16:38.000 --> 00:16:51.000

Washington County is a great example. They included many of these sites in their countywide transit study. And so with so many jurisdictions doing transportation system plan updates, it's a great time to be thinking about this as part of planning.

00:16:51.000 --> 00:16:55.000

So thank you very much. That is the Transit Minute.

00:16:55.000 --> 00:17:06.000

Thanks, Allie. Truly a minute. Mayor Delane and then Ryan.

00:17:06.000 --> 00:17:07.000

Yeah, yeah, I can hear you.

00:17:07.000 --> 00:17:13.000

I think I got all my mutes off. Okay, good. I can't let it pass, Ellie. You cut us off the map again.

00:17:13.000 --> 00:17:28.000

And I think East County might, if they might say the same thing because they're cut off the map with the legend so If you guys could consider that if including the west counties and these counties in

00:17:28.000 --> 00:17:30.000

Thanks, Mayor. Ryan.

00:17:30.000 --> 00:17:49.000

Thank you. Just going back to safety for a moment, and I appreciate Commissioner Fire's point in trying to understand the safety data that's presented. And it's just at such a high level. And I appreciate that the the information that you're sharing. I don't know that it's appropriate to really share at a different level.

00:17:49.000 --> 00:17:57.000

For this type of a form, but it is sometimes challenging to know a lot of the detail that happens on some of these.

00:17:57.000 --> 00:18:11.000

I know here at ODOT, I just want to share, as Commissioner Savez pointed out, in particular as it relates to pedestrian and bicycle fatalities, we have our vulnerable crash user response team that evaluates those within 30 days.

00:18:11.000 --> 00:18:22.000

I evaluate every one of those independently with them and go over the data. We talk about safety improvements. And I'm sure local jurisdictions have similar processes for what's going on on their facilities.

00:18:22.000 --> 00:18:43.000

And the responses to those. And it might be at some point something that we want to spend some time thinking about In terms of an agenda item, just to come back and share Some of the things that we have done as a result of those, some of the information we've shared, and maybe also some of the how we classify those fatalities that you're seeing up there. And I just bring up one.

00:18:43.000 --> 00:19:03.000

We had a fatality recently on I-84 that was uh coded as a fatality as a pedestrian. It was someone changing their tire that their vehicle was struck as they were changing their tire and that gets coded as a pedestrian. And so sometimes it's hard to tell exactly what's happening on these things unless you really dig into the data and understand it.

00:19:03.000 --> 00:19:12.000

I appreciate that we have this time and that we do recognize what's happening out there. But if you really want to dig in and understand that.

00:19:12.000 --> 00:19:25.000

What's happening on some of these. I do think that would be useful. One of the things that strikes me is, again, how often we're seeing alcohol speed And some of the other factors that lead into some of the safety issues that we're seeing and

00:19:25.000 --> 00:19:53.000

What steps can we take as an organization at JPAC and Metro and how we think about our safety dollars, how we're applying those for a number of programs that Metro, ODOT, the cities and counties are supporting today, and how do we make sure that we're maximizing the efficiency and effectiveness of those programs to really help tackle some of these things that are really more serious than I think any of us think about unless you're really staring at that data and you recognize how often these factors are

00:19:53.000 --> 00:19:55.000

Part of what's happening out there. Thanks for just allowing me to talk about that for a minute.

00:19:55.000 --> 00:20:07.000

That's right. Of course, thanks. And Mayor Delane, I do want to say we've had a lot of great chat already in the meeting, but please, if you could keep it brief.

00:20:07.000 --> 00:20:14.000

Yeah, first I want to thank Ryan, acknowledge his group for putting out these rapid flashing beacons.

00:20:14.000 --> 00:20:18.000

I think they do really give us an opportunity to try to make a difference.

00:20:18.000 --> 00:20:26.000

But I think also as I drive through our region and our area We need something more on education side.

00:20:26.000 --> 00:20:31.000

The number of times I approached the rapid flashing beacons in Forest Grove, Cornelius.

00:20:31.000 --> 00:20:37.000

Anywhere in Washington County. And have pedestrians crossing within half a block of them.

00:20:37.000 --> 00:20:42.000

That there's an educational element. I think it goes much to what Ryan was talking about, about bad choices.

00:20:42.000 --> 00:20:48.000

So we need to think about what we're doing about the education, help people understand the why.

00:20:48.000 --> 00:20:53.000

Why is it so important that they use these things? That's all I wanted to chime in. Thanks, Chair, for the indulgence.

00:20:53.000 --> 00:21:10.000

Of course. Right. Well, thank you to the staff for our regular presentations. I do appreciate the the level of interest in our safety and in transit and how we continue to make that better. That's the point of why we do these and why we continue to highlight them.

00:21:10.000 --> 00:21:16.000

So I think the conversation is very welcome. Some quick updates from me.

00:21:16.000 --> 00:21:29.000

First on the transportation package. As you all know, the Oregon legislature is contemplating a package In this 2025 legislative session.

00:21:29.000 --> 00:21:42.000

In preparation for the package and knowing that the region is more successful at achieving its priorities when we speak in one voice about the level of investment that we would like to see happen here in the region.

00:21:42.000 --> 00:21:53.000

You will recall that JPAC did develop a packet of regional priorities that we have been sharing in Salem.

00:21:53.000 --> 00:22:00.000

I ask that you please take a look at the memo in the packet for an update on the status of this work.

00:22:00.000 --> 00:22:07.000

Since staff has been just hard at work in Salem advancing these priorities.

00:22:07.000 --> 00:22:14.000

Another important update is We are hosting a special JPAC meeting next month.

00:22:14.000 --> 00:22:22.000

On Thursday, May 22nd. And this is going to be an online workshop.

00:22:22.000 --> 00:22:35.000

To learn more about the RFFA Step 1A projects. At our last meeting, folks had mentioned that they would really like to some presentation and discussion time.

00:22:35.000 --> 00:22:51.000

On each of the five projects that are presented in the scenario, whether that's Burnside Bridge or 82nd Avenue or Montgomery Streetcar Sunrise Corridor. So my understanding is that staff from each of those projects will have an opportunity to present and answer questions on projects.

00:22:51.000 --> 00:22:56.000

And that, again, is in response to requests from this body.

00:22:56.000 --> 00:23:04.000

And you should have received an invitation. So please make sure on your calendar that you let us know if you'd like to attend.

00:23:04.000 --> 00:23:10.000

Okay, so on to our consent agenda. We do have three items on the consent agenda.

00:23:10.000 --> 00:23:30.000

Commissioner Savas did inform me at the start of the meeting that he would like to pull one item from the consent agenda. So I want to look to Michelle and or Ted just to make sure that uh we procedurally here, we don't make any mistakes as to how I move this.

00:23:30.000 --> 00:23:34.000

Well, I could also just provide some clarification before asking Michelle about procedure.

00:23:34.000 --> 00:23:35.000

Okay.

00:23:35.000 --> 00:24:00.000

I think the issue that Commissioner Savas raised was raised by Clackamas County and smart transit agency regarding representation of transit agencies at JPACT. And that issue was raised as part of the US Department of Transportation's certification process of us as a metropolitan planning organization.

00:24:00.000 --> 00:24:20.000

And so at the time response to that was that once the USDOT reported back on our certification that we would then talk about that specific issue at JPACT, We did just receive a certification on Friday, and so Metro staff has been looking to

00:24:20.000 --> 00:24:38.000

Figure out when we could fit the report back to JPACT on that certification process into our JPACT agenda and was intending on Specifically addressing that specific issue as part of the report back so I don't know if Commissioner Savas, if you would be willing to

00:24:38.000 --> 00:24:44.000

Listen or hold off until we're actually prepared to report back on the whole certification process.

00:24:44.000 --> 00:24:49.000

And that transit representation issue that was specifically raised in that process.

00:24:49.000 --> 00:24:51.000

Commissioner Savas.

00:24:51.000 --> 00:25:05.000

Yeah, thanks, Ted. As I shared earlier with Chair Gonzalez, there was a commitment made by this group to bring this back to JPAC, us for a discussion and a resolution.

00:25:05.000 --> 00:25:24.000

So I appreciate the late information, but that does not negate the challenge that we have nor the commitment to resolve this and so You know, if I would like to pull it and follow through with our commitment to address it and not

00:25:24.000 --> 00:25:45.000

Not cause any further delay. We have a structural problem. You know, throughout not just here, but in other aspects of transit that we're trying to resolve and really frankly, it's on behalf of the citizens in the region who are paying for transit, who are not receiving service. So I think there's a

00:25:45.000 --> 00:25:55.000

Overwhelming commitment to meet the demands on behalf of those who are paying but not being served

00:25:55.000 --> 00:26:04.000

Okay, Commissioner. Looking at the Metro staff here so We do have three.

00:26:04.000 --> 00:26:10.000

Items on the consent agenda. There is a request to pull one.

00:26:10.000 --> 00:26:22.000

From the agenda for next meeting and so Looking at my agenda, we would move two items on consent which is Resolution number 25-5481.

00:26:22.000 --> 00:26:30.000

Which is a series of actions on the MTIP. And then also number two, the consideration of our meeting minutes for March.

00:26:30.000 --> 00:26:37.000

So if I could have a motion to move those two items on the consent agenda.

00:26:37.000 --> 00:26:45.000

Chair Gonzalez, I move to approve the consent agenda but withdraw item 4.2 and bring it back for further discussion.

00:26:45.000 --> 00:26:48.000

Okay, thank you. Can I get a second? Thank you, Commissioner.

00:26:48.000 --> 00:26:52.000

Second, I second.

00:26:52.000 --> 00:26:54.000

All right. All in favor, say aye.

00:26:54.000 --> 00:26:55.000

Bye.

00:26:55.000 --> 00:26:56.000

Right.

00:26:56.000 --> 00:26:57.000

l...

00:26:57.000 --> 00:26:58.000

Bye.

00:26:58.000 --> 00:27:00.000

Bye.

00:27:00.000 --> 00:27:13.000

Seeing no opposition. The motion passes unanimously. Thank you. And that item will return as a part of the presentation that Metro staff was planning to to bring at a future meeting. Thank you, Commissioner Savas.

00:27:13.000 --> 00:27:29.000

All right, now on to our discussion items, which includes uh the public hearing for the regional flexible funds public testimony hearing. Thank you to folks that have been patiently waiting for us to be able to get to this point.

00:27:29.000 --> 00:27:48.000

As folks recall. At the last JPAC meeting, we did refer a package for public comment a set of projects that could potentially be funded through through bonding a portion of our region's regional flexible fund allocation.

00:27:48.000 --> 00:28:02.000

Which we refer to as our FFA Step 1a One, the public parliament period also includes counties and cities applications for funding for projects to be funded through what is called Rafa step two.

00:28:02.000 --> 00:28:16.000

Today, we'll host a public hearing to gather input from the members of the public on projects identified And the step 1a1 bond and the local transportation products competing in the step two allocation process.

00:28:16.000 --> 00:28:28.000

Please also note that the agenda packet includes a variety of options for folks to share their thoughts on the process and the projects under consideration, including an online open house that runs through April 28th.

00:28:28.000 --> 00:28:37.000

And if you haven't looked at that open house It's really interactive and engaging on the internet. So I highly encourage folks to do that.

00:28:37.000 --> 00:28:47.000

So Grace is here to kick us off with this part of the of the presentation and agenda. Grace, I see you've joined us. I'll hand it off to you. Thank you.

00:28:47.000 --> 00:29:00.000

Thank you, Chair Gonzalez and members of JPACT for having me here this morning to introduce the 28 through 30 regional flexible fund allocation Public Testimony or public hearing opportunity.

00:29:00.000 --> 00:29:06.000

Just have a couple of short slides and then we'll hand it back over for Terry Gonzalez to open the public hearing.

00:29:06.000 --> 00:29:21.000

Next slide, please. So on March 26, Metro opened a public comment period for the 28 through 30 regional flexible fund new project bond proposal and the step two competitive allocation.

00:29:21.000 --> 00:29:32.000

The public comment period runs through April 30th, 2025. Members of the public are encouraged to participate and provide comment through the following formats.

00:29:32.000 --> 00:29:39.000

There's an online open house and survey on the regional flexible fund bond proposal, referred to as Step 1.1.

00:29:39.000 --> 00:29:44.000

An interactive map and survey on the step two applications received.

00:29:44.000 --> 00:30:00.000

Both of these surveys are also available in Spanish. Members of the public can also submit emails send us regular u.s postal service mail or pick up the phone.

00:30:00.000 --> 00:30:07.000

And lastly, there's today's public hearing. Next slide, please.

00:30:07.000 --> 00:30:22.000

So following the public comment period, Metro staff aims to compile the comments, identify the comment themes, and issue public comment reports for the bond proposal, as well as for step two in May in efforts to support the deliberations. These will be two separate reports.

00:30:22.000 --> 00:30:34.000

With the aim For JPAC and Metro Council to make a final decision on the regional flexible fund bond proposal and step two in July of this year.

00:30:34.000 --> 00:30:50.000

Next slide, please. And if there are any questions regarding the public comment or the regional flexible fund allocation in general, please feel free to reach out and contact myself. And with that, I will turn it over to Councilor Gonzalez.

00:30:50.000 --> 00:30:55.000

Thank you, Grace. So I will now open a public hearing on agenda item.

00:30:55.000 --> 00:31:04.000

2028, 2030 regional flexible fund allocation step 1a1 and step two of public testimony.

00:31:04.000 --> 00:31:09.000

Ramona, if you could please provide instruction on how the public can provide comment once again.

00:31:09.000 --> 00:31:15.000

And we'll ask folks too. Raise your hands and whatnot. Thank you.

00:31:15.000 --> 00:31:27.000

You chair. If you have not done so in advance, please sign up to testify by using the raise hand function in the reactions or more menus or by dialing star 9.

00:31:27.000 --> 00:31:32.000

When it's your turn to testify, I'll call your name or phone number.

00:31:32.000 --> 00:31:37.000

For those on Zoom, click accept to be promoted to a panelist.

00:31:37.000 --> 00:31:41.000

Your Zoom window will close briefly before you rejoin as a panelist.

00:31:41.000 --> 00:31:47.000

You can turn on your camera if you like. Testimony is limited to three minutes.

00:31:47.000 --> 00:31:57.000

And the timer begins when you begin speaking. Please state your name for the record before testifying. You do not need to give your physical address.

00:31:57.000 --> 00:32:06.000

If you know what projects you're specifically speaking about today. Please say that at the beginning of your testimony.

00:32:06.000 --> 00:32:12.000

I believe we have Councillor Brett Sherman. He's our first person to sign up today.

00:32:12.000 --> 00:32:14.000

Go right ahead.

00:32:14.000 --> 00:32:26.000

Thank you very much. And I'm actually pretty excited about having the full three minutes today. I really shortened it up kind of given where we've been in the past. So I maybe have an extra minute to chat with you guys. So I do appreciate that.

00:32:26.000 --> 00:32:32.000

Good morning, everyone. Char Gonzalez, committee members. Thank you for this opportunity to speak to you today.

00:32:32.000 --> 00:32:38.000

My name is Brett Sherman. I'm a Happy Valley City Councilor. I hold a number of committee responsibilities, including as an alternate for JPACT.

00:32:38.000 --> 00:32:44.000

And I'm here to testify in favor of funding the Step 1A Sunrise Quarter project at the full \$12.5 million.

00:32:44.000 --> 00:32:52.000

And to advocate for the associated Step 2 Highway 212, 224 Sunrise Bike Ped Facilities and interchange improvements.

00:32:52.000 --> 00:33:07.000

There are a number of solid projects that are under consideration, and it is imperative that we structure our public asks in a way that validates we are spending public money wisely. None of my comments today are meant to disparage any of the other projects in the region.

00:33:07.000 --> 00:33:19.000

It is critical that we receive the full \$12.5 million for Sunrise so that we can build on the momentum from the recently completed visioning and move this key corridor forward towards shovel-ready status.

00:33:19.000 --> 00:33:28.000

This project has been a regional priority for over 40 years, and an investment in this project demonstrates our commitment to making the region safer and more livable.

00:33:28.000 --> 00:33:35.000

Notably, they're related to 212, 224 interchange improvements will help to mitigate the risks of moving through what has been deemed a high injury corridor.

00:33:35.000 --> 00:33:56.000

In addition, it provides access to over 650 acres of buildable industrial and commercial lands And it lacks substantial affordable home building opportunities. It also benefits those who travel to and from the East, including commuters from Estacada and Sandy. So with that, I really do urge you to move these projects forward, and I appreciate today's time and consideration

00:33:56.000 --> 00:34:01.000

Thank you for allowing me to present.

00:34:01.000 --> 00:34:04.000

Thanks, Councillor Sherman, for coming.

00:34:04.000 --> 00:34:24.000

Next, we have Bob Hastings, and I'll be promoting him as a panelist.

00:34:24.000 --> 00:34:25.000

Hey, Bob, thanks for your patience.

00:34:25.000 --> 00:34:33.000

Good morning, JPAC committee, and thank you for the opportunity. I'm Bob Hastings.

00:34:33.000 --> 00:34:53.000

I am a member of the Citizens Advisory Design Group Serving for many years on serving earthquake ready Burnside Bridge project. And I just want to give you my endorsement of Multnomah County's request for funding through the funding for flexible funding process.

00:34:53.000 --> 00:35:00.000

The thing I wanted to emphasize for the committee is how engaged Multnomah County has been through this process.

00:35:00.000 --> 00:35:07.000

They um over 30 years of working on public works projects, mostly through trimet.

00:35:07.000 --> 00:35:13.000

They've learned a lot of lessons. From others bringing projects forward.

00:35:13.000 --> 00:35:18.000

It's an important project. It has had a lot of vetting.

00:35:18.000 --> 00:35:31.000

Both from citizens of all stripes and background areas. So I've been very impressed with the inclusiveness of Multnomah County on this process They've taken very seriously this opportunity.

00:35:31.000 --> 00:35:42.000

It's going to be a project that will be for an earthquake ready bridge not just serving the city of Portland, but the whole region from Gresham Providing traffic and transit.

00:35:42.000 --> 00:35:50.000

It also will provide a multimodal connections as well as good ADA connections for folks across the whole bridge.

00:35:50.000 --> 00:35:58.000

It's a project that's also going to provide a lot of economic development opportunities for folks in the city and the region.

00:35:58.000 --> 00:36:14.000

And in that case, those dollars that JPAC can provide will have a multiplier effect throughout the region. So with that, I'm not going to delve into the details But just an overall endorsement of their request. And thank you for the opportunity.

00:36:14.000 --> 00:36:24.000

Of course. Thank you, Bob.

00:36:24.000 --> 00:36:41.000

Okay, next we have Jill Rundle. Jill, I'm promoting you as a panelist.

00:36:41.000 --> 00:36:49.000

Good morning, panel. Thank you for allowing me to speak this morning. My name is Jill Rundle and I live, work, and spend meaningful time in the Sunrise Corridor.

00:36:49.000 --> 00:36:55.000

This is my community. It's where I raised my family, run my business, and invest my time and energy.

00:36:55.000 --> 00:37:01.000

I'm here today to express my strong and unwavering support for the Sunrise Gateway Corridor and the Highway 212 project.

00:37:01.000 --> 00:37:10.000

This is not just a transportation upgrade. This is a once-in-a-generation opportunity to transform a region that's waited far too long for a real investment.

00:37:10.000 --> 00:37:22.000

For decades, the people of Clackamas County have called for safer roads, better access, and more reliable infrastructure. The Sunrise Corridor Community Visioning Project captures that collective voice and this project is the tangible next step.

00:37:22.000 --> 00:37:33.000

This isn't just about getting from point A to point B. It's about unlocking access to jobs, reducing daily traffic headaches, and giving working families the safe, affordable, and efficient transportation options they deserve.

00:37:33.000 --> 00:37:38.000

It's about making sure our region grows in a way that's sustainable and inclusive.

00:37:38.000 --> 00:37:42.000

The Sunrise Corridor is brimming with potential. It's a vital hub for future economic development.

00:37:42.000 --> 00:37:46.000

But that potential won't be realized without the infrastructure that supports it.

00:37:46.000 --> 00:37:55.000

Right now, we're holding back opportunity. With this project, we can open the door to growth that benefits everyone, families, workers, developers, and local businesses.

00:37:55.000 --> 00:38:06.000

This is a win-win for our community and for Oregon, and I urge you to support the Sunrise Gateway Corridor Project. Let's invest in a future that's safer, stronger, and more connected for everyone who calls this place home.

00:38:06.000 --> 00:38:11.000

Thank you.

00:38:11.000 --> 00:38:12.000

Thank you. The next person who has signed up to speak is Gary Woods.

00:38:12.000 --> 00:38:15.000

Thank you so much, Jill.

00:38:15.000 --> 00:38:42.000

Gary, I'm promoting you as a panelist.

00:38:42.000 --> 00:38:51.000

Showing up here.

00:38:51.000 --> 00:38:52.000

There it is. I think Gary, Gary's here now.

00:38:52.000 --> 00:38:56.000

Okay, I'm going to move on to the next person. Michael. There we go.

00:38:56.000 --> 00:38:58.000

Great.

00:38:58.000 --> 00:39:07.000

Gary, you should be able to come off mute.

00:39:07.000 --> 00:39:08.000

Good morning. My name is Gary Woods. Can you hear me now?

00:39:08.000 --> 00:39:12.000

Hi. Yep.

00:39:12.000 --> 00:39:21.000

Okay. My name is Gary Woods and I would like to comment on the step two application that King City submitted.

00:39:21.000 --> 00:39:31.000

Or the west side trail segment one project I've submitted a lengthy written document, so I'll just summarize my main points.

00:39:31.000 --> 00:39:42.000

Number one, the project asks for building three roads All of these roads will be stubbed until an indefinite time sometime in the future, likely several years.

00:39:42.000 --> 00:39:49.000

For one of these roads at least, it will be many, many years. This is not a responsible use of the grant funds.

00:39:49.000 --> 00:39:58.000

Number two, the owners of 30% of the property covered by this grant are not a minimal to selling the property to King City for this project.

00:39:58.000 --> 00:40:05.000

I live in the Edgewater HOA and I've talked with my neighbors And this is a very controversial project.

00:40:05.000 --> 00:40:12.000

Which has a high possibility of requiring eminent domain to acquire the property.

00:40:12.000 --> 00:40:23.000

Number three, the Westside Trail, as originally planned can be built without additional property being purchased.

00:40:23.000 --> 00:40:45.000

Number four, the roads and trails are not tier one projects as the grant application states they are tier two application they're tier two And number five, the incorrect version of the west side trail layout was submitted with the grant application.

00:40:45.000 --> 00:40:55.000

Thank you for looking at the documents that I sent in. I think 22 pages and for allowing me to speak this morning.

00:40:55.000 --> 00:40:57.000

Thank you.

00:40:57.000 --> 00:41:22.000

Our next testifier is Michael Walter, and I'm promoting michael as a panelist.

00:41:22.000 --> 00:41:28.000

Good morning. My name is Michael Walter. From the city happy valley's Economic and Community Development Director.

00:41:28.000 --> 00:41:34.000

I'd like to echo everything that Councillor Sherman said, and I'm speaking to the same projects on the Sunrise Corridor.

00:41:34.000 --> 00:41:51.000

I served on the project management team and at times the technical advisory committee And I'd like to break my testimony down into kind of two sections. One is first wearing my hat as my position, the Economic and Community Development Director, and advocate for the

00:41:51.000 --> 00:41:58.000

Projects and projects focused mostly on what Councillor Sherman spoke to about the industrial area.

00:41:58.000 --> 00:42:15.000

This is called the Rock Creek Employment Center in the City of Happy Valley's plans it's been planned and studied extensively for nearly 20 years. It would benefit quite a bit from the corridor no matter what parts of the corridor might be funded.

00:42:15.000 --> 00:42:21.000

It will eventually see benefits to economic development in that area.

00:42:21.000 --> 00:42:28.000

Strongly advocate for that. Then I'm going to put my other hat on which is resident.

00:42:28.000 --> 00:42:38.000

Near the corridor living just off of 142nd avenue And also for my mother who lives in Chatterbrook.

00:42:38.000 --> 00:42:49.000

Manufactured home community, which is also in the corridor. And here I'd like to focus on local residents observations about safety.

00:42:49.000 --> 00:43:04.000

As many people know, the corridor has high maybe not fatalities, but high accidents, as Councilor Sherman spoke to And we've witnessed several of them.

00:43:04.000 --> 00:43:23.000

Even just recently. And as the committee explored at the very beginning with the ODOT data on crashes and et cetera, a lot of times The reason that we have crashes and accidents is because of driver behavior or error.

00:43:23.000 --> 00:43:29.000

And sometimes It's also the road design.

00:43:29.000 --> 00:43:35.000

As it interacts with other roads and signals. And this is the case, I believe.

00:43:35.000 --> 00:43:48.000

With the existing Highway 212-224. And so only some of these infrastructure related improvements will really lead to increased safety.

00:43:48.000 --> 00:43:57.000

I'd like to strongly advocate for that as well. And thank you very much for your time.

00:43:57.000 --> 00:44:11.000

Next person is Zachary Luridson. Zachary, I'm promoting you as a panelist.

00:44:11.000 --> 00:44:25.000

Good morning, folks. Can you see me hear me? There we go. Awesome. Good morning. Hello, Zachary Lawretsen. I'm from Oregon Walks. We're a pedestrian advocacy organization. We also host the 82nd Avenue Coalition. It's nice to see so many of you friendly faces.

00:44:25.000 --> 00:44:39.000

As you finalize your RAFA funding priorities, I really want to lift up 82nd Avenue specifically. I know many of you know 82nd Avenue well, and I want to highlight just a couple of reasons why that is deserved.

00:44:39.000 --> 00:44:46.000

82nd Halves has decades of challenges. It's a high crash corridor. It's had decades of paving. So there's intense heat islands effects.

00:44:46.000 --> 00:44:57.000

The sidewalk network is incomplete, often inaccessible. Bus line 72 has, as you know from your packet and information, some of the highest delay of any line in the entire system.

00:44:57.000 --> 00:45:06.000

And yet, and this is what's so important and yet In the face of these challenges, Line 72 has the highest ridership of any line in the entire state.

00:45:06.000 --> 00:45:23.000

And our constituents along 82nd Avenue are voting with their feet that transit is critical, even in the face of these challenges, it's incredibly critical. So if there's ever a chance and ever a place to prioritize transit and investment in transit. It would be here on 82nd Avenue and

00:45:23.000 --> 00:45:32.000

There's momentum on 82nd Avenue. Your dollars from RAFA will be matched from other transportation agencies and other projects.

00:45:32.000 --> 00:45:41.000

The 82nd Avenue Coalition is working with jurisdictions all around the corridor, around workforce, around housing, around tree canopy, around depaying, childcare.

00:45:41.000 --> 00:45:45.000

Things that make 82nd Avenue robust and really investing in folks.

00:45:45.000 --> 00:45:53.000

I know you get more asks than there are dollars. But please, please, please prioritize 82nd Avenue as you go through that prioritization process.

00:45:53.000 --> 00:45:55.000

Thank you.

00:45:55.000 --> 00:45:57.000

Exactly.

00:45:57.000 --> 00:46:03.000

Next is Dick Davis. I'm promoting you as a panelist.

00:46:03.000 --> 00:46:13.000

Thanks. And also, I do want to acknowledge folks, you'll see that we've updated the timer to 90 seconds. We have about, I think, close to 20 more people scheduled.

00:46:13.000 --> 00:46:19.000

And to help guide us through the agenda, we do have items on the other side of this.

00:46:19.000 --> 00:46:26.000

That we need to complete by 930. Thank you in advance for understanding that we're shifting the time block to 90 seconds. Thank you.

00:46:26.000 --> 00:46:28.000

Dick.

00:46:28.000 --> 00:46:52.000

Thank you. I am the chair of Portland Streetcar. I am here today to testify in support of bond funding for Excuse me, for the Montgomery park streetcar extension Which brings with it tremendous economic development potential and private sector support.

00:46:52.000 --> 00:47:00.000

This project presents an opportunity to replicate past streetcar successes to build thousands of units of new housing.

00:47:00.000 --> 00:47:06.000

And create a vibrant, walkable neighborhood close to the central city.

00:47:06.000 --> 00:47:24.000

The Montgomery Park Streetcar Extension is currently in the federal project development phase, which means in the two years The next two years, it will be ready to request federal funding to start construction.

00:47:24.000 --> 00:47:41.000

Applying the RFA bond funding to the funding plan uh will uh fill a crucial gap in local match and ensure the project is a competitive candidate for federal construction.

00:47:41.000 --> 00:47:48.000

Funds and leverages nearly 30 million in private sector support for the project.

00:47:48.000 --> 00:48:01.000

I hope you will consider the climate smart transit connection and broad community benefits This regional support for this project will provide.

00:48:01.000 --> 00:48:03.000

Thank you.

00:48:03.000 --> 00:48:06.000

Thank you. Right on time.

00:48:06.000 --> 00:48:36.000

Foreign bowling is next. Lauren, I'm promoting you as a panelist.

00:48:39.000 --> 00:48:44.000

Lauren, you should be able to speak now. No, we cannot hear you.

00:48:44.000 --> 00:48:50.000

No.

00:48:50.000 --> 00:48:51.000

Sorry.

00:48:51.000 --> 00:49:00.000

I'm going to move to the next person. Lauren, you work on your your speaker there on your end and we'll get back to you.

00:49:00.000 --> 00:49:08.000

The next person. After Lorne is... Tyler Smith.

00:49:08.000 --> 00:49:22.000

Tyler, I'm promoting you as a panelist.

00:49:22.000 --> 00:49:49.000

All right. Good morning. Morning, commissioners, mayors, counselors uh I'm Tyler Smith. I'm the vice president of ironworkers Local 29 and the chair of our political action committee I'm... Wanted to talk to you today just to galvanized support for the earthquake ready Burnside bridge

00:49:49.000 --> 00:50:11.000

Um this I personally, this project is kind of personal to me because I worked on the burnside bridge as like a new journeyman right after finishing or apprenticeship in, I believe it was 2005 Possibly 2004 but It was pretty cool. We were doing like some uh

00:50:11.000 --> 00:50:28.000

Seismic upgrade projects and working kind of in the guts of the piers burnside bridge and we found old rivets from when the project was first built you know a hundred years ago ish And... It's an amazing... It's an amazing bridge.

00:50:28.000 --> 00:50:34.000

But we need a new one. We know that we're not going to have these bridges.

00:50:34.000 --> 00:50:49.000

Aren't built to last when the big one hits. By building a new bridge, we'd really uh it would invest a lot in the next generation. We have a robust apprenticeship program.

00:50:49.000 --> 00:51:03.000

That you know we're trying to bring in lots of Young folks, women young folks people from the BIPOC communities, veterans. Anyhow, I guess I'm out of time, but I'm just saying, please support this project in the future.

00:51:03.000 --> 00:51:06.000

And thank you for your time.

00:51:06.000 --> 00:51:11.000

I'm trying to get folks on here a little bit faster.

00:51:11.000 --> 00:51:16.000

Diana Helm, I tried to, there you are, Diana Helm you're next.

00:51:16.000 --> 00:51:27.000

Thank you. Good morning, Chair Gonzalez and the rest of the JPAC committee. I appreciate your time this morning. My name is Diana Helm and I have lived, worked, played, shopped, eaten.

00:51:27.000 --> 00:51:42.000

And lived my life here for 30 years now in the Sunrise Corridor. I'm the former mayor of Damascus, and I'm here today to strongly support the Sunrise Gateway corridor, Highway

212 project, not just as a transportation project, but as a means for economic development.

00:51:42.000 --> 00:51:48.000

Clackamas County is growing, but economic opportunity isn't reaching every part of the region equally.

00:51:48.000 --> 00:51:54.000

The Sunrise Corridor is poised for growth, but we need the right infrastructure in place to make that happen.

00:51:54.000 --> 00:52:08.000

We have waited decades, right, Paul? Decades. For real investment in safety and transportation, and this project reflects the voices of residents, youth, small businesses, and underrepresented communities.

00:52:08.000 --> 00:52:16.000

This project will open the door for more housing development by improving access and reducing barriers for builders.

00:52:16.000 --> 00:52:30.000

It will create better mobility for our local workforce, especially those without cars, and it will support existing residents by reducing congestion and improving access to major job centers in the Clackamas industrial area.

00:52:30.000 --> 00:52:38.000

Many of our residents work in retail, healthcare, logistics, and education, and they need safe, reliable routes to get to their jobs.

00:52:38.000 --> 00:52:49.000

This project expands bike, pedestrian, and transit access while easing traffic for others. This project will create improvements that will benefit people every day.

00:52:49.000 --> 00:52:59.000

And I urge you to support this whole project. I've been involved for many, many years and would love to see the funding go through on this. Thank you for your time.

00:52:59.000 --> 00:53:04.000

Promise no. You're next.

00:53:04.000 --> 00:53:13.000

Good morning, Chair Gonzalez and JPAC members. My name is Thomas Ngo. I'm here to urge full funding for the 82nd Avenue Transit Project.

00:53:13.000 --> 00:53:36.000

I live just a block away from 82nd Avenue in Montevilla and serve on both TriMet's 82nd Avenue Community Advisory Committee and PBOT's Building a Better 82nd Avenue Community Advisory Group I grew up a few blocks away and I experienced the corridor's challenges daily. 82nd Avenue runs from the airport to Clackamas Town Center, serving some of Portland's most diverse and historically underserved neighborhoods.

00:53:36.000 --> 00:53:45.000

And it's one of the city's most dangerous streets. It's part of more than a dozen vulnerable road users have been killed here in the last decade.

00:53:45.000 --> 00:54:00.000

Now, PBOT's done an inventory of all the specific issues along 82nd Avenue that need to be addressed. And there's a lot of work that needs to be done to make 82nd Avenue

00:54:00.000 --> 00:54:06.000

Thanks, Thomas. I think you dropped off.

00:54:06.000 --> 00:54:08.000

Okay, I think Thomas dropped off. Yeah, but thank you, Thomas.

00:54:08.000 --> 00:54:13.000

I think for him if he comes back.

00:54:13.000 --> 00:54:18.000

So we have jay jones

00:54:18.000 --> 00:54:19.000

Hey, Thomas. Sorry, I think you dropped off for a little bit.

00:54:19.000 --> 00:54:22.000

Thomas is right here.

00:54:22.000 --> 00:54:29.000

Do you want to wrap up? You're on mute. Sorry.

00:54:29.000 --> 00:54:30.000

Do we want to...

00:54:30.000 --> 00:54:36.000

Sorry. Yeah, I'll submit written testimony as well, but I urge you to fully fund the 82nd Avenue Transit project request.

00:54:36.000 --> 00:54:44.000

It's shovel ready. It aligns directly with RTP's goals for equity, safety, and mobility. And thank you for your consideration and leadership.

00:54:44.000 --> 00:54:48.000

Thank you, Thomas.

00:54:48.000 --> 00:54:53.000

I think Jasmine should be here. Jasmine, you're next.

00:54:53.000 --> 00:55:02.000

Hi, good morning. Thank you for having me. My name is Jasmine Ko and I'll also be speaking on the support of 82nd Avenue.

00:55:02.000 --> 00:55:11.000

I am the community programs manager. Verde has been serving communities, building environmental wealth for around 20 years.

00:55:11.000 --> 00:55:19.000

And we are currently a part of the 82nd Avenue Coalition along with Oregon Walks, Pano and Unite Oregon.

00:55:19.000 --> 00:55:40.000

We're very excited that the 82nd Avenue corridor is being considered to be a recipient of these funds. It is such an essential transportation hub for many of our community

members getting to school and to work and As Zachary mentioned, line 72 has the highest ridership of any route and we have heard firsthand from

00:55:40.000 --> 00:55:47.000

Youth and families that they are waiting for buses because they're full, especially during peak hours.

00:55:47.000 --> 00:55:58.000

Many of our community members don't have access to personal vehicles. So it is uh yeah a very critical project to invest in excellent transit.

00:55:58.000 --> 00:56:12.000

And we are also investing in housing being developed in Coley. And so this would be augmented and further support our greenhouse gas emission goals by connecting housing, jobs, and transit.

00:56:12.000 --> 00:56:28.000

Anyways, I understand that there are limited funds and a lot of competing projects, and so we are very grateful for your consideration in 82nd Avenue and not just for our community, but for the greater region that 82nd Avenue serves.

00:56:28.000 --> 00:56:31.000

All right. Thanks so much.

00:56:31.000 --> 00:56:37.000

All right, Chair, we're going to try Lauren Bowling again and see if they were able to get their tech working.

00:56:37.000 --> 00:56:38.000

Can you hear me? Okay, sorry about that.

00:56:38.000 --> 00:56:39.000

Ah, yeah.

00:56:39.000 --> 00:56:41.000

Yes. Horn.

00:56:41.000 --> 00:56:56.000

Chair Gonzalez and JPAC members. For the record, my name is Lauren Bulling. The Ironworkers Local 29 would like to express our continued strong support for Multnomah County's regional flexible funding allocation request for the earthquake Ready Burnside Bridge project.

00:56:56.000 --> 00:57:12.000

Funding this project will create a modern bridge that advances both multimodal transit and safety while also creating family wage jobs for our region. As a local, we represent more than 1,300 journey level workers and 250 registered apprentices across Oregon and Southwest Washington.

00:57:12.000 --> 00:57:28.000

And we are proud of our partnerships with community groups like Constructing Hope and Portland Youth Builders to open opportunities for historically disadvantaged Oregonians. And I would just add on to that, more than 30% of our registered apprentices are people of color, women, veterans, or some combination of these groups.

00:57:28.000 --> 00:57:39.000

On the multimodal component, the Burnside Bridge is used by three TriMet bus lines, line 12, 19, and 20, and this accounts for nearly 15% of the total bus ridership in the region.

00:57:39.000 --> 00:57:47.000

On a side note, we are also running Senable 7-Eleven in the Oregon State Legislature right now, which is looking to update statute.

00:57:47.000 --> 00:58:07.000

And allow the use of automated traffic cameras and highway work zones when workers are present. So traffic fatalities and safety on the roads is incredibly important to our membership. Again, we just asked for the consideration and support of the earthquake Ready Burnside Bridge, RFFA request, and thank you for your time.

00:58:07.000 --> 00:58:11.000

Mark Lineman, you're next.

00:58:11.000 --> 00:58:18.000

Thank you. My name is Mark Linehan. I'm a resident of Portland. I'm here in support of the Prescott Project.

00:58:18.000 --> 00:58:33.000

Which will build bicycling and pedestrian improvements on Prescott in Northeast Portland from Route 72nd Street to across the I-205 area.

00:58:33.000 --> 00:58:42.000

And the reason I support this is I am a bicyclist. I cycled that route fairly often. And the reason I cycle it is it's one of the few ways to get across I-205.

00:58:42.000 --> 00:58:56.000

In that part of Portland, the best alternative option or the only really alternative option is kink Killingsworth and that's just way so busy then it's not at all a good route.

00:58:56.000 --> 00:59:05.000

This Prescott connection connects two main high poverty areas in the city, Cully and Park Rose.

00:59:05.000 --> 00:59:20.000

So it's a way to address providing transportation by bicycle for populations that may not be able to afford cars. It also has complementary function with respect to the 82nd Street project.

00:59:20.000 --> 00:59:31.000

Because it connects to 82nd in both directions from east and west and provides a way for people in those areas to get to the proposed improved bus lines on 82nd.

00:59:31.000 --> 00:59:44.000

The other alternative that RFA funds is considering is one on Gleason street But Gleason Street has two alternatives. One is Burnside, which is just south of it.

00:59:44.000 --> 00:59:52.000

And the other is Halsey, which is a little messy but still there. Whereas Killingsworth is, I'm sorry, Prescott is the only one further north.

00:59:52.000 --> 00:59:56.000

So that's why I think it should be funded. Thank you.

00:59:56.000 --> 01:00:00.000

Jay Jones, you're next.

01:00:00.000 --> 01:00:07.000

Okay, good morning. My name is Jay Jones. I'm the president and CEO of the North Clackamas Chamber of Commerce.

01:00:07.000 --> 01:00:23.000

I'm here today as support for the Sunrise Corridor and the 212 project I represent the regional chamber of Commerce that supports businesses in Oregon City, Happy Valley, Gladstone, Milwaukee, and unincorporated Clackamas.

01:00:23.000 --> 01:00:29.000

I also live, work, play, spend time in the Sunrise Corridor, like Diana Helms does.

01:00:29.000 --> 01:00:34.000

Why does this matter? It matters because this is one of the busiest freight routes in the state.

01:00:34.000 --> 01:00:38.000

And one of the highest concentration areas for jobs in our region.

01:00:38.000 --> 01:00:52.000

We must invest now to support the intended growth of the surrounding areas to support a bright future of our regional economy And so that people in this part of the region have alternatives to driving by improving access to transit.

01:00:52.000 --> 01:00:56.000

Another note is happy valley It's the fastest growing.

01:00:56.000 --> 01:01:02.000

Large city in the state. The infrastructure to get people moving in that area.

01:01:02.000 --> 01:01:10.000

This funding would increase safety equity, access to jobs schools, services, economic development.

01:01:10.000 --> 01:01:21.000

Youth and education in parks and open spaces. Please fully fund the \$12.5 million in funding for the Sunrise Corridor and the Sunrise Gateway.

01:01:21.000 --> 01:01:29.000

In the Highway 212 project So our community can move our community can move forward with investments we've been waiting for for decades.

01:01:29.000 --> 01:01:39.000

I rest back. Look, I made it. That's fantastic

01:01:39.000 --> 01:01:55.000

Amy Ferrara, you're next.

01:01:55.000 --> 01:02:17.000

Sorry about that. My name is Amy Ferrara and I'm here to support the sunrise 212 corridor. From 2006 to 2016, I worked along Highway 212 at Haven Spa and experienced what it was like for our vehicles and our hot tubs and things leaving and traveling along Highway 212.

01:02:17.000 --> 01:02:22.000

And since then, now I'm a mom of five. I have kids within the school district.

01:02:22.000 --> 01:02:50.000

They attend Taekwondo. One of my daughters works in the industrial park down on 212. And we've seen a significant change in the flow of traffic and how long it takes to get from one end to the other. I'm now in the real estate industry and see a full flood of folks moving into Happy Valley and Damascus areas and know that this project will be such an impact and very important on the growth of our local community. So I ask that you fully fund the

01:02:50.000 --> 01:02:55.000

Sunrise Corridor and Highway 212 project. Thank you.

01:02:55.000 --> 01:02:59.000

Thank you. And Todd?

01:02:59.000 --> 01:03:07.000

Hello, my name is Ian Todd. I am the vice chair of East Multnomah County Transportation Committee, as well as the City Councilor in the city of Fairview.

01:03:07.000 --> 01:03:12.000

And I'm here to offer support for the 223rd Avenue proposal.

01:03:12.000 --> 01:03:18.000

This actually dovetails and provides some synergy with already funded projects.

01:03:18.000 --> 01:03:22.000

That are happening that connect to it on Sandy Boulevard by Multnomah County.

01:03:22.000 --> 01:03:26.000

The project on Marine Drive and the main streets on Halsey project.

01:03:26.000 --> 01:03:36.000

There is a complete disconnect in bike lanes and sidewalks running from Halsey up north on 23rd.

01:03:36.000 --> 01:03:46.000

There is a fully funded safe routes to School project on the On the west side of that, that this would dovetail with and provide synergy.

01:03:46.000 --> 01:03:52.000

Blue Lake Park, which is a regional park at the north end of Fairview.

01:03:52.000 --> 01:04:00.000

Currently, there is no safe way to bicycle there. It is a high transit category.

01:04:00.000 --> 01:04:11.000

Corridor, it is also... an equity focus corridor And a lot of students need to be able to get down to Halsey and it is not safe.

01:04:11.000 --> 01:04:22.000

On either side. There is also issues with... a bottleneck where there is a undercrossing at the railroad that is being worked on.

01:04:22.000 --> 01:04:35.000

So we get a lot of bang for our buck regionally with this is how it fits with everything else we're doing. And I strongly urge funding for the 223rd project it will tie together and provide safety.

01:04:35.000 --> 01:04:37.000

Thank you.

01:04:37.000 --> 01:04:40.000

Thank you. Randall Friesen, are you here? Welcome.

01:04:40.000 --> 01:04:53.000

I am. Good morning, everybody. Good morning, Chair Gonzalez and JPAC members. Thank you for all you do to make improvements to our different counties throughout the Portland Metro and Southwest Washington area.

01:04:53.000 --> 01:04:59.000

My name is Randall Friesen. I'm from the Columbia Pacific Building Trades Council, and I'm here to speak about earthquake ready Burnside bridge projects.

01:04:59.000 --> 01:05:08.000

The Columbia Pacific Building Trades Council proudly represents over 20,000 skilled and construction trades professionals in the Portland metropolitan and Southwest Washington area.

01:05:08.000 --> 01:05:17.000

I'm here to express our full and enthusiastic support of EQRB's request of 25 million to find the optimal version of this vital project.

01:05:17.000 --> 01:05:30.000

The version that delivers the greatest public value. We are particularly proud that this project will be constructed using a project labor agreement, which will ensure the highest quality of work on time completion And adherence to the budget.

01:05:30.000 --> 01:05:39.000

This new bridge is far more than just a structure. It represents a significant investment in safer and more modern multimodal transportation facilities.

01:05:39.000 --> 01:05:49.000

It will serve all modes of transportation and crucially, enhance accessibility to the downtown core for all communities Especially those in traditionally underserved and disadvantaged.

01:05:49.000 --> 01:05:54.000

This includes essential improvements such as building ADA compliant sidewalks to connect with nearby transit stops.

01:05:54.000 --> 01:06:12.000

And social service providers, creating safer and better protected pedestrian and bicycle facilities directly on the bridge, preserving the existing dedicated bus lane, implementing permanent bicycle and pedestrian street improvements adjacent to the bridge, and strategically preparing the bridge for a future streetcar line.

01:06:12.000 --> 01:06:20.000

This multifaceted infrastructure project directly addresses several urgent community needs. And thank you for your time and consideration. Appreciate it.

01:06:20.000 --> 01:06:22.000

Thank you.

01:06:22.000 --> 01:06:35.000

I just want to quickly say Juan Pedro Moreno Almeida I have you signed up to testify and I see your hand is up. I've tried to promote you a couple of times and you've declined.

01:06:35.000 --> 01:06:43.000

I'm going to call up Sarah on her own. But one, Pedro, we'd love to try to get back to you. So we'll try one more time.

01:06:43.000 --> 01:06:46.000

Until then, it's Sarah's turn.

01:06:46.000 --> 01:06:54.000

Hi, good morning, folks. Thanks for the opportunity to weigh in here. I've been before you a couple of times as a TPAC member.

01:06:54.000 --> 01:07:03.000

And I just want to reiterate that I wish I had the luxury of parochialism right now, but I'm quite worried, honestly.

01:07:03.000 --> 01:07:15.000

We're looking at a statewide transportation package where I'm being told there isn't money for safety in part because we haven't been able to stand up regional tolling to pay for some major projects in the Portland metro region.

01:07:15.000 --> 01:07:22.000

I'm being told there isn't funding guaranteed for the safety programs that we're supposed to deliver next year because of the federal government.

01:07:22.000 --> 01:07:38.000

And I'm worried that we aren't able to operate with one voice as a region to set our priorities, be concise and be clear with the federal government that has no interest in supporting our proven solutions like capital transit projects.

01:07:38.000 --> 01:07:55.000

82nd Avenue, TV Highway. Portland Streetcar, which we know deliver catalytic returns on investment for people walking, biking, rolling who also depend on transit for housing delivery for jobs delivery, workforce development.

01:07:55.000 --> 01:08:03.000

I just want to say that I hope that we can remember why we have Metro beyond an MPO, why we invested in regional government.

01:08:03.000 --> 01:08:21.000

To think about projects that advance the interests of the whole beyond jurisdictional boundaries and really think carefully about leveraging every critical opportunity right now as we are faced with a challenging situation in the capital as we're faced with a challenging situation in DC,

01:08:21.000 --> 01:08:32.000

And really speak with one voice with clarity around our priorities now and to get us through the next couple of years. Thank you very much and I appreciate the opportunity to speak with you today.

01:08:32.000 --> 01:08:33.000

Thanks, Sarah.

01:08:33.000 --> 01:08:42.000

All right, Juan Pedro Moreno Almeida is here. And I believe the last one, if you are here to speak today, please raise your hand.

01:08:42.000 --> 01:08:43.000

Go right ahead.

01:08:43.000 --> 01:08:51.000

Good morning, Chair Gonzalez and members of the committee. My name is Juan Pedro Moreno, and I'm a lifelong resident of Hillsboro, Oregon.

01:08:51.000 --> 01:09:02.000

I'm here today to voice my strong support for funding the TV Highway Transit and Safety Project, which is currently being considered for 28 million in regional funds, which is just short of TriMet's 30 million request.

01:09:02.000 --> 01:09:24.000

Our \$30 million request for almost the last three years, I have been directly involved in efforts to develop and promote the TV Highway Equito Development Strategy, working alongside passionate community members and community-based organizations to ensure that the future development reflects the needs and the voices of those who live work, play and travel along this corridor, particularly those who have been historically

01:09:24.000 --> 01:09:36.000

Excluded from infrastructure planning and decision-making spaces. The TV highway corridor is home to many immigrants, families who are financially burdened, and essential workers who rely on public transportation every day.

01:09:36.000 --> 01:09:42.000

This project represents more than just infrastructure. It's about safety, dignity, and access.

01:09:42.000 --> 01:09:47.000

It's about making sure that transit is fast, reliable, and safe for people walking, biking, or riding the bus.

01:09:47.000 --> 01:09:56.000

By fully funding this project, you're helping ensure that improvements to the corridor are equitable, community driven, and responsive to the lived experience of those who know it best.

01:09:56.000 --> 01:10:10.000

Continued investment in TV Highway is an investment in our people, our neighborhoods, and our shared future. I urge you to allocate the full \$30 million requested. Let's not fall short of a transformational opportunity for our corridor and our community.

01:10:10.000 --> 01:10:31.000

Thank you so much for your time today. And I also did want to mention, I think there are a few other people that are looking to do testimony for specific transit and safety project. I'm not sure if they've gotten to raise their hands, but Maria Dolores, Maria Rodriguez, and Pee Wee Roginda, if you're here, please raise your hands. And thank you so much for being here as well.

01:10:31.000 --> 01:10:38.000

They see PoE and they will be next after, I think Mayor Lube, your hand is raised.

01:10:38.000 --> 01:10:40.000

Yeah. Hi, Mayor Lube. Thank you.

01:10:40.000 --> 01:10:46.000

Hi, everyone. Thank you so much. Good morning. My name is Heidi Lube. I am mayor of Tigard and also a JPAC alternate.

01:10:46.000 --> 01:10:59.000

I wanted to talk today and just express my appreciation for the RFFA process that has provided my community an opportunity to advocate for the critical connections that our service and for our residents and businesses.

01:10:59.000 --> 01:11:05.000

Our project, the North Dakota Street, which is also a Fano Creek Bridge Replacement Project.

01:11:05.000 --> 01:11:12.000

It's important as it's a key multimodal connector between neighborhoods and a response route for our first responders.

01:11:12.000 --> 01:11:22.000

The fact is this bridge is failing. If investment is not made by replacing the structure, it will be weight restricting, limiting its function for our emergency response route.

01:11:22.000 --> 01:11:32.000

The replacement bridge will be elevated to minimize flooding and reduce the environmental impact. It'll be constructed to current seismic standards, making it more resilient to shaking.

01:11:32.000 --> 01:11:39.000

The sidewalks and bike lanes on both sides of the bridge will facilitate safe movement for people walking and traveling by bicycle.

01:11:39.000 --> 01:11:44.000

And the new bridge will provide a multimodal link. Having trouble with that word today.

01:11:44.000 --> 01:11:52.000

Between residents and the regional trail system are Fano Creek Trail and the Washington Square Regional Center.

01:11:52.000 --> 01:11:57.000

We've been prioritizing this project for years and have been successful in securing a portion of the funding needed.

01:11:57.000 --> 01:12:10.000

But the \$8 million request will allow the project to be successfully constructed.

01:12:10.000 --> 01:12:12.000

Mayor.

01:12:12.000 --> 01:12:17.000

Poa, you're next.

01:12:17.000 --> 01:12:18.000

Morning.

01:12:18.000 --> 01:12:27.000

Good morning. Good morning, Sharon, members of the committee. My name is PUnjinda and I work with unite oregon.

01:12:27.000 --> 01:12:32.000

We serve as the convener of the TB Highway Coalition, Equity Coalition.

01:12:32.000 --> 01:12:38.000

And for the past three years, I have supported his work in an administrative role.

01:12:38.000 --> 01:12:46.000

I'm also a regular transit writer who depends on the Tualatin Valley Highway corridor to get where I need to go.

01:12:46.000 --> 01:13:02.000

The TBA Highway Transit and Safety Project is one of five candidate projects Being considered for regional flexible funding TriMet has requested 30 million for the project and the current allocation proposal is for 28 million.

01:13:02.000 --> 01:13:15.000

This investment would improve transit access and safety, enhance the rider experience, and help make service faster and more reliable, something our communities truly need.

01:13:15.000 --> 01:13:22.000

I want to acknowledge that a project of this scale is complex, but over these past few years.

01:13:22.000 --> 01:13:28.000

I have witnessed a strong commitment from everyone involved, metro staff.

01:13:28.000 --> 01:13:43.000

Trimet, CAUTI teams, elected leaders, community-based organizations, and especially community members who've all come to the table with the shared goal of making these corridors safer and more accessible.

01:13:43.000 --> 01:14:04.000

So this is not just about infrastructure. It's about supporting the people who rely on this corridor every day. Immigrants, essential workers, low income families, and so many others So thank you so much for your time and for the continued leadership in supporting this work.

01:14:04.000 --> 01:14:06.000

Thank you.

01:14:06.000 --> 01:14:27.000

Next, we have Maria. Maria Rodriguez Kwamazi.

01:14:27.000 --> 01:14:48.000

Iciones de infrextructura. Muchas personas y nuestra comorida especialment integrationos ingresos y personas mayores.

01:14:48.000 --> 01:15:04.000

Dependent, they'll transport the publicual largo de esta cartera este proyecto no solo mejor a la accesual transitos y no temiles seguridad experiencia de los suario el a confiabilidad del servicio. Cetra de tener hacer a seguras.

01:15:04.000 --> 01:15:17.000

Todo nosotros. La propuesta segula.

01:15:17.000 --> 01:15:26.000

Universión completa para que este trabajo tengan mayor impacto posible pi verdoamente reflex necesidades de nuestras comunidades.

01:15:26.000 --> 01:15:40.000

Gracias por suit considerar este inversión tan importante paler bien estar queen es vivimos y transitamos por esta reggión.

01:15:40.000 --> 01:15:46.000

Okay, Maria Dolores Torres, I believe, is our last one. Please raise your hands if I have missed you.

01:15:46.000 --> 01:15:49.000

Go ahead, Maria.

01:15:49.000 --> 01:16:06.000

Buenos dias presidente gonzales y miembros del comiten. Pollo en que nos brinden el pre supuesto completo para las mejoras a nuestro tibijawei.

01:16:06.000 --> 01:16:15.000

Que abarca el condado de Washington. Esto nosaría mayor seguridad en inclusividad para todos.

01:16:15.000 --> 01:16:29.000

Redución de congregion y mejora del fujo vehicular. Superficiabial.

01:16:29.000 --> 01:16:37.000

Expansion de haceras mejor seña alamiento. Y connectividad de rutas desarroll urbanos tenible.

01:16:37.000 --> 01:16:43.000

Estos mejores son fundamentales para construir una comunidad más segura accessible resiliente.

01:16:43.000 --> 01:16:49.000

Gracias por su tiempo y prosidar esta solicitud I put this on English on the chat.

01:16:49.000 --> 01:16:50.000

Thank you.

01:16:50.000 --> 01:16:53.000

Gracias maniadolores.

01:16:53.000 --> 01:16:57.000

Mr. Chair, we have no one else signed up to testify.

01:16:57.000 --> 01:17:03.000

Thanks. I did see Christina Delgado had raised their hand and then they were here, but maybe they left.

01:17:03.000 --> 01:17:09.000

Ask them in both the panelists and attendees column. I'm not sure.

01:17:09.000 --> 01:17:10.000

But I don't see them. If you're here Please do raise your hand.

01:17:10.000 --> 01:17:14.000

Okay.

01:17:14.000 --> 01:17:19.000

Or if you're in the panelists, go ahead and speak up.

01:17:19.000 --> 01:17:20.000

It's okay. Okay, great. Thank you.

01:17:20.000 --> 01:17:23.000

I don't think they're here.

01:17:23.000 --> 01:17:33.000

Seeing no further testimony, I will close this public hearing. Thank you to all that made the time this morning to share your thoughts with JPACT.

01:17:33.000 --> 01:17:46.000

We sincerely appreciate that. You weighing in on these projects that can have such a big impact on our region and our communities and our neighborhoods. So it's sincerely appreciated.

01:17:46.000 --> 01:17:53.000

You have until the end of the month. To provide more input if you did not have the ability to testify today.

01:17:53.000 --> 01:18:02.000

And the agenda packet and a quick Google search We'll show you how you can give us more feedback.

01:18:02.000 --> 01:18:13.000

We're going to move on to our agenda. Because we had our public hearing and we had a long list of people waiting to engage with us.

01:18:13.000 --> 01:18:24.000

I want to bring back the the UPWP element, TED I think that you have something to share about that.

01:18:24.000 --> 01:18:41.000

Yes, thank you, Chair. So yeah, so we've pulled the UPWP item off consent agenda. So I wanted to just do a brief explanation of the UPWP and then have a community discussion before requesting action today.

01:18:41.000 --> 01:18:48.000

I think many of you are familiar with the UPWP is for the Unified Planning Work Program.

01:18:48.000 --> 01:19:04.000

What this document is, is description of our transportation planning activities across the region And it's purpose, it's federally required and its purpose is to be able to describe all the planning activities for the upcoming year.

01:19:04.000 --> 01:19:14.000

And make sure that we are coordinating across those activities as best as possible for efficiency and good communication and good planning.

01:19:14.000 --> 01:19:24.000

It is something that we need to submit to the Federal Highway Administration and Federal Transit Administration for their review and approval.

01:19:24.000 --> 01:19:42.000

We have been requested by them to submit that document earlier this year to give them time, a little additional time Given the staff cutbacks that they are facing in their offices and the potential additional review time.

01:19:42.000 --> 01:19:56.000

That may be. Required from the new administration and the new planning directives coming out of the new administration. So we're trying to comply with that request and get this document submitted to them.

01:19:56.000 --> 01:20:07.000

So it has been submitted for your approval today. Again, it is not a budget document. It does not allocate any new funds. It is really just a planning coordination document.

01:20:07.000 --> 01:20:16.000

So with that, maybe I'll just open it up to committee questions and discussion, and then we can Move on.

01:20:16.000 --> 01:20:20.000

Thanks, Paul. Thanks, Ted. Sorry. Commissioner Savas.

01:20:20.000 --> 01:20:38.000

Yeah, well, Ted, I appreciate your explanation. It does not change actually the issue before us. And even when it came back before this exact matter. It was basically shelved So I don't know how many years has gone by.

01:20:38.000 --> 01:20:51.000

Where this particular issue about transit representation has been I delayed, kicked, not really addressed. And I really believe, and I will go back to the minutes.

01:20:51.000 --> 01:20:59.000

If I need to, I don't think I have to. I think a number of us recall that this would come back for discussion, for resolution.

01:20:59.000 --> 01:21:05.000

And I don't set the agenda and I'm not being critical of the chair here.

01:21:05.000 --> 01:21:28.000

But if that was missed, then that's not That does not change the issue. The issue is really important for, you know, if you just listen to the public testimony, it's very clear that transit is a big component For a number of reasons, whether it's safety, it's climate, it's our goals as an MPO. And that to me is the relevant piece.

01:21:28.000 --> 01:21:37.000

So I respectfully request that we honor what we committed to do and follow through.

01:21:37.000 --> 01:21:43.000

Yeah, so again, I think I I think I tried to explain this earlier, Commissioner. I'll try it one more time.

01:21:43.000 --> 01:21:51.000

That issue was raised during the certification of the Metropolitan Planning Organization process.

01:21:51.000 --> 01:22:04.000

Which is a separate process from the look and review of the annual Unified Planning Work Program. So it has always been our intent as staff. We said that we would commit to bringing the issue back.

01:22:04.000 --> 01:22:14.000

When we reported back on the federal certification process. As I mentioned, we did just receive the report, the federal certification report on Friday last.

01:22:14.000 --> 01:22:23.000

And since receiving that, we have been in internal discussions about how to fit that report back into the JPAC report or JPAC work program.

01:22:23.000 --> 01:22:28.000

Since we now have that report in hand. And it is our intent to bring that issue up.

01:22:28.000 --> 01:22:36.000

When we report back on the certification process, which again is not the same thing as the unified planning work program.

01:22:36.000 --> 01:22:47.000

Ted, what is the the urgency for needing to approve the plan today. What happens if we're not able to approve the plan?

01:22:47.000 --> 01:23:05.000

Yeah, so the approval of the plan that we submit to USDOT or to Federal Highway Administration and Federal Transit Administration is that they must then review it and approve it before we are then eligible to receive our planning funds, transportation planning funds back to the region.

01:23:05.000 --> 01:23:20.000

And they, as I mentioned, requested a little more time this year for that approval process. If they don't approve it in time, then we can't enter into an agreement with Oregon Department of Transportation.

01:23:20.000 --> 01:23:33.000

And Federal Highway Administration to receive our transportation planning funds. And so we typically wrap that up and get approval of that IgA before the start of the fiscal year, which begins July 1st.

01:23:33.000 --> 01:23:37.000

And so if we delay and don't give them enough time to review and approve it.

01:23:37.000 --> 01:23:43.000

We could have a delay in actually having our transportation planning funds available to us.

01:23:43.000 --> 01:23:47.000

For the next fiscal year's work program.

01:23:47.000 --> 01:24:04.000

Thanks, Ted. So I think, Commissioner i think there's Do you recall the conversation that we had about having this conversation um what I'm hearing from staff is that we are having that conversation. That conversation will be had as a part of this

01:24:04.000 --> 01:24:21.000

Certification report and certification report part of our broader work plan and also part of how we are actively governing, I think, through this RAFA process as well. I think that's a an example of those lessons learned.

01:24:21.000 --> 01:24:43.000

And I think trying to think use the UPWP as a vehicle for that conversation i think there might be a misconnection, I think is what I'm seeing and so I would... hearing from the staff and the importance to have that plan approved, but also having a conversation that we will have

01:24:43.000 --> 01:24:46.000

I think that we can treat them as two separate items.

01:24:46.000 --> 01:25:00.000

But recognizing the importance to improve this. And get it to federal highways. But anyway, do you see you have your hand up and they would like to see if we could get this moving because we do have two more items.

01:25:00.000 --> 01:25:12.000

Well, Chair, respectfully, I just want to just bring us all back to And I don't have the exact dates, but I can easily provide that. But if you recall.

01:25:12.000 --> 01:25:30.000

When you sent, Chair, when you sent out that email to everyone with your issue that we should go through JPACT, before we signal anything or send a message to The UPWP, the FHWA, all the agencies involved here. On a matter like this.

01:25:30.000 --> 01:25:52.000

Basically, we were criticized for doing what a email from jpac staff weeks prior said an invitation to send in directly to UPWP to the fhwa That's submission so we followed Staff's advice and sent that that communication to them.

01:25:52.000 --> 01:26:00.000

Later, you send an email critical of us for doing that now And then we agreed to bring this back.

01:26:00.000 --> 01:26:16.000

Now we're told we're not going to bring it back. We're just going to submit it and approve it. So I'm sorry but there's a procedural issue here and we're not being consistent with what the messages from JPAC or Metro. I don't know which staffer

01:26:16.000 --> 01:26:21.000

Who's representing JPAC and who's representing Metro here, but I'm getting conflicting messages here.

01:26:21.000 --> 01:26:30.000

Commissioner, the matter that we discussed a few months ago was related to the MPO certification process.

01:26:30.000 --> 01:26:46.000

Not the UPWP. So those are different things. And what I'm trying to land and connect here. And I understand and i understand the process that we talked about and that we are going to see through at jpac here i see them as two separate things.

01:26:46.000 --> 01:26:54.000

The MPO certification process, as Ted has shared We are talking about it. It is coming to us.

01:26:54.000 --> 01:27:12.000

I'm sharing it, staff is sharing it. But the UPWP is not the MPO certification conversation that we talked about, which is also the nexus for for representation and how we make decisions around that.

01:27:12.000 --> 01:27:20.000

So I hope that you can get there with me right now on that.

01:27:20.000 --> 01:27:35.000

Chair, as I read the agenda there, exhibit b It says Metro 2025 self-certification for UPWP legislation i mean I, you know, I I'm struggling here.

01:27:35.000 --> 01:27:39.000

Okay. Councillor Lewis.

01:27:39.000 --> 01:27:50.000

Sure, thank you. I do believe that the connection here is that in order to have a UPWP And a body must be recognized.

01:27:50.000 --> 01:28:00.000

We are recognized now as an MPO thanks to the letter that came last week. Would this conversation be any different if we hadn't received that letter last week?

01:28:00.000 --> 01:28:18.000

That's... probably not the case because we would be going off of our previous recognition of status. So I think it is appropriate to move forward with UPWP But I do think that Commissioner Savas is bringing up that there is no scheduled

01:28:18.000 --> 01:28:35.000

Process for JPAC membership evaluation. So that's something that I commit to bringing forward to our agenda setting meetings and work with you, Chair, to make sure that I'm helping bridge the gap of that expectation because I think it will be a larger conversation.

01:28:35.000 --> 01:28:48.000

The question I have is UPWP was talked about at TPAC, and I'm curious if we could get a little bit more texture about TPAC did this connection to status come up at TPAC?

01:28:48.000 --> 01:28:56.000

And also I see Mayor McInery Ogle has a line item in the chat.

01:28:56.000 --> 01:29:03.000

So questioning if that edit had come up before and was dropped or if this is a new edit.

01:29:03.000 --> 01:29:09.000

I'm curious just how deep TPAC got into this discussion.

01:29:09.000 --> 01:29:10.000

Yeah, so... Oh, sorry, you want me to respond?

01:29:10.000 --> 01:29:14.000

Thanks, Councillor. Please go ahead, Tabia.

01:29:14.000 --> 01:29:32.000

Yeah, so some great points by counselor lewis um TPAC did recommend the UPWP as proposed, and it does include references to our coordination with the Southwest Regional Transportation Council.

01:29:32.000 --> 01:29:44.000

So it is relevant to the comments that Mayor McIner has put into chat, and I can get to those in just a moment.

01:29:44.000 --> 01:29:53.000

And it is, but as it is TPAC took this issue up.

01:29:53.000 --> 01:30:01.000

The UPWP, we had not received our certification yet. We don't know when the exact dates when we're going to get the certification.

01:30:01.000 --> 01:30:10.000

Back from USDOT, which is why we wait to actually schedule the follow-up conversation until we know we have it in hand and then we schedule up that conversation and report back on that.

01:30:10.000 --> 01:30:22.000

And the issues raised in that certification process. There is in the UPWP a section that talks about how we have responded to previous certification reports.

01:30:22.000 --> 01:30:29.000

In terms of how the planning work program has followed up on the recommendations in those reports.

01:30:29.000 --> 01:30:41.000

But this year's UPWP has not had the opportunity to respond yet to the new one, to the new certification, which is why there's no discussion in there at this point.

01:30:41.000 --> 01:30:53.000

So TPAC, again, approved recommendation of this document as is. Reporting back on our future planning activities, but also on the prior certification.

01:30:53.000 --> 01:31:06.000

But it is the normal process for us to when we get a new certification is to review that, review it with TPAC and jpac and address the issues brought up in it.

01:31:06.000 --> 01:31:21.000

And one of those issues will be this issue brought up by Clackamas County and Clackamount County agencies on transit representation. And so that will be scheduled that discussion will be scheduled as we report back this summer.

01:31:21.000 --> 01:31:40.000

Just one more item is that if we don't get approval of the UPWP, These are transportation planning funds not only for Metro, but for any agency that's receiving federal transportation funds in the region. So it would restrict our ability to actually get that

01:31:40.000 --> 01:31:47.000

Reporting back done and have those future conversations if we don't approve this year's UPWP.

01:31:47.000 --> 01:31:54.000

Thanks, Ted. So the I understand we've had a conversation on this.

01:31:54.000 --> 01:32:20.000

What I see is a very important need for us to approve the UPWP We're going to schedule a continued conversation certification, which is part of the plan And including the elements that Commissioner Savas has brought up and that also JPAC talked about, I believe, in December, if I remember correctly, or January.

01:32:20.000 --> 01:32:27.000

I do see hands up, Commissioner Savas and then Mayor Delane. And then I will ask for a motion.

01:32:27.000 --> 01:32:32.000

For us to approve the item that was pulled from consent. So Commissioner Savas.

01:32:32.000 --> 01:32:46.000

Yeah, I just want to point out that the recording of this meeting back then will show that staff And the chair made an obligation to bring this back this time this particular time of the year.

01:32:46.000 --> 01:32:53.000

You know, April, May. And here we are, and it had not come back.

01:32:53.000 --> 01:33:07.000

So the timing, now we're in conflict again. So the timing is not consistent with what we were told when this item was I'm committed to bringing back. So there's a lot of inconsistency here. I will be voting no.

01:33:07.000 --> 01:33:11.000

And I will take every step I can to elevate this.

01:33:11.000 --> 01:33:14.000

Thank you.

01:33:14.000 --> 01:33:18.000

Okay, thanks, Commissioner. Mayor Delane.

01:33:18.000 --> 01:33:43.000

Maybe you can share Commissioner Lewis mentioned the letter. Has there been some change in our status or question of our status of how our MPO is configured the necessity of the basically the jackpack Metro Council to come into concurrence for agreements on such items as the MPO?

01:33:43.000 --> 01:33:47.000

Thanks for the question, Mayor. Going to look to Tad for this.

01:33:47.000 --> 01:33:50.000

I'm sorry, Mayor, could you repeat the question one more time?

01:33:50.000 --> 01:34:14.000

Commissioner Lewis mentioned the letter. Has there been some change in our status My understanding is to form the MPO agreement, we have to have JPAC agree and Metro agree concurrently, right? It's kind of like a house and senate kind of thing. Is our status somehow changed on that? Is there something from this letter? I'm not aware of the letter, so I'm trying to understand if our

01:34:14.000 --> 01:34:15.000

Our duality relationship has changed. So can you expand on that at all?

01:34:15.000 --> 01:34:19.000

Yeah. Sure.

01:34:19.000 --> 01:34:26.000

So yes, the recommendation letter that did come in certifying our MPO process.

01:34:26.000 --> 01:34:38.000

And... And again, like I said, we received that on Friday. We're still digesting all of the recommendations and corrective actions that are included in it. And we'll be reporting back to you on those.

01:34:38.000 --> 01:34:46.000

But it has not fundamentally changed our MPO process or our JPAC Metro Council relationship in terms of that decision making.

01:34:46.000 --> 01:34:54.000

Okay, so we can proceed. Previously, it sounds like there's some It's spicy when you bring up the words corrective actions. So hopefully we can be brought into the loop as the JPAC reps to help understand this. Thank you.

01:34:54.000 --> 01:35:00.000

Yes.

01:35:00.000 --> 01:35:03.000

Yep. And that is our intent, yes.

01:35:03.000 --> 01:35:13.000

Yeah, of course. Thanks, Mayor. And I understand that there's there's this energy for this conversation around representation.

01:35:13.000 --> 01:35:25.000

Which I recall that conversation i don't i don't feel like I am in contradicting myself from what I've said in the past and if i am I would like to know that.

01:35:25.000 --> 01:35:33.000

But I do see the UPWP and this broader conversation around representation and the MPO certification process.

01:35:33.000 --> 01:35:36.000

As a much longer arc of a discussion that we're having.

01:35:36.000 --> 01:35:54.000

At JPACT. Using the UPWP per se in this kind of technical approval does not feel like the right area for me to to necessarily hold that up. And so I am hearing direction from my staff that this is important to approve today.

01:35:54.000 --> 01:36:01.000

And so I would entertain a motion from JPAC. And hope that we can get it moving forward on approval.

01:36:01.000 --> 01:36:14.000

And with a sequence of conversations following up to address the items that Commissioner Savas has raised on behalf of of his constituents.

01:36:14.000 --> 01:36:33.000

So I would entertain a motion. For resolution number 25 5466 for the purpose of adopting The fiscal year 2526 unified planning work plan and certifying that the metro area is in compliance with the federal transportation planning requirements.

01:36:33.000 --> 01:36:35.000

Stovemove, Stovall.

01:36:35.000 --> 01:36:36.000

Second, something.

01:36:36.000 --> 01:36:42.000

Thanks, Mayor. Thank you. Moved by Mayor Stovall and seconded by Councillor Simpson.

01:36:42.000 --> 01:36:49.000

Michelle, do we need to call roll here?

01:36:49.000 --> 01:36:51.000

Yes, that would be best. Thanks.

01:36:51.000 --> 01:36:55.000

Okay, great. I'm going to ask Ramona or Georgia to please call roll.

01:36:55.000 --> 01:37:03.000

I'll be happy to do that. Commissioner Singleton, are you still with us?

01:37:03.000 --> 01:37:04.000

Okay. I?

01:37:04.000 --> 01:37:08.000

I am I.

01:37:08.000 --> 01:37:09.000

Commissioner Fai. Commissioner Savas.

01:37:09.000 --> 01:37:13.000

Yes.

01:37:13.000 --> 01:37:15.000

No.

01:37:15.000 --> 01:37:24.000

Is Commissioner angelina marina with us still I think we've lost her.

01:37:24.000 --> 01:37:26.000

I'm sorry. Hi.

01:37:26.000 --> 01:37:27.000

Right. Mayor Stovall. Mayor DeLean.

01:37:27.000 --> 01:37:29.000

Thanks, Council.

01:37:29.000 --> 01:37:33.000

Bye.

01:37:33.000 --> 01:37:34.000

Mayor Bott. Ryan Winsheimer.

01:37:34.000 --> 01:37:35.000

Bye.

01:37:35.000 --> 01:37:43.000

Hi.

01:37:43.000 --> 01:37:44.000

Might have lost Ryan.

01:37:44.000 --> 01:37:47.000

Sam Basu.

01:37:47.000 --> 01:37:49.000

l...

01:37:49.000 --> 01:37:56.000

Emerald Abogue. Ali M Ezra. Oh, he's not here. Ali's not here, is he?

01:37:56.000 --> 01:37:57.000

Okay. Okay, yes. Thank you. I thought you'd dropped off.

01:37:57.000 --> 01:38:01.000

Amy.

01:38:01.000 --> 01:38:04.000

Councillor Lewis. Councillor Simpson.

01:38:04.000 --> 01:38:07.000

Hi.

01:38:07.000 --> 01:38:08.000

Hi.

01:38:08.000 --> 01:38:14.000

Levin Ruck.

01:38:14.000 --> 01:38:20.000

Devin, are you still with us? I see that in there.

01:38:20.000 --> 01:38:22.000

Okay. Mayor McInerney Ogle. Scott Patterson.

01:38:22.000 --> 01:38:28.000

Hi.

01:38:28.000 --> 01:38:29.000

Aye.

01:38:29.000 --> 01:38:35.000

Right. I believe that's everyone. And it passes.

01:38:35.000 --> 01:38:53.000

Thanks, Ramona. And thanks, everyone, for the conversation. Regionalism is something that we need to work on every single day and Those are the values that we commit to by showing up to jpac then That means that having hard conversations is an important part of that.

01:38:53.000 --> 01:39:09.000

And so I appreciate that. Commissioner Savas for continuing to voice what's important to you. And I think that we share that same level of interest in addressing those those items and for everyone for leaning into discussion.

01:39:09.000 --> 01:39:31.000

We will now move on to our Next item, which is federal surface transportation bill reauthorization Which will cover some of the initial regional priorities Betsy Emery is going to make a presentation Betsy was supposed to start around 835 and so

01:39:31.000 --> 01:39:46.000

It's likely that this conversation will be shortened. And we also had a TV highway lpa update which I think is probably being bumped as well, but it depends as to how this conversation goes. So anyway.

01:39:46.000 --> 01:39:58.000

Thank you, everyone. Yeah, I'll try to cut this down a bit in terms of my talking points. So we might just flow through a couple of slides.

01:39:58.000 --> 01:40:05.000

Georgia, I think, has the slide deck. It might be up. Oh, it is up already. I just have too many screens. Okay.

01:40:05.000 --> 01:40:29.000

Let's get started. So good morning, JPAC members. I'm Betsy Emery, Metro's Federal Affairs Advisor. I'm here today to present a draft set of regional priorities for the Federal Surface Transportation Reauthorization bill There's been some unexpected movement on this topic on the Hill, and that's really causing us to move much more quickly in creating these priorities. The House Transportation Committee opened their portal

01:40:29.000 --> 01:40:35.000

For organizations to submit proposals for their consideration for this bill.

01:40:35.000 --> 01:40:40.000

And they're working on a really fast timeline. The deadline that they've announced is April 30th.

01:40:40.000 --> 01:40:47.000

So that's really causing us to shift the original timeline that we had presented up quite a bit.

01:40:47.000 --> 01:40:57.000

And so to accommodate this accelerated timeline, I've worked closely with staff from the many different jurisdictions that are represented at this table.

01:40:57.000 --> 01:41:00.000

To co-create a draft set of priorities that I'm going to present today.

01:41:00.000 --> 01:41:09.000

And so I'm looking for a robust discussion, looking forward to that so that we can make sure that JPEG's priorities are well represented in that submission.

01:41:09.000 --> 01:41:15.000

Next slide. The surface transportation, next slide.

01:41:15.000 --> 01:41:24.000

Okay, here we are. The Service Transportation Reauthorization bill is the legislation that renews the Federal Surface Transportation Programs.

01:41:24.000 --> 01:41:32.000

This legislation sets all policies, priorities, and funding levels for all USDOT programs for multiple years.

01:41:32.000 --> 01:41:43.000

It extends, removes, or creates the vast majority of our federal transport programs directs how the money will be divided up and regulates how agencies are allowed to spend it.

01:41:43.000 --> 01:41:54.000

The reauthorization typically occurs every four to six years. The current bill, which is the bipartisan infrastructure law, expires in September 2026.

01:41:54.000 --> 01:42:06.000

And given the very large scope of the bill, short-term extensions are very common. Many experts are anticipating that this reauthorization will be delayed as well.

01:42:06.000 --> 01:42:15.000

And that's because the bipartisan infrastructure law expires basically right before a high stakes midterm election.

01:42:15.000 --> 01:42:22.000

Even though it might be delayed, I think it's really important that we prepare a set of priorities because hearings are underway and the portal is already opened.

01:42:22.000 --> 01:42:30.000

And this is going to be a year-long process. So we should start to get things on paper. So we have guidance in terms of how we talk to our congressionals.

01:42:30.000 --> 01:42:40.000

Next slide. The surface transportation bill is directly negotiated in two committees, and we are lucky to have Oregon representation on both.

01:42:40.000 --> 01:42:48.000

The House Transportation Committee, which Rep Hoyle serves on, has broad oversight over a majority of the bill.

01:42:48.000 --> 01:42:55.000

The Senate Environment and Public Works Committee, which Senator Merkley serves on, has authority over the highway components.

01:42:55.000 --> 01:42:59.000

Oregon and our region have benefited from having long tenured leadership.

01:42:59.000 --> 01:43:21.000

On both of on the House Transportation Committee, especially, having Rep DeFazio as chair coupled with Rep Blumenauer's dedication to transit gave Oregon a very powerful voice in the bipartisan infrastructure law. And while Oregon continues to have good committee representation, those retirements mean that we're no longer represented in committee leadership.

01:43:21.000 --> 01:43:32.000

Next slide. The transportation bill tends to be very large, so negotiations take time. With Republicans holding majorities in Congress and the White House.

01:43:32.000 --> 01:43:37.000

The bill is likely, it will largely reflect those policy priorities.

01:43:37.000 --> 01:43:41.000

There is an overall sense that top line funding levels will decrease.

01:43:41.000 --> 01:43:48.000

We are anticipating possible reductions in discretionary grant programs, especially those that focus on climate.

01:43:48.000 --> 01:43:57.000

Conversations on the Hill are already underway. The House and Senate committees have begun holding hearings on this topic and a few themes are starting to emerge.

01:43:57.000 --> 01:44:02.000

First, there's alignment that the next bill needs to emphasize safety and reliability.

01:44:02.000 --> 01:44:13.000

In the transportation network. Members of Congress on both sides have a lot of frustration about how long it has taken to get bipartisan infrastructure law dollars out the door.

01:44:13.000 --> 01:44:19.000

There's consensus that the rollout has been too slow and inflation has eroded its historic purchasing power.

01:44:19.000 --> 01:44:25.000

And so both sides want to find ways to get money to the projects faster.

01:44:25.000 --> 01:44:40.000

The bipartisan infrastructure law more than doubled the number of discretionary grant programs at USDOT, which some consider as one of the reasons for the slow funding rollout. And so some members are considering either removing or consolidating USDOT programs.

01:44:40.000 --> 01:44:51.000

So that the funding is more streamlined. Some members are interested in redirecting transit and active transportation funding back to traditional road and bridge infrastructure.

01:44:51.000 --> 01:44:58.000

Some are calling to redirect. Some grant funding programs back to state formula programs.

01:44:58.000 --> 01:45:08.000

And adjusting those formulas to account for inflation. There are also conversations about giving states more flexibility in administering their federal formula funding.

01:45:08.000 --> 01:45:15.000

There's also a lot of interest among the majority party to reform permitting regulations and processes.

01:45:15.000 --> 01:45:28.000

Especially those that are related to NEPA. And of course, they have to find a way to pay for the reauthorization. And those conversations often center around the insolvency of the Highway Trust Fund.

01:45:28.000 --> 01:45:33.000

Similar to the state, the federal gas tax, which hasn't been increased since the 90s.

01:45:33.000 --> 01:45:41.000

Does not generate enough revenue to fund the transportation bill. Next slide.

01:45:41.000 --> 01:45:46.000

I'm going to skip this actually to save some time. Next slide.

01:45:46.000 --> 01:45:58.000

So JPAC's draft priorities are um informed by all this federal context, the priorities that were adopted for the state transportation package.

01:45:58.000 --> 01:46:03.000

And the goals that were identified in the regional transportation plan, as well as staff conversations.

01:46:03.000 --> 01:46:10.000

These draft priorities are very high level because JPACT has a different level of influence in the federal arena than at the state.

01:46:10.000 --> 01:46:22.000

And instead of identifying specific tweaks and providing bill text. These priorities focus on stating our position on the bigger policy positions that are up for negotiation.

01:46:22.000 --> 01:46:43.000

First, as I mentioned, the administration is very focused on reducing overall government spending, so it is unlikely that the bipartisan infrastructure law will be renewed in its entirety or at its historic funding level. This draft priority emphasizes the importance of maintaining level funding for key discretionary and formula programs.

01:46:43.000 --> 01:46:58.000

There is a special call out to maintain BIL funding for the capital investment grant program. And this is because there are multiple high priority regionally significant projects that are in the pipeline for that program right now.

01:46:58.000 --> 01:47:10.000

Along those lines, another draft is to call on Congress to continue the practice of making advanced appropriations for the entire bill window. This provides certainty about the future funding amounts.

01:47:10.000 --> 01:47:18.000

And application windows for discretionary programs, something that's really important when preparing financing stacks for large scale programs.

01:47:18.000 --> 01:47:28.000

Or projects, rather. Another draft priority is supporting innovative transportation funding mechanisms that ensure long-term solvency of the Highway Trust Fund.

01:47:28.000 --> 01:47:39.000

Chair Graves is considering implementing a \$150 year annual fee on EVs as an example of trying to bolster that fund.

01:47:39.000 --> 01:47:47.000

And he's a Republican. Another key priority is to emphasize safety for all users in all funding and policy provisions of the bill.

01:47:47.000 --> 01:47:58.000

This includes advancing existing complete streets and Vision Zero policies and reappropriating funding for programs like the Safe Streets and Roads for All program.

01:47:58.000 --> 01:48:08.000

It also feels important to identify some examples of small scale high impact projects that could be deployed more easily if federal permitting requirements were streamlined.

01:48:08.000 --> 01:48:20.000

Relatively straightforward projects like installing curb ramps, sheltered bus stops, and traffic signals should not take months or even years to complete the various hurdles before they can be implemented.

01:48:20.000 --> 01:48:32.000

Given conversations about redirecting transportation funding to traditional infrastructure, it feels important to emphasize JPAC's support for integrated multimodal systems that are well coordinated and connected.

01:48:32.000 --> 01:48:40.000

This includes transportation options at all scales, including microtransit all the way up to high capacity transit.

01:48:40.000 --> 01:48:46.000

This also includes support for technologies that enhance the reliability and interconnectedness of the system.

01:48:46.000 --> 01:48:59.000

Lastly, given the budget shortfalls that many agencies are experiencing, there is a draft priority to increase the flexibility so some federal funding programs can more easily be used on large scale maintenance projects.

01:48:59.000 --> 01:49:09.000

Next slide. As I mentioned at the beginning of this presentation, the House Transportation Committee's application window is causing us to fast track this process.

01:49:09.000 --> 01:49:21.000

Staff is trying to ensure that JPAC can participate in the negotiations about this bill And is recommending that we submit draft priorities into their portal to give us a foot in the door.

01:49:21.000 --> 01:49:29.000

I know that we don't normally do it this way and that you prefer to submit priorities to external partners only when they've been vetted and agreed upon by JPAC.

01:49:29.000 --> 01:49:45.000

But based on the unexpected and expedited timeline, staff thinks the best way to thread the needle of running good process and reflecting shared priorities is to incorporate your feedback and discussion into an updated version of these priorities and submit that to the committee.

01:49:45.000 --> 01:49:51.000

While this doesn't constitute an official sign-off from GAPACT, which I'll be coming back in May for.

01:49:51.000 --> 01:50:01.000

It will ensure that our submission to the committee reflects JPAC's interests, and we will be clear in that submission that these are draft.

01:50:01.000 --> 01:50:16.000

I'll go to the next slide. Actually. So with that, I really look forward to hearing your thoughts about these priorities. I know we're very very little time to do that, but I do look forward to hearing that. And so I will open it up for discussion.

01:50:16.000 --> 01:50:22.000

Thank you.

01:50:22.000 --> 01:50:23.000

Thank you.

01:50:23.000 --> 01:50:34.000

Thank you, Betsy. Record time presentation. Folks, if you have any comments or feedback on this or the questions on the screen, it'd be great if we could keep those on to help guide conversation.

01:50:34.000 --> 01:50:45.000

Absolutely welcome it.

01:50:45.000 --> 01:50:47.000

Mayor Delane.

01:50:47.000 --> 01:50:54.000

I feel like I'd be remiss if I didn't chime in my usual comment. Lump sum, large lump sum.

01:50:54.000 --> 01:51:04.000

Allotments against allotments those were economically challenged makes it even more difficult for them to consider moving to hybrids or EVs.

01:51:04.000 --> 01:51:16.000

So I think that would be my challenge, right? If you're talking to even \$150 I mean, we're talking about the registration right now is almost untenable at the level it is at our state level.

01:51:16.000 --> 01:51:23.000

And to think about paying more federal level It's just, so we got to think about how that can be doled out in small bites.

01:51:23.000 --> 01:51:39.000

Instead of a lump sum request. That would be my quick and short feedback and quick feedback on ways that they're actually going to discourage people moving to hybrids or EVs.

01:51:39.000 --> 01:51:50.000

Thanks, Mayor. Betsy, I'm going to just get all of the comments and then you can respond and kind of the package format here. Commissioner Fai.

01:51:50.000 --> 01:52:00.000

Thank you, Chair Gonzalez. Betsy, great job. Great presentation. I think you did a really Good job of presenting complex topic in a succinct way.

01:52:00.000 --> 01:52:01.000

Thank you.

01:52:01.000 --> 01:52:07.000

My comment, it's sort of a bit of a question as well, but you can take back.

01:52:07.000 --> 01:52:14.000

It's to see if you're working with Brian Worley with the Association of Oregon Counties as well.

01:52:14.000 --> 01:52:21.000

To sort of get what he's hearing from counties throughout Oregon.

01:52:21.000 --> 01:52:31.000

So that you could just tell her to our federal sort of a complete story, not just our region But this is also shared.

01:52:31.000 --> 01:52:55.000

Stress and shared considerations for when it comes to the reauthorization service bill. And I mentioned Brian's name because him and I attended a NACO conference as one of the vice chairs on the transportation committee him and I co-led a sort of a subgroup

01:52:55.000 --> 01:53:07.000

To actually talk about this particular topic with many people throughout the nation and He heard a lot of great feedback. I did see a lot of the what we've heard presented here.

01:53:07.000 --> 01:53:17.000

And we'll continue to share with the county staff if there are more missing but connect with him since this is a federal bill.

01:53:17.000 --> 01:53:29.000

So that we have a complete Oregon story. That sort of helps our story as well.

01:53:29.000 --> 01:53:33.000

Thanks, Commissioner Sam.

01:53:33.000 --> 01:53:39.000

Thanks, Betsy. Great, great presentation. I really think that the framing of this document makes sense.

01:53:39.000 --> 01:53:47.000

And I appreciate the call out on the CIG program And it's funding level as well.

01:53:47.000 --> 01:53:57.000

The transit formula funded increases in the ija It's had a huge impact for transit, especially TriMet.

01:53:57.000 --> 01:54:03.000

And we want to continue to help tell that story on how this funding has been critical for our region.

01:54:03.000 --> 01:54:13.000

I also think that the section on streamlining and efficiency improvements makes sense to include when our projects receive federal funding.

01:54:13.000 --> 01:54:26.000

That funding brings new requirements and we're working through ideas. Of ways to really improve the process and to really speed up the federal project delivery.

01:54:26.000 --> 01:54:31.000

Thank you. Great, great presentation here.

01:54:31.000 --> 01:54:34.000

Thanks, Sam. Commissioner Savas.

01:54:34.000 --> 01:54:56.000

Yeah, Chair, considering the circumstance how this meeting is flowed today, I'm going to reserve my comment for today um and ask that maybe we either ask bring this back or at least be able to submit comment in writing I have a few concerns.

01:54:56.000 --> 01:55:03.000

However, I don't think we have the time actually to actually vet this in a responsible way today.

01:55:03.000 --> 01:55:13.000

Okay. Thanks, Commissioner. I'll make sure that we um that our staff gives a clear timeline of what is doable here.

01:55:13.000 --> 01:55:15.000

Ali?

01:55:15.000 --> 01:55:36.000

Yeah, thanks. It is hard to um formulate this strategy here that's such a short order but i appreciate the high level um points that you raise here. Given the administration's priority to expand fossil fuel energy infrastructure, I think that's kind of a theme

01:55:36.000 --> 01:55:50.000

It doesn't quite align with our ambitions around. Decarbonization and reducing greenhouse gas emissions here throughout transportation So I think, you know.

01:55:50.000 --> 01:55:55.000

Is there the opportunity to How?

01:55:55.000 --> 01:56:17.000

To ask for flexibility. I think leaning into the funding that's made available be not earmarked and be flexible and allow the local allow the state to decide how to invest where it's needed. I think probably that's the theme that you were aiming to. And I think that's probably your smart move.

01:56:17.000 --> 01:56:20.000

Thank you.

01:56:20.000 --> 01:56:26.000

Thanks, Holly. Okay, Betsy, if you could try and address all we've heard.

01:56:26.000 --> 01:56:34.000

Yeah, absolutely. I think these are all really good feedback, like good comments, and I appreciate that.

01:56:34.000 --> 01:56:48.000

Commissioner Savas, I'm happy to connect with you and your staff, either Trent or Jamie. Both of them have been involved in the creation of this document, but I'm happy to sit down and have a more detailed conversation with you about your concerns.

01:56:48.000 --> 01:56:53.000

In terms of timing, just to speak a little bit to that quickly.

01:56:53.000 --> 01:57:13.000

So we have this meeting today. April 30th is when the House Transportation Committee portal closes. And that is really how you get your foot in the door for negotiation. We can always go back and provide an updated list to them or the confirmed list once we have it finalized and adopted.

01:57:13.000 --> 01:57:21.000

But it's really important to at least get our name in there so we have something to reference back to once we're trying to create an amended version with the committee.

01:57:21.000 --> 01:57:29.000

And so that committee portal closes April 30th, May 22nd, next JPACT, I will be back.

01:57:29.000 --> 01:57:41.000

With a more refined version for adoption. And then that can really guide our outreach over the summer and the preparation of our agenda and talking points for the JPAC trip.

01:57:41.000 --> 01:58:01.000

Recognizing the world is changing very quickly in the space of federal funding. And so we may need to revisit this again over the summer before we go for JPEACT. And so right now it's very much an initial priorities that I'm trying to map out for the committee and then recognizing that there is time left in the process.

01:58:01.000 --> 01:58:08.000

Of the bill writing and the negotiations in which we can still weigh in.

01:58:08.000 --> 01:58:17.000

Thank you, Betsy, for sharing the timeline and um And how we can make sure that we get our priorities in there.

01:58:17.000 --> 01:58:33.000

All right, folks. I know that we did a lot in this meeting here today, and we are going to have to bump the TV highway locally preferred alternative update to our our main meeting.

01:58:33.000 --> 01:58:42.000

I don't see any further comments, but If anyone is still here that provided testimony, we appreciate that.

01:58:42.000 --> 01:59:04.000

The regional flexible fund is one of the major investment opportunities that we get to enact as JPAC. And so I'm really excited about that process and how it's going and that there's so much community feedback and support into five great projects in the step 1a

01:59:04.000 --> 01:59:29.000

And then many other projects in the step two process. And also there is also there is a very clear need for JPAC to continue to have conversation around this certification question that has been underlying uh for a few months. And so I will make sure Councillor Lewis has also expressed

01:59:29.000 --> 01:59:48.000

That we will schedule these. And our plan was always to ensure that the certification process was a part of that and so I will now move to a journal meeting. Our next meeting will be in person on May 15th. And again, thank you all for

01:59:48.000 --> 01:59:57.000

Your engagement. Have a great day.

Subject: [External sender]Support for the Sunrise Gateway Corridor funding

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

JPACT and Metro Transportation,

I am submitting this in support of the Sunrise Corridor Gateway project, as it increases multimodal transportation options, helps create more jobs in the area, and protects and enhances the existing neighborhoods in the region.

As a former long-time resident of Clackamas County (just above the corridor), I saw firsthand how the area grew, yet struggled to improve as financial inputs were always constrained. It was always disappointing that there were

no easy access points to the Clackamas River, very few parks and greenspaces and serious congestion. I am heartened to think that this funding may be the jumping off point to some great improvements for the region.
I hope that this is just the first investment to improve the region.
Thank you for your consideration.
Mike Eddy

600 NE Grand Avenue
Portland, OR 97232-2736

RE: Comments on Metro's 2028-30 Regional Flexible Fund Step 1A.1 Draft Bond Allocation

Dear Chair Gonzalez and JPACT members:

Thank you for the opportunity to provide feedback on the proposed 2028-30 Regional Flexible Fund Step 1A.1 Draft Bond Allocation. We appreciate the support that JPACT has shown the TV Highway Transit and Safety Project by including it in the draft bonding scenario. We understand and appreciate JPACT's position to distribute RFFA bond funds around the region to the five proposed projects. All the projects are important and worthy of consideration.

As you know, the TV Highway Transit and Safety Project is at a critical juncture in compiling the local funding package to enable the project to move forward with the federal Capital Investment Grant process. Every local dollar counts for this multijurisdictional project. While we appreciate the initial JPACT proposal of \$28 million in RFFA Step 1A.1 bond funds, we must take this opportunity to request that JPACT reconsider and allocate the full requested amount of \$30 million to the TV Highway Transit and Safety Project.

These funds are a critical piece of the local, regional, state and federal funding strategy for this high-capacity transit project that will serve multiple westside communities. TriMet, Metro, Washington County and the cities of Beaverton, Hillsboro, Cornelius and Forest Grove are all committing funds to this project. The more certainty we can collectively provide for this project by committing this regional funding, the higher its chances of successful implementation.

We know that together we can make the TV Highway Transit and Safety Project a reality to

provide more frequent and efficient transit service and provide safe access to transit for our communities. Thank you for your consideration of our comments.

Sincerely,

Chair Kathryn Harrington

RE: Support for Bridge Crossing of Highway 26 by the Westside Trail

Dear JPACT members,

CPO 7 represents Washington County communities including Bethany, Rock Creek, Oak Hills and neighborhoods south to Baseline Road. Although a portion of our members live in the City of Hillsboro, the City of Beaverton or outside the UGB, the majority of our membership lives in the urban unincorporated area between Hillsboro and Beaverton.

Our CPO community is divided by Highway 26. The only Highway 26 crossings available to us are the incredibly busy and bike and pedestrian unfriendly freeway exits on Murray Blvd, Cornell Road/Bethany Blvd, NW 185th Avenue, and Cornelius Pass Road. These crossings are more than a mile apart, and they are unsafe for all but the bravest pedestrians and bicyclists.

Construction of the Regional Westside Trail crossing at Highway 26 would provide an extension of the Westside Trail, significantly increasing accessibility and use of this regional trail. The Highway 26 crossing would also provide pedestrians and cyclists a safe way to cross Highway 26 mid-point between Cornell Road and Murray Blvd. This crossing would provide pedestrians and cyclists improved access to schools, recreation and shopping and would also encourage walking and biking to work at businesses located on NW Science Park Drive, in the Greenbrier Industrial Park, and on the Nike World Campus.

This important trail link would encourage and support historically marginalized communities as well as those just seeking to minimize their carbon footprint by walking or biking to work, school, recreation or shopping.

Our CPO membership supports allocation of Regional Flexible Funding to the Bridge Crossing of Highway 26 by the Westside Trail.

Sincerely,

Nancy Hazelett

RE: Support for the SMART SW 185th Avenue ITS and Better Bus Project

Dear JPACT members,

CPO 7 represents the Washington County communities straddling 185th Avenue from W. Baseline Road on the south and the Multnomah/Washington County line on the north. Although a portion of our members live in the City of Hillsboro, the City of Beaverton or outside the UGB, the majority of our membership lives in the urban unincorporated area between Hillsboro and Beaverton.

Since the opening of the MAX Red line to Hillsboro, the increase in the number of MAX trains per hour has created significant traffic congestion on adjacent roads causing unacceptable delays for all modes of transportation. Not only is the MAX crossing at SW 185th an issue, but the nearby W. Baseline Road and NW 185th intersection, the Willow Creek MAX station, the Portland Community College Campus at Willow Creek, and the frequent bus service on 185th Avenue are all heavily impacted by traffic delays and routine congestion at these locations.

Although this project will not be the ultimate solution for resolving the delays to the traveling public, the proposed improvement will provide needed relief until funding can be found for the costly grade-separated crossing for the MAX line at SW 185th Avenue. Our CPO membership supports allocation of Regional Flexible Funding to the SMART SW 185th Avenue ITS and Better Bus Project.

Sincerely,

Mancy Hazelett
CPO 7 Chair

Subject: Support for RFFA Funding Request for Earthquake Ready Burnside Bridge Project

JPACT Committee Members:

I would like to express support for Multnomah County's Regional Flexible Funding Allocation (RFFA) funding request for the Earthquake Ready Burnside Bridge Project. This project will result in a modern bridge that advances multimodal safety and enhances one of the highest ridership bus routes in our region. A rebuilt Burnside Bridge will be one of the only central city bridges standing post-earthquake, making this project critical in supporting community safety, response, and economic recovery after a major earthquake.

The new bridge will provide safer, modern multimodal transportation facilities, serving all modes and communities accessing the downtown core, especially adjacent neighborhoods which are located in equity focus areas. This includes building ADA-compliant sidewalks to adjacent transit stops and social service providers, safer and better-protected pedestrian and bicycle facilities on the bridge, preserving the existing bus-only lane, providing permanent bicycle/pedestrian street improvements adjacent to the bridge and preparing the bridge for a future streetcar line. This multifaceted infrastructure project addresses many urgent community needs including the safety and resiliency of the bridge, and upgrades to support the region's plans for high capacity transit.

The Burnside Bridge is used by three TriMet bus lines - Line 12, 19, and 20 - and carries nearly 15% of the total bus ridership in the region. The Line 20 has the second-highest bus ridership in the entire region. The transit improvements that this regional funding would support would allow our communities' to have safer, and more accessible access to these services, and would put necessary infrastructure in place to reduce delays. In order to support our region for generations to come, the new, seismically-resilient bridge will be well-prepared for future bus rapid transit development, as well as potential streetcar expansion.

Making the Burnside Bridge seismically resilient will also improve the reliability of the nearly 19-mile Burnside St. regional emergency lifeline route, stretching from Washington County to Gresham across the heart of the metro region.

The project will support regional economic development through short and long-term job creation by providing over 6,200 job years of employment, including for apprentices, women, and people of color. A safe and resilient bridge will better support the reliable movement of goods and services in and across Portland and the region.

Increasing easy and safe access to transit in this region must be a priority, so we strongly support including the Earthquake Ready Burnside Bridge project as part of this RFFA bond package, and encourage decision-makers to substantially fund the transit elements included in the project proposal. These transit improvements will make the bridge safer, more reliable, and more accessible for communities for decades to come.

Sincerely,

Cassie Davis (local small business owner and DBE certified)

Support for Trails Projects in RFFA for 2028-30

Dear Chair Gonzalez and Members of the Committee.

We are writing today to share our support for the trails projects competing for funding in the 2028-30 RFFA.

- More than 80% of Oregonians report using local trails or off-street paths, and there
 is broad public support for investing in trails.
- Off-street paths provide the safest alternatives to walking or riding on high-speed and high-traffic roadways. Closing the gaps in our regional trail network is critical to addressing the epidemic of traffic fatalities and serious injuries on our roadways.
- In addition to saving lives and healthcare system costs, off-street paths are
 extremely valuable visitor amenities and support the Metro region's outdoor
 recreation and tourism economy, connect Metro residents to nature, and support the
 economic vitality of Oregon communities.
- With Oregon's restriction on gas tax to the road right of way, RFFA is a critical source of funding for trails investments.

Thank you for your consideration and leadership,

Stephanie Noll, Director, Oregon Trails Coalition

Testimony to Metro JPACT on April 17, 2025 in Support of Full Funding for the 82nd Avenue Transit Project

Good morning, Chair Gonzalez and JPACT members.

My name is Thomas Ngo. I'm a community member serving on both TriMet's 82nd Avenue Community Advisory Committee and PBOT's Building a Better 82nd Avenue Community Advisory Group. I live just a block from 82nd Avenue in Montavilla and regularly experience its challenges firsthand.

Projects being considered for funding through the Regional Flexible Funding Allocation are essential projects toward our shared goals. I'm here today to urge you to fully fund one project in particular: the 82nd Avenue Transit Project. TriMet submitted this project under the Capital Investment Grant priority because it leverages federal grants and is a shovel-ready project.

But this isn't just about capital investment. 82nd Avenue Transit directly advances the core goals of Metro's 2023 Regional Transportation Plan—equity, safety, mobility, climate, and the economy. The RTP calls for investments that reduce transportation disparities, eliminate serious crashes, and improve access and reliability for everyone in the region.

I grew up near 82nd Avenue, which serves some of Portland's most diverse and historically underserved communities. It's also one of Portland's most dangerous streets. More than a dozen vulnerable road users have been killed on 82nd Avenue in the past ten years. The RTP identifies 82nd Avenue as being in the top tier of serious injury corridors, it's part of Portland Vision Zero's High Crash Network, and it has six of the top 30 high crash intersections from Fremont to Flavel.

Through my work on PBOT's Building a Better 82nd Avenue Community Advisory Group, it's clear that PBOT's work is just a starting point to address these safety issues. 82nd Avenue Transit doesn't just mean better transit service — it's an investment that will make 82nd Avenue safer for the thousands of transit riders and pedestrians who use it every day.

Line 72 carries more people than the MAX Orange and Yellow lines. But as a rider of TriMet's Line 72, I regularly encounter delayed buses and frustrating bus stacking, where overcrowded buses skip stops and leave passengers waiting on narrow sidewalks. Evening trips on Line 72 can take 21 minutes longer than morning trips — a delay that hits working families hardest.

The 82nd Avenue Transit project stretches from NE Portland to Clackamas Town Center, a corridor that is home to 4% of the region's population and 6% of its jobs. The dedicated transit lanes and station upgrades won't just significantly enhance service reliability and rider

experience, it's a regional investment in both equity and economic opportunity. I urge you to fully fund the 82nd Avenue Transit Project request through the RFFA Step 1A bond — it will be a critical investment that directly advances the region's Regional Flexible Funding priorities.

Thank you for your consideration and leadership.

Testimony to Metro JPACT on April 17, 2025 in Support of Full Funding for the 82nd Avenue Transit Project

Good morning, Chair Gonzalez and JPACT members.

Subject: [External sender]RFFA Funding Request for Burnside Bridge

CAUTION: This email originated from an External source. Do not open links or attachments unless you know the content is safe.

JPACT Committee Members:

The Portland metropolitan region has many transit-oriented funding needs but none greater than the need for a new earthquake-resistant Burnside Bridge. Once the expected subduction earthquake happens, there will be NO transit routes available across the Willamette River in or near downtown Portland, the region's core — no bus lines, no light rail, no trolley lines, no pedestrian or bicycle routes — unless the proposed new Burnside Bridge is available.

My wife and I are now moving from our 30-year home in Southwest Portland to an apartment in the Northeast sector of the city. One reason for our move is the fear of being trapped on the west side of the Willamette after the big earthquake with only limited access to necessities such as drinking water, electricity, gas, food, medical services, etc. The 200,000 or so SW Portland residents and workers won't be the only folks in this predicament. The 600,000 residents of Washington County will be in the same situation.

THE LACK OF A DEPENDABLE WAY TO CROSS THE WILLAMETTE IN PORTLAND AFTER A MAJOR EARTHQUAKE IS TRULY A REGIONAL ISSUE, NOT JUST A MULTNOMAH COUNTY CONCERN. THE NEED FOR A NEW BURNSIDE BRIDGE IS CRITICAL SINCE NEARLY A QUARTER OF THE STATE'S POPULATION AND A MAJOR PART OF THE STATE'S ECONOMIC ENGINE WILL BE IMPACTED IF THE BRIDGE IS NOT BUILT BEFORE THE BIG QUAKE HITS.

Providing funding for the Earthquake Ready Burnside Bridge project through the RFFA program will benefit everyone in the Metro region in two related ways:

- 1. Help ensure that the 19-mile Burnside Street emergency lifeline route will still be functioning from end-to-end after a major earthquake.
- 2. Help Multnomah County produce a new bridge that will offer much-improved facilities for TriMet bus riders, pedestrians and bicyclists (as well as for possible future MAX or Portland Streetcar riders).

Sincerely, Edward (Ed) Wortman

1317 NW 24th Ave., Portland, Oregon 97210

April 16, 2025

Testimony: Support for RFFA Funding Request for Earthquake Ready Burnside Bridge Project

To: JPACT Committee Members:

By way of introduction, I am and architect and urban designer who has worked in Portland for over 40 years. I was the founding chair of the Willamette Light Brigade, which is gradually lighting our river bridges; I co-founded the Portland Winter Festival which held its tenth event this year with over a quarter of a million Downtown attendees; and I have been engaged on EQRB as an advisor from the outset.

Burnside will be the only major arterial capable of crossing the Willamette after a major earthquake. Burnside Street has few overhead structures through the city, so can be restored quickly to full service. After 'the big one', Burnside will become the most important transportation corridor in the region.

I visited Christchurch, New Zealand six years after their earthquake. The remains of as many unreinforced masonry buildings as Portland had, six years later, been cleared and the lots seeded with grass or brought back to commercial use using modified freight containers.

The first days and weeks following a major subduction event, medical and other emergencies will rely entirely on the Burnside Bridge. It will be essential to Metro and other local services. Please support funding to this critical infrastructure.

Sincerely,

Paddy Tillett RIBA, FRTPI, FAICP, FAIA (emeritus)

Subject: [External sender]Earthquake Ready Burnside Bridge

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

To Whom It May Concern:

As the author of *The Portland Bridge Book*, first published in 1989 by the Oregon Historical Society Press, I have been writing and teaching about the big river bridges located across the lower Willamette River for more than three decades.

Most recently (since 2017), I have been a volunteer member of a series of citizen committees dedicated to getting at least one big river bridge designed and built to remain standing after the subduction zone earthquake that we all know is coming — not if, but when.

I urge Metro to approve the Regional Flexible Funds' bond measure that would assist in the realization of that bridge, i.e., a new and earthquake ready Burnside Bridge — the city's lone designated Lifeline Corridor bridge — and in the full amount of \$25 million as requested by Multnomah County.

I have seen the drawings for the proposed life-saving Burnside Bridge. My question is how can lives be saved if the forces of short-sightedness prevail at this critical design juncture?

Sincerely, Sharon Wood Wortman 3270 SW Fairmount Blvd. Portland, OR 97239 Subject: Support for RFFA Funding Request for Earthquake Ready Burnside Bridge Project

JPACT Committee Members:

As a Multnomah County citizen, homeowner and CDAG member, I would like to express support for Multnomah County's Regional Flexible Funding Allocation (RFFA) funding request for the Earthquake Ready Burnside Bridge Project. This project will result in a modern bridge that advances multimodal safety and enhances one of the highest ridership bus routes in our region. A rebuilt Burnside Bridge will be one of the only central city bridges standing post-earthquake, making this project critical in supporting community safety, response, and economic recovery after a major earthquake.

RE: Comments on Metro's 2028-30 Regional Flexible Fund Step 1A.1 Draft Bond Allocation

Dear Chair Gonzalez and JPACT members:

Thank you for the opportunity to provide feedback on the proposed 2028-30 Regional Flexible Fund Step 1A.1 Draft Bond Allocation. We appreciate the support that JPACT has shown the TV Highway Transit and Safety Project by including it in the draft bonding scenario. We understand and appreciate JPACT's position to distribute RFFA bond funds around the region to the five proposed projects. All the projects are important and worthy of consideration.

As you know, the TV Highway Transit and Safety Project is at a critical juncture in compiling the local funding package to enable the project to move forward with the federal Capital Investment Grant process. Every local dollar counts for this multijurisdictional project. While we appreciate the initial JPACT proposal of \$28 million in RFFA Step 1A.1 bond funds, we must take this opportunity to request that JPACT reconsider and allocate the full requested amount of \$30 million to the TV Highway Transit and Safety Project.

These funds are a critical piece of the local, regional, state and federal funding strategy for this high-capacity transit project that will serve multiple westside communities. TriMet, Metro, Washington County and the cities of Beaverton, Hillsboro, Cornelius and Forest Grove are all committing funds to this project. The more certainty we can collectively provide for this project by committing this regional funding, the higher its chances of successful implementation.

We know that together we can make the TV Highway Transit and Safety Project a reality to

provide more frequent and efficient transit service and provide safe access to transit for our communities. Thank you for your consideration of our comments.

Sincerely,

Chair Kathryn Harrington

Subject: [External sender]EQRB: Burnside Bridge Replacement Testimony **Attachments:** Burnside Earthquake Ready Fixed Span Bridge 25 01 22.pdf

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

Dear Joint Policy Advisory Committee Members,

This letter of testimony is in strong support of funding the Earthquake Ready Burnside Bridge replacement project, but with two clear caveats: please INSIST that the bridge be designed as a fixed-span bridge (rather than as an operating bascule type drawbridge) and that the design INCLUDE one or two water transmission pipelines to provide Portland west of the Willamette River with its only dedicated source of water that would be available after the Cascadia earthquake.

This is vital and absolutely important public service because all the other water line crossings of the river are projected to fail during the earthquake.

A bit of background: Multnomah County hired an engineering firm to prepare a Navigation Study for the EQRB. In the end the report recommended a drawbridge type of structure, even through the engineers could not identify any river navigation that needed a span higher than the Tilikum Crossing bridge just a short distance upstream from the Burnside Bridge. The County just needs to submit an amendment to the Coast Guard bridge permit, which will need to be extended in any case, noting that matching the clearance of the Tilikum Crossing structure is all that is needed for river navigation purposes. https://www.ecfr.gov/current/title-33/chapter-I/subchapter-J/part-115

A fixed-span bridge would be far less expensive than a drawbridge, and would result in far smaller annual operating expenses for the County. In this day and age of limited infrastructure funding there is no reason to be building an un-necessary drawbridge! And suspending a pipeline right below the bridge deck would be far, far less expensive than boring a dedicated waterline tunnel under the river, as the Portland Water Bureau has earlier proposed to do.

I am attaching a one-page summary of this recommendation along with two diagrams illustrating the point.

Respectfully yours,

Kevin Shanley

Kevin Shanley, FASLA 836 S Curry St., #1700 Portland, OR 97239 541-650-2628

Burnside Earthquake Ready Fixed Span Bridge

"It's never too late to NOT build the wrong project!"

Why is the proposed Burnside EQRB an expensive operating bascule bridge when the Tilikum Crossing Bridge, a short distance upstream, is a fixed span bridge that limits the river's vertical navigational clearances?

There is no longer any commercial or recreational need for higher navigational clearance between the Burnside and Tilikum bridges. The once-a-year visiting navy ships are the only maritime craft in this reach of the river that need higher clearances than the Tilikum Bridge provides; the taller Navy ships already moor between the Burnside and Steel bridges, with the smaller ships mooring upstream of the Burnside bridge.

A fixed span bridge would be considerably less expensive to construct and would result in substantial long-term savings in operational and maintenance costs. The cost savings would result from only having one bridge foundation in the water, from eliminating the bascule machinery and supporting structures, from eliminating the operational personnel and the maintenance of the bascule machinery. A fixed span bridge would also provide much wider navigation clearance under the bridge than the current EQRB provides.

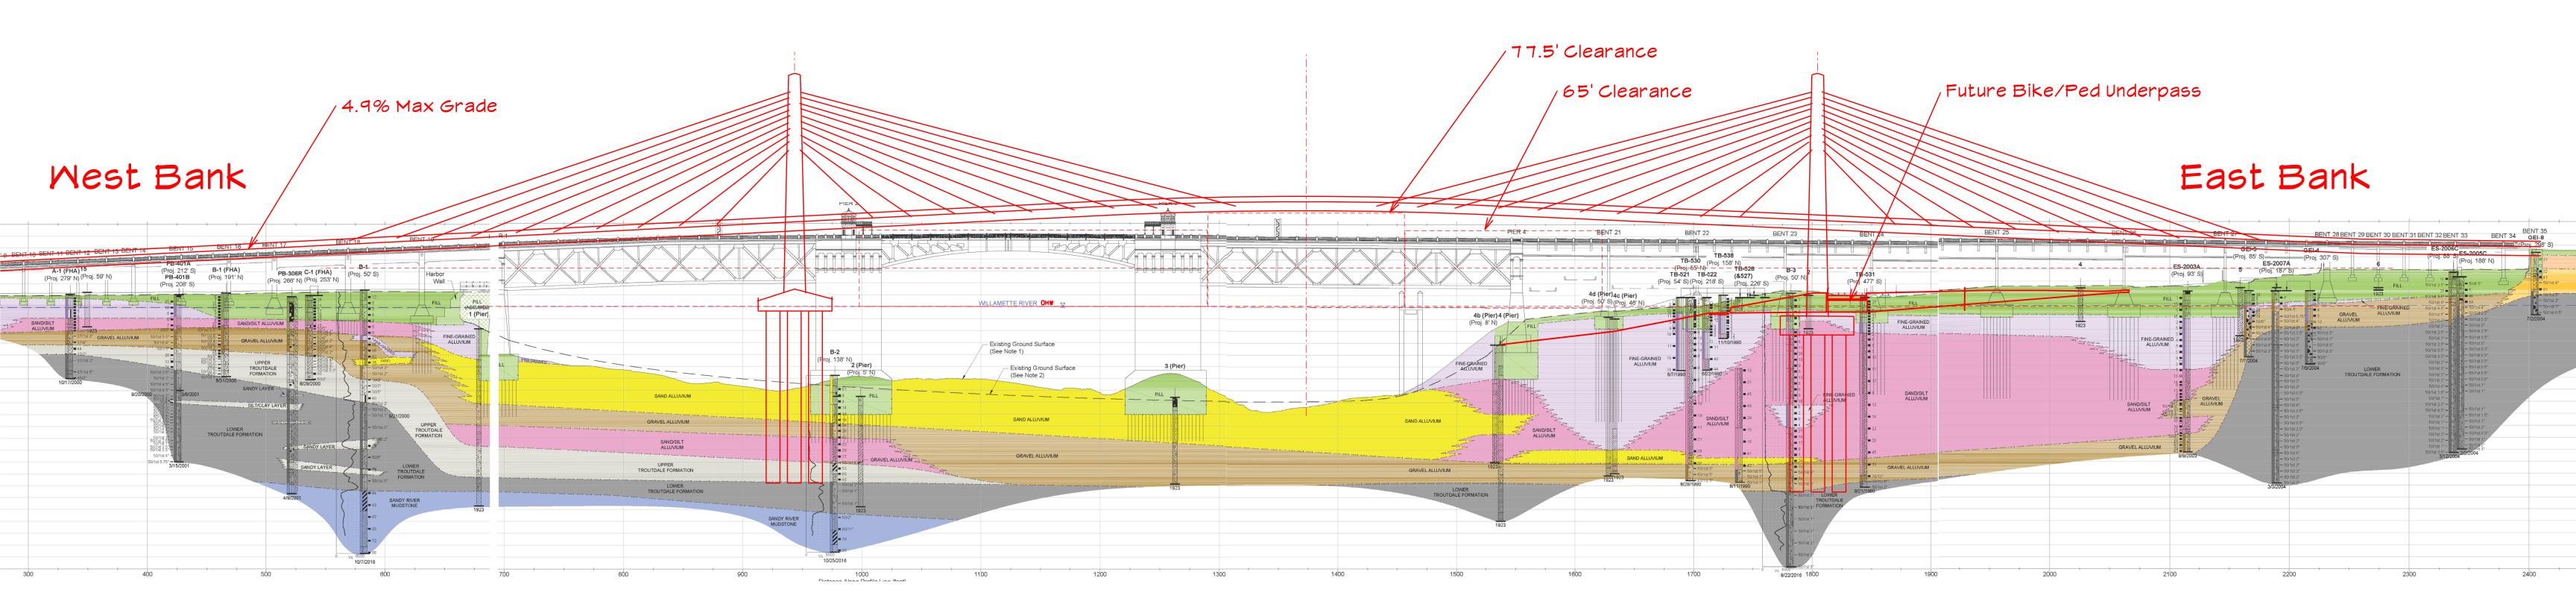

<u>Very importantly</u>, a fixed span would allow the bridge to carry beneath its deck earthquake resistant water lines to supply Western Portland with water after a Cascadia earthquake event. This would be much less expensive and less technically challenging than the water line currently proposed to be tunneled under the river. A pair of water lines designed into and hanging below the deck would provide for operational and safety redundancy.

The attached diagram shows a Tilikum-like bridge structure superimposed on the existing Burnside Bridge geologic cross section and shows the matching navigational clearances. A new fixed span bridge certainly need not copy the Tilikum Bridge, but there might be some aesthetic symmetry to a similar, sister-bridge, type of span, perhaps with the inverted "Y" bridge spires currently proposed in the cable-stayed portion of the bridge.

Additionally, the current EQRB fails to connect the Eastside neighborhoods to the eastside river esplanade; a simpler, less expensive bridge must, given the scale of this public investment, include this vital on-grade connection to serve the current and future residents and visitors in the Eastside communities, especially as it grows in population and density.

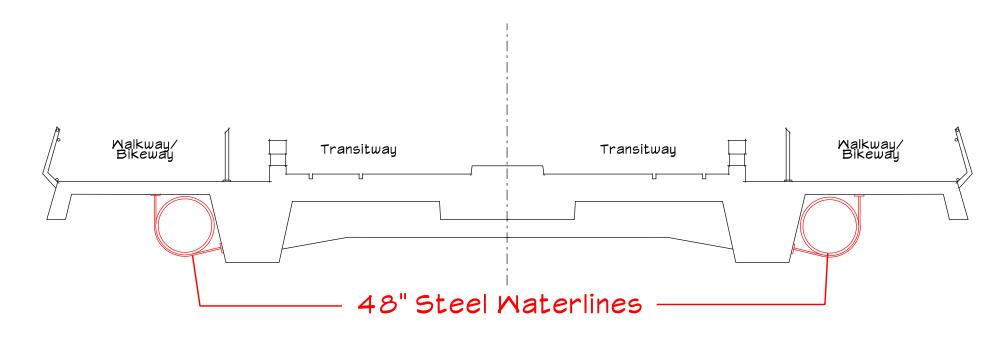

A fixed span bridge need not require the interruption of the Eastside Esplanade and its floating segments, except for the briefest periods of time, especially if the floating esplanade is fitted with a temporary construction safety roof right under the bridge.

Multnomah County has hired a first-class bridge design team including one of the premier bridge design firms in the world; let them go back and design a beautiful, affordable fixed-span bridge that meets our transportation needs, along with our earthquake-resilient water supply needs and community connectivity needs!

We have **five businesses along lower West Burnside**... **Dante's** on 3rd and Burnside for 25 years... **Star Theater** on 6th just off Burnside for 14 years... **Burnside Suites** on 4th and Burnside... The building at **503 West Burnside**... and the **Kit Kat Club** for 12 years just off Burnside in Ankeny Alley... Your current plan is to close the Burnside bridge for **five years**. That is a death sentence for every already-desperate business on lower West Burnside that have already been punished by 5 years of covid and awful city/county policies for downtown. **Unless you get a better plan to keep the bridge partially open while rebuilding (like every other bridge project the last 30 years) or some major economic help to businesses affected, we are 100% AGAINST your plan.**

Sincerely,

Frank Faillace

Subject: [External sender]Support for RFFA Funding Request for Earthquake Ready Burnside

Bridge Project

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

JPACT Committee Members:

As a resident of Portland who lives and works on opposite sides of the Willamette River, I would like to express support for Multnomah County's Regional Flexible Funding Allocation (RFFA) funding request for the Earthquake Ready Burnside Bridge Project.

The most important thing about this project (though certainly not the only) is that a rebuilt Burnside Bridge will be one of the only central city bridges standing post-earthquake, allowing effective connectivity at critical times. This is essential to the City in order to have continual accessibility for immediate, emergency response, linking both sides of the river, and allowing for critical transportation during an earthquake – a major earthquake or even a moderate one where other bridges cannot be relied upon. It is critical to execute this plan, ensuring increased resilience if and when disaster strikes.

Other reasons to support this project include a multi-faceted bridge supporting multiple modes of transport that feel safe and effective and link neighborhoods, thoughtfully serving communities who will be accessing downtown or even simply need to pass through downtown in a variety of ways. Since this project will include building ADA-compliant sidewalks, better-protected pedestrian and bicycle facilities on the bridge, a retained bus-only lane, permanent bicycle/pedestrian street improvements adjacent to the bridge and preparations for a future streetcar line, this project is netting multiple safety and connectivity features for people of all types and all modes of transport.

It will also support the region's plans for high capacity transit. The Burnside Bridge is used by three TriMet bus lines - Line 12, 19, and 20 - and carries nearly 15% of the total bus ridership in the region. That's a lot of riders! The Line 20 has the second-highest bus ridership in the *entire region*. In order to support our region for the future, the new and seismically-resilient bridge will be well-prepared for future bus rapid transit development (and potential streetcar expansion).

Making the Burnside Bridge seismically resilient will also improve the reliability of the nearly 19-mile Burnside St. regional emergency lifeline route, stretching from Washington County to Gresham across the heart of the metro region. And of course, a project this size will come with economic opportunity for denizens of our lovely city and surrounds - regional economic development through short and long-term job creation for the many facets of building and maintaining this infrastructure.

I strongly support including the Earthquake Ready Burnside Bridge project as part of this RFFA bond package, and encourage decision-makers to substantially fund the transit elements included in the project proposal. Help fund safety, reliability, accessibility and connectivity in this critical area.

Sincerely,

Alenna Sebben

Subject: Support for RFFA Funding Request for Earthquake Ready Burnside Bridge Project

Dear JPACT Committee Members,

I support supports Multnomah County's RFFA funding request for the Earthquake Ready Burnside Bridge Project, and also hope you'll add you're support. This project will create a seismically resilient, modern bridge that enhances multimodal safety, supports high bus ridership, and serves as a critical lifeline post-earthquake for community safety, response, and economic recovery.

Key benefits include:

- ADA-compliant sidewalks, improved pedestrian/bicycle facilities, and preserved bus-only lanes.
- Transit upgrades for TriMet Lines 12, 19, and 20, which carry 15% of regional bus ridership.
- Preparedness for future bus rapid transit and streetcar expansion.
- Enhanced reliability of the 19-mile Burnside St. emergency lifeline route.
- Economic development through 6,200 job years of employment, including opportunities for apprentices, women, and people of color.

We urge decision-makers to prioritize and fund the transit elements of this project to ensure safer, more reliable, and accessible transportation for generations to come.

Sincerely, Charles Rossman

Subject: [External sender]Let's make sure the Burnside Bridge is ready when we need it most.

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

JPACT Committee Members:

I would like to express support for Multnomah County's Regional Flexible Funding Allocation (RFFA) funding request for the Earthquake Ready Burnside Bridge Project. This project will result in a modern bridge that advances multimodal safety and enhances the resilience of a critical transportation corridor. A rebuilt Burnside Bridge will be one of the only central city bridges standing post-earthquake, making this project vital for supporting community safety, response, and economic recovery following a major earthquake.

As someone who crosses the river daily for my commute, I understand firsthand the importance of reliable transportation. Every day, I rely on the Burnside Bridge to get to and from work, and I often worry about my ability to get home safely in the event of an earthquake. If a major earthquake were to strike, I need to be able to quickly and safely access my family to ensure their well-being. An Earthquake Ready Burnside Bridge is a critical route for me, as it connects me to my family and to essential services. The thought of being unable to reach them because of a damaged or inaccessible bridge is a significant concern.

The new bridge will provide safer, modern multimodal transportation facilities, serving all modes and communities accessing the downtown core, particularly adjacent neighborhoods located in equity focus areas. This includes building ADA-compliant sidewalks to adjacent social service providers, as well as safer, better-protected pedestrian and bicycle facilities on the bridge. The project also includes permanent bicycle/pedestrian street improvements adjacent to the bridge and prepares the bridge for future transportation developments.

This multifaceted infrastructure project addresses many urgent community needs, including the safety and resiliency of the bridge, as well as upgrades to support the region's plans for high-capacity transit. Making the Burnside Bridge seismically resilient will improve the reliability of the nearly 19-mile Burnside St. regional emergency lifeline route, stretching from Washington County to Gresham across the heart of the metro region.

The project will support regional economic development through both short- and long-term job creation, providing over 6,200 job years of employment, including opportunities for apprentices, women, and people of color. A safe and resilient bridge will better support the reliable movement of goods and services in and across Portland and the region.

Increasing easy and safe access to transportation in this region must be a priority. We strongly support including the Earthquake Ready Burnside Bridge project as part of this RFFA bond package and encourage decision-makers to substantially fund the transit elements included in the project proposal. These improvements will make the bridge safer, more reliable, and more accessible for communities for decades to come.

Jennifer Dimsho

North Portland Resident (14 years)

March 20, 2025

Chair Juan Carlos González Joint Policy Advisory Committee on Transportation Metro Regional Center 600 NE Grand Ave, Portland, OR 97232

Re: Bond Proposal Development

Dear Chair González and members of JPACT,

Thank you for the opportunity to comment on the development of a regional transportation bond as a component of the 2028-2030 Regional Flexible Fund Allocation decision. Our comments represent a unified voice from the Clackamas County Coordinating Committee (C4), which is comprised of the County, its cities, community representatives, and special districts, including but not limited to urban and rural transit providers. On behalf of C4, we urge JPACT to prioritize meaningful investment in the Sunrise Gateway Corridor as part of any proposed bond scenario.

The Sunrise Gateway Corridor is a vital economic and residential area that continues to experience rapid growth, yet remains one of the most unsafe transportation corridors in the region. Adjacent to some of the fastest growing cities in the state, the corridor is expected to support the creation of 14,000 jobs and over 17,000 new homes in coming years but lacks access to transit and basic safety features to be able to support this growth.

Over the last year, thousands of community members have collaborated with Clackamas County, TriMet, Metro, Happy Valley, and ODOT to co-create a vision for this corridor, emphasizing transit accessibility, multimodal infrastructure, and climate resilience. We ask that JPACT seize this opportunity to support that vision through strategic investment in a diverse and growing community.

For over forty years, local jurisdictions have advocated for regional investment in the Sunrise Corridor. However, substantial transit gaps, congestion, and inadequate infrastructure for pedestrians and cyclists remain in the corridor. The resulting safety concerns, frequent crashes, and transportation inefficiencies pose significant challenges to sustainable growth. Addressing these deficits will not only enhance mobility and economic development but also align with the region's climate goals by reducing reliance on single-occupancy vehicles.

Additionally, investing in the Sunrise Gateway Corridor supports critical climate resilience measures. The area experiences extreme heat island effects due to limited tree canopy and expansive impervious surfaces. Strategic investment in green infrastructure, shade structures, and transit-supportive development will help to mitigate these environmental challenges while improving public health outcomes. Furthermore, this corridor serves as a primary evacuation route for the wildfire-prone areas of east Clackamas County. Strengthening road capacity and transit accessibility here is a matter of public safety and climate adaptation.

JPACT has made access to transit a central focus of the bond criteria. As we collectively prepare for future growth, we must ensure that investment keeps pace with the needs of our region. The bond proposal presents a unique opportunity to correct historical underinvestment and provide the infrastructure necessary to support housing production, job access, and economic mobility. Prioritizing the Sunrise Gateway Corridor in this funding package aligns with regional and state transportation goals and will significantly enhance the livability and sustainability of our communities.

Thank you for your leadership and commitment to equitable regional investment. We look forward to continuing our partnership with JPACT to support transportation improvements that benefit the entire Metro area.

Sincerely,

Paul Savas, Commissioner Clackamas County

Subject: [External sender]Burnside Bridge and Water Pipeline under the Willamette.

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

I believe the most important projects to fund are:

A. The Burnside Bridge. To have 1 bridge that is seismically designed with ramps built to the same codenot cut corners.

So it can withstand earthquake and provide a safe thoroughfare - is essential. I understand the other bridges have ramps that would collapse even if their bridge stood.

B. The main water pipe, where water flows under the Willamette and delivers essential water from the Eastside to the Westside

is critical! The pipe is old, not in good shape and must be addressed right away.

First things first Oregon! Priorities.

This must be funded and construction started asap.

We have the money. Let's get going.

There will be a quake.

All the current bridges across the Willamette in Portland will fail.

Countless hours of study & participation by staff and public have been spent to address those 2 facts. They have found a solution.

Now is your opportunity to honorably, morally respond to their request for assistance: Fund the new Burnside Bridge.

Thank you for your attention to this urgent matter.

Subject: [External sender]Multnomah County Bond Request

CAUTION: This email originated from an External source. Do not open links or attachments unless you know the content is safe.

To whom it may concern

Multnomah County is requesting \$88 million for several projects. As a resident, I do not support the request.

Clearly an earthquake proof Burnside Bridge is a worthy project. That is a \$28 million request. The remaining projects are questionable. The most questionable is extending the streetcar to Montgomery Park. Sadly, one should not fund five when only one is worthy.

The city, county and state are in a financial downward spiral, as noted by state economists. Further, existing infrastructure is in horrible shape. The departments of transportation need to address this reality.

Thank you for the opportunity to comment.

Subject: Support for RFFA Funding Request for Earthquake Ready Burnside Bridge Project

JPACT Committee Members:

My wife and I would like to express support for Multnomah County's Regional Flexible Funding Allocation (RFFA) funding request for the Earthquake Ready Burnside Bridge Project. We feel that the EQRB project is a much-needed project to update the 100 year old bridge and to provide a means for the city to recover when the big earthquake occurs.

With the number of bus lines that pass over the bridge, the updating of the bridge is a necessity, not to mention all the pedestrians and bicycles as well.

Please make the funding of this project a priority both through this funding as well as supporting of the County in securing additional funding so that it can be completed.

Thank you for your consideration.

One out of 5 cars on the roads in east county, Portland and other parts of this area have no valid Registration on their vehicles, I took my daughter to the store today and I sat in my car while she was in there. There is a pot store by where she shops. There must have been 30 cars pull in to buy the drugs and only one car had valid registration.

This is supposed to be the way you get the money for the bridge; I am totally against you getting any money for these projects! So, if you want to make up for this tell the County Sheriff and Police force to get off their big butts and go after these people. Then and only then will support any thing for the City of Portland.

An East County Taxpayer

Mike

[&]quot;Anxiety's like a rocking chair. It gives you something to do, but it doesn't get you very far." Jodi Picoult

April 15, 2025

Joint Policy Advisory Committee Members 600 NE Grand Ave. Portland, OR 97232-2736

Dear Chair and Esteemed Members of JPACT:

On behalf of the City of Tigard, I wanted to express my appreciation for the Regional Flexible Funding Allocation (RFFA) process that provides our communities opportunity to advocate for the critical connections that service our residents and businesses. The North Dakota Street (Fanno Creek) Bridge Replacement project is important to Tigard as a key multimodal connector between neighborhoods and response route for our first responders. This bridge is failing. If investment is not made to replacing this structure, it will be weight-restricting, limiting its function as an emergency response route.

The replacement bridge proposed in this location will be elevated, to minimize flooding and reduce the environmental impact, and be constructed to current seismic standards, making it more resilient to shaking. The sidewalks and bike lanes on both sides of the bridge will facilitate safe movement for people walking and traveling by bicycle. This new bridge will provide a multimodal link between residents to the regional trail system, the Fanno Creek Trail, and the Washington Square Regional Center. The City of Tigard has been prioritizing this project for years and has been successful in securing a portion of the funding needed to construct the project. However, the requested funds in this RFFA application of \$8 million will allow this project to be successfully constructed to ensure that this facility is safe, open and functional for all modes well into the future.

Thank you for your consideration.

Sincerely,

Heidi Luus

Mayor Heidi Lueb

Testimony to Metro JPACT on April 17, 2025 in Support of Full Funding for the 82nd Avenue Transit Project

Good morning, Chair Gonzalez and JPACT members.

My name is Thomas Ngo. I'm a community member serving on both TriMet's 82nd Avenue Community Advisory Committee and PBOT's Building a Better 82nd Avenue Community Advisory Group. I live just a block from 82nd Avenue in Montavilla and regularly experience its challenges firsthand.

Projects being considered for funding through the Regional Flexible Funding Allocation are essential projects toward our shared goals. I'm here today to urge you to fully fund one project in particular: the 82nd Avenue Transit Project. TriMet submitted this project under the Capital Investment Grant priority because it leverages federal grants and is a shovel-ready project.

But this isn't just about capital investment. 82nd Avenue Transit directly advances the core goals of Metro's 2023 Regional Transportation Plan—equity, safety, mobility, climate, and the economy. The RTP calls for investments that reduce transportation disparities, eliminate serious crashes, and improve access and reliability for everyone in the region.

I grew up near 82nd Avenue, which serves some of Portland's most diverse and historically underserved communities. It's also one of Portland's most dangerous streets. More than a dozen vulnerable road users have been killed on 82nd Avenue in the past ten years. The RTP identifies 82nd Avenue as being in the top tier of serious injury corridors, it's part of Portland Vision Zero's High Crash Network, and it has six of the top 30 high crash intersections from Fremont to Flavel.

Through my work on PBOT's Building a Better 82nd Avenue Community Advisory Group, it's clear that PBOT's work is just a starting point to address these safety issues. 82nd Avenue Transit doesn't just mean better transit service — it's an investment that will make 82nd Avenue safer for the thousands of transit riders and pedestrians who use it every day.

Line 72 carries more people than the MAX Orange and Yellow lines. But as a rider of TriMet's Line 72, I regularly encounter delayed buses and frustrating bus stacking, where overcrowded buses skip stops and leave passengers waiting on narrow sidewalks. Evening trips on Line 72 can take 21 minutes longer than morning trips — a delay that hits working families hardest.

The 82nd Avenue Transit project stretches from NE Portland to Clackamas Town Center, a corridor that is home to 4% of the region's population and 6% of its jobs. The dedicated transit lanes and station upgrades won't just significantly enhance service reliability and rider

experience, it's a regional investment in both equity and economic opportunity. I urge you to fully fund the 82nd Avenue Transit Project request through the RFFA Step 1A bond — it will be a critical investment that directly advances the region's Regional Flexible Funding priorities.

Thank you for your consideration and leadership.

Subject: Support for RFFA Funding Request for Earthquake Ready Burnside Bridge Project

JPACT Committee Members:

As a Multnomah County citizen, homeowner and CDAG member, I would like to express support for Multnomah County's Regional Flexible Funding Allocation (RFFA) funding request for the Earthquake Ready Burnside Bridge Project. This project will result in a modern bridge that advances multimodal safety and enhances one of the highest ridership bus routes in our region. A rebuilt Burnside Bridge will be one of the only central city bridges standing post-earthquake, making this project critical in supporting community safety, response, and economic recovery after a major earthquake.

The new bridge will provide safer, modern multimodal transportation facilities, serving all modes and communities accessing the downtown core, especially adjacent neighborhoods which are located in equity focus areas. This includes building ADA-compliant sidewalks to adjacent transit stops and social service providers, safer and better-protected pedestrian and bicycle facilities on the bridge, preserving the existing bus-only lane, providing permanent bicycle/pedestrian street improvements adjacent to the bridge and preparing the bridge for a future streetcar line. This multifaceted infrastructure project addresses many urgent community needs including the safety and resiliency of the bridge, and upgrades to support the region's plans for high capacity transit.

The Burnside Bridge is used by three TriMet bus lines - Line 12, 19, and 20 - and carries nearly 15% of the total bus ridership in the region. The Line 20 has the second-highest bus ridership in the entire region. The transit improvements that this regional funding would support would allow our communities' to have safer, and more accessible access to these services, and would put necessary infrastructure in place to reduce delays. In order to support our region for generations to come, the new, seismically-resilient bridge will be well-prepared for future bus rapid transit development, as well as potential streetcar expansion.

Making the Burnside Bridge seismically resilient will also improve the reliability of the nearly 19-mile Burnside St. regional emergency lifeline route, stretching from Washington County to Gresham across the heart of the metro region.

The project will support regional economic development through short and long-term job creation by providing over 6,200 job years of employment, including for apprentices, women, and people of color. A safe and resilient bridge will better support the reliable movement of goods and services in and across Portland and the region.

Increasing easy and safe access to transit in this region must be a priority, so we strongly support including the Earthquake Ready Burnside Bridge project as part of this RFFA bond package, and encourage decision-makers to substantially fund the transit elements included in the project proposal. These transit improvements will make the bridge safer, more reliable, and more accessible for communities for decades to come.

Sincerely,

Jackie Tate

April 16, 2025

Testimony: Support for RFFA Funding Request for Earthquake Ready Burnside Bridge Project

To: JPACT Committee Members:

By way of introduction, I am and architect and urban designer who has worked in Portland for over 40 years. I was the founding chair of the Willamette Light Brigade, which is gradually lighting our river bridges; I co-founded the Portland Winter Festival which held its tenth event this year with over a quarter of a million Downtown attendees; and I have been engaged on EQRB as an advisor from the outset.

Burnside will be the only major arterial capable of crossing the Willamette after a major earthquake. Burnside Street has few overhead structures through the city, so can be restored quickly to full service. After 'the big one', Burnside will become the most important transportation corridor in the region.

I visited Christchurch, New Zealand six years after their earthquake. The remains of as many unreinforced masonry buildings as Portland had, six years later, been cleared and the lots seeded with grass or brought back to commercial use using modified freight containers.

The first days and weeks following a major subduction event, medical and other emergencies will rely entirely on the Burnside Bridge. It will be essential to Metro and other local services. Please support funding to this critical infrastructure.

Sincerely,

Paddy Tillett RIBA, FRTPI, FAICP, FAIA (emeritus)

Georgia Langer

From: Ed Wortman <ed.wortman@comcast.net>

Subject: [External sender]RFFA Funding Request for Burnside Bridge

CAUTION: This email originated from an External source. Do not open links or attachments unless you know the content is safe.

JPACT Committee Members:

The Portland metropolitan region has many transit-oriented funding needs but none greater than the need for a new earthquake-resistant Burnside Bridge. Once the expected subduction earthquake happens, there will be NO transit routes available across the Willamette River in or near downtown Portland, the region's core — no bus lines, no light rail, no trolley lines, no pedestrian or bicycle routes — unless the proposed new Burnside Bridge is available.

My wife and I are now moving from our 30-year home in Southwest Portland to an apartment in the Northeast sector of the city. One reason for our move is the fear of being trapped on the west side of the Willamette after the big earthquake with only limited access to necessities such as drinking water, electricity, gas, food, medical services, etc. The 200,000 or so SW Portland residents and workers won't be the only folks in this predicament. The 600,000 residents of Washington County will be in the same situation.

THE LACK OF A DEPENDABLE WAY TO CROSS THE WILLAMETTE IN PORTLAND AFTER A MAJOR EARTHQUAKE IS TRULY A REGIONAL ISSUE, NOT JUST A MULTNOMAH COUNTY CONCERN. THE NEED FOR A NEW BURNSIDE BRIDGE IS CRITICAL SINCE NEARLY A QUARTER OF THE STATE'S POPULATION AND A MAJOR PART OF THE STATE'S ECONOMIC ENGINE WILL BE IMPACTED IF THE BRIDGE IS NOT BUILT BEFORE THE BIG QUAKE HITS.

Providing funding for the Earthquake Ready Burnside Bridge project through the RFFA program will benefit everyone in the Metro region in two related ways:

- 1. Help ensure that the 19-mile Burnside Street emergency lifeline route will still be functioning from end-to-end after a major earthquake.
- 2. Help Multnomah County produce a new bridge that will offer much-improved facilities for TriMet bus riders, pedestrians and bicyclists (as well as for possible future MAX or Portland Streetcar riders).

Sincerely, Edward (Ed) Wortman

Subject: [External sender]Earthquake Ready Burnside Bridge

CAUTION: This email originated from an **External source**. Do not open links or attachments unless you know the content is safe.

To Whom It May Concern:

As the author of *The Portland Bridge Book*, first published in 1989 by the Oregon Historical Society Press, I have been writing and teaching about the big river bridges located across the lower Willamette River for more than three decades.

Most recently (since 2017), I have been a volunteer member of a series of citizen committees dedicated to getting at least one big river bridge designed and built to remain standing after the subduction zone earthquake that we all know is coming — not if, but when.

I urge Metro to approve the Regional Flexible Funds' bond measure that would assist in the realization of that bridge, i.e., a new and earthquake ready Burnside Bridge — the city's lone designated Lifeline Corridor bridge — and in the full amount of \$25 million as requested by Multnomah County.

I have seen the drawings for the proposed life-saving Burnside Bridge. My question is how can lives be saved if the forces of short-sightedness prevail at this critical design juncture?

Sincerely, Sharon Wood Wortman 3270 SW Fairmount Blvd. Portland, OR 97239

May 2025

Appendix E: Online Survey Written Comment Received

Public comments on proposed projects for Step 2 2028-30 Regional Flexible Funds.

May 2025

Project Name	Applicant	Support Rating	Comment
Clackamas Industrial Area Improvements: SE Jennifer Street Multi-use Path	Clackamas County	1	Doesn't connect to any notable existing infrastructure, so I don't imagine this creates any new riders
Clackamas Industrial Area Improvements: SE Jennifer Street Multi-use Path	Clackamas County	1	Why has there been so much focus on 'Sunrise Corridor' area the last few years? The county should focus its transportation funding on existing population centers, such as cities and urbanized areas of North Clackamas County, rather than directing resources toward unincorporated areas that encourage further sprawl. Prioritizing urban infrastructure benefits more residents and supports sustainable growth. Additionally, this particular project appears to disproportionately benefit a single wealthy landowner, Terry Emmert, making other projects on the list a more deserving use of public funds.
Clackamas Industrial Area Improvements: SE Jennifer Street Multi-use Path	Clackamas County	2	\$8m for sidewalks? really. Is this the best way to spend tax payer funds. Yes its tax payer even when it comes from the Feds.
Clackamas Industrial Area Improvements: SE Jennifer Street Multi-use Path	Clackamas County	3	Clackamas County keeps asking cities to subsidize services to urban unincorporated areas through the Library District as well as these transportation dollars. We should not be prioritizing spending in unincorporated areas they should annex or incorporate as their own city. I would ordinarily have been inclined to rate this a 1, but I do think it has some merit in that it supports the Veterans' Village and Clackamas Village transitional housing.
Clackamas Industrial Area Improvements: SE Jennifer Street Multi-use Path	Clackamas County	3	Fill the gaps for pedestrian and bike safety and access!
Clackamas Industrial Area Improvements: SE Jennifer Street Multi-use Path	Clackamas County	4	There are many workers in the area who are forced to walk in the street with semis. This important connection will increase safety.
Clackamas Industrial Area Improvements: SE Jennifer Street Multi-use Path	Clackamas County	4	This is an area that desperately needs non-motorized transportation infrastructure! I'm concerned, though, that the proposed segment is poorly connected at either endreally, the entire length of Jennifer Street from 82nd to 135th needs protected bike and pedestrian routes to serve local communities and employment centers. Hopefully this is integrated into the Sunrise Corridor planning and this proposed project is simply a segment of a contiguous route improvement.
Clackamas Industrial Area Improvements: SE Jennifer Street Multi-use Path	Clackamas County	5	Great project, demonstrating how to provide safe bicycle infrastructure in an industrial area. Portland, sharpen your pencils and take note, this is how you do this.
Clackamas Industrial Area Improvements: SE Jennifer Street Multi-use Path	Clackamas County	5	Those who live in the area deserve this improvement.
Clackamas Industrial Area Improvements: SE Jennifer Street Multi-use Path	Clackamas County	5	Infrastructure investment, particularly active transportation investment, in the Clackamas Industrial area has been too-long overlooked. This critical work would unlock access and opportunity to many of the workers who work in the industries along SE Jennifer.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	1	isn't this currently open to bikes/peds?
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	1	This is outrageous when ODOT is saying we are out of money and peoples lives are at risk due to the road conditions
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	1	This project will greatly enhance economic development in downtown Gladstone and encourage more collaboration between Oregon City and Gladstone.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	2	This might make me want to visit this area.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	3	Would be swell to have this connection again.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	3	I would appreciate this bridge as a local resident, but I'm not certain how necessary it is given that there is another bike/ped bridge a few blocks away.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	4	Well, I love this idea, but I would point out that there is already a bridge crossing the Clackamas River at 82nd Ave, which is just a hop, skip and a jump to the east. Not sure if this one is needed, but it would be cool.

Project Name	Applicant	Support Rating	Comment
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	4	It is the missing link to the Trolley Trail and many others. I see it as a missing link; I have walked and biked the trails nearby many time on both sides of the river, from Milwaukie to Oregon City and this would really be a valuable link.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	4	Interesting idea that would give this area more access. But i d like to see some sort of river access for people there in the plan. As this will be a huge temptation while walking or riding through. In some ways i wonder what is the goal here for the money? Will parking nearby be included as this will open a large portal to the other riverside. Not everyone will bike there.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	4	This is an excellent project proposal. I ride the Trolley Trail frequently, and currently the route requires a lengthy detour to the old 82nd Drive bridge to the east and back again. This would finally provide a direct link across the Clackamas River for people walking and biking between the Portland/Milwaukie/Gladstone area and the Oregon City area.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	4	Here's another no brainer! This provides an offroad connection from one side of the river to the other, offering a more scenic passage than the car bridge, and also connects to an existing offroad trail, the Clackamas River Greenway Trail! It provides both residents and tourists to really enjoy the area offroad with biking and walking, and especially allows the neighbors to the north easy access right out there doors to recreation!
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	4	Much needed connection. This area has historically been underserved. It's supported by the residents of the area.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	5	This project would dramatically improve bike and pedestrian linkage between Oregon City and downtown Milwaukie & beyond
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	5	I understand Oregon City's desire for the path to Tumwata Village/the falls, but public visitation of the falls is still some years out. This project should be a higher priority, to provide a safe and easy connection from the Gladstone/Oak Lodge area to Oregon City.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	5	This would be a great addition to our bike/ped infrastructure and a tourism boost as well.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	5	We need this over-the-Willamette connector!
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	5	This may be the coolest project of this cycle. This regional trail will serve people from all counties and help Gladstone and Oregon City thrive
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	5	Awesome project!!
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	5	Project cost is not prohibitive. Excellent use of funds. Having this safe/improved connection is ideal.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	5	There's alerady a nice footbridge at Cross Park. I'd rather see the money go toward a shoulder on Clackamas River Drive (currently a death wish for anyone on a bicycle) or even a footbridge over the Willamette near Oregon City.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	5	this would improve my commutes around this area. I live in multnomah but work in Clackamas/Oregon City.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	5	I appreciate that the funding would actually be constructing a connection for users and not just planning more.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	5	This has all the makings for a safe and gorgeous opportunity to move from Gladstone to Oregon City. It sounds like a fantastic day trip to spend some time in these towns. Very much looking forward to it and I hope it gets the funding.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	5	Giving the Trolley Trail a direct connection to Oregon City would dramatically increase its usefulness. Walking or biking across the Clackamas River on McLoughlin Boulevard is neither attractive nor safe, and the 82nd Avenue Bridge is too far east to be convenient.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	5	Yes.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	5	Biking and walking really improve a city.

Project Name	Applicant	Support Rating	Comment
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	5	Great to enable crossing away from busy car route on McLoughlin. Encourages access to the waterfront areas for paddling.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	5	I think this project will increase the walk ability of the Clackamette area. Having recently been in Bend, OR and seeing how many pedestrian bridges they have over their river, the Clackamas river could use more. I also believe with the proposed projects in Oregon City, this bridge would allow Gladstone residents to easily come and use them. It would make the area more connected and help to make individuals more healthy by increasing walking loop options. I do believe good walking loops would bring visitors from elsewhere in the metro area, and it would be a positive addition for all.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	5	Bridges connect communities. Rivers, though vital and beautiful, need more options for crossing them. Getting pedestrians and bike safely away from traffic is better for both walkers and bikers and auto traffic.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	5	This project replaces a historic, vital pedestrian and bicycle connection between Gladstone and Oregon City. The Gladstone end of the bridge connects to Gladstone's soon-to-be-adopted town center. The connection would benefit residents and visitors from many parts of the metro area by creating a Clackamas River bike and ped loop suitable for walkers, riders and strollers of all ages.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	5	Another non car crossing of the river in this area will be popular
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	5	Great concept and appears to lead into the one in Oregon City; address a key regional pathway.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	5	This project will transform downtown Gladstone by connecting pedestrians and cyclists to downtown Oregon City safely and conveniently. It will invite more bike traffic from Milwaukie as they complete the Trolley Trail. It will help spur more economic development and investments into the downtown Gladstone Area.
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	5	A great opportunity for connectivity between Gladstone and the trails to Oregon City
Gladstone Historic Trolley Trail Bridge Construction	Gladstone	5	creates a safety corridor and access.
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	1	More lanes for cars? No thank you.
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	1	The county should not be prioritizing transportation funding in unincorporated areas. This funding should be spent to support current population centers residents of cities, or of urbanized North Clackamas County. Not to encourage more development outside the urban core. Moreover, this is a total boon to one wealthy Republican landowner, Terry Emmert. Any other project on the list is more meritorious than this one.
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	1	This should be lowest priority based on how many people it would actually help. Please focus on population centers, not special interests by property owners.
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	1	Other project are much more worthy. This would be a step in the wrong direction.
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	1	Correcting my number here. Selected wrong end on my prior comment NOT supporting this project when so many others cost so much less for much larger results that help connect existing already built corriders that can carry so many more pedestrians and bicyclists!
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	1	This looks like a car project rather than bike ped as claimed in the title

Project Name	Applicant	Support Rating	Comment
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	1	I would much rather see this amount of money spent in areas where there is more population that will use the infrastructure than in an unincorporated industiral area. Please prioritize other projects over this one.
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	1	Happy Valley was a massive mistake on the part of Metro. The Sunrise Highway should NEVER have been built; Happy Valley should NEVER have been allowed to grow without having a light rail line or a designated walkable town center. Doubling down on these mistakes would just show how much the Metro council DOES NOT GET IT. Cancel the 2nd turn lane, make this focus just on the bicycle infrastructure, and come back next time.
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	1	Please do not fund this project that is part of a larger freeway/expressway project that is contrary to so many regional policy goals. This is a "green-washing" project, dressing up a highway improvement as an active transportation project.
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	1	I don't feel like this is necessary. There are much worse traffic management issues nearby at Carver (no protected left turn onto the bridge) and Damascus (traffic signal at Foster and 212 routinely backs up traffic for miles). An off-highway bike/ped trail would be a safer alternative.
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	2	Please do not use bike/ped money to further highway expansion projects.
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	3	I have driven to Carver many times, so I am quite familiar with this route. However, I feel that the hyper-local residents should have more of a say than others such as myself.
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	4	Very dangerous intersection that is car-centric. This improvement would be very helpful for the thousands of residents in the area. It's the only connection between the commercial area and the many neighborhoods to the south of the intersection. Traffic is also very busy, so this would help that issue as well.
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	5	This intersection is terrible! It's always backed up and that makes it hard to make the turn to or from 152nd Avenue.
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	5	I grew up in Clackamas County and used to commute through here. It's long overdue for multimodal improvements. It's regionally significant as it is the primary East-West route through northern Clackamas County. The people living in this community deserve to be safe and separated from commuter traffic.
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	5	This simply will not serve many people. Funds should be prioritized & allocated for projects in areas with highest number of people who can benefit & that helps get existing networks tied together!
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	5	The Sunrise Corridor has a major need for improvement to ensure multimodal uses of the road are possible. This project would be the first step in bringing the community closer to bike/walk accessibility and support broader access in the area.
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	5	This corridor is in great need of improvements and I'm glad to hear that this solution is compatible with the larger project.
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	5	This is a forward-thinking project connecting much of Happy Valley and the Portland metro area to farther areas such as Estacada. In my situation, for example, I would love to be able to bike to my family in estacada, but currently would need to ride all the way north to the springwater corridor to do so safely.

Project Name	Applicant	Support Rating	Comment
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	5	I ride this section of roadway at least three times a week and it would be so much safer for me on my commute if I didn't have to navigate this intersection on the very narrow shoulder. People drive carelessly here and are in a hurry and they don't take into consideration how dangerous it is for other road users. A multi use path would allow me to safely commute to and from work via bike
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	5	It would be amazing!!! Please please please!!
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	5	This area is extremely unnerving to be a pedestrian and there is a great need to make this area safer and more accessible by foot and bike.
OR 212/224 Sunrise Hwy Phase 2: Bike/Ped Facilities and Interchange Improvements (CON)	Happy Valley	5	This intersection has been failing for years and is one of the more critical areas needing improvement in the region.
Lakeview Blvd - Jean Rd to McEwan Rd	Lake Oswego	1	Deliver a cycle track or a bike/ped trail adjacent to the project. Road widening by itself is a horrible waste of funds.
Lakeview Blvd - Jean Rd to McEwan Rd	Lake Oswego	1	This is a small street with an easily accessible parallel route. traffic calming and shared facilities would be much better than expanding the roadway
Lakeview Blvd - Jean Rd to McEwan Rd	Lake Oswego	1	GTFO. When the public gets unencumbered access to the lake they can start making demands for funds.
Lakeview Blvd - Jean Rd to McEwan Rd	Lake Oswego	3	A moderate price tag and worthy project.
Lakeview Blvd - Jean Rd to McEwan Rd	Lake Oswego	5	I am writing on behalf of Lake Oswego School District to urge the advocacy for the construction new sidewalks and roadway improvements in the Rosewood neighborhood, specifically to extend the infrastructure Lakeview Blvd to 65th Avenue. This is a light industrial area and residential. The road is shared by manufacturing with large vehicles and walkers to our schools. This request is in light of a recent significant investment in our community—the construction of a new \$43 million school within the Lake Oswego School District. This school is intended to serve students, many of whom will be walking from the Rosewood and Bryant neighborhoods, and it is imperative that we ensure safe and accessible walking routes for these students and their families. This project would be a significant improvement in the area for both pedestrians and business traffic.
Lakeview Blvd - Jean Rd to McEwan Rd	Lake Oswego	5	This is an important project for students getting to LO's largest new elementary school that does not have safe bike or walk areas. Students along this route are forced to walk in the street along a busy industrial road that also hosts a busy central bus school bus barn.
Lakeview Blvd - Jean Rd to McEwan Rd	Lake Oswego	5	This is an underfunded area between Lake Oswego and Tualatin that constructing this project would benefit residents and employers. The corridor would also provide walkable facilities to residents of Rivergrove, unincorporated Clackamas County, and unincorporated Washington County. None of those jurisdictions would otherwise invest in this sort of a project.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	1	Complete waste of money. Such a small strip of what you call 'connection' to Milwaukie. Linwood has NOTHING to connect to and Milwaukie is just the New Season shopping strip mall. This is NOT well thought out! Rarely do you see people walkingTHEY DRIVE and will continue to drive. You imagine if it is built it will become some major new thing people will fill with usage. Look at the mess on Linwood with the ULTRA WIDE sidewalks that supposedly walkers and bikers are busing WHERE ARE THESE USERS? The roadway which is widely used has been DANGEROUSLY narrowed. Drive on both roads frequently and rarely see walkers or bikers. So what fact finding documented information was used to justify the Linwood project and the same for your new want for a project on Railroad roadway. Just STOP this wasteful crap.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	1	I don't feel this is a good use of funds. There are many other ways to get from one end of this proposed project to the other. The upheaval required and the destruction of natural areas would be tremendous. It ain't broke, so don't (try to) fix it. It is no secret that the intersection of Harmony, Linwood, and Railroad is extremely heavily used. The railroad crossing adds further delays for traffic. Adding the path would be unsafe and would add additional, unnecessary delays for motorists.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	1	This road is already too narrow for the car lanes as it is. The roadway should be widened and improved before any walking path should be created.

Project Name	Applicant	Support Rating	Comment
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	2	I like the idea of a trail but this intersection is awful and dangerous. Harmony Rd. Crossing at the railroad is a huge road hazard and there is always bad backups here.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	3	I fully support the creation of a bike path along Railroad Avenue. I just want the decision makers to know that the signals at Harmony Road and Linnwood Avenue back up traffic due to their inefficency, and should be converted to sensored signals that can skip, extend, or shorten phases based on real-time traffic demand.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	3	Will this path bring homelessness into our neighborhoods and will crime rise due to easier access. How much more foot traffic can I expect living close to Hector Campbell elementary?
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	4	People walk along this road but have no place to be. Cars all speed and the sides of the road are covered in trash and steep slopes
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	4	great idea
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	4	looks like it would be a very useful connection.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	4	While i love the idea, making the intersection between Rail, Harmony road smoother would make more sense with this project. That intersection is not smooth and adding public/pedestrian layers could result in tragedy. Addressing the intersection and incorporate it in this.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	4	I would like to see a safe walking path on at least one side of Railroad Ave. I would also love to see a sensor-sensitive stop light at Home to make it easier for cars to get out on Railroad and to slow down traffic. More and more vehicles use Railroad to get to the Milwaukie Marketplace and downtown Milwaukie. Especially when construction begins on King Rd and Monroe St, I think the traffic will really increase.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This multiuse path would provide a key connection to help people walk and bike safely between Milwaukie, the North Clackamas Aquatic Park, and the Clackamas Town Center area. The project would also help kids get to school safely at Cascade Heights Charter School and help people get to their jobs in the Milwaukie industrial area to the south too. Bus lane improvements could help provide more frequent transit in or through Milwaukie, decreasing reliance on cars. This is a very important project!
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This would be a great place for a Multiuse path. It connects the 224 Shopping Mall (New Seasons, Planet Fitness, etc.) with the bike path on Linwood Ave and Lake Rd. There really is a missing link here and this would complete it very well. Thank you for considering this!
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	Being a buffer zone, costs for this are relatively low and offer a lot of benefit for relatively little buck. A good and safe east-west bumper is definitely something lacking in this area of Milwaukie.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This project is an excellent opporutnity to link several large scale housing developments in adjacent neighborhoods with natural spaces, Clackamas Community College, local schools, and the North Clackamas Aquatic Center. It is currently unsafe to walk, bike, or roll along this route, given the speed of cars and lack of infrastructure.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This would encourage cycling and walking on Railroad and would create alternate bus/cycle routes since the 34 and 152 run infrequently. It would connect the Monroe & Linwood pedestrian/bike corridors, it would create the ability to walk to the Milwaukie Marketplace from neighborhoods off Linwood - improving walk scores and property values. It would also connect the Minthorn natural area to neighborhoods nearby. This would be of great benefit to the community and there's quite a lot of unused land on Railroad that would give ample room for such improvements. This would only be beneficial to the community and would help make the entire area more accessible and provide alternatives for transport. I live off Stanley in a small development (the Grove) and am constantly looking for ways to ride my bike instead of driving. This would be such a perfect way for me to walk/ride my bike to the gym, or get a coffee, or get something small from the grocery store. There are elementary schools, playing fields, natural areas all off Railroad that could do with more transportation options. This is honestly my dream project, as insane as that sounds.

Project Name	Applicant	Support Rating	Comment
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This project would provide much needed linkage between 37th Ave and the multi-use path on Linwood, eventually linking to North Clackamas Park and Milwaukie Center The existing bike lane on Railroad is dangerous
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This has been needed for decades. I can't think of many roads in the metro area that have as much use and are as dangerous for anyone outside of an auto vehicle. This needs to happen. I'm willing it to happen. I'm excited for its completion.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	Currently they are few areas along this route that have a sidewalk or safe place to walk or ride a bike. It would be a great addition and way to connect the Milwaukie Marketplace/Seven Acres area with the Clackamas/Sunnyside area that just doesn't exist for people not using an automobile.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This project has been in the minds of Milwaukians for many years. It is extremely unsafe to walk or bike that stretch of road, though it is the straightest shot to get from the Milwaukie Market place area to Linwood. I have walked it and bike parts of it (highly unnerving for an experienced adult). There is a school next to Railroad Ave that many kids could walk or ride to but cannot due to the unsafe conditions. If we really want kids/people to be healthier then we need to make complete paths/sidewalks for them to use in their everyday lives. YES to Railroad Ave Multiuse Path!
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This would be awesome! This is a major thruway and would be great to have a bike path here. without a bikepath it is unsafe to bike on this road.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	Vital connection where there is non, traffic needs to share this thoroughfare
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This would tie in greatly to other adjacent investments already made by the City of Milwaukie, further building on the network effect. Furthermore, the City of Milwaukie has shown commitment to building out a bike network with the only hurdle being funds. They put in the political work to raise money through a new fee that goes directly to active transportation projects, but of course that can only fund so much. With Metro's help Milwaukie could be the most bike friendly city in the region and make the biggest dent in carbon emissions! Railroad ave is currently the most direct route for many to the vast majority of employment in the city as well as Milwaukie Marketplace, a large portion of public commerce in the city, but many are not prepared to use it because it is a high stress route outside of car.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	We live off Railroad Ave and like many of our neighbors, we have young children. We would love to utilize a bike path to commute to the grocery, library, parks and businesses in downtown Milwuakie. Currently it is very challenging to bike on Railroad Ave, due to the unsafe biking infastructure and it is challening to bike up the hill to reach local businesses.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	I live on SE Beckman Ave. and we are in great need of this type of pedestrian/bike pathway!
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	Right now getting to CCC's Harmony Campus and the N. Clackamas Aquatic Center is either dangerous or extremely meandering. These are important parts of our community that are currently really hard to access except via car! Adding a multiuse path will make a huge difference and make those spaces much more accessible. I highly support it!
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This is an essential arterial between ever growing Clackamas and and Dowtown Milwaukie and the Willamette waterfront. It has a large amount of open right-of-way and would dramicially improve safety in what is otherwise a high speed corridor. Please get this done.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	I biked this for the first time just last week on my new e-bike. While I am a fairly confident cyclist, I was uncomfortable at times biking directly alongside and with traffic, especially along a section of road where drivers really like to go fast. A multi-use path in this location would be a great improvement to the area!
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	There have been people killed walking, jogging or running along side railroad avewith the increase in housing in the area and increased traffic adding a bike/pedestrian lane makes more sense than ever
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	I was just talking about this last weekend! A lot of people bike, walk, board on this very busy road which can cause stress to both the driver and pedestrian. Having a sidewalk/bike path here would be HUGE for the area. Milwaukie is already adding biking lanes, pedestrian safety near here. Why not add on to an already great and VERY needed project.

Project Name	Applicant	Support Rating	Comment
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	I'm a very avid cyclist and have bike on this road for years since it's such a major pathway to get from the oak street area to 82nd and clackmas town center. This path would allow for so many others who are not as hardy of cyclists as me to get to school, shop or work in a safer and quicker way.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	It's a great idea. That road can only be used by cars as it is so dangerous and will give an excellent opportunity to reach the aquatic center. I however think it should extend further to the aquatic center via a pathway through the three creeks natural area. SE harmony road is not that great for bikes as well. Maybe that's the plan?
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This stretch of road isn't safe, and can only be improved if the decision is made to add a walk/bike corridor.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	THIS is the kind of project that Clackamas County should be prioritizing, NOT the Sunrise. This project would connect areas of housing with both commercial areas and parks. Although proposed by the City of Milwaukie, this project could be extended by the County up Harmony Road to provide a crucial link for the residents of unincorporated Clackamas County around Clackamas Town Center the most densely-populated part of the county. Moreover, there is a large farm parcel on the edge of Milwaukie, just a few blocks off the Harmony/Railroad intersection, which seems likely to be redeveloped into needed new middle housing. This project also provides a great connection to the work the City and County have already done on Linwood Avenue. It's a 5 out of 5, easily!
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	Railroad is a heavily traveled road with a bike lane on one side, only, and nowhere for pedestrians to walk on either side. It is highly dangerous for anyone who is not in a car, and there is no better or safer north/south route for anyone who doesn't use motorized transportaion. There has been a lot of development in the area, and a lot more people moving in, which has increased traffic on this road, and made it more dangerous to everyone who uses it.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	The multiuse path would span 37th to Linwood, and provide a safe space for people to walk, bike, and roll. It would help people safely get to schools like Cascade Heights Charter School (at the Campbell Elementary School site) or Clackamas Community College, and connect to the North Clackamas Aquatic Park or Clackamas Town Center area. It would also help people safely get to jobs in the industrial areas south of Railroad too.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This will increase property values, livablity, and connectivity in Milwaukie. It will also be a safer version of this area for walkers and bike riders.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	The nearest public transit opportunity is King so a safe, convenient method of travel along railroad would be a good step toward making Milwaukie a more bike/pedestrian friendly city.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This is very important for interconnectivity and active transportation in Milwaukie and throughout the North Clackamas region.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This is a badly needed East-West connection that would benefit not just the adjacent neighborhoods, but would also help fill gaps between residential, educational and jobs centers across an urbanized region where dense infill is planned/encouraged.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	Yes!!
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This will be a huge win for Milwaukie and Clackamas County residents alike getting from one end of Milwaukie to the other.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	Unsafe to walk or bike along railroad avenue. This project is greatly needed.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	I live off the road, and I can tell you that I have had to go around in order to get from my house to the Milwaukie Marketplace. This is because its scary to ride my bike or walk on the side. We should make it easier to have a straight shot to that area.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This is a high yield project for the overall cost. It would make a great straight-run path that would bring many in to connect to cycle track up SE 37th, East on SE Monroe and over much closer to the SE 29th Greenway that then connects to the Springwater Trail headed for central Portland.

Project Name	Applicant	Support Rating	Comment
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This project is long overdue and a much needed connection in Milwaukie/Clackamas County. I would love to see it built and see it continue farther to the east so that it creates a very safe connection to the Community College Campus and North Clackamas Aquatics Park which would allow better and safer non-vehicle options for accessing these facilities. The eastern end of RR ave is a particularly bad intersection for pedestrians and cyclists and I encourage all of the stakeholders to really consider how best to improve this intersection before building the RR ave MUP. I would suggest that the Rail Road Ave MUP get elevated up into the air at the Linwood/Harmony/Lake intersection so that it is lifted above that intersection and then comes down on the south side of Harmony Rd as well as coming down to meet the Linwood MUP and Lake Rd Bike lanes. Creating an elevated MUP over this intersection would make it a much safer intersection for all who pass through this terribly busy area. The danger and discomfort of this intersection is really limiting who chooses to walk or bike through this intersection. Timid cyclists and pedestrians stay away from this area. I have an employee who lived out Sunnyside Road and who wanted to ride to work in Milwaukie. She did feel safe in riding through this intersection and decided that driving was her only option. Consider and elevated structure like this: https://atlanta.urbanize.city/sites/default/files/styles/2018_article_image_1140x538/public/background/2022-08/Buckhead%20Loop%20PATH400%20bridge%20HUB404.jpg?itok=o6xVbQjG Or something like this: https://pbs.twimg.com/media/Dgj9VmuXUAAuQ0_jpg:large This Multi-Use path idea has been in the Milwaukie TSP going back to at least 2007 and the community continues to hope that it gets built. Once it is constructed it will allow a much safer way for peds/bikes/ and disabled folks to move along RR ave. I have ridden my bike on RR ave in the past and it is extreemly dangerous. I have also driven along RR ave many times and encountered mom
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	Awesome, let's do this!
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This is a crucial project for residents that live in this area of Milwaukie. Railroad is a major thoroughfare for residents and safety personnel. Car traffic is constant but the area lacks a safe route for pedestrians.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This is a vital project to connect existing and future multi use paths in Milwaukie. Additional investments are needed to improve the intersection at SE Railroad, Linwood, and Harmony for bikes and pedestrians. Elevated and separated crossing is one possible solution.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	I see walkers and cyclists hugging the narrow shoulder on this busy road. It can be dangerous for pedestrians and motorists especially when it's dark. I ask that this proposal be approved and started as soon as possible.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	Developing this multiuser path will provide better acces for three schools and connections from the city to 82nd Ave. There are already a lot of users walking along the side where there is no current sidewalk and this project would make it safer for bike, walkers and runners. Maybe it would also slow drivers down along railroad with enhancements that help slow traffic. Please fund this project!
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This road is currently extremely dangerous for pedestrians and cyclists and the proposed multi-use path should be considered a high priority.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	I do not live in this neighborhood, but regularly drive down Railroad Ave. When I do see pedestrians, I worry for their safety. This could be a great connector for walking and biking! A multiuse path would change it from hazardous to enjoyable.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This area has no sidewalks and is unsafe for pedestrians. It is a logical path for walkers and bikers to get around the city, yet it is currently unsafe. This project would significantly increase livability, bikeability and safety in Milwaukie. Please, please, please put this path in! In a few years, my kids will be teenagers and this path would make me feel so much safer for them getting around the city.

Project Name	Applicant	Support Rating	Comment
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	Can we Eliminated Dangerous Railroad Crossing to an Grade Separate Overpass. Also to relocate the Intersections to a Roundabout or a New Traffic Signal to standard McCain Heads with Yellow Reflective Borders. Can we widen Harmony Road to 5 Lanes from Highway 224 to Highway 213.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This addition of sidewalks is vital for the safety of locals. This area includes two schools and several large affordable housing apartment complexes. Many of our children will be able to bike and walk to school once completed. Currently many of us drive a short distance as this road is not safe for pedestrian or cycling use.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This would be a huge relief to my family. My son has walked home from school since the 4th grade and had to weave through the neighborhood because RR is not safe. We also have adopted the block at 42nd and cannot safely pick up the trash most days due to speeding. This would be a HUGE improvement for all those living beyond 37th, providing us with safe walking access to the Milwaukie Marketplace and beyond.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	People on bicycles need good parallel routes to 224.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This stretch of road is one of the most dangerous areas for a cyclist or pedestrian due to its high use as a "short cut" for cars that drive here to avoid the 224. There is a history of fatalities and crashes along the road and there is a memorial is set up for those who've lost their lives. The roadway has a soft shoulder leading into steep ditches along the railroad and wetland ditches along the residential North side where you can often see cars stuck in the muddy creek that appears in heavy rains. Drainage issues means that pedestrians and cyclists are forced to travel inside the road which is already narrow for the two lanes present. There are few stop signs, and the only light is as SE Linwood and SE Harmony, which gets heavily trafficked and backed up during rush hours and disabled freight trains. It also happens to be one of the most beautiful stretches of road in Milwaukie, with Minthorn hosting seasonal flocks of wood ducks, geese and other upland birds on the south side of the road while a mix of historic and new developments are situated on the north side. The pathway connects Milwaukie's Linwood neighborhood and unincorporated Clackamas County to the Milwaukie Marketplace, making it easier for kids and people without cars to easily navigate to our continually developing commercial centers. With the new 24-hour fitness, the upcoming Pietro's and the recently opened New Seasons, there is a lot of motivation for pedestrians and cyclists to travel this way: a mostly flat and not hilly stretch of road. It's long overdue to be upgraded: please help fund this important and highly used space: help make it safer.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	As an avid runner and a family who loves to bike/walk in good weather, this bike path would provide us a safe route to access the Milwaukie Marketplace shopping center without having to use a vehicle. It also gives us access to other parks and playgrounds for the kids to safely visit. As a runner it provides another route/path for me to safely travel on, opening up more route options.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This would be an excellent project for improved pedestrian and biking access to downtown Milwaukie.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This would make traveling by bike or walking to the improved market area more safe, and alleviate congestion on the roadway.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	It is so dangerous for walking and biking on this road. Fully support a path on this road!
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	People die on this road, it's completely unsafe with no walking paths and no bike lanes yet there is tons of room! They're are several deaths I can remember from the last ten years from unsafe conditions here despite it being one of the feeder streets to downtown Milwaukie gettin from the Linwood area
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This project would greatly increase connections between outer Milwaukie and even the CCC campus on Harmony, to downtown Milwaukie and to the the closer shopping and grocery center. This would put resources within walking and biking distance with improved safety.

Project Name	Applicant	Support Rating	Comment
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This project will improve safety and allow access to Grocery and other services without an automobile.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This would be amazing for our family. Our children would use it as would adults for a variety of different reasons. We are very much in favor and hope this moves forward!
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This path would improve the safety and the effectiveness of my ride to work and would allow me to have a more direct route without having to worry about cars hitting me on this narrow shoulder section
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This would make a long stretch of road that would be perfect for bike commuting usable for bikes and not just speeding cars.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	Very useful addition to non-motorized transport options from SE Portland/Milwaukee further SE. There is very little dedicated, protected non-motorized infrastructure in this area
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This is such a great place for a multiuse path!
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	There is no side walk or any space for pedestrians and bikers. Basically everyone just share the road which is very dangerous. Cars are driving 35 mile/hr on a single lane road while someone is walking on the side of the road and it is very narrow.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This is a main bicycle thoroughfare to get from other well-known and well-used bicycle paths (like 205 trail, Gladstone Trolley Trail, etc). Making this road safer and more accessible to pedestrians and cyclist, would definitely make it easier to traverse through the area without having to go uphill and into Linwood area of Milwaukie.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This would be a great addition to the area! People regularly walk along the road in this area and it is super dangerous. This path could also be a connection between those neighborhoods and downtown Milwaukie or the aquatic center. Please fund this project.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	The intersection on Harmony/LinWood/ Railroad/Lake Rd the street has a lot of lumps, humps, cracks and curves. Make it smoother and safer please.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	Needed
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	Go look at the intersection during rush hour. It's abysmal. 7/11 parking lot makes it worse as patrons try to get in and out.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This is a very unsafe road for pedestrians. I and my family do not walk, when we otherwise would, because of how concerning the road is.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This project is much needed and overdue. This stretcher road is very dangerous for pedestrians and bikers. Putting a bike and walk path here would help connect outer southeast Milwaukie with downtown. It would also help to connect to grocery stores, gyms, and other necessities. It would also make it easier for high school students to ride their bikes to Milwaukie high school.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This area is growing with housing and apartment developments, which results in more car traffic as well as more families who need safe sidewalks/bike paths. We currently have very limited safe pedestrian/bike infrastructure in this area of Milwaukie. This would be a huge safety improvement for the residents as well as the two elementary schools directly in this path. There are also minimal residential properties directly along Railroad and ample shoulder for path development. The road is relatively flat making it very attractive for cycling. It would connect this part of Milwaukie to downtown library, City Hall, Max and retail/dining which supports our community hub vision. It also would support Springwater Corridor use as Railroad would connect to Linwood to Springwater, ultimately expanding the pedestrian/cycling access to Metro as a whole.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	Many people use the narrow path along the edge of this road, including children waiting for school buses and others. It's very dangerous and has had vehicle accidents and at least one fatality. This road has become a through-way for Happy Valley residents to get across Milwaukie to 99E and badly needs the project to be done.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This road has become a through way for Happy Valley residents to get to 99E. It has become very dangerous for pedestrians and cyclists due to increased traffic.

Project Name	Applicant	Support Rating	Comment
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This is a great project to get more people, adults and kids, out biking and walking safely!! It will allow people to walk/bike to shop at the Milwaukie market place safely and to better access local schools
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This is a central corridor from central to eastern-located neighborhoods in Milwaukie. This is needed for walk-ability and connectivity in the city. Railroad is not safe to walk or bike on, and it should be.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	I often use Railroad when on a run in the neighborhood and have had many scary encounters with cars getting too close. A sidewalk would be much appreciated and ensure greater safety for all who the road when walking, biking or running.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This would greatly improve the safety of children in the area, as it is near Linwood Elementary and Rowe Middle School. People drive very fast on Railroad and without sidewalks it is extremely dangerous, but many of the more safe streets around Railroad don't connect, which forces pedestrians and cyclists onto Railroad. Sidewalks on Railroad would greatly improve our walking and cycling safety. Thank you!
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This would resolve a MASSIVE accessibility, walkability, and active transportation access problem that currently exists for local residents and families in this area. There are lives being risked daily on this road as a result of inadequate walking and cycling access.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	The intersection at Railroad/Linwood/Harmony needs work to reduce the size of hump north of the tracks, and I wish it was safer to ride my bike to the Milwaukie community center, though I love this project to add a bike lane to Railroad! Thank you!
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This would be excellent - driving more cyclist traffic toward downtown Milwaukie businesses and keeping them safe.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	A dedicated pathway for non-motorized travel would make use of this corridor safer for those who do not wish to drive all the time, and will allow greater access for more folks to the outdoors around them!
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This area is greatly lacking safe pedestrian access. Walkers in Milwaukie are very limited in having paths/sidewalks to use. This would be a great addition to have for walkers. We would be able to get more exercise and enjoy the city more.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	There are no sidewalks in this heavily used traffic corridor. The roads are particularly congested at rush hour. This project would improve this neglected area greatly. I think many people would bike or walk if there were dedicated pathways, This is a less affluent area than Happy Valley. I believe the hard working people in the area would feel that their voices count & were heard if this project is completed. There are many children in this area, as well. This would provide them safer travel when walking or biking. I hope serious consideration is given to this project. Thank you
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This path connects two areas of Milwuakie together, giving all those that live in those communities and surrounding communities a way to move between already established bike and walk paths without having to bike/walk with vehicles. This also connects Sprinwater Cooridor to downtown Milwaukie and, through that, Sellwood. Folks can exit the Springwater Coridoor path at Linwood, take Linwood to this new Railroad multi-use path, and then walk or bike into downtown Milwaukie via the recently built path on 37th. From there, they can cross McLoughlin at multiple intersections to then walk/bike north into Portland or South to the Trolley Trail and Oregon City. This path would also allow bikers and walkers to avoid the dangerous intersection at Harmony/Lake/Linwood/Railroad where multiple streets converge and the train tracks create an unsafe route. I am a regular biker and currently I have no choice but to bike with cars if I want to bike from the SE part of Milwaukie to the NE, this results in me often choosing to drive as I don't feel safe biking with cars for that long, especially when I have my 7 year old on my bike. I personally, would use this path very often and I highly recommend and support this project.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This is a very dangerous two-lane road with zero space for pedestrians. It would be in everyone's interest to build a multiuse path now while there is still space.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	Can we Upgrade the Traffic Signals to 12,12,12 Standard McCain with Reflective Borders & a Flashing Yellow Arrow sharing on Steady Yellow. The Intersections on Linwood, Railroad & Harmony is Ugly, Bad, Dangerous and Worst.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	We need to do Grade Separation Project on Harmony Road. It is a Dangerous Intersection & Busy Street. Build Bridges over Railroads is Very Important to Save Life's & Ease Congestion.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	Can we Permanently Eliminate All Railroad Crossings, 100% to be Grade Separated Bridges Only?

Project Name	Applicant	Support Rating	Comment
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This is a much needed improvement. Perhaps an elevated path with a guard rail and proper lighting for those that will undoubtedly use this at night as well. I think having the path elevated from street would add additional safety.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	It will connect 2 elementary schools and a college to downtown and is an intregal connector to Clackamas town center area and shopping along 82nd.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	Connects 2 elementary schools and a college from down town to retail area making it safer and more enjoyable
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	Separated pedestrian/bicycle use is badly needed along this route.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	Railroad Ave. has always been dangerous for pedestrians and bikers for years, but now it seems to be a major connector to get to what I think must be Happy Valley. I have lived on a side street for over 30 years that connects with Railroad and have seen the a huge increase in traffic. I support sidewalks, bike and transit on this road. Better yet, a bypass to connect to wherever people are going. A good time to view traffic congestion is 3:30 pm every weekday. What should be a 10 min commute to get to 122nd and Sunnyside Rd,. from Home Ave/Railroad is 30 minutes during this time frame.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	Railroad is currently very dangerous to walk or bike along. It would be a tremendous benefit to the community to have a safe multi use path along this main thoroughfare.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This road absolutely needs a bike lane. I bike on it often.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	This project will improve the safety of this street!
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	Can we widen Railroad Ave to 3 Lanes, One Lane in each direction with a Center Lane.
Railroad Avenue Multiuse Path: 37th Avenue to Linwood Avenue	Milwaukie	5	Can we Build a Bridge over Railroads on Harmony Road. Linwood @ Railroad Ave is Very Dangerous Intersection.
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	1	Stop taking money from the roads. Our cars are being ruined by the state of the roads while money is diverted to walking paths
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	1	This project is for a long pedistrian/bicycle bridge that by passes the downtown area of Oregon City. Is on the wrong side of Highway 99 E to provide benifit to the downtown area or to provide a reasonable connection for Oregon City Residents to connect to the proposed development of the Paper Mill site. There is no proposed river access therefore the only benefit is to provide a river view that is already provided with highway sidewalks along this area. The bridge would have limited access to the down town area (access proposed at each end of the bridge and at the existing arch bridge across the Willamette.), The current Sidewalk area is being used more for homeless camping and fishing access which leads one to suspect that the proposed long bridge would likewise be so used. The northern end of the proposed bridge would be located OVER the existing West Linn Sanitary Sewer conduit that connects West Linn to the Tri-cities sewer plant, This conduit has been in place for approximately 30 years. Due to the narrow width of land available under the conduit it is likely that replacement or providing additional capacity would require access from Highway 99e above the conduit. Thusly the proposed bridge would be an obstruction for any required future maintenance work on this conduit. To provide the through access that this project would provide a better solution should be found.
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	1	By routine observation as a nearby resident it is apparent this is a very lightly used bike/ped transportation corridor and with the adjacent obstacle of the 99E railroad tunnel there's no reason to expect significant change by adding the long span walkway making the initial construction cost and ongoing maintenance cost astronomical per user mile

Project Name	Applicant	Support Rating	Comment
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	2	Where do you get a cost of \$4m if you haven't even designed this yet? according to your statement. include widened sidewalks, curb extensions, improved crossings, and new green spaces. It would be nice to see the counties/cities do the work in design first, then ask for money. It seems when you put a \$4m price tag, you will strive to hit the expense. Vs trying to do the upgrade, change for less money.
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	2	Its already a busy traffic area for vehicles. With ample safe walking area on main.
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	2	Oregon City 99E Enhancements and Trails is an interesting concept but it has not addressed the issues of a loss of a riverside forest or serious impacts to that forest. Oregon City has no riverside forest on the Willamette and this is the only heavily vegetated area that has emerged over the last 100 years. The forest is inhabited by American Bald Eagles and Osprey nests and numerous (8) Great Horned Owl nests over its 2000 ft length area. Other elements of this project don't impact the environment but this project could impact the only riparian forest on the Willamette River. A biological opinion must be undertaken to identify the creatures in the forest, a trail impact survey in order to determine if the project destroys or severely alters this riparian forest. Corridor work to clear for trail and elevated structures will require the removal of many native trees and shrubs. All have grown up on a basalt ledge and are significant size making the forest functional. Replacing disturbed areas for the entire forest would be a major mistake because of the carbon sequestration that is now there, the shade factor of the salmonids and the ESA listed species of fishery that migrate along the edges which the forest provides shade for. US Fish and Wildlife, NOAA and others played a role in 2011 when an adjoining forest was threatened with total removal. They weighed in because that project "Riverview Terrace Deck and Park" had to maintain nesting, cover and other features that those federal agencies required. Adjustments were made in that project and some habitat values were recreated but not without long-term recovery time.
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	2	The overall project description of the Oregon City 99E improvements suggest an overall project cost under 5 million dollars. Everyone who participated in the planning indicated that the cost was not fully known but the first phase would be under 5 million. There should be some clarifications of the total project amount. There should be some clarity. What happened here?
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	3	Better flow and safer access.
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	3	Safer access for bikes/peds to be able to access businesses in Oregon City and further on to Canby
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	4	This would be a great addition to Oregon City because riding down Main Street is a bit dicey, especially on a traditional bike. Ebikes work well on Main St, but not everyone has an Ebike.
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	4	Make sure the bike/ped path has good connections down to the water, and across 99E.

Project Name	Applicant	Support Rating	Comment
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	4	Fix the roads as the city won't as it's a county road.
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	4	This is a VERY GOOD project as it has the potential to become a scenic river section of an interconnected trail system with the Promende trail, and especially also enhances the area relative to the extensive work being done where the old mills were for culturual, natural and recreational values associated with water and walking on land. The potential for seeing the Falls from along the river also provide a wonderful scenic experience! There's a lot that could be experienced and connected with such an enhancement of McLoughlin Blvd!
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	4	I work in Oregon City and this area needs updating.
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	4	I would love to see this project coordinated with the Tumwata Village redevelopment as a gateway and community connection to the siteand reflecting that history in a way that often still feels hidden in Oregon City.
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	5	This area is such a beautiful part of Oregon City yet feels really unsafe outside of a vehicle. I'm really excited about the potential for it to be improved. (I live in MultCo but have deep ties to ClackCo).
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	5	The idea of continuing the streetscaping makes sense. It would be nice to connect to Tunwata Village with separation from motor vehicles.
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	5	Yes! People on foot or on bikes should have safe access to this waterfront area.
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	5	This will drastically improve Oregon City. I have lived here for years and it needs this.
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	5	Love the idea of walking lanes, but please DO NOT limit or reduce the lanes of traffic to do so. Especially for bike lanes. I see bike lanes all over. Used and cars sitting in traffic beside them. Main street can't take more traffic either, so don't consider pushing any traffic that way. Most people in Clackamas County DRIVE, the walking is only for an occasional respite, social outing etcwhich is greatbut we need to be able to get to WORK EVERYDAY

Project Name	Applicant	Support Rating	Comment
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	5	This project is absolutely needed. Walking along 99e through that section currently is a frightening and not safe experience. Putting in a pedestrian bridge will not only make that corridor a safer and friendlier experience, it will also make Oregon City a river destination. Oregon City has such a beautiful section of the Willamette, especially with Willamette Falls. It is literally unlike anything else in the metro area. I believe this project will have a positive influence in the greater Portland area because of its uniqueness. We have all seen how popular Vancouver, WA's waterfront path is. To be able to have a desirable path along the Willamette with views of the falls, will draw visitors to the metro area. Also with the proposed location being so close to West Linn, residents of both Oregon City and West Linn will be able to easily use the path everyday. It is a win for everyone in the metro area and ultimately a boost to local economies with the visitors it will bring in.
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	5	Oregon City is right on the water. Though walking along McLoughlin is more like walking along a busy street than walking next to a river. Any improvements that would make it feel less like walking next to a busy street or make it feel more like walking next to a river are welcomed heartily!
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	5	Please update this dangerous interchange
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	5	In the past 5 years this area has been significantly run down by transient and drug traffic! It would be wonderful to see it refurbished. The foliage is extremely overgrown and that's where a lot of this activity takes place. Oregon City is becoming like many other larger Cities where we don't feel safe walking our streets. It's just a sad, sad shame.
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	5	Improved non-motorized access to the riverfront, along with the enhancements to the Willamette Falls area seems to make sense
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	5	We should invest as much as possible in Oregon City to support the shared history of Oregon - between Indigenous People, who should be getting land back whenever possible to the first Western settlers, there is much to learn in Oregon City and improvements will encourage local tourism.
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	5	A creative solution successfully addressing significant challenges at a critical location in need of both local and regional bicycle and pedestrian access. Also improving safety along a route with an effective solution solving the unsurmountable. The funding that the project is seeking seems high for this phase, however, there may be challenging administrative paths that will require the investment to ensure the project is refined, possible, and risk is significantly better understood and mitigated. The project appears to have the potential to economically improve the waterfront and city and could be a great draw for the community in addition to provide respectful and fitting integration for local tribes: I.e. Improved fishing access, tourism. All while clearly finding a low impact route on the existing ground without disturbing it or the historic arch. Creative solutions need additional consensus and this funding may help align the right experts to better comprehend and communicate the solution. Let's see Oregon City lead the state with innovative bike and ped solutions when constrained by deficient adjacent ODOT infrastructure constraining progress. Look to Trail BC for a comparable solution (Columbia Skywalk, \$15M total construction cost) that eliminated risk of construction work in the river and improved project outcomes and was successful for that City and its region that supported the investment. Very exciting project and great potential value for the region and hope it can move forward to better quantify it with the right experts capable of assessing it and checking the boxes for all stakeholders.

Project Name	Applicant	Support Rating	Comment
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	5	I would be so excited if this project moved forward. I just think the historical significance Oregon City and the falls are such a draw as a local resident in Portland but also for visitors outside the region, but when you get to the area it is nearly impossible to access the river and even see the falls. I think having this access would not only benefit local Oregon city residents looking for bicycle and running routes, but also bring more tourism to the region that is so rich with history, (early settlers and indigenous) but also incredible natural beauty. Industry and cars have cut the people off from this. I think it would be so amazing to bring it back to the public.
OR99E (McLoughlin Boulevard) 10th Street to tumwata village: Shared-Use Path and Streetscape Enhancements Project Development	Oregon City	5	This would be a great project and support downtown.
NE Halsey Street Complete Street: 192nd Avenue - 201st Avenue	Gresham	1	I ride this route occasionally and would welcome safety improvements.
NE Halsey Street Complete Street: 192nd Avenue - 201st Avenue	Gresham	1	Biking down high traffic streets like Halsey is a ridiculous waste of funds. Pedistrain safety is great. Encouraging bikes on this street, not so much. Do not create more unused bike lanes that reduce car traffic lanes, create car congestion, and otherwise create places for gravel, trash, vegetation, and other debris to accumulate. I am so tired of seeing so much money spent on bike lanes that are not used. Spend some time in these communities to see how people get around. Metro will spend more money maintaining bike paths than they will ever be used by bikers.
NE Halsey Street Complete Street: 192nd Avenue - 201st Avenue	Gresham	2	This is a massive amount of money for a small amount of impact. There is not good connectivity in this area so what is the point of all this work?
NE Halsey Street Complete Street: 192nd Avenue - 201st Avenue	Gresham	3	Why sidewalks so far out from town, when there are lots of places with no sidewalks closer in? I live at 60th & Halsey area, and some streets have sidewalks, and others do not. Can we fix the sidewalk situation closer to town first please?
NE Halsey Street Complete Street: 192nd Avenue - 201st Avenue	Gresham	4	YES - desperately needed!
NE Halsey Street Complete Street: 192nd Avenue - 201st Avenue	Gresham	5	This road desperately needs protection for bikes and pedestrians. Please fund this project.
NE Halsey Street Complete Street: 192nd Avenue - 201st Avenue	Gresham	5	This is a great project as this part of Halsey has needed improvements for quite a while. The proposed solution is a great fit for what is needed here.
NE Halsey Street Complete Street: 192nd Avenue - 201st Avenue	Gresham	5	This project would be really great, especially with how close it is to the schools. I've only ever driven on this part of the road, but it currently feels way too sketch to even consider trying to walk/bike.
NE Halsey Street Complete Street: 192nd Avenue - 201st Avenue	Gresham	5	hopefully you have plans to re-pave the entirety of Halsey including the SE portion. driving is dangerous on that side of town especially with a much older car
NW Division Street Complete Street: Gresham-Fairview Trail - Birdsdale Avenue	Gresham	2	I ride the Fairview-Gresham trail occasionally. The utility of this improvement is not clear to me.
NW Division Street Complete Street: Gresham-Fairview Trail - Birdsdale Avenue	Gresham	2	Fully in support of sidewalks, completely against adding bike lanes. Division is a heavily travelled road and cyclists should be discouraged from traveling down this highly congested area.
NW Division Street Complete Street: Gresham-Fairview Trail - Birdsdale Avenue	Gresham	4	People walk here all the time, but the sidewalk just stops, and it's uneven and muddy and some of the landscaping pushes walkers right next to the road.
NW Division Street Complete Street: Gresham-Fairview Trail - Birdsdale Avenue	Gresham	4	This seems like an easy win. Let's help pedestrians and cyclists make their way down NW Division Street off the Fairview Trail. Very cool.
NW Division Street Complete Street: Gresham-Fairview Trail - Birdsdale Avenue	Gresham	5	Great
NW Division Street Complete Street: Gresham-Fairview Trail - Birdsdale Avenue	Gresham	5	This is a great project that focuses on pedestrians. We need more projects like this one to repair the atrocious, dangerous conditions of sidewalks all over Portland.

Project Name	Applicant	Support Rating	Comment
NW Division Street Complete Street: Gresham-Fairview Trail - Birdsdale Avenue	Gresham	5	Makes life safer for those outside of a car, makes our planet healthier, makes our communities more economically resilient. Easy approval of a project
NE 223rd Ave: NE Glisan to NE Marine Dr Safety Corridor Planning	Multnomah County	3	Don't waste money on ITS. Produce either a parallel trail or a cycle track!
NE 223rd Ave: NE Glisan to NE Marine Dr Safety Corridor Planning	Multnomah County	3	This whole area is unfriendly to pedestrians and bikers. I'd love to be able to access businesses and parks and move around without thinking my kids or I will be hit by a car.
NE 223rd Ave: NE Glisan to NE Marine Dr Safety Corridor Planning	Multnomah County	3	I bicycled this route once, and found it to be horrible.It will still be undesirable due to the hill.
NE 223rd Ave: NE Glisan to NE Marine Dr Safety Corridor Planning	Multnomah County	5	This will help reduce any pedestrian and car encounters along this route.
NE 223rd Ave: NE Glisan to NE Marine Dr Safety Corridor Planning	Multnomah County	5	Important bike/ped connexion to Blue Lake Park and Marine Drive path. It's pretty bad right now.
NE 223rd Ave: NE Glisan to NE Marine Dr Safety Corridor Planning	Multnomah County	5	223rd desperately needs safety improvements with lack of side walks or adequate bike lanes in many areas. This road is primary access to both blue lake park and chinook landing boat launch as well as the marine drive bike path The railway crossing between sandy blvd and marine drive has been hit by truckers many times for both low and narrow clearance and does not provide any safe pedestrian or bicycle throughway to access the park, boat launch, or bike path for the many people in both fairview, woodvillage and other neighboring communities.
NE 223rd Ave: NE Glisan to NE Marine Dr Safety Corridor Planning	Multnomah County	5	Pedestrian/bike access is necessary in both N & S directions, especially under the railroad bridge near Townsend Way.
NE 223rd Ave: NE Glisan to NE Marine Dr Safety Corridor Planning	Multnomah County	5	It is really tight under the railway tracks, and there are no sidewalks
NE 223rd Ave: NE Glisan to NE Marine Dr Safety Corridor Planning	Multnomah County	5	Under the railroad bridge is very dangerous for bicyclists and pedestrians, and somehow this needs to be addressed. I'm very supportive of this project and making this road safer for everyone.
NE 223rd Ave: NE Glisan to NE Marine Dr Safety Corridor Planning	Multnomah County	5	what a pleasure it would be to cycle to that park.
NE 223rd Ave: NE Glisan to NE Marine Dr Safety Corridor Planning	Multnomah County	5	People are having to walk in the road! Please fund this project.
NE 223rd Ave: NE Glisan to NE Marine Dr Safety Corridor Planning	Multnomah County	1	I lead a group bike ride on this section monthly and it's the scariest part of our day. Wider bike lanes/shoulders, bike signage would help.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	1	We need trees and shrubs that were previously planned and less ugly heat absorbing concrete blocks. that take out one of the travel lanes. How do emergency vehicles get thru one lane all blocked with cars?
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	1	NE Glilsan St. is 30 mph. Do NOT put bicycle lanes on NE Glisan St. This portion of NE Glisan St. is used by freight semi- trucks to travel to I-205. It is a steep hill from NE 87th Ave. to NE 90th Ave. Yes, add traffic signals & pedestrian crossings.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	1	This is stupid. The hill on Glisan at 87th is too steep, people aren't going to bike on it.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	1	I ride this general area quite often, but avoid Glisan Street because of safety concerns. Making this a safe bicycling route across I-205 is definitely worthwhile. I would use it.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	1	This will increase traffic exponentially. I live near this intersection and your proposal is an absolute nightmare. Having four lanes at Glisan and 82nd is vital to keeping traffic moving!
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	1	The street is too narrow for bike lanes.

Project Name	Applicant	Support Rating	Comment
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	1	This area does not need reduced traffic lanes for what be underutilized bike lanes. Bikes should not be encouraged to travel through highly congested areas. The amount of funds that will be spent building and then maintaining bikes lanes will never equal the amount of bikes that travel in this area. This project will be a complete waste of money for bike lanes. I say that confidently in spite of all aspirations to build up this area. Please do not remove vehicle traffic lanes for hardly utilized bike lanes. Use this money for other purposes.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	1	Please allocate funds to fixing potholes.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	1	This is a waste of money and useless. No one uses the existing bike infrastructure on Halsey, so continuing to waste money on additionally pointless "investments" makes no sense. I live on 80th and Holladay and have watched traffic patterns deteriorate (worse driving on side streets due to higher congestion on main streets) with no discernable increase in biking. The city does not appear to measure or care that 'improvements' are used - every effort in the past to reach out to understand how they assess success has received nothing of use "yeah, we don't care no one uses the infrastructure, we have a long term plan and that's what matters!". Wasting taxpayer dollars on further useless projects to meet PBOT's TSP is feckless and inept.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	2	This area is already so jam paced with congestion, adding bikes into the mix would only cause more delays and conflicts. Consider giving bikes their own dedicaded crossing, and implementing a diverging diamond interchange or some other solution to reduce congestion. Adding a bike/ped solution connecting Hassalo, 92nd and the gateway transit center would be a much better solution than adding bike lanes to a car centric freeway interchange.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	2	This could provide much needed improvements to this area.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	2	My concern in this corridor is that parking is permitted in the outer lane during certain hours, but the hill creates a blind horizon so driving in that lane has the risk of seeing a parked vehicle (or bicyclist) after it is too late to stop safely. I don't know if the 1-5 ranking is 1 or 5 being highest.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	2	The hill on this stretch of Glisan is very steep and undesirable for bicycle riders and there are nearby alternatives that are more suitable. The best option is using the Stark and Washington couplet which has almost no gradient Even Burnside, though it does have a hill, it is less steep and preferable to the one on Glisan.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	2	Good project yet expensive and should be deprioritized in light of more pressing needs.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	3	The sidewalks are pretty spacious here, but lanes are tight.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	3	Yet again, the City of Portland is proposing a scattershot approach to bicycle network delivery, rather than a network-based approach. After this project is complete, it will still leave a gap on Glisan's bicycle lanes from roughly NE 47th to NE 79th, for no good reason. PBOT, go back to the drawing board, and come back with a project that will deliver a complete link in the network, not another half-measure that leaves bicyclists stranded in the middle of dangerous car-focused kill zones.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	4	This is a dangerous stretch of Glisan, with cars parked at odd hours blocking a lane of traffic. Taking Glisan down to two lanes from 82nd to 102 would help reduce speeding. Please also consider adding safe pedestrian crossings.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	4	This is an important line into the neighborhood and therefore a major artery that needs to be crossed multiple times a day for students and families. We have the community center and park on one side, and the elementary school on the other. With the increase in families and neighborhood ammenities, making this a safe corridor for crossing and cycling is a must.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	4	This whole section of road could use some serious reorganization walking around isn't that pleasant, crossing Glisan is hard, and the freeway interchange is sufficiently car-tangled that I've never once in 20 years felt like trying to walk over to the 99th Ave side.

Project Name	Applicant	Support Rating	Comment
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	4	This is great for the people that live and work in that area, but does little to show improvement for all Portlanders. I am not sure that this is more important than repairing sidewalks. The sidewalks all over downtown and NW and all over Multnomah County are in seriously bad shape. Sidewalks are broken and missing chunks everywhere in Portland. I am disabled and I have to get into the street at some places; like near the 82nd St MAX station going away from downtown on the right side of street, I risk my life getting into the street with traffic so that I can get to my destination (Portland Animal Welfare). In none of these applications does anyone request funds to repair the sidewalks which are 100% impassable in many places in Portland including Downtown, NW, N, and I am sure everywhere in Portland. People using wheelchairs, scooters, walkers, and other devices find it impossible to navigate the sidewalks. Thank goodness for bike lanes!
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	4	A pedestrian crossing on 84th avenue is too close to 82nd. Drivers swing around at that light fast and rev up for a hill after waiting and they won't have enough time to stop safely for pedestrians. 86th or further East would allow cars more time and allow pedestrians to cross safely. I have lived in the area for 15 years and have observed and driven these patterns.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This is a busy street in an area that could really use safer crossings (and more of them). The 82nd project has been through very extensive community engagement with formal groups and engaged community organizations and I think a lot of folks have been able to weigh in so these are well considered changes.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	I travel through this area multiple times per month, and it's one of the most dangerous areas in Portland for pedestrians and bicycles. This project is urgently important, and I urge you to fund it. Thanks.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	Strongly support! We need more safe bike crossings of I205.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	Speeding in this area is extreme, and additional measures may be necessary to reduce fatalities, such as an additional traffic signal or speed bumps.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	1. The downhill, westbound corridor between 92nd and 82nd is extremely dangerous for pedestrians and motorists alike. Motorists come barreling down the hill at high speed, with no impediments, traffic calming, or safety enforcement to deter them. It's a dangerous situation for the schools and Portland Parks facilities along this stretch, as well as for all users of the road, including motorists. I fully support drastic safety improvements here. 2. I regularly commute by bicycle along the I-205 multiuse path. I always dread the Glisan crossing. This Glisan/I-205 interchange is very broad and very busy, and crossing Glisan here requires passing through TWO right turn ways, where motorists may be inclined to turn right on red without stopping unless they are actively looking for cyclists and pedestrians. This situation is even worse in the dark. I don't understand why the bike path was not tunneled under Glisan when the Max line was built. I strongly support safety improvements at this junction.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This project would greatly increase the safety of this important corridor for active transport, while still allowing adequate service for auto users. It is an opportunity to invest in a high-crash corridor in historically underserved east Portland.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	I bicycle in this area to and from home
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	I fully support the addition of bike lanes and goal of reducing speeding cars along Glisan. However, I would like to highlight that bike lanes without hardened infrastructure separating them from cars is not enough. With the history of cars speeding in this area, adding a couple of feet of air between speeding cars and bikes is not safe infrastructure. It is not enough. Roundabouts, chicanes, raised medians, etc should be considered as part of this improvement. As a bike commuter living on the east side of portland, bike infrastructure east of 82nd is consistently an afterthought. Unprotected bike lanes along a busy road are not adequate infrastructure. This poor design only leads to tension between cyclists and cars. Cars see bike lanes as unused space, and someone choosing to bike has to make the decision if they are willing to risk their safety to do so. One alternative could be 2 way bike lanes on one side of the street with 10' of green space separating them from the traffic.

Project Name	Applicant	Support Rating	Comment
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	I live in NE Portland. This project is SO needed. NE Glisan is a dangerous street for pedestrians, drivers, and bike riders. It was part of my regular commute for years - the absolutely worst part. I still use this stretch of Glisan for errands. A road diet benefits drivers by slowing down traffic and making it safer for all of us. I look forward to seeing this project completed.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	Glisan in this part of town is a highway. Drivers drive recklessly and dangerously through the area trying to make green lights and get onto 205 seconds sooner than they would have if they drove slowly. This street severs communities to the north (who are boxed in on 4 sides by dangerous car-centric streets and highways) from those on the south. And it serves as a barrier between Multnomah University and Montavilla Park, both great community amenities, and the neighborhoods to the south. There is no need for this street to be this wide. I fully support a road diet on this section of Glisan to support safe driving and safe transporation in Portland.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	The crossing at NE 84th and Glisan will greatly enhance connectivity between my neighborhood to the south, and the park. My family crosses there several times a week, and it feels dangerous. To mitigate other dangerous behavior I would suggest prohibiting left turns onto Glisan from NB 83rd.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	NE Glisan is a critical connection between the Hazelwood and Montavilla neighborhoods that I-205 divides, yet it has no bicycle facilities whatsoever. As a city street built like a state highway, it feels dangerous to use and to cross, often restricting my and my family's movement through our community from our home in Madison South. As a cyclist, the alternative east/west routes over I-205 are inadequate. NE Halsey's configuration at and between the intersections of 92nd and 100th Aves is uncomfortable, stressful, and dangerous, and E Burnside is simply too far out of the way when trying to get to the area of northern Hazelwood and Maywood Park, such as a shopping trip to Fred Meyer or Winco or an appointment at Vibra Specialty Hospital. In the absence of a reconfiguration of the NE Halsey overpass, which I understand has been indefinitely delayed by PBOT due to budget issues, a reconfiguration of Glisan is severely needed in order to provide safe and convenient eastwest access for pedestrians, cyclists, and other active commuters. Additionally, the north-south connections across Glisan east of 82nd Ave are inadequate and dangerous. The five travel lanes and lack of clear crosswalk marking introduces significant risk of collision for people crossing from Montavilla Park, which I do when I am on a shopping trip to the US Foods at 82nd & Stark. Chef'Store Finally, as a motorist I find the current configuration of Glisan to be unsafe. The intermittently allowed parking in front of Multnomah often necessitates otherwise unnecessary lane changes, increasing potential points of conflict and risk of collision, and the five-lane configuration encourages frequent and significant speeding. Eliminating the parking and reducing the right-of-way to three general travel lanes will significantly increase the safety of the corridor.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This is an excellent project that I strongly support for funding. There are too many travel lanes for the amount of traffic, leading to so much speeding issues and safety issues. There are no good bicycle connections in this area crossing I-205, and the pedestrian environment is very difficult. Please fund this project!
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	As someone who has lived near Glisan for 20 years, I can't say how many times I've witnessed speeding, reckless driving, and crashes on this stretch of road, causing damage to both people and property. The two lanes of traffic in either direction are an open invitation for drivers to race each other down the stroad in either direction. Noise pollution from revving engines is a problem. It's also frightening to bike on this street, fearing these racers will hit me. So many trees and front yards have been taken out from crashes; so many parked cars have been demolished, both those in driveways and those which are allowed to park on the street in off peak times. These four lanes of traffic are almost never all utilized. A diet is desperately needed. I feel that the outer lanes of Glisan between 82nd and 84th should be rose lanes for buses and vehicles turning right. Then from 84th east it should be then one lane of traffic in either direction, with a turn lane, and then the outer lanes being dedicated to bikes (and parking if there is room). A crosswalk at 84th makes sense as well, as there are often people crossing the street there to get to and from the park. Please make this happen!

Project Name	Applicant	Support Rating	Comment
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	Drivers exiting the freeway do not have a stop light or sign between 205 and 82nd, a distance of approximately three quarters of a mile. A stoplight at 90th would provide both a safe crossing and cut down on speeders coming off the highway going 45 mph as they reach the downhill slope. There is also a school at this intersection and a large planned Volunteer for America complex.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	82nd at Gilsen is a Dangerous Intersection, Can we add a Additional 2nd Left Turn Lanes and a Right Turn Lane. Traffic Signals to be replaced to New McCain Standard Heads with Yellow Reflective Borders.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This area has enormous potential to thrive and grow if Metro can ensure safety for pedestrians and cyclists.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	would fill a critical gap!
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	There are too many avoidable accidents around here. They won't stop on their own. As this area grows there needs to be infrastructure to go with it in order to keep pedestrians safe.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	I have clients and co-workers with visual impairments that live/work along this stretch of Glisan. Prioritzing this portion of Glisan would impactful to their ability to safely and idependently travel along this stretch of Glisan.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	Crossing 82nd is the bane of my existance. This would make errands more manageable, and I'd probably spend more time at the montavilla community center because of it.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	Crossing 82nd and 205 is currently pretty awful. This would make a huge difference in my day-to-day needs of getting around Portland. Currently, this vital commercial area is hostile or inaccessible to those outside of cars.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	I hope this project includes the off and on ramps at Glisan and 205. I've had several near misses with pedestrians, as well as vehicles making last minute lane changes due to confusing signage, i.e. which lane goes to 84, 205, turn left on Glisan or right in Glisan. Please fix this!
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	There are relatively few connexions to the I-205 path (and crossing the freeway) that it makes complete sense to improve this one.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This is a good project because highways act as city tourniquets and we need to make it as easy as possible to navigate over and around them. Additionally, this provides attention to the neglected east side and 82nd ave areas.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	this is such a well traveled and conjested area. I highly support this project.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This is a critical project for enhancing safety for all road users along a dangerous corridor.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This project would directly effect a large number of people, including thousands of schoolchildren attending schools like Roadway and McDaniel and the community center. Quite a few take the bus or drive themselves, and they are often out in traffic around 82nd. Anything that makes them safer is high priority.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	The safety of this street really needs to be prioritized, and if it's chosen for funding, I hope Metro will redirect the current parking spaces on Glisan as they are currently a hazard (the north side spots that allow parking any time except for specified traffic hours).
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This area of town is in solid need of new development. This investment aligns with the building a better 82nd project, and will continue to help east Portland become a more vibrant part of the city.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This is a sorely needed project. Whenever I drive through here, others are driving way too fast and it's difficult to keep an eye out for any other types of road users. We definitely don't need so many car lanes.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This project would be a HUGE benefit to the neighbourhoods on both sides of 205. The current biking/walking connections are very lacking
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This project supports the Better 82nd project, Vision Zero, greenhouse gass emission reduction, improved transit, and facilitating biking. All great things.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	I lived on NE Hassalo & 84th for 7 years, and tis was one of the most dangerous intersections for bikes or pedestrians on the eastside. I would love to see these improvements in place.

Project Name	Applicant	Support Rating	Comment
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This would improve the safety and usability for cyclists traveling both locally and commuting longer distances.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	I'm 100% in support of this project. This is currently a dangerous stretch of road for drivers, cyclists, and pedestrians, and therefore needs traffic calming measures employed. Converting the outer lanes of this section of road to bike lanes would make vehicle travel more consistent with the rest of E Glisan, open up access to cyclists, and should calm traffic some to help reduce speeding. Furthermore, this western portion of this stretch divides hundreds of homes from a large park and a university. Additionally, traveling west through the 82nd & Glisan intersection is confusing and inefficient. The right lane quickly ends at 81st, causing a traffic pinch and results in driver confusion/frustration (I live at 81st and Glisan and see this all the time). A dedicated right-turn (and transit?) lane should be installed both westbound and eastbound to make traffic flow more intuitively through the intersection, improving driver safety. Thank you for considering this project!
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	People driving can super fast on this stretch and often it results in really crazy crashes. Anything to slow down traffic in this area would be awesome.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	I live near Glisan on 94th and see accidents all the time. This is an ultra-busy corridor because it is the only access from the interstates (both 205 and I-84 - due to the lack of 84 offramps before 42nd) to this whole section of NE Portland. These improvements will keep pedestrians, bikers and drivers all much safer. Long overdue!
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	The intersection at NE Glisan and 87th should be upgraded to a traffic signal. Alternately, another intersection on NE Glisan between 82nd Ave. and 205 could be upgraded to a traffic signal. Drivers who know this section is uncontrolled by signals drive much faster in this segment. Street narrowing alone may not reduce this behavior. I live in the neighborhood, and have seen the result of high speed crashes by motorcycles and single autos, as well as the danger faced by pedestrians.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	Crossing GLisan East of 82nd as a pedestrian (especially at night) is very dangerous, traffic cannot see well and there are not many lgihted/flashing crossing options to get to bus stops.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This is a key path to help folks access Montavilla CC, Gateway Green, and connect East Portland and Portland (over the unofficial boundaries of 82nd/205), and dramatically improve safety.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This will dramatically improve safety for children and families living west of 82nd Avenue and/or south of Glisan attempting to access Montavilla Park.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This project is needed to support pedestrian and bicyclist safety on SE 82nd.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	Great idea that will save lives and also spruce up Montavilla's 'main street.' Happy to see this on the list
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	I live near Glisan and 47th. This addition to the Glisan bike lanes would allow me to make safe, convenient bike trips east of the 205 or onto the 205 bike path.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	Separated bike lanes on Glisan will provide a great alternative for crossing 205 on a bike. I currently use the unprotected lanes on east Burnside for the crossing, and it's not a very comfortable experience, especially when the lanes disappear for half a block at Burnside & 82nd. Crossing 82nd on a bike feels dangerous to me on most cross streets, and I'd look forward to a crossing on a street designed with bikes in mind.

Project Name	Applicant	Support Rating	Comment
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This portion of Glisan is in dire need of traffic control. I live at Glisan and 85th and my neighbors and I have a shared photo album documenting all the accidents that occur along this corridor. In the last 6 months alone there have been at lease multiple incidents where motorists either drunk, excessively speeding or aggressively driving or any combination have crashed through fences, telephone poles, bus stops, pushed cars the length of a block and a half, hit bicyclists, pedestrians, and other cars. People exiting the freeway are still driving freeway speeds. There is a day care in the neighborhood that has had numerous cars drive into the yard. It is not a matter of if a child's life could be taken from these reckless drivers, but when. Additionally there is a University campus along this stretch that creates a lot of pedestrian traffic as students park in the neighborhood and attempt to cross 5 lanes of traffic to get to school. Please please fund this projects before more lives are lost along this portion of Glisan.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	I'm glad to see Glisan slowly become a proper neighborhood street. This area (most east of 47th) turns into a bit of a drag race with intermitted street parking. I would like to see grade separated cycle lanes within this project
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	I have lived on Glisan at 85th since 2009 and can't count how many accidents we've witnessed. It's essentially a highway in a residential neighborhood with a college, early learning school and park. This project is long overdue to address the safety of not only the lives of my family but those of my neighbors and the community at large. Thank you.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This corridor is so overbuilt at the moment. You have so much right of way to work with. These improvements sound lovely. You've got one big chance to do this. Make it beautiful <3
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This would help my commute and needs improvement!
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This should be done. It is needed for basic safety
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	Enhanced crossings much needed in this area. I'm interested in a safer travel experience on Glisan for all modes.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This street is so wide and there's not enough crossings. Please fund!
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	Please help improve that are for entering 205 on-ramps in both directions. It takes what feels like an unnecessarily long time just to enter the are on Glisan. So many stops and pauses in lights. What's purposed sounds like it will help that.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	I drive through this area everyday and the improvements would make it so much safer and efficient. Safer for bikers and pedestrians in a heavily trafficked route to 205, 84 and driving towards 82nd. This neighborhood could use some TLC as it is a lower income area in general.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This is a high traffic intersection near schools and major public transit lanes. If our intent is to encourage use of public transit we need to improve safety. 82 Ave has the highest pedestrian deaths in the city and improvements to this section will hopefully improve pedestrian safety as well as encourage the use of public transportation and bikes.

Project Name	Applicant	Support Rating	Comment
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	Glisan and 90th is very dangerous for children to cross. Commuters in cars are using Glisan to speed very fast up the hill on Glisan to get from SE Portland to Washington State, etc. on I-205. Cars are always going over the speed limit up the hill. There is very poor visibility because of the hill. There's also a big problem at Glisan & 90th because 90th is not aligned on both sides of Glisan. 90th needs to be aligned to be the same on both sides of Glisan. There needs to be a red light at the intersection of Glisan and 90th. I feel very sorry when I see a child trying to cross 5 lanes of traffic (including 90th not being aligned on both sides of Glisan and not knowing if cars are going to turn onto Glisan or go straight across Glisan. I support the whole length of the Glisan project because this is a very dangerous street for bicycles. Thank you!
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	Crossing 82nd and 205 is dangerous for all users, but pedestrians and cyclists are at the greatest risk. This will give some security to the most vulnerable road users.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	Thus street is crazy to drive on for no reason Too congested and busy fast traffic. Better changes for signal intersections and lane consolidation would be nice.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	Slowing and calming traffic on this section of Glisan is incredibly important for making the neighborhood safer for pedestrians, cyclists, and drivers. There have been serious car crashes at both Glisan & 82nd, and Glisan and 205, when speeding vehicles get to the end of this stretch. There is no reason, or need, for there to be a 4-lane highway through this area that passes homes, a University, businesses, and a park and community center. Taming this stretch of Glisan will make it much easier to travel through this area and access the park and neighborhood via foot or bicycle. I bike, walk, and drive in this area, but I never bike or walk along this stretch of Glisan, as it is far too dangerous with narrow sidewalks right next to drivers swerving and passing to go 50+mph through here. Please provide on-street parking and bike lanes that will help buffer the sidewalks, and narrow the road so traffic slows and safety increases. It is amazing that no one was hurt when the speeding west-bound pickup truck crashed through the park fence and into the playground! Slowing traffic in this stretch will also help calm traffic that is headed westbound on Glisan past 82nd.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	Addressing this high crash zone will rejuvenate the livelihood of the surrounding community and the connectivity to the area east of 205. The sooner it happens the better it is for all members of the neighborhood, residential, business or educational.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This area needs better connectivity from 82nd to downtown and improved safety.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	We live in the Montavilla neighborhood, west of 82nd and south of Glisan. Montavilla Park is the closest park to us, and we have a very young child. We want to safely walk to Montavilla Park, but needing to cross both Glisan and 82nd is challenging - particularly crossing 82nd at the 82nd and Glisan intersection. This project would help us and many other families safely access Montavilla Park and the Montavilla Community Center in a neighborhood that is lacking places to play for young children.

Project Name	Applicant	Support Rating	Comment
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This stretch of roadway has a toddler daycare, a University campus, a Community Center (with pool), and private homes such as ours. The speed at which the majority of cars race down this stretch of road is outlandish during all hours of the day and night. This is not an exaggeration- My family is afraid to walk down this road due to the speed cars travel and the number of times this has brought cars over the curb into telephone poles, cars and trees. As mentioned, we live on this stretch and have witnessed a significant number of tragic accidents here that are all directly related to unsafe driving. We had a car wrap around the telephone pole next to our driveway destroying our own car (not once but THREE times!). A tragedy involving children at the day care next door to our home will occur if safety is not prioritized soon. This is not a highway, yet the four lanes and straight road cause motorists to go as fast as they possibly can, often jockeying between the lanes to beat other motorists for position. There is NEVER traffic stopped heading east until the traffic lights near the highway. Having two lanes is not necessary for car movement except to allow for unsafe speed conditions. This stretch of road also connects communities and Portland is being represented as a city that does not care about its citizens when a blatant safety concern is ignored here. Families come to bring their children to University and witness this safety issue and don't choose to stay because of things like speeding cars and not being able to walk down the road. This generally promotes strongly negative behaviors for motorists which impacts all of Portland. This is not about making this stretch of road "pretty"- it is about helping people like my family live safely that want to move around our community just to get to work and school and the community center.
NE Glisan St: 82nd Avenue Multimodal Safety and Access	Portland Bureau of Transportation	5	This is a really important project to improve safety and multimodal mobility in a dangerous stretch of roadway. Please fund!
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	1	Seems like this would save lives in a scary area for pedestrians
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	1	Riding my bike often in this area and yes it's time to do something here !
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	3	PBOT is planning to put lipstick on a pig. This is all wasted money; what MLK needs is a full road diet, cycle tracks, elimination of traffic signals in favor of roundabouts, square-abouts, and plazas, and in general an acknowledgement that the current design was delivered with racist intent, and that a future design must roll back the efforts to divide the black community in order to promote white suburban automobile commutes. Go back to the drawing board, PBOT, and come back with a project that acknowledges the damage and seeks to build community rather than putting band-aids on traffic sewers.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	4	Visibility on MLK for pedestrians isn't great. The more trees the merrier so please add more, but maybe put them in advantageous places (and please maintain them after being planted!)
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	4	This is a very pedestrian frequented section of road, and I love using it even in cars. The proposed changes would drastically improve relations between all travelers.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	4	I live not far from here and this seems like a good opportunity to right some historical wrongs but giving people safer options to disembark onto MLK. Also, I ride the 6 semi regularly, using it to get up to my mom's house. Improving these stops along the way would help everyone.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	4	MLK is too much of a barrier that separates physically and perceived NE Portland. Signal are far apart and traffic is heavy and fast. Traffic needs to be slowed down and pedestrian crossing more frequent with safety related improvements.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	4	Would be good to have signalized crossings for better traffic control.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	Please fund this project! I live very near MLK, and use it many times per week. People crossing MLK literally take their lives into their handsit is highly dangerous, narrow, with speeding traffic. Enhancing crossings and providing additional lighting will make a huge difference in the safety of this major road in NE Portland. Thank you.

Project Name	Applicant	Support Rating	Comment
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	I currently live nearby and there are not enough places to cross MLK, especially need more places to cross between Russell and Hancock. Of course, people cross the street anyways and it is not very safe. The bike crossing at Tillamook and the pedestrian crossing at Knott often make people walking or biking wait multiple cycles after pressing the button or triggering the sensors. I would take the 6 bus more frequently if it were A) reliable and B) safer to cross the street to get to the bus stop to catch the southbound bus in front of Ox without going up to Russel (several blocks out of the way). I often just cross directly over.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	Hwy 99 is a highly important North-South transit route, but feels incredibly hostile to pedestrians and transit users. Improvements would make it feel safer.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	Much needed!
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	I have lived off of MLK for 5 years. Crossing this busy street is challenging at any time of day. While there are signalized crossings, they are often few and far in-between. Crossing on foot or by bike is challenging at the unsignalized crossings because there are 4 lanes of fast moving drivers who need to see me and stop in time. I have had many close calls with a driver in the outermost lane failing to yield and almost making me another statistic. I don't want to be a statistic. Further this street serves more as a barrier in these neighborhoods than a main street. It is loud, polluting, and busy. It fails to have any significant businesses that maintain a walkable appeal. But the few that do exist (Vanport plaza to name one) require crossing. And, as someone who frequently rides Trimet line 6, many bus stops do not have safe crossings joining them. These crossings are specifically lacking south of Fremont and north of Alberta.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	I support this project because there are limited places to cross NE MLK on a bike or on foot due to its width and the speed of vehicles on it. The project would allow me and other people I know who live car-free or car-light to access healthcare and other opportunities more safely.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	We need to add more Crosswalks with a Traffic Signal or a HAWK. Also to add more Median Trees and Streetlights. Traffic Signal Upgrades to New McCain Heads with Yellow Reflective Borders. Eliminate Walk Signals to Manually, so that way Vehicles can have a Flashing Yellow Arrow when its Clear.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	This project is desperately needed to improve safety on MLK. With poor pedestrian crossings, high vehicle speeds, poor bus stops, and lack of bike infrastructure, I rarely feel safe as a pedestrian.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	School boundaries cross MLK, and in order for children to safely get to school and gain the independence of walking alone as they get older, this is a key project. Businesses are disadvantaged by unsafe crossings, or lack of them, and improvements will bolster economic activity here! Please help keep the central city and historic area walkable and vibrant!
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	Crossing MLK is terribly unsafe at this point in time. We are a family on the west side of MLK that crosses at the Bryant St crosswalk to get to Woodlawn Elementary 4 times a day, and the number of close-calls we've had are uncountable. We want to continue our walkable route safely, and encourage more folks on the west side of mlk to travel by bike or foot. The area from Dekum north to Lombard is particularly treacherous, as folks start to speed up as they head down the hill towards Lombard. The sidewalks are very close to the speeding traffic, as there's no really shoulder on the road so even crossing at the light on Dekum is nerve racking. We truly need more visible crosswalks, and a light at the Bryant crossing would be so valuable, as it's a green route as it is.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	I think this corridor is incredibly important to facilitate crossings. The speed, visibility, and number of neighborhoods that boarder this makes it a priority project for safety improvement. MLK is a major corridor for the area and can be very dangerous to cross.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	Key for safety and continued growth along that corridor

Project Name	Applicant	Support Rating	Comment
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	The estimates of these projects is mindblowing. How does putting in three crosswalks/signals cost 5 million dollars?
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	Improved pedestrian safety is desperately needed on MLK. Crosswalks with pedestrian refuge islands would help, since the street is so wide. Also, need more frequent crossings for peds and bikes.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	I live in this area, take public transport and bike and walk with my kids. I definitely want to see more safe space for us! This is currently a busy and car-centric road, but I am one of many who live and work here and don't drive. Also all the teenagers and kids going to the shops and cafes need safe crossings.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	I live on a block right off MLK Jr. and often drive, bike, and walk down this corridor. With the proposed improvements, I would be much more inclined to walk and bike over choosing my car to go get food at the food carts, pick up my medication at the Walgreens, and even walk over to go volunteer at the Oregon Humane Society. There are a handful of shuttered businesses along the northern tip of this corridor, close to Lombard, and this project would contribute to much needed economic opportunities for small business owners. I am highly in favor of this project! Thank you so much.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	Easier & safer for users of public transit. Very high density area.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	We badly need a sufficient crossing at NE MLK and NE Bryant for both pedestrians and bike traffic. Bryant is the greenway through this neighborhood and the crossing is MLK crossing absurdly dangerous. NE Bryant between MLK and Vancouver is also in desperate need of paving, it's among the worst bike routes in the city and someone is going to get their tire stuck in a crack eventually and get seriously hurt. I understand that the crossing at NE MLK and Buffalo is receiving some improvements for school crossings, but that should not prevent or lessen the priority of improving the intersection at Bryant, which draws even more traffic and is used by more than just the school-going population.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	This project is an important step in improving safety on this boulevard, which is a major transit connection site. It also further supports the county in the city of Portland's goals to achieve vision zero as well as implement the PDX pedestrian plan which are commitments already made by local leadership.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	MLK divides the neighborhood even more than I5. Atleast the cars on I-5 arent speeding by businesses and the many people waiting for the bus and walking along MLK. The numerous BIPOC-owned businesses and their patrons deserve a corridor where they can feel safe and prioritized by the city/metro. I recommend that this project look into expanding sidewalks as much as possible on minor streets for bulb-outs. I also hope to see the feasability of providing BRT along this corridor and what it would take to upgrade sections for BRT.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	I know this project came out of partnership with the Soul District and it has been long wanted by the Black community. Please fund this so it's easier to walk across MLK and access local businesses.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	MLK Blvd is a dangerous, high-speed street cutting through residential neighborhoods on both sides. Crossing the street is extremely difficult and frankly scary, as is making left turns at intersections when in a car or bicycle. The Albina community has been waiting many decades for these improvements. Please fund these critical safety improvements on MLK Blvd.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	MLK is a good street to keep cars on, but with really dangerous crossings. Refuge areas at some crossings, especially Bryant, are needed - Bryant is a Greenway with an unprotected crossing
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	This critical route through tyhe East side needs modernization and safety upgrades.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	This is the 2nd most important project on this list, after W Burnside.

Project Name	Applicant	Support Rating	Comment
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	this would help a historically underserved community get better access to it's central, nearby locations, while improving safe access across a major roadway and high crash thoroughfare.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	yes please do
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	pro, pro-safety, pro-transit, pro-this community, thank you for investing in this community!
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	YES! this would be a wonderful improvement on the current area, which is difficult to cross and transit is hard to access. improving these would improve dramatically access to commerce on BOTH sides of this major roadway., PLEASE invest in this project!
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	My family and I have to cross MLK Daily. I have to cross MLK several times a day on bike. It is really stressful to cross at NE Bryant. I hope there are plans to make this intersection safer for people walking and biking. Many families live in the apartments on both sides of MLK and have to access the bus stops there.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	In 2013 I was a pedestrian crossing the street at NE MLK and Dekum, at a green pedestrian light with the little walking man signal going to indicate it was my turn to go. However, it was the type of light that does not have a protected left turn for drivers. Instead, drivers are supposed to check for pedestrians and then should turn if it is safe. A driver did not check for pedestrians before turning, and ran her car right into me at high speed. It was a terrifying, traumatic, and painful experience, and I spent years physically and mentally recovering. I had PTSD and panic attacks for at least a year, in addition to neck, shoulder, and back injuries which have never fully healed. Improved crossings, signal modifications, and intersection lighting along this high-traffic corridor will make this neighborhood safer for pedestrians, bicyclists, drivers, etc. I would not want what happened to me to happen to any other person. While the driver was at fault for not checking before she turned, that type of intersection signal is also inadequate. If the pedestrian light is green while the driver light is red, and then the pedestrian light is red while the driver left-turn signal is green, then that prevents this type of accident from happening. More signage or other kinds of traffic calming devices to alert drivers to slow down and watch for pedestrians would be helpful too. Eg. Flashing lights to indicate that a pedestrian is crossing NE MLK.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	Great way to connect neighborhoods on both sides of MLK and bring foot traffic to businesses. At the moment the design of MLK discourages crossing and pedestrian traffic. Should also add blocks on NE 7th to ensure cars aren't using 7th to bypass new traffic signals on MLK. Cars already speed up 7th Ave when traffic is congested on MLK.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	We desperately need pedestrian lights on the crosswalk on NE Bryant and MLK. It is the zone for Woodlawn Elementary school and there are kids who live on the other side of MLK from the school who walk to school and cannot cross MLK safely without lights at the crosswalks. NE Bryant is also a greenway. It makes it incredibly difficult to bike across MLK on that greenway without lights. Cars do not stop and MLK has four lanes to cross.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	Often when I cross MLK on bike it feels like a more stressful crossing and I hope this enhances safety / comfort.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	This will be such a valuable project for so many residents and businesses to help bridge N and NE neighborhoods.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	Crossing MLK outside of a car is a poor experience in most places. I've commuted across MLK by bike for more than 10 years, and the recent PBOT project that added a signal at MLK & NE Going St has finally made the crossing feel safer. Creating more safe crossings like that in more places will help connect the neighborhoods on both sides of MLK for more people. The safety benefits should be large since MLK is usually busy with pedestrian traffic.

Project Name	Applicant	Support Rating	Comment
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	I cross this area frequently and it feels like cars routinely drive 10-20mph over the limit. I also routinely see cars blowing red lights throughout the day. While I'm thrilled and support the upgrading crossing, I worry about the erratic driving behavior and its impact in people existing in the area. Furthermore, I would like to stress design consistency in the project area. The newer cycle crossing at NE Going is excellent but is different than most crossings around the area. Specifically, it is not immediately clear if I should wait for the light while cycling. The offset button makes me think that I shouldn't use it since it would cause me to be closer to the curb, and give the impression to other vehicles that I am yielding space.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	Cars on MLK do move at higher speeds and many Greenways cross it so anything to increase cyclist/pedestrian safety is much needed
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	I support all of the proposed changes. Also, with I-5 immediately nearby, the line 6 could easily be upgraded to BRT with BAT lanes. One private vehicle lane in each direction is adequate, especially on what could be such a beautiful main street
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	Traffic gets really backed up on MLK, people drive too fast, and people waiting for the crosswalks can be hard to see as a driver. There are also large holes where man covers are that can cause damage to vehicles, or wrecks when trying to avoid them. I take this route to work and traffic congestion can be unpredictable.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	MLK is sandwiched between multiple walkable and bikeable areas of commerce and activity. Having safer pathways between these area would make the neighborhood even more accessible. The safety of some of the current crossing is terrible and in need of an upgrade. This is already an area where people that walk and bike frequently. The improvements proposed to this area would greatly benefit the community! Safer crossings and more walkable and bikeable crossings in this area would be happily used by the community and visitors between communities.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	MLK is a dangerous mix of cars and people - anything that can be done to safeguard pedestrians should be a priority for funding.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	It would be nice for buses on MLK to have some form of signal priority so that they can operate with fewer delays.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	cars travel much too fast on MLK
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	The speed of traffic along NE Dr. MLK Jr Blvd is unsafe and these improvements would make a significant difference to the community!
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	MLK Jr Blvd has the highest concentration of affordable housing almost anywhere in the US. We have move thousands of low-income families onto a busy "freeway" type of street and it is challenging for businesses, their customers and residents to navigate the "frogger" experience of crossing the streets. feeling safe on sidewalks and being connected to their neighbors
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	NE MLK can be very difficult to cross as a biker or pedestrian. Any improvements would be welcome.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	I live near MLK. I would like to make it safer to cross and walk along!
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	Support public realm improvements that are safety and user-experience focused that encourage shared transit.
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	This important project builds on other work in the corridor to improve safety and access to transit in this key corridor. It will help leverage the prior investments in the corridor to ensure full impact. Please fund!
NE MLK Jr Blvd Safety and Access to Transit	Portland Bureau of Transportation	5	Can we widen MLK Jr Blvd to 5 Lanes, 2 Travel Lanes in each direction with a Center Turn Lane. Upgrade All Traffic Signals to 12,12,12 with Reflective Borders. Flashing Yellow Arrow to be turn on with Less Traffic. Pedestrian Signals need to be on Manually by pushing the button.

Project Name	Applicant	Support Rating	Comment
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	1	Prescott is not wide enough to accommodate neighborhood traffic, busses and bike lanes. The funds can be better spent on other projects.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	1	I bicycle this route quite often, and would definitely appreciate safety improvements here, especially because it is one of the few ways to get across I-205
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	1	I do not support this project in any way shape or form. Parking lanes are needed on Prescott for a large number or residents in homes with no driveway. This is where they park. There are many other bike lane options on other streets. They can also use side streets. This is unnecessary and a waste of funds.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation		Ugh. Stop prioritizing bike lanes in highly congested traffic areas. Adding bike lanes will not increase bike traffic and reduce car traffic. Just look at the modes of travel people use in these areas. It will be an utter waste to spend money on bike lanes. Pedestrian safety and easier access to public transit is great. Bike lanes that will be difficult to main, will collect gravel, vegetation, trash, and other debris is a total waste of tax payer dollars.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	3	Yet again, PBOT is taking a scattershot approach to delivering a complete bicycle network. This project will leave bicyclists stranded at NE 72nd avenue when heading westbound. PBOT, go back to the drawing board, and come up with a project that provides complete, seamless links in the bicycle network. This project should extend all the way to the NE 7th Ave bicycle greenway, Stop planning for half-measures.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	3	I'm not entirely convinced a bike lane is necessary between 72nd and and 205. I ride my bike down Prescott all the time, and for 80% of the trip there's plenty of space and I've never missed having a bike lane. There's just a few specific locations that could use bike accomodations: (1) Prescott/82nd (2) Prescott/Sandy, (3) the 205 overpass, (4) connecting with the 205 greenway (there's no ramp down on the westbound side, and no crossing). If you just made those few locations safer for bikes, they wouldn't have to touch the rest of the street. Prescott east of 82nd COULD defintely use better pedestrian access; large sections of it have no sidewalks and no crosswalks.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	4	This would provide safer routes for pedestrians and help with flow.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of	4	This seems to be a good use of funds. Someone needs to focus and address the badly maintained sidewalks all over Portland. These sidewalks are in danger states of disrepair and makes it impossible for disabled people using wheelchairs and scooters to travel on the sidewalks.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	4	This is a critical thoroughfare that is sorely in need of updating. The improved connections with the FX bus and 82nd ave are sorely needed. Do fund this project!
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	This street has some challenging crossings and a lot of opportunities for improvement. The 82nd project has been through very extensive community engagement with formal groups and engaged community organizations and I think a lot of folks have been able to weigh in so these are well considered changes.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	This project is vitally important to me and my family, as it provides a crucial, safe, bike- and pedestrian-friendly connection along Prescott, across the highly dangerous crossing with Sandy.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation		This project will have a massive safety benefit. As someone forced to ride this section of road for work 5 days a week because it is the only crossing of 205 in the area, having a bike lane would greatly increase the safety of that section. The wide road allows people to blow past the marked 25 mph speed limit routinely. This new lane would add a level of safety and comfort for me to ride with my family to the Gateway Green or the Winco grocery store because we will have a safe way to get to the 205 path. The extra-wide parking lane is rarely used, and the cars that are there tend to show damage from other cars hitting the mirrors and sides from driving so fast down Prescot. This will also help encourage drivers to go slower as they head west towards Scott Elementary School

This will also help encourage drivers to go slower as they head west towards Scott Elementary School
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	The stretch of Prescott between 82nd and I-205 lacks sidewalks on both sides. It's a busy street, with a curve that makes it harder for motorists to see pedestrians who are forced to walk in the traffic lane, since what little shoulder is available is often muddy or inaccessible. Adding sidewalks to improve accessibility and safety should be a priority. It is very difficult for Parkrose residents to access points west of I-205 without getting in a car.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	This is a route I take to work every day and it's needed some type of facility for years.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	I need a safe bicycling connection from my home to the 205 bike path and this would accomplish that.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	For Building a Better 82nd to be truly successful, it is essential that connecting routes be upgraded. Prescott is particularly important, as it has the ability to connect the 70s Greenway to 82nd and on to the 205 Bike Route: all routes that my family regularly uses. Please fund this project!
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	Please also included hardened infrastructure between the bike lanes and traffic. Any improvements to crossing safety at 72nd/Prescott would be greatly appreciated cars are aggressive here.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	I ride this route regularly. Parked cars reduce the width below what feels safe, and the edge of the road is frequently filled with debris. A safe connection from this route to NE 92nd near Rocky Butte would be very valuable. Nobody should be asked to ride near 82nd and Sandy.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	I strongly support the Northeast Prescott Street: 82nd Avenue Multimodal Safety and Access project. This improvement would significantly increase the safety of my family's daily commute and provide much safer access to Gateway Green for biking and recreation. Investing in safer crossings, signals, and bike lanes is essential for making our neighborhoods more connected and accessible for everyone—especially those who rely on active transportation.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	This corridor is a key connection across I-205 between outer east Portland and the inner city in an area of the city that lacks safe connections for pedestrians, cyclists, and other active commuters. I personally use the Prescott overpass when I travel by bike between my home in Madison South and destinations in far northeast Portland, such as Costco, Cascade Station, and the North Lake Physical Therapy clinic. I can attest that cycling along Prescott between 81st Ave and I-205 is stressful and unpleasant, where I'm faced with the dangerous choice of weaving in and out of the lightly used on-street parking space and taking the driving lane and holding up impatient motorists behind me. The intersection at Sandy Blvd, in particular is especially harrowing, as the paved shoulder on the west side of the street gives way to a gravel shoulder on the east, making it so that a cyclist must merge into general traffic in the middle of the intersection in order to avoid the potentially dangerous terrain. Reconfiguring this shoulder area into a buffered bicycle lane will go a long way to making me feel safer on NE Prescott. Further, it will ease the worries of my spouse, an autistic woman with severe anxiety around driving, who currently refuses to cycle into the Hazelwood/Maywood Park/Parkrose Heights area due to safety concerns along Halsey, Glisan, and Prescott. This project would open up her ability to shop in Gateway and Cascade Station, take our infant to the pediatrician on NE 122nd, recreate in Gateway Green, and otherwise engage with our neighbors and community to the east in a sustainable and enjoyable way.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	Inrode this route regularly woth my young child. Having buffered lanes would be an amazing improvement tonour daily lifes and a signal to other road users that cyclists have a place on NE Prescott!
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	This is an excellent project that I strongly support for funding. There are no bicycle connections at all in this area crossing I-205, and the pedestrian environment is very difficult. The on-street parking is barely used and makes the roadway wide and unpleasant to walk or ride along. This area has been lacking in investment for so long. Please fund this project!

Project Name	Applicant	Support Rating	Comment
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	I live right off Prescott and this area of Prescott has always felt incredibly dangerous but the only way I can access the 205 path or the Parkrose neighborhood.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	This would make a huge positive impact for those of us that live in D1/East Portland. There are very few ways for us to connect with the rest of Portland by bike or on foot, and almost none are protected and safe. Prescott is a vital thoroughfare for cyclists on the east side to connect with the greenways throughout Concordia and Alberta. It's biggest downside is that it has no bike lanes and is notorious for cars speeding down. Giving us cyclists proper protection like concrete lane dividers would be immensely helpful. For me to get really anywhere by bike, I have to use Prescott and the I205 path. So any steps to make that safer would positively impact myself and everyone else that lives in Concordia, Parkrose, Argay, Maywood, and the rest of D1
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	This project would improve safety and allow this section to be "future proofed", as cyclists use this corridor daily. Not only that, but there are lots of families with kids getting to school. NE Prescott is an amazing Segway to get to the east. I have ridden it for decades. As the traffic increases, it gets harder and harder. And, this section has a lot of newer families, it is a thriving area of Portland in an otherwise downturn of our city. The businesses on 72nd and Prescott are thriving with the amount of people visiting them. (Just look at Johnnys coffee/Upright Brewing on the Northwest corner of 72nd/Prescott on a sunny day.). The Going bikeway is fantastic. That is the segment going west. This project would really be a great addition in terms of safely getting to and across 82nd. Certainly, Gateway Green brings riders along this route, as well. The sidewalks on this route are not wide enough, they have power poles in the middle of them, etc. So, riding on them is not feasible (legality aside on that one, as safety is still more important). For the benefit of transportation, our future generations, along with the current ones, please, put the dollars into bike lanes along this corridor. It would continue to strengthen our fantastic cycling infrastructure.

NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	This is an essential piece of bicycle infrastructure. Adding a car blocked bike lane makes sense.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Transportation	5	one of the only connections across I-205 in this area, better multimodal connections are sorely needed
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	anything to facilitate 82nd ave FX development and fix the heinous issues on 82nd in genera.

Project Name	Applicant	Support Rating	Comment
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	I both drive and cycling on this connector frequently and it seems to be heavily used by cyclists (oftentimes with kids) to cross the 205 corridor from NE PDX.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	This would be a complete game changer for me and allow me to safely bike with my family across Sandy/205. Currently we always drive because it's too high stress with the car speeds and lack of good routes (the existing Going greenway is very bad for getting to the 205 path from west of 82nd)
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	I live on Prescott and 81st and bike, walk, and drive there. We frequently see and hear cars racing down Prescott and 81st. We are so glad to hear that there may be some traffic calming in this area. Bikers use our street (81st) frequently and could use better support getting to the 205 bike path. Please fund this!
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	there are so few neighborhood connexions to the I-205 path in this area, it makes sense to improve this one.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation		Please consider the following: Add speed bumps to this stretch of road. This area of the road is flat and generally free of policing so reckless drivers often race down it for fun. Consider making the lanes protected as well, there is more than enough space for it and it will be a popular connector for bikers east of the 205.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	Gateway green is a destination for cycling, but so many people drive there now because the connection feels unsafe. This would be a huge improvement in my ability to safely access the park without having to drive there.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	I live west of that area. I ride Prescott to the 205 multiuser trail but it does not feel safe! This project will be terrific. Any project that makes it safer for cyclists and walkers will get people out of cars, make traffic flow quicker, reduce deaths and reduce tailpipe pollution.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	This is a corridor that can connect east Portland green space. This Prescott corridor would connect to the 72nd Roseway Parkway which has a new car free pedestrian only "Mason St. Plaza". Also, Rocky Butte is in the process of a proposal to be opened to public recreation, and Prescott St would provide more direct access to the proposed north trailhead of Rocky Butte. Furthermore, this Prescott Corridor would connect to the Greenbelt at the City of Maywood Park and support access to Gateway Green mountain biking park and also to Gateway Transit Center. This project has great potential to connect to many other transit centers and pedestrian access to greenspace.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	Critical safety project for all users. Provides access to the I-205 path, which is current very dangerous to access from the west side of 205. Also, a critical connection to a major transit center (Parkrose TC).
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	I walk to the library along this route because I don't want to be mistaken for a prostitute on Sandy (so I cut up the hill on 80th from Prescott to Gregory Heights), not because I'm dressed like a prostitute, but because the only women you see walking alone on this stretch of Sandy usually are. Part of Prescott has no sidewalks and cars whip through there going so fast. I also use Prescott to cross 205 on my bike when I ride to work. This section doesn't have any bike lanes either and every day I make it without dying or getting hit feels like I won a lottery. It's only a matter of time. The cars are fast, the curve is blind, and there's no protection for pedestrians or bikers. And there's no other route available because Sandy is absolutely out of the question and there are no other streets that cross 205 and 82nd. If you're on foot or pedaling, you've got no other option but to take your life in your hands on this stretch.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	This project would directly effect a large number of people, including thousands of schoolchildren attending schools like Roadway and McDaniel and the community center. Quite a few take the bus or drive themselves, and they are often out in traffic around 82nd. This area is currently pretty unsafe, esp for pedestrians and bicyclists. Anything that makes them safer is high priority.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Transportation	5	This project would be a HUGE benefit to the neighbourhoods on both sides of 205. The current biking/walking connections are very lacking
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	This is a high pedestrian and car traffic area, and the riskiness of that combination I think makes it difficult to maintain local businesses.

Project Name	Applicant	Support Rating	Comment
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	Love this project. Another and perhaps cheaper option would be leveraging the upcoming Mason greenway. South of where it will end at the 77th ave greenway connect east to 81st via the alley paths on Skidmore (the dotted lines on the map) then continuing on Prescott/81st to the 205 at the intersection. This utilizes the new Mason greenway while still making an eastern connection to the 205 path. It eliminates the need for lanes from 80th to 72nd while using the new approved resource, the Mason greenway.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	There badly needs to be a connection from NE Portland to the I-205 MUP that isn't Marine drive or a busy road. Since you did not complete the promised east-west connection from Gateway to Rose City Park, that s Prescott connection is now a must-have project.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	Transforming 82nd from a stroad into an honest rapid transit corridor will be huge for this part of Portland. It will also be big help in reaching Vision Zero.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	Safety is an issue on Prescott including the high number of cars that speed from Sandy down 82st to Prescott. Bike lanes will add to a better 82 and the adjoining streets. These changes would make the neighborhood feel safer and has been needed for a long time.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	This would vastly improve access for Sumner neighbor residents to get to the 205 bike path and Gateway Green. Also to a safer biking greenway like Going St at 72nd or Alberta. Currently Sumner residents have no direct access to biking greenways.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	I live just off of NE Prescott near 82nd, I walk this area all the time with my two young children. One of them I take to the daycare on the corner of 82nd and Prescott, by putting in traffic calming measures would make this particular corner much safer for all the children that go to this daycare. and with these traffic calming measures I think that it would help reduce that amount of traffic that uses our street to bypass the section of 82nd between NE sandy and Prescott. so often during rush hour cars speed down our street to try to avoid traffic on 82nd. putting in bike lanes would also make me feel more comfortable riding my bike with my kids as i ride wirth them to school at scott elementary.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	This area is a no man's land for biking, fixing this gap in the bike network would be huge.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	I have feedback for the 82nd to 72nd portion, especially when this project looks to be underfunded. Why not extend the Mason greenway from 77th to 81st and link the new Prescott lanes at 81st and Prescott, instead of adding new lanes from 72nd to 82nd. It is how many bikers already behave. Additionally it links up to the plaza/mural that was installed at Mason/81st Ave in 2024, the perfect compliment to the plaza at 72nd.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	Pedestrian safety across and along 82nd avenue is incredibly important and needed. Any improvements made should rank pedestrian safety of highest importance.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	This is a key connection which gets especially scary the closer you get to Sandy (esp. from the west)
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation		I commute by bicycle along this stretch of Prescott street, and have for the past seven years. I have been struck by cars twice because of visibility issues caused by the on street parking. On top of that, I have had dozens and dozens of close calls with cars due to the lack of a dedicated bike lane. Implementing this project would make this busy stretch of street significantly safer for myself as well as other cyclists, pedestrians, and drivers.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	Safe east-west bicycle routes especially over 82nd and the freeway are really important and provide sustainable transport options for a large range of residents
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	This stretch of Prescott is very bike-unfriendly despite being low speed and a crucial connector between the park blocks at 72nd and further NE. Would love to see better accessibility here.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation		This project fills in one of the many gaps in our active transportation network in east Cully. West Cully accommodates walkers and bikers well, but the accessibility gets worse the farther east you walk or bike. This project will also create a safe connection from Cully to the neighborhoods in east Portland. There are precious few places to cross 82nd that feel safe outside of a car.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	Please support this mulitmodal project!

Project Name	Applicant	Support Rating	Comment
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	This project will help close a gap between the 70s greenway connector (PBOT project) and the I-205 multi use path. This would be huge as it creates a safer trip for non vehicle users to the Gateway Greens bike park. Prescott does not have stops between 72nd and 82nd Avenue so vehicles are often traveling at high rates of speed in the wide road. Reducing the width of the road may decrease travel speeds making it safer for pedestrians and non-vehicle users.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	I would like to see physically protecting bike lanes in this area, especially crossing over I205
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	This one seems like an easy win. There are very few cars parked on street and the road is very smooth and in good condition. Bike lanes and crosswalks could be very easily and cheaply implemented
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	Keep funding 82nd, we love it!
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	This project demonstrates a commitment to public safety that the community living near 82 Ave deserve. This area has the highest level of pedestrian deaths in the Portland area and if we plan on encouraging public transportation we need to commit to public safety as well.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	Prescott is one of the few ways for cyclists to cross 205, and one of only three that is not a High Crash Corridor. It's the only way to traverse 205 north of Ricky Butte. It's also one of the few ways for people to access Gateway Green. These upgrades will improve the safety of this route. If we're serious about climate change we need to make it safer for everyone to traverse across 205.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	This project supports increased livability in this area and promotes safety for pedestrians. I live on these blocks and frequently walk this area with my child, cars drive very fast and are not attentive to folks crossing the street etc.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	NE Prescott recieves a lot of non-vehicular traffic, improved safety and access would better connect the east side to downtown.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	This project would be great to connect the bike path from the 205 trail in the Cully neighborhood. I bike from work at Gateway and when I need to head west at Prescott it can be a rough & not very safe route. Following the current bike route is not direct and zigzags crossing Prescott. We need more bike safe infrastructure in the Cully neighborhood for students as well to get to both Scott & Roseway Heights.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	I am an avid cyclist who happens to live off of NE Prescott Street. I have cycled eastbound on NE Prescott Street, crossing the I-205 bridge and I can confidently say that this is one of the most dangerous places to cycle in the metro area. Because there is only one reasonable option (NE Prescott Street) to cross I-205 going east for cyclists, this problem must be addressed for all of the many cyclists (and pedestrians) who live east of I-205.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	An absolutely, much needed connection to the 205 path and Parkrose Transit station for those of us that use alternative transportation! Please make this happen ASAP!!
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	Important project to improve bicycle access and circulation around 82nd Ave and I-205.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	Can we widen Prescott Street to 3 Lanes, One Lane in each direction with a Center Turn Lane.
NE Prescott St: 82nd Ave Multimodal Safety and Access	Portland Bureau of Transportation	5	60th, Curry at Prescott is a Very Dangerous Intersection, can we change it into a Roundabouts
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	1	The safety deficit for pedestrian and cyclists along Halsey takes precedence to moving cars faster through this corridor.
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	1	What a waste of money. We should be eliminating traffic signals in favor of roundabouts, square-abouts, plazas, and other traffic-calming interventions that build community and deliver on Vision Zero. Do not fund this project.

Project Name	Applicant	Support Rating	Comment
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	1	Boo, waste of money. Do not fund.
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	1	It's about time Portland dedicated funds to improving Foster - it's been a shameful abandonment of a struggling neighborhood.
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	2	Add transit signal priority from the start. I do not care about freight signal priority.
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	2	Add transit signal priority from the start. I do not care about freight priority.
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	2	Doesn't seem to be great need for this.
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	3	Can we add a bike lane or at least a wide shoulder to Foster? It's a death wish on a bike.
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	3	Ensure bike lane on Foster is preserved and remains protected for access from Lents to inner SE.
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	3	Very important, highly utilized connection. This often-neglected road needs substantial improvements. I'd support a Multnomah commitment to dramatic improvements on the east side of the county.
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	4	Lights take a long time, and Foster is otherwise the fastest route into town from the Portland outskirts
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	4	I drive this part of the Halsey (& Weidler Couplet) regularly. High speeds & lack of lane & signal clarity can make this an unsafe stretch of road. Signal improvements would be very much appreciated.
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	4	As someone who lives adjacent to the 92nd & Halsey intersection, I often hear street racers and joyriders speeding down Halsey. Signal improvements to "rest on red" would be very welcome in order to curb that dangerous behavior. Additionally, as an occasional rider of the Trimet 77 bus line, signal timing that helps to keep the line running on time would be very much appreciated.
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	4	Investment is needed in these areas
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	4	I feel very concerned for my safety when walking, driving or biking around SE foster & SE 92nd around the i-205 entry ramp. There are many confusing intersections, and blind turns, that cause danger to pedestrians and buildings. The neighborhood regularly and recently struggles with cars driving into buildings. The turn on SE Woodstock before SE 91st is particularly problematic and needs some intervention.
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	5	These two projects seem like really strong connectors over the 205 corridor. Coupled with the glisan through street, I think this will open up opportunity east of 205 and allow for more pedestrian traffic to move towards the greenlines and mall 205. The foster addition will nicely connect growing lents neighborhood and allow that area to lean more into pedestrianism.
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	5	This sounds like a good project. This stretch of foster road is in dire need of improvements. It has lots of people driving too fast (witchh speed cameras or better use of signal timing could mitigate), not enough safe places to cross as a pedestrian or bicyclist, RVs parked in the bike lanes, and terrible pot-holed pavement for some of the driving lanes that makes it especially dangerous to drive on a motorcycle. Any money spent on this stretch of foster is money well spent.
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	5	please do include better light timing on Foster especially around 92nd/205 interchange. These exits regularlly back up onto the freeway in peak hours so adding improvements here would be greatly beneficial. Also consider adding auxilary lanes to 205 for this exit to mitigate imapacts of this congestion.
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	5	Traffic on Foster sucks and it needs to be improved.

Project Name	Applicant	Support Rating	Comment
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	5	Foster and Halsey have a chance to be safe, walkable and attractive areas of the city, bringing foot traffic to local businesses, but the cars are too dangerous for many families & small children. By focusing our funds on these core streets, the benefits can radiate throughout the communities & bring back thriving shopping & gathering areas.
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	5	Foster Road is one of the most dangerous roads in Portland metro. Currently the Foster bus line terminates at 122nd. Are the proposed improvements part of the plan to extend transit east to 162nd.
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	5	Foster Rd between 122nd and 172nd need big time improvements.
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	5	The signal by the Fred Meyer and Halsey gas station here, just inside of 84, is insanely inefficient and dangerous. Even tuning that one would have a big positive impact on local traffic.
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	5	High volume of student pedestrian travel and too much traffic bottleneck when school lets out. Needs safety improvements
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	5	This section of Foster is a slow ineffective route from ~148th and Foster to I205. I'd love to see improvements in the driveability of this section in regards to light timing,
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	5	This is an essential east west connection to cross 205. There are frequent car crashes and nightly chaos. I was hit by a car while riding my bike on 74th and Prescott in 2016. I frequently ride Prescott to sandy businesses east of 205 and would greatly appreciate the improved safety.
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	5	This is a high priority because gridlock is bad now and will get much worse as residential construction continues to grow east of 162nd. Also I wish Clatsop St east of 132nd could have a bike lane. Residents in this are have only cars to get around.
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	5	I am writing to request the decision makers of this fund to please prioritize implementing measures to reduce the speed of traffic on Foster specifically, between SE 82nd and SE 92nd. I have lived on SE Foster for five years; in that time, we have seen an explosion of traffic. This can be attributed to the fact that new housing developments have been built between Foster and SE 89th and SE 92nd which is great for the community, but it also introduces more traffic to the area. Cars are constantly speeding down Foster. The Lents Town Center Monument is actually currently broken because cars keep hitting it. On SE Foster and SE 92nd, you can still see the crumbling building where a Tesla crashed into the building. Refuge Coffee House on SE Foster is missing a window because someone crashed into the building. And while it's easy for property damage to get brushed aside, here is the part that I am most concerned about: There are children that live in this neighborhood and the speeding cars are a huge concern. There's a daycare on SE 86th and Foster even one of their fences is bent over because someone hit the fence. Imagine if there had been a child nearby! Even for me, I have a two-year-old, and I am constantly scared of the cars that are speeding by him. Because my driveway is attached to Foster, I am constantly dealing with the traffic when I exit out of my driveway. Cars do not slow down. Some of them even honk at me if I dare exit out of my own driveway; they're speeding towards me at 50+ MPH even though it's a 35 MPH zone. At 50 MPH, this doesn't give me enough time to see them before they turn around the corner. Lately, I've just been relying on the reflection of the building, but even that doesn't give me enough time to see them. Accidents happen on the SE Lents Monument all the time, and even with the most diligent and careful driving, I fear it won't be enough unless changes are made to slow down the flow of traffic. Kids live there. People walk their dogs in the empty lot near the Lents Town C
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	5	This street is so fast! Please fund this to help slow speeds.
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	5	I believe this will be hugely helpful in moving east and west on Halsey with signal improvements. It can be difficult to navigate the area in a timely matter. Halsey is useful already but can be inproved.

Project Name	Applicant	Support Rating	Comment
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	5	This area badly needs improvements and infrastructure upgrades. It is a major through fair for both residents and commercial drivers.
Outer Halsey and Outer Foster (ITS Signal Improvements)	Portland Bureau of Transportation	5	western end of this Halsey section should be cycle friendly
W Burnside Green Loop Crossing	Portland Bureau of Transportation	1	This is a key IMPORTANT project
W Burnside Green Loop Crossing	Portland Bureau of Transportation	1	Do NOT add bicycle lanes to W. Burnside St.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	1	This is such a busy area that needs some love
W Burnside Green Loop Crossing	Portland Bureau of Transportation	1	The Green Loop is a nice concept but we need to invest these dollars more widely across the city and focus on access to greenspace for outer neighborhoods who do not have equitable access to trails, parks and other green areas. Do not fund this over more critical projects across the county.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	1	Removing car traffic lanes in support of this project is a terrible idea. There are plenty of other routes of travel by bike and using funds in this area to support bike traffic is a terrible idea. This is a highly congested vehicle traffic area, the worst thing you could do is reduce lanes for vehicles in support of bikes. Doing this will not reduce vehicle traffic, it will only increase vehicle congestion and make this area increasingly unpleasant.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	2	Seems very expensive for what we get, but certainly important.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	2	Seems unnecessary and potentially very disruptive.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	3	This is a real hairy area to exist as a human being outside of a car. I'm all for making it safer to move through this section. At the moment I just avoid entirely. With the new Darcelle Park coming, I don't want any obstacles to getting there.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	3	While this stretch certainly needs improvements, I think they can wait until after the Burnside Bridge rebuild. Better still, time them to be completed coincident with the bridge reopening.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	3	Downtown Portland already has more transportation infrastructure than surrounding areas. The money is better spent elsewhere.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	3	Old Town/Chinatown has een warned traffic in this area will be severely affected by bridge construction; are any portions of this work likely to be altered or removed for rebuilding, and better left for after bridge completion?
W Burnside Green Loop Crossing	Portland Bureau of Transportation	4	This will improve safety for pedestrians crossing in the area.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	4	Removing traffic lanes to add in bike lanes will ALWAYS be a good thing!! Decentralize cars as much as possible.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	4	This stretch of Burnside needs repaving, and calming. I'd be in favor of this project if it improves the road generally, in addition to creating more room for bicylists
W Burnside Green Loop Crossing	Portland Bureau of Transportation	4	Although this project will serve some of the people of Portland who live and work in that area, I am not sure that this is more important than repairing sidewalks. The sidewalks all over downtown and NW and all over Multnomah County are in seriously bad shape. Sidewalks are broken and missing chunks everywhere in Portland. I am disabled and I have to get into the street at some places; like near the 82nd St MAX station going away from downtown on the right side of street, I risk my life getting into the street with traffic so that I can get to my destination (Portland Animal Welfare). In none of these applications does anyone request funds to repair the sidewalks which are 100% impassable in many places in Portland including Downtown, NW, N, and I am sure everywhere in Portland. People using wheelchairs, scooters, walkers, and other devices find it impossible to navigate the sidewalks. Thank goodness for bike lanes!

Project Name	Applicant	Support Rating	Comment
W Burnside Green Loop Crossing	Portland Bureau of Transportation	4	This is a troubled area. I once admired the landscaped median, but the streetscape is now dated and with poor functionality. Traffic needs to be better directed and calmed. Pedestrian need every advantage crossing this perceived barrier. The needs for West Burnside actually extend all the way to NW 23rd Place. This area is populated and active and the streetscape needs to support those active needs - especially pedestrian and transit related infrastructure.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	4	Crossing Burnside can be challenging. Some pedestrians seem to think they can cross where ever they like, and some drivers think Burnside is an express way through town, though it is the fastest way through town. More safety improvements are very welcome for this area. Better communication with drivers, crosswalk stop lights and also lashers, is necessary.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	4	Need safer designated crossing locations and bikes to be separate from traffic.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	Let's build a better Burnside! Seriously, doing this project while the bridge construction is happening seems like common sense.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	This project is SO important to improving connectivity for peds and bikes in the highly congested and dangerous NW Portland area. Please, please fund this. Thanks.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	We need to invest in downtown
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	I go downtown frequently- I shop there, recreate, and visit my daughter at work. My most common transportation is to park in a city owned structure and then walk and take the streetcar to various downtown & Pearl destinations. This project would make getting between Downtown and Old Town/The Pearl easier and safer. It would also ease my daughter's commute (by bicycle from NE Portland), and my husband's recreational bicycling. I'm really looking forward to this one!
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	A EB bike/bus lane will be a huge safety improvement!!
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	It's fine, but it's also pretty weak sauce, and only marginally contributes to building out the regional bicycle network we need. Why not add the cycle track for both directions on Burnside? Stop compromising in favor of more deaths on our roadways and more automobile throughput; what we need is less space for cars, and much more for people.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	The Green Loop is a transformational multi modal pathway that will connect downtown to the central east side. This crossing would connect the north and south park blocks and enable bike and peds to safely cross Burnside.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	I support this project because it would help prioritize transit on a corridor that is a bottleneck for the entire system while also improving active transportation.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	This impacts people visiting downtown from many other parts of the city and is a great step in improving multi-modal travel downtown.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	West Burnside is a significant hurdle for walkers, cyclists, and other non-drivers traveling north-south between Downtown and Chinatown/the Pearl District. Providing safe crossings, especially at the park blocks, would encourage multimodal travel by reducing risk of collision from high-speed vehicles and improving the comfort and enjoyment of walking/rolling on this route. Additionally, Burnside's design prioritizes auto traffic over transit, cyclists, and pedestrians, and this project is an opportunity to improve equitable sharing of the public right-of-way by giving cyclists and transit riders dedicated space, in turn providing pedestrians on the sidewalk a buffer from high-speed traffic. Personally, should these improvements take effect, I would spend time walking/cycling along the park blocks and engaging with nearby restaurants and retailers.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	Downtown needs investment that will help bring walkers and bikers in
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	it's criminal that burnside, such an important street, is so dangerous to walk on. i think this would be a boon to the tourism industry downtown.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	This is a necessary investment in connectivity of the city. It is a major impact to the safety and mobility of all modes, and will improve commerce in the area as well.

Project Name	Applicant	Support Rating	Comment
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	This area should be the beating heart of Portland but instead feels forgotten. This investment could start to give this area the love it deserves.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	Absolutely critical for both bikers and transit along this corridor. Also, critical to making the corridor more of a "main street" and supporting safety and business activity in a struggling area. There needs to be a west-bound bike and transit lane as well.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	How about getting rid of all the TENTS so people will actually use this West Burnside Green Loop Crossing? I have 6 businesses along West Burnside (the oldest for 25 years now) and they are all hanging by a thread because no one wants to come downtown BECAUSE OF THE TENTS AND ASSOCIATED DRUG USE. Also, maybe STOP GIVING THE TENTS OUT. Get a clue Multnomah County before we all go bankrupt.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	This area sees a tremendous amount of pedestrian traffic and should be a priority to make safe. The whole area from Broadway to i405 is a major tourist area. It should reflect well on the city.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	Making downtown a highly desirable place to live is key to a thriving future of Portland. We should always design cities for the people who live in them and not for the people who pass through them or dip in for work and dip out in the afternoon. Calming motor vehicle traffic and improving walking, biking, and transit are great ways to make a city a pleasurable place to live.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	This section of road is dangerous to ride and improving it would make the connection from the Burnside Bridge to Flanders way easier and safer for cyclists.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	This section is highly traversed by pedestrians, transit, bikes, scooters, and vehicles. It is a major east/west thoroughfare through a key downtown area. This project would also help boost safety, which is needed. Thank you.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	Hope we can continue to invest in the cycling downtown.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	This is a very dangerous area for pedestrians, a signal at Park would be a tremendous safety improvement.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	It would provide a missing link in the Green Loop.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	This supports revitalizing the Central Ciity. The \$9,000,000 price looks okay if it accomplishes that revitalization. My family shops downtown.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	TriMet lines 19 and 20 are regularly significantly delayed on W Burnside between Broadway and SW 3rd. I ride these buses much further easttypically boarding at Cesar Chavezbut those downtown delays can add 15-20 minutes to my commute. Adding bus lanes here would be a huge improvement for reliability and give me more time with my family.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	This is the most important project on this list.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	Would be great to incentivize pedestrian and bike traffic in this area. Right now, it is underutilized. The park blocks and pods in this area could use the increased foot traffic.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	This is one incredibly busy route that has badly needed a better pedestrian throughway for many years.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	Dedicated eastbound non-car lanes further down Burnside? Love it to bits. This area is a mess for buses and doesn't need to be.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	I support this particularly as part of a longer-term process connecting bike lanes on West Burnside with the bike lanes on East Burnside from 69th and beyond.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	I live very near to Burnside. This project would allow me safer, convenient access to downtown whether on bike or bus.

Project Name	Applicant	Support Rating	Comment
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	This is such a critical gap for biking in Portland, and the timing is great here, with the coming North Park blocks extension and construction of Darcelle XV plaza. This project will bridge an existing gap, providing immediate benefits and longer-term visibility to the Green Loop. Please fully fund this project!
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	I hope the bike lane can be protected in some way from the busy burnside traffic.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	This upgrade cannot come soon enough. Thank you
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	I live downtown near the South Park blocks and want to say how excited I am for the development of the green loop. The north and South Park blocks are lovely as is but definitely need to continue moving into the direction of more greenery and walkability. Currently, there are a bit too many cars for many people's comfort and many of the drive too fast through the area. Additionally, there is definitely not sufficient protected north-south bike connectivity through downtown. This project combines the many needs of the people who live and work near the park blocks (and will continue moving to these areas as they continue to grow) to help provide a better public space for everyone.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	Anything that improves cyclist and pedestrian safety and is designed to increase cyclist and pdestrian use throughout the city is awesome - cycling and walking ARE what Portland is about and only strengthens its identity as a beautiful place to live.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	i'm PUMPED on the green loop and all the improvements to cycling/ped safety.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	This project would directly provide a positive impact on my life as a resident near the North Park Blocks. Burnside is currently such an unenjoyable and dangerous street to be on and live near by due to all the space that is prioritized for cars.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	Burnside is a very busy and unsafe. Crossing burnside on a bike is uncomfortable as there are large potholes and paint is unclear. Pedestrians have long crosswalks which make it difficult to cross. Every month I see a car accident and every week I see a close call, mostly from the drivers fault. Businesses do not prosper because of the way burnside detracts pedestrians. Please look into the betterblock student project from portland state university. They put in a lot of effort with local organizations and have the ball rolling on how the burnside bridge closure can be an opportunity for trail and error of an active transportation project in this area. Portland should get with the times, though we're known for biking and walk ability, our city is far far behind many others, especially downtown
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	Completing the Green Loop, especially through this section will greatly improve street safety and QoL.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	I bike this stretch of road every day to get to work, and it is in desperate need of dedicated bike infrastructure.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	Yes yes yes. I usually cross via Park on foot to get to the food cart pods or the north park blocks. But HAWKs and other pedestrian and cycle priority infrastructure is very welcomed.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	need to improve cycling safety so this project would be helpful

Project Name	Applicant	Support Rating	Comment
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	I live 2 blocks away from the intersection of Burnside and Park and cross the road twice a day on my commute to and from work. Neither crossing at Park nor 8th has sufficient safety measures in place for pedestrians. This is the main pedestrian crossing between between Broadway and 10th, and the roadway layout makes for very dangerous drivers. On eastbound Burnside, the downhill between 10th and 9th followed by the widening of the roadway allows drivers to accelerate beyond the speed limit, and the roadway immediately changing from 2 to 3 lanes in each direction locates waiting pedestrians further out of the view of most drivers. From the opposite direction, a wide flat road similarly allows drivers to accelerate beyond safe speeds. The trees in the center median also prevent westbound vehicles from seeing pedestrians crossing the eastbound lanes. Additionally, the proximity to the CCC Old Town Heath Clinic between Broadway and 8th means that especially vulnerable users cross frequently with very few safeguards. I have personally witnessed many elderly and disabled attempt to cross here, and it is beyond unsafe. While I acknowledge that all projects available for funding are important, because this project is between the the very busy Burnside crossing intersections of both Old Town and the Pearl District, pedestrians are much more likely to be utilizing this area now and in the future. In its current state, the blocks surrounding the Park Blocks serve as a dead zone since pedestrians are more likely to cross at the signalized intersections at Broadway and 10th. This project will go a long way toward rectifying this safety and livability hazard.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	We need to continue to invest in downtown. This is a big step to help in the recovery!
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	As a cyclist who rides to Timbers games, this project will enhance biking and pedestrian safety through the heart of the City.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	Please complete the green loop!
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	A very busy area with limited non-motorized options. Could and should be far more bike friendly. As part of a larger Green Loop this should be a priority
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	Support active transit and people-first public realm improvements that improve conditions in inner Portland.
W Burnside Green Loop Crossing	Portland Bureau of Transportation	5	I am very excited for the Green Loop concept to come to fruition, and this could be a key piece of that, so please try to support.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	1	This will not be a very useful trail connection, and seems like a low priority compared to improving safety and active transportation on major roadways.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	1	It will attract bums.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	1	This would benefit a small group of people.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	1	Unless the City slows traffic on Shattuck at Fairvale, the City is inviting another fatality and more injuries. Have not seen ANY POLICE SITINGS of speeders in 45 years I've lived here2 blocks fromRed Electric. Have myself watched a young man die in my front yard, because driving he avoided pedestrians and went off the road into the ditch and hit the power pole. Water Bureau has NOT ADDRESS the water runoff at Marquis Parking lot that pours water down Shattuck. It should be divereted into the Fairvale water trough. City is absolutely IGNORING the dangers of running this path across Shattuck without absolute etering of speeding drivers that average 42 MPH.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	1	The completion of this project will make it much easier for those of us in Southwest Portland where there are few sidewalks to walk or bicycle safely for recreation connecting to the Fanny /creek trail or to get to work downtown.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	1	As a community member who would live immediately adjacent to the trail I do not feel any level of enthusiasm for this project. The city has not worked with neighbors at all to talk about any kind of dividers between our properties and the trail. I have two young children who currently are able to play safely in our yard. I have no confidence that the actual impact to us has been considered at all. They also attend Hayhurst and frankly, I don't really want a ton of people having easier access to the unattended back side of our school grounds. I am a huge proponent of making our transportation plan more inclusive but I have yet to see how this project in the balance is worth the money. Pay for something families are petitioning for in the budget, like sports and after school programs instead, particularly in underprivileged areas like east Portland which have not had equitable investment.

Project Name	Applicant	Support Rating	Comment
Red Electric Trail East of SW Shattuck Rd	Portland Parks	3	I am not sure that this is more important than repairing sidewalks. The sidewalks all over downtown and NW and all over Multnomah County are in seriously bad shape. Sidewalks are broken and missing chunks everywhere in Portland. I am disabled and I have to get into the street at some places; like near the 82nd St MAX station going away from downtown on the right side of street, I risk my life getting into the street with traffic so that I can get to my destination (Portland Animal Welfare). In none of these applications does anyone request funds to repair the sidewalks which are 100% impassable in many places in Portland including Downtown, NW, N, and I am sure everywhere in Portland. People using wheelchairs, scooters, walkers, and other devices find it impossible to navigate the sidewalks. Thank goodness for bike lanes!
Red Electric Trail East of SW Shattuck Rd	Portland Parks	3	Seeing the projected cost of this being similar to the MLK improvement, I could imagine this money having a bigger impact continuing to improve crossings or adding bike lanes on more frequented streets (like Burnside and Glisan, referring to other current projects).
Red Electric Trail East of SW Shattuck Rd	Portland Parks	3	A great project to help improve and promote active and healthy transportation. This will be used even for those who want to get outside and enjoy their environment
Red Electric Trail East of SW Shattuck Rd	Portland Parks	4	Good use case, could have a better implementation with connections between fairvale and Pendelton along with connections from side streets such as 54th/53rd/52nd and extension from Pendelton ct. to Dover
Red Electric Trail East of SW Shattuck Rd	Portland Parks	4	There are not many comfortable routes to bike into Portland from Beaverton. This helps provide one more connection. Once the full Red Electric Trail vision is complete, it will be so, so much better.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	The improved and safer connection including a school and park really helps this trail segment punch above its weight.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	The Red Electric Trail has long been in dire need of expansion and development. This project would provide an invaluable safe route for bikers and pedestrians in a highly diverse and mixed-income area. Please fund this.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Any improvement in bike infrastructure is welcome and long overdue
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	The west side needs more off-street options
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Awesome
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This is a critical missing link. Existing local streets extend the trail to the east, and the upcoming redevelopment of the Alpenrose site will include extending the trail to Oleson Rd. For an urban with virtually no sidewalks, this will be an invaluable E-W route. SW Portland has received the short end of the active transportation funding stick for decades. This is a perfect opportunity to turn that trend around.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Great idea
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This project will help connect walkers and bikers on the westside to downtown and will make a big difference in the viability of commuting by bike.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	My family and I live in the Hayhurst neighborhood, and would love to see a safe route for kids in the neighborhood to be able to walk to school. There is a lack of infrastructure in this area to support walking and biking, and with the proposed development of the old alpenrose site, we will potentially have a huge influx of families with no safe method of crossing shattuck to get to hayhurst elementary and Pendleton park.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	We need to bring the Fanno Creek trail all the way to the Willamette river please! This is a key part of making that happen, especially as I assume the redevelopment of Alpenrose Dairy will extend the connection even further. SW Portland is a desert of safe places to walk and ride. Please prioritize this improvement.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	We need a better connection through this area from Terwilliger to Garden Home and beyond. The Red Electric Trail needs to be completed & connected!
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	We need to keep up the momentum on the Red Electric project. Filling gaps is key to a connected and useful network.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	SW Portland has very few sidewalks & this trail will fill a big need for walkers to get off the narrow roadways in this area. There is also lots of community & volunteer support for the trail.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	As the old Alpenrose Dairy site gets developed into housing, we need more off-street paths for kids walking from the housing development to the park and school
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	So important for school kids at Hayhurst, especially with the enormous development at Alpenrose
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This will be great for east-west bike and pedestrian travel. BV Hwy is not very friendly to anything but automotive travel
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	The Red Electric Trail will enable active transportation in an area without adequate sidewalks and bikeways.

Project Name	Applicant	Support Rating	Comment
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This project will allow people walking and biking to connect to the Fanno Creek Greenway for an important transportation route.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Soon there will be a development larger than the Forest Park development. Kids will need easy/safe access to the school. Also, we need more off road bike and pedestrian trails. I'm looking forward to this trail ultimately connecting to SW Oleson so that I can ride my bike to New Seasons to the west and the Willamette River and downtown to the east.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This will be an essential walkway for this entire area. Currently there is no way to walk/bike this way without being on the side of a busy highway.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Adding a crosswalk across Cameron, and a safe trail through this neighborhood will create a much safer and more walkable route for children who walk to school every day. Please approve!
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	The continued development of non-motorized, bike and people trails should be 100% top priority for this city - especially in the SW, where pedestrian only spaces are very rare. It's too bad there aren't 20 more projects like this in the SW.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	The southwest communities are not only lacking sidewalks, but also even any space that's safe to walk in this area. The red electric trail will provide a much needed safe passage for pedestrians and other folks who need this route to get where they need to go safely. We will never have sidewalks in the southwest but Trails of this nature make up for the lack of sidewalks.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This is not just recreational. This is about safety. It is about our environment . If the city government approves additional housing in an area, as it has in the former Alpenrose project, it must make multi-modal transportation possible and safe.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	In a part of Portland that has almost no sidewalks, this would be a crucial bike and pedestrian of the Red Electric Trail and connect the planned Alpenrose development with Hayhurst ES, and the Hayhurst neighborhood and other parts of SW Trails with the Piece of the Red Electric Trail that will be built on the Alpenrose property and the Fanno Creek Trail.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Hope to see the Red Electric trail all the way to the river at some point!
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This project is long overdue and is in a part of Portland where safe biking and walking possibilities are few and far between. It is also near new development and a school. It connects into a much larger system.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	While many projects on the list merit investment, this project supports connectivity with a large new development in an area of the city that has limited pedestrian connectivity or public transit options. We need to move beyond car-centric modes of travel as much as possible to extend the life of everything.

Project Name	Applicant	Support Rating	Comment
			To appreciate the importance of the Haynurst segment of the Red Electric Regional Trail it is crucial to keep in mind that this heighborhood has very few sidewalks. Only 14% of area streets have a sidewalk, making Hayhurst one of the neighborhoods with the least sidewalk coverage in Portland.
			This means that schoolchildren walk to Hayhurst Elementary School in the road, alongside cars. And the problem will only become more urgent once the Raleigh Crest development builds 263 new residences on the Alpenrose site.
			Portland Parks & Recreation's proposed RFFA project connects the Alpenrose site to the elementary school and to Pendleton Park, and has the potential to become a car-free, safe route to school for many young children.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	THE REGIONAL IMPORTANCE The Red Electric Regional Trail will become a key connector for local, short distance trips within and between the many neighborhoods it passes through. And giving residents a safe way to walk across their neighborhoods is important! But the bigger significance of the RERT is that it is regional. It will provide a 16-mile, family-friendly walking and cycling route from Garden Home to the Willamette River and downtown Portland. Heading the other direction, from Garden Home to the south, trail users would be able to connect to Tigard's Fanno Creek multi-use Trail for a total 24-mile trip.
			Because of this, both the Portland City Council and the Metro Council conferred the trail with the "regional" designation in 2007 and 2008, respectively. The new Raleigh Crest development of the Alpenrose site will be building a segment of the Red Electric trail across their property. If Metro were to fund the Hayhurst/Pendleton Park segment of the trail, the combined private public-private dollars would anchor the western end of the Red Electric to the Fanno Creek Trail and would be a gap-free extension of this walking and cycling path.
			EQUITABLE TRANSPORTATION Finally, having a safe route to walk or roll would be transformative for those who do not drive—children, the disabled, people living on low incomes and the elderly. Because it is a multi-use path, the Red Electric Trail would be particularly helpful to disabled people or others who rely on a scooter or other wheeled device. In this way, the Red Electric multi-use path would reduce car trips and help non-drivers achieve independence. Please keep in mind, the area does not have safe access to the bus stops on Beaverton-Hillsdale Highway; Shattuck Road does not have a sidewalk (and there was a pedestrian death crossing BHH at Shattuck a few years back).
			EVALUATION SCORING One last comment about the evaluation report scoring. It is an impressive and comprehensive set of criteria, and obviously Metro put a lot of work into evaluating the
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	My wife and I have enjoyed walking the trails in southwest Portland for decades. As she gradually becomes more disabled, however, we can no longer manage most of them. None are ADA-accessible, and the area does not have many sidewalks, so it's hard to find a good place for us to stroll. That's what is so exciting about the Red Electric Trail. It will be ADA-compliant, run on relatively level terrain, and my wife will be able to walk along it with her walker. That makes it unique in this area. We will use and appreciate the Red Electric Trail.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	I used to live in SW Portland off Shack Road and, as a cyclist, I can attest to the need for off-street bikeways and trails. Many of the area's roads are too narrow to accommodate bike lanes. The proposed extension is a great route for bikes because it is on an abandon rail grade, so it's not too steep. It also connects the school, park, and community garden with existing bike routes and, hopefully, will encourage kids to bike to school.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	There are so few ways for pedestrians and cyclists to cross these major roads, and the Red Electric Trail would significantly improve that.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	I feel this is very important for a neighborhood with so few sidewalks, making this more livable and encouraging activity, and it is part of a larger longer trail which has regional significance. This is a great use of taxpayer money.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This is a great project because it connects to existing trails and helps connect existing neighborhoods with new development.

Project Name	Applicant	Support Rating	Comment
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	I enjoy walking the trail near the Garden Home community center and would love to extend that walk to the east with the development of the red electric trail
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	I love our neighborhood trails. My husband and I walk them frequently. The maintained trails provide safety for hikers and bikers away from traffic. Currently, there are no sidewalks in this segment. The new alpen rose developement will bring more traffic and the need for safe walking and biking trails. Please consider this extension of the trail.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	SW PDX is so lacking in sidewalks- or even safe road shoulders. Routes like these help folks in this region recreate, commute, and engage positively with their surroundings and communities. I am so grateful for the trails I already frequently use, but more and wider connectivity would be even better! Thank you for considering the Red Electric!
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This project will especially be important as the housing development at Alpenrose gets built. If we can get more people walking & biking, that's a huge win!
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Outer SW is limited on safe bike trails. Please support this project so we can safely bike around these neighborhoods
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This neighborhood has very few sidewalks. Only 14% of area streets have a sidewalk, making Hayhurst one of the neighborhoods with the least sidewalk coverage in Portland. This means that schoolchildren walk to Hayhurst Elementary School in the road, alongside cars. And the problem will only become more urgent once the Raleigh Crest development builds 263 new residences on the Alpenrose site. It will provide a 16-mile, family-friendly walking and cycling route from Garden Home to the Willamette River and downtown Portland.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Lots of bang for the buck. Gives the community safe route for school kids and adults walking access to Community Garden. Biking all the way to the river as this is a great connector.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	The Red Electric Regional Trail will become a key connector for local, short distance trips within and between the many neighborhoods it passes through. And giving residents a safe way to walk across their neighborhoods is important! But the bigger significance of the RERT is that it is regional. It will provide a 16-mile, family-friendly walking and cycling route from Garden Home to the Willamette River and downtown Portland. Heading the other direction, from Garden Home to the south, trail users would be able to connect to Tigard's Fanno Creek multi-use Trail for a total 24-mile trip. I am a walker/recreational biker and enjoy the many safe spaces near my home. I see this as a fantastic way to keep healthy as I age. This would really offer a safe route to keep active and healthy. Thank you for your consideration, Sally Doughty
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Having moved to the Hillsdale neighborhood after over 30 years living in NE Portland, the biggest adjustment has been the difficulty of finding our way to places that are close enough to bike or walk to. We've been impressed with the work that's been done in recent years to make the area more pedestrian and bike friendly, and are hopeful that the momentum will continue, making it possible for folks to leave the car at home more often, get more exercise, and help save the environment.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	I think more walking trails in Portland area is good for all the residents. I will use this trail regularly if this project get funded.

Project Name	Applicant	Support Rating	Comment
			Please fund this project to improve the walkability of our neighborhood. There are very few sidewalks and the roads are narrow.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	The SW Trails network is one of the best and most unique things about Portland. Every new segment makes new areas accessible to walking and increases the usefulness of the whole system.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	It's a positive step toward completing a route between SW Oleson Rd and the new Hillsdale pedestrian bridge. Significant development is coming to the Alpenrose acreage west of Shattuck, so this trail will have even more people to serve. The Red Electric Trains are link us to the regions rich history.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This project has been in development for several years, and should be completed. Access to the school is important, as is providing the trail through an area that needs one.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This would be a wonderful option to encourage more people to utilize our parks and also for school children to be able to walk to school along this trail.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Would provide protected walkway in an area with few/no sidewalks for schools access and general pedestrian access
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This is an important connector trail in an area where a large development is planned. This trail has been in planning for many, many years. It's time to fund it.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This trail will be used by many people in the neighborhood. It's very important. Please see to it that it is built.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	I would use this trail regularly to recreate and get exercise in my neigborhood. It would save me driving to get to the fanno creek trailheads.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	On the Strava heatmap you can already see desire paths for this. The SW Trails are a reason I chose to come to Portland and make it my home. Not to mention anything that will offer paths for kids to get to school that will cut down on congestion I am a huge fan of.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	It's a much needed improvement to make walking a viable mode of transportation in SW Portland.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	The sections of a path add far more value, when connected, than any section alone would. Same for this part of the Red Electric Trail. It will capitalize on, by connecting to, trail sections before and after. It will provide a safe route for Hayhurst Elementary students, Pendleton Park users, and Vermont Hills Community Gardeners. This project provides a lot of bang for the buck.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	SWTrails has worked closely with the Portland Bureau of Transportation, PP&R and Metro over the decades to make the Red Electric Regional Trail a reality. We hope that Metro will continue to support this worthy project. Thank you for your consideration.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Safe access is needed for children. The area does not have enough sidewalks for pedestrian safety. I want to
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	The area needs more pedestrian safe paths.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This area needs disability accessible paths and routes, as many parts of SW have no sidewalks or even paved streets! SW is underserved for disability accessible transportation and recreational routes.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	One of the aspects that makes Portland such a great place to live is its walkability. That is hampered in many parts of SW, however, due to the lack of sidewalks. Having dedicated paths, especially near elementary schools improves both safety and that walkability. Vermont West of 45th has no sidewalks but this path would enable safe and easy access for the neighborhood to get to Olsen road and be able to then access the Fanno Creek trail at the Garden Home Community Center. Also improves safety for bikes as there are also few bike lanes in this part of SW.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This trail would allow me and my husband to walk or bike for several of our errands, decreasing our carbon footprint and increasing our exercise

Project Name	Applicant	Support Rating	Comment
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Having a safe route to walk or roll would be transformative for those who do not drive—children, the disabled, people living on low incomes and the elderly. Because it is a multi-use path, the Red Electric Trail would be particularly helpful to disabled people or others who rely on a scooter or other wheeled device. In this way, the Red Electric multiuse path would reduce car trips and help non-drivers achieve independence. Please keep in mind, the area does not have safe access to the bus stops on Beaverton-Hillsdale Highway; Shattuck Road does not have as idewalk (and there was a pedestrian death crossing BHH at Shattuck a few years back)
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Residents of Southwest Portland have the least sidewalk coverage, the least connected sidewalk network, the least number of connected bike routes, the fewest planned bike routes, and the worst transit coverage in Portland. Too many of our biggest roads, the collectors and arterials, lack sidewalks, and safe crossings. The Red Electric Trail is already providing needed connectivity though the hills. The project is an especially important section of the trail. It is worthy of investment.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	We live in the Hayhurst school district. There are very few sidewalks in our area and would love a safe route for pedestrians.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	with the development of the Alpenrose dairy site, this a crucial connector to the new neighborhoods northern boundary. This is in the name of safety for commuters and children of Hayhurst school. In addition, it's a keystone to broader red electric story. As a neighbor, creating safe routes to hillsdale would be a huge business boon to easily funnel patron to the services there and avoiding the busy and often sidewalk less beaverton hillsdayle highway and Vermost street. Recall too that this area is rife with unpaved or poorly maintained roads. This small section is a vital link to support a broader vision in the neighborhood where I've lived for 28 years.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	The Alpenrose Project to build upwards 300+ (family-sized) Housing Units will result in large influx children and a safe-walking-route to School is the least METRO can do in support of the installation of a very high-density planned community. Shattuck will have no sidewalk build out running north up to the nearby Albertsons Grocery Store. Overall - the Development appears to have little to no walkability infrastructure to get from the Development to the future Raleigh Hills Town Center
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	It is much needed for safety in our area.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Given the new large housing development going in on Shattuck Road, and lack of sidewalks on Shattuck and surrounding roads, this trail is critical for providing a pedestrian link to Hayhurst School and other parts of the surrounding community. I am certain it would also garner a lot of healthy walker, bicyclist and runner traffic and provide safe routes for kids.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This can be an essential and safe path for parents and students of Hayhurst Elementary School. Additionally, the two main roads neighbors walk in this neighborhood do not have sidewalks for most of the roads: SW Vermont St. and SW Cameron Rd Thank you for your consideration of this important project.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Biking would be safer and easier

Project Name	Applicant	Support Rating	Comment
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	The Red Electric is a must-have
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	 There is a significant lack of sidewalks and safe places to walk/ bike/ wheelchair in this area. Would be a regional benefit to connect the Fanno Creek trail, with this, the privately funded Alpenrose trail, and all the way to the river and downtown.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	I'm a high school runner who is always looking for new paths. I think this trail will make new areas more reachable for others like me. It will give an option that isn't on a sidewalk next to a busy road. Its location will also connect up to the Fanno trail, giving more people access to our wonderful network.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	The community regularly uses the stretch of unmaintained road at SW Fairvale Court and a muddy foot path at the end of the road as a route to access the local elementary school on foot. SW Fairvale has poor drainage, is littered with potholes, and is overgrown with ivy and blackberries. The entire Hayhurst community would benefit from upgrading this road and connecting Cameron with Shattuck. In addition, to school access, people also frequently use this route to access Pendleton Park. An upgrade would benefit many children and families in the Hayhurst community.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This project will connect with the future Raleigh Crest segment of the Red Electric trail across their property and anchor the western end of the Red Electric to the Fanno Creek Trail, providing a gap-free extension of this walking and cycling path that will serve residents, and schoolchildren walking to Hayhurst Elementary School.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	It provides an important link in the trail system of SW Portlandjust look at what it abutsa park, a community garden, an elementary school grounds. There is no time like the present to continue work on this wonderful concept of the Red Electric Trailsomething for bicyclists, walkers, hikers, runnerssupportive of a healthy and active community.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Off street access is critical for gardens and schools in this neighborhood
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This project combines a historical geographic feature (a former railroad right of way) with neighbors needs for transportation, exercise and recreation. By connecting pieces, this project will allow the existing trails to join into a transportation option
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	To appreciate the importance of the Hayhurst segment of the Red Electric Regional Trail it is crucial to keep in mind that this neighborhood has very few sidewalks. Only 14% of area streets have a sidewalk, making Hayhurst one of the neighborhoods with the least sidewalk coverage in Portland. This means that schoolchildren walk to Hayhurst Elementary School in the road, alongside cars. And the problem will only become more urgent once the Raleigh Crest development builds 263 new residences on the Alpenrose site. Portland Parks & Recreation's proposed RFFA project connects the Alpenrose site to the elementary school and to Pendleton Park, and has the potential to become a car-free, safe route to school for many young children.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Creating safe pathways for the community s an amazing way to support the soul of the commhnity
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	We need a safe alternative to reach Shattuck road and places west of Hayhurst. There are few safe places to walk in Hayhurst because of the lack of sidewalks.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	It has been in the planning stage for decades! We need safe routes in SW Portland!

Project Name	Applicant	Support Rating	Comment
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	I support this project because it would provide a critical interconnect on a vital, new non-vehicular pathway in SW Portland - the Red Electric Trail. I live in SW Portland (Markham neighborhood) and have frequently biked and walked through the impacted neighborhoods, including the Fanno Creek trail to the south. The Red Electric Trail adds a pedestrian/bike throughway to an area that is seriously deficient in safe sidewalks. It also provides a path for the large new development on the former Alpenrose property. I am a member of the nonprofit group SWTrails. As it has advocated, residents of SW Portland live with a dearth of infrastructure—the area has the least sidewalk coverage, the least number of planned bike routes that have actually been built, and the worst bus coverage and frequency in Portland. Only **33%** of our biggest roads, the collectors and arterials, have sidewalks. SWTrails has built and maintains our 55 miles of trails as a safe alternative to roads which lack basic infrastructure. The point is to avoid high crash corridors and intersections where possible. The Hillsdale-Hayhurst segment of the Red Electric Trail is a good example of this. It runs near, and parallel, to the Beaverton-Hillsdale Highway high crash corridor, which has a bike lane, but no sidewalks. Confident cyclists will ride on BHH—no one else will; the Red Electric offers children and less confident riders the only alternative route. Thank you very much for your consideration.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This trail would be a great asset to our neighborhood.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	There are so few trails to allow for safe transportation without cars in this area! Everyone is so excited to have this new trail in an area without sidewalks! Please consider this project! Who will use this trail? Students walking or biking to Hayhurst and other schools in our area. Community members who need an ADA accessible route. Bicycle commuters who want to avoid SW Beaverton Hillsdale Hwy. Neighbors who want to walk or bike to Oleson Road to get to Raleigh Hills or Garden Home, where they can connect to the Fanno Creek Trail.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This project is much needed. Having a safe accessible route getting through the neighborhood and to school will be a real asset in the community
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	It would greatly improve our neighborhood.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This trail would greatly enhance walkability in an established neighborhood with few sidewalks and rambling narrow roads.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	SW Portland is significantly underserved with sidewalks making goals of increased pedestrian activities difficult in many parts of the area. Hayhurst, in particuular, has only 17% coverage with sidewalks. The completion of this trail which has now been assisted by the development of the Alpenrose property and investment by the developer should make this a priority project for funding.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Red Electric Regional Trail has been planned for decades to connect the Willamette River Greenway to the Tualatin River Greenway. As a member of the neighborhood who relies on walking and biking, this would be incredibly helpful to have a safe path that connects through this section. As a bicycle commuter avoiding Beaverton Hillsdale Hwy is important as it is extremely dangerous and overwhelming to have to bike on. Also, on snow days there is not way to walk to a grocery store. This trail would make it possible to to walk or bike to Oleson Road to get to Raleigh Hills or Garden Home I can get to trader joe's and Ace Hardware
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	The lack of sidewalks in this area makes this infrastructure critical to the ability to safely walk or bike in this area. The trail will connect a wide swath of homes safety to the elementary school and adjacent park. Biking or walking on Shattuck & Cameron is dangerous for all.

Project Name	Applicant	Support Rating	Comment
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	We don't have any sidewalks in our neighborhood. Our streets are very narrow and poorly maintained (lots of potholes that cars need to swerve around, cars need to drive in the center of the road because of parked cars, making it very unsafe to walk). This trail would provide safe, walking passage for all ages, including school children trying to get to Hayhurst school. Our streets are also getting much busier because of Portland's infill goal - new homes, being built, more people, and families need to walk, and no safe place to do so.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Since there is a lack of sidewalks in this area, as well as the housing development going into the old Alpenrose property, this trail will help make it safer for people not having to walk on the streets, including kids going to Hayhurst school.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	In a part of the city with very few safe walking routes, this trail will be an essential east-west transportation route for pedestrians and bicyclists. Since the developers of the alpenrose site will be completing a significant portion of the trail to the west of SW Shattuck Rd. soon, the city should make completion of this section of the already designed trail a high priority. The trail also provides an important "safe route to school" for Hayhurst students and other local services and institutions. Please make funding this trail a high priority in your budget process.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This project is definitely needed to give pedestrians and bikers a safer place to recreate, especially kids. This will anchor the neighborhood for safer movement and allow parents to feel safer with kids on bikes. Please fund this project soon.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Given the lack of bike paths and sidewalks in Hayhurst we need a safe way for people to travel
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Making this trail usable would be a huge benefit to people who walk (+/- with their dogs) plus bicyclists and others who use electric scooters, etc. Parents can walk their children to Hayhurst Elementary School. Pendleton Park is such a great resource for this area and being able to access it from the Red Electric Trail would be great. The alternative to the RET is driving, walking, cycling, etc. in city streets, many of which are quiet or very busy; Vermont Street, for example, is non-stop traffic all of the time. I know because I live on Vermont St. directly across from Gabriel Park. Additionally, once the Alpenrose Dairy site is developed, traffic is going to increase measurably! Having a trail to avoid the madness just makes so much sense. I appreciate your consideration. Linda Kimbrough
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Having a safe car-free walking or bike route for kids and families connecting to Hayhurst School and Pendleton Park in the SW area is vital for increased safety, especially considering the development on the former Alpenrose property which will dramatically increase car traffic in this neighborhood. We do not currently have sidewalks or other safe walking/biking routes and this would be incredibly helpful and increase safety in the area.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	SW has no sidewalks and only very few marked crosswalks. Having an option for safe walking paths to school and parks is the least we deserve.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This is within the vibrant and family friendly neighborhood of Hayhurst. Completing this work would provide valuable connection between areas of the neighborhood to the park and school.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Cameron Rd and Shattuck Rd are incredibly unsafe for pedestrians. There are no sidewalks and speeding is a problem. This project will provide a safe way to travel through SW Portland.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This would be particularly beneficial because there aren't sidewalks in this area and a lot of kids and families who walk to a neighborhood school would be able to use this. There is going to be a big development of homes going up on the Alpenrose property and this would provide a safer walking/biking route for the population increase where there are currently no sidewalks in the area.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Having this trail in this neighborhood will improve the ability of kids to get to and from school. I really think that the road (SW Fairvale Ct) could also be improved as it is a bumpy, patchy, muddy mess. I don't like on this road, but it is not condusive to walking or biking and it would be silly to connect it to a brand new trail. Fix fair ale court and put in the path and the project would be helpful.

Project Name	Applicant	Support Rating	Comment
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This is a long-promised project, one that will help provide the southwest side of town with an off-street bicycle trail. Off-street bicycle trails have been built in other parts of the city, but they have received little support in the southwest side of town. This is a good step in ensuring that the southwest neighborhoods receive similar treatment as other parts of town. The project will eventually hook up to the region's bicycle trail, helping to improve that system.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	I live on a separate part of the red electric trail and my child attends Hayhurst. This trail would be a wonderful addition to the neighborhood. I live near the new walking bridge in Hillsdale and the safe access to Hillsdale has completely changed how often I visit the shops. I wholeheartedly continue to support this trail!
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	I support this project as our neighborhood has a lack of sidewalks and off-street bicycle trails. The old railroad right-of-way lies next to our neighborhood school and park, as well as our community garden, and would provide a safe corridor for the children and families of the Hayhurst neighborhood to reach these important community assets. Also, given the impending development of the former Alpenrose Dairy site, any improvements to the walkability and bikeability of our neighborhood would have a significant impact in mitigating the new development's impact on traffic and neighborhood safety. It is also a key piece in the plan to expand our region's network of bicycle trails by helping to link us to Washington County next door and hopefully allow us Hayhursters and SW Portland bicyclists to ride all the down to the Fanno Creek Trail.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Not only would this provide an excellent and safe route to Hayhurst school, but also much better access to Pendelton park and could alleviate chronic parking problems near the school and park. Moreover it would provide a link between downtown Portland and the Fanno Creek trail into Beaverton, thus a truly regional project. When our kids went to Hayhurst they had to ride their bicycles on the street, this would have been a much better option.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	I would like sideways or safe walkable spaces for myself, pets, and children. I do not feel safe walking on the side of the busy streets or Shattuck and Cameron where drivers drive well over 50 miles per hour past my children who have to walk and bike to school. It's honestly terrifying.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This is very important for myself and my family. I do not feel safe walking and biking with my children on the side of these busy streets. Cars routinely drive over 50 miles per hour on the roads in the Hayhurst neighborhood.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This is extremely important for our neighborhood children and neighbors.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Only 17% of Hayhurst streets have sidewalks. This is a critical safety and recreation trail for the community.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Since it was built, I regularly use the Hillsdale pedestrian bridge that is part of the Red Electric trail. I see others using it as well. Meanwhile, my family drives to Garden Home Rec Center to ride bikes on the trail there. If completed, kids like mine could ride bikes from Hillsdale and Multnomah Village, for free fun, exercise, and actual transportation. SW barely has any sidewalks; volunteer labor fills the gap by building and maintaining trails. Thank you.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Leverages private funds for a trail segment in the proposed Alpenrose redevelopment to extend the trail further east in an established right of way. Supports Safe Routes to Hayhurst Elementary and connects to Pendleton Park. Situated in SW Portland that lacks sidewalks and bike lanes. The Red Electric Trail project checks so many boxes and is worthy of being prioritized in Regional Flexible Funding.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This is just part of the Red Electric Trail which has several segments. The completed trail will link the western edge of Portland and eastern Washington Coiunty to Hillsdale, the South Waterfront and Downtown on a family friendly safe and desireable ride experience. With the advent of electric bicycles, the hills of SW Portland become minor issues. Metro transportation planning models have forecast a huge pent up demand for a safe continuous bicycle, ADA, and pedestrain route from SW Portland to downtown. We urge approval of this important link in the vision of a completed trail.

Project Name	Applicant	Support Rating	Comment
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	I grew up in Northeast Portland, where the streets were on a perfect grid with nice sidewalks on every block. When my husband and I moved to Southwest to be closer to his commute to Salem, we noticed the lack of sidewalks and swore we would move back to the east side before our kids learned to ride bikes. Turns out we love living in Southwest, and my husband still commutes to Salem but we still struggle with the lack of sidewalks. My daughters just learned how to ride their bikes and we put traffic cones out on our street to slow traffic and make people aware when the kids are out riding bikes, but it would be really helpful to have bike trails or paths to walk on or ride on to make the experience safer. We're interested in being able to ride our bikes further through Southwest as a green alternative to driving. We take the bus downtown, but this trail would help us get to many places in Southwest where we like to go such as Pendleton Park. I think these trails would go far to helping Southwest feel less neglected.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	We need more areas to safely bike and walk in SW Portland as there are few sidewalks. Thank you.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This has been long needed and with the developer across from shattuck offering to construct the portion of trail on their property with the subdivision it would be foolish to not build off this momentum and get nearly double the benefit vs project costs.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	The Hayhurst neighborhood is sidewalk-deficient and lacks proper stormwater facilities. Please invest in this communite asset of a trail, in order to provide connectivity to the excelent trail system along fanno creek. I am a resident of the Fanno Creek Headwaters watershed area and this upper reach of the watershed is underinvested in natural resources and access to nature recreation. It used to be an old, unincorporated rural Multnomah County that was later converted into the City of Portland. Portland has never upgraded the old county ditch and road infrastructure. so we lack safe sidewalks and have very limited riparian buffers. Please invest in our local trail network. I love to walk with my dog but this area is inaccesable currently and covered in weeds.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	SW Portland is notoriously difficult to bike commute from due to hills and lack of safe cycling routes into downtown and beyond. This project would give the west half of the city something comparable to the Springeater corridor to allow for safe transit and recreation. For too long the west half of the city has watched as public improvement projects are deployed to other neighborhoods. As a tax base I have no doubt that the west half of the city contributes the majority of tax funds but those dollars are continually diverted away. It has gotten to the point where it feels as if the city is not working for SW Portland at all. It may be time for all of us to pull up roots and leave for other cities such as LO, Tigard and Beaverton
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This seems like a very important connector for pedestrians in an area of Portland that does not have safe pedestrian access
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Excited about expanding biking path for my commute to work
Red Electric Trail East of SW Shattuck Rd	Portland Parks		Sw area needs safe access to areas to promote bike riding. SW lacks sidewalks as compared to other quadrants of the city and this would facilitate walking and biking with designated safe areas.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This would be an amazing connector for me and my family to make it to Fanno Creek from Hillsdale and help make the Red Electric trail a reality
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	I think this would be a great addition to the area!
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Creating a safe low traffic bike commuting route easy to west from the river to Beaverton is very much needed. Biking on Beaverton Hillsdale's highway is not safe or appealing to cyclists with fast cars and high traffic. Please support the red electric route!
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	The SW trails are an essential network of walking (and running) paths in SW, an area with very few sidewalks. Completion of the Red Electric would provide east-west connectivity that we just don't have right now, and Metro would be establishing that connectivity for a bargain. The small section of trail highlighted is one of the final pieces holding up the development of a truly great, useful, and healthy transportation alternative for southwest Portland.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	A safer alternative for pedestrians than high traffic streets in this area.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This is an important piece to the magnificent Red Electric Trail project, and one that would make cycling in the challenging SW area much safer.

Project Name	Applicant	Support Rating	Comment
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This is a critical bike connection on the west side. There is ample room to also include some soft surface options that are more mountain bike focused. LETS MAKE TRANSPORTATION FUN!!
			Northwest Trail Alliance could get involved in creating optional lines to supplement the main transportation line.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	The more non-car improvements we can make, the better!
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This project will provide the very needed safe and walkable path for the SW community. Right now only 17% of the Hayhurst neighborhood has sidewalk, and for three years I need to push my stroller and walk around the neighborhood in car lane which is not safe at all. And my elementary school kid has no safe route to walk to Hayhurst Elementary, from Shattuck Road. With the construction of Raleigh Crest Development, there will be even more school age kids need a direct and safe route to walk to school, instead of taking a car ride. This shall be prioritized, and can bring in bigger regional impact since Raleigh Crest is building part of the trail along their property, connecting to the Beaverton neighborhoods.
Red Electric Trail East of SW Shattuck Rd	Portland Parks		Priority shall be building the segment from Shattuck Rd to Pendleton Park, so at least school kids can walk and bike directly and safely to Hayhurst Elementary School. And that demand will increase due to the development of Raleigh Crest. This will be a much needed safe route for the Hayhurst neighborhood, which suffer from a very low percentage of sidewalks.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	SW PDX is desperately in need of safe routes for pedestrians, bicyclists, and wheeled devices to access. There are only sidewalks on 17% of roads in our area. Kids walk to school and the park on the road. Teens, cyclists and low income populations need access to safe routes that are not shared with vehicles, especially as an alternative to the frenetic Beaverton Hillsdale Highway. Please remember our neighborhood when considering the allocation of funds. It would greatly enhance our little community, especially with the impending influx of 263 residences directly impacting this neighborhood that will also be connected to this trail.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	The Hayhurst neighborhood has very few sidewalks. This trail would prvoided a much needed safe way for children to get to school and across neighborhood.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	I want to be able to walk this trail every day to be out in nature and improve my health.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This would be such a beneficial project for locals and especially all the kids in the area who walk to hayhurst/pendleton park
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	A safer crossing at Shattuck is essential for pedestrians. This trail would provide an important connection between and within neighborhoods. It's an essential piece of the long term effort to have a functional regional trail along the Red Electric route.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This project is extremely important. The Raleigh Crest development on the Alpenrose dairy property will bring hundreds of new residents into the Hayhurst. The continuation of the Red Electric trail into the neighborhood from the new development will provide a safe way path to school for the neighborhood children. Shattuck is very dangerous for pedestrians and cyclists. The Hayhurst neighborhood does not have sidewalks. The Red Electric Trail is extremely important for connectivity within the neighborhood and will be the only safe pedestrian/cyclist route between Beaverton and Portland in this area.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Vital to successful community building/connection
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	It is much wanted and needed!
Red Electric Trail East of SW Shattuck Rd	Portland Parks	1 5	SW Portland lacks sidewalks and urban trails like this are a KEY piece of infrastructure to ensure equitable and safe access to schools and parks. Large development across Shattuck (250+ homes) is breaking ground and this also will be key to ensuring safe neighborhood access.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This project would make a great impact for families and neighbors of all ages living in and visiting this area of SW Portland.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	It will create a safe walking path for the students to get to and from school. There will be one path to take instead of there being many, and it can be maintained to keep it safe
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This is an important project to provide safe access to the school from the alpenrose development as well as connecting the development to the overall community. I think it is also a good use of funds to work towards more car free/low traffic routes through our region.

Project Name	Applicant	Support Rating	Comment
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	I live along the proposed route of the RED ELECTRIC TRAIL, am an active volunteer with the HAYHURST NEIGHBORHOOD ASSOCIATION, and have actively supported efforts to develop this historic route for safe local transportation of our many neighbors (especially as a Safe Route to Schools). Back in May of 2014 I wrote up "A Walker's Guide to the historic route of the 'Red Electrics' through SW Portland" (this is posted on the SW Trails website). I am former President of SW Trails (for 5 years) and have worked closely with our many neighbors, PBOT, and Portland Parks to help develop a "Safety First" route through SW Portland and avoid our very unsafe routes along our very unsafe (for pedestrians and bikers) secondary and main auto routes. Our area of the City has very few sidewalks most of our streets (some 75%) have no sidewalks so we are forced to walk or ride in the street and risk being hit by a car. We also have very few crosswalks to help people safely cross our busy streets. PLEASE SEE THE REPORT SUBMITTED BY SW TRAILS VOLUNTEERS for all of the pertinent details and our concerns. And remember that this construction project is but a part of the much longer REGIONAL ROUTE that will provide a 16-mile, family friendly, walking and cycling route from Garden Home east to the Willamette River and downtown Portland a dream we've had for the past 30 years!
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	I think it's important for communities to be connected, safely while exploring nature and some learning about human history. It will be a wonderful addition to Hayhurst neighborhood and school. It would really be appreciated if Portland Parks could partner with Hayhurst elementary to create an arboretum along the trail. Additionally, partner with the Hayhurst elementary garden club to help restore the trail with native plants and habitat.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	Once again, institutional bias, even unintended ones, get in the way of pedetsrian and bike safety in SW and some areas of east Portland. The study behind these projects assumes ALL projects are on a flat grid with multiple choices in how to get somewhere - indeed, with multiple somewheres to get to! SW is a broken cobweb of heavily-trafficked connectors, often going from one car-centric area to another; other roads do not connect to each other, are interrupted by topography or highways and nearly all of these roads lack sidewalks. So, no, some projects do not go somewhere like a business district, or a school, or park. Many projects getting no points for 'connecting to transit' have no transit service to connect to! Last, many of the connector roads - even if they have a sidewalk - are loud and unpleasant; a project like this which AVOIDS them may be a higher benefit than a sidewalk along one. Same for cyclists. Please stop assuming we all live in SE Portland, and view projects in different areas holistically, and on their OWN terms, rather than if they check boxes geared towards a dense urban grid.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This project provides a safe connection for pedestrians in SW Portland, where sidewalks, paths, and trails are sparse. The walkway is a critical piece in connecting the fanno creek trail to other trails that eventually lead to downtown Portland and the waterfront. The neighborhood fully supports this project and hopes to see it completed in the near future.
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	This is a very important project, and I urge you to please fund it. We have practically no sidewalks in our neighborhood, and this will be a safe route for children in our neighborhood to get to school and bus stops so they are not walking in the road (which is what they currently do because there are no sidewalks). Additionally, this will provide a safe crossing across busy Shattuck Road, which has been shown in studies that most people are speeding on - even though the speed limit has been lowered twice. We also have many elderly neighbors, people who are blind and walk with a white cane, and disabled individuals who would greatly benefit from a safe paved trail - and especially one that is ADA compliant. Additionally, I want to note that this is part of a larger regional trail plan, and we need this connectivity to help us not be so car dependent. People will feel inclined to ride bikes and walk more with this safe trail. I would safely bike to the grocery store with the addition of this trail, which I wouldn't consider now because there are no bike lanes and it's not safe. Our roads are clogged with cars because it's unsafe to walk and bike on our roads. This super important trail will reduce greenhouse gas emissions and help our earth. I wholeheartedly support this project. It will make a huge positive impact, and not just for our community, but all of the Metro area because it's part of a larger regional trail network. Please fund it!
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	I feel like Southwest Portland often gets neglected when it comes to the walk ability and rideability of our neighborhoods. We have lots of walkers and bike riders in this area too, and they are underserved.

Project Name	Applicant	Support Rating	Comment
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	It is needed. A whole neighborhood is being built on the alpenrose site (west end) and there will be kids that need to get to the elementary school (east end.)
Red Electric Trail East of SW Shattuck Rd	Portland Parks	5	The Red Electric trail would provide a much-needed non-motorized corridor between the school and Alpenrose development. Additionally, it will help our community enjoy a vibrant natural area that is currently not well accessible.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	1	There are already sidewalks on Merlo, and the travel lanes extra wide, surely striping could accomplish adding bicycle lanes.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	1	This road already has sidewalks, while much of Aloha does not. I would prefer sidewalks being added to more areas of Aloha before adding a trail to an street that already has sidewalks.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	2	build a cheap sidewalk along here instead just something functionable and safe. doesn't need a huge amount of effort put into it.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	3	I urge decision-makers to recognize the critical need for a crosswalk at the intersection of SW Merlo Rd and SW Merlo Drive to enhance safety for community members, students, and staff in the area. This intersection is frequently crossed by students, educators, and residents, but the lack of a designated pedestrian crossing creates significant risks. Vehicles often fail to yield to pedestrians and routinely travel at speeds exceeding 30 miles per hour, which makes crossing unsafe. Installing a crosswalk would greatly improve safety and promote a more pedestrian-friendly environment for all.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	4	This is a much needed trail section to connect our beautiful nature park and regional trail resources to the nearby neighborhoods. I regularly use (at least twice a week by bike) the Westside and Beaverton Creek trails at this location, and that infrastructure can easily support more users. I think this additional trail section will open up opportunities to so many more families in the neighborhood to enjoy such a wonderful Beaverton resource and get exercise in the process.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	4	Improving pedestrian flow to the MAX is great
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	This is a critical link between the Westside Trail and Merlo MAX station and all neighborhoods west of 170th. My family and I live just west of 170th, near Beaver Acres Elementary school. We would like to ride our bikes on the westside trail, but don't do it, because we don't feel safe accessing it along this stretch of roadway. Cars and trucks drive at very high speeds, making it feel incredibly unsafe. Not only this there are often kids walking along this stretch to get to Beaver Acres Elementary School and to Merlo High School. I am very much in support of funding this critical link for people walking and biking. Thank you.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	This community deservers to have better walking and biking infrastructure!
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	This would be a nice connection!
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	I come to this area frequently, and filling this trail/connectivity gap would go a long way toward improving access for families and people without cars, as well as bikers and all pedestrians, to this important natural area. This is a no-brainer. Please fund it!
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	This would provide a critical extension of the Beaverton Creek Trail that would connect schools, residential areas, parks, and commercial amenities. Washington County has a planned complete street improvement project on 170th Ave that would bring sidewalk to this connection.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	This is a great project to provide access to an elementary school and a trail system.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	This link between Trimet, Waterhouse Trail and the alternative high school, as well as the developing areas west of 170th Ave, have generated more demand for active transportation in this area. Please help fill this need by funding this project.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	It would make non-auto life in the area more pleasant
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	would fill a gap for biking, walking, access to transit. So important. Connects to longer trail lengths. Please build!

Project Name	Applicant	Support Rating	Comment
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	I support the completion of a multi-use path to complete this trail. It is important to have a robust and safe area for people to walk, bike, and transit.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	This project would greatly help the student at the Merlo Station Campus who travel by foot and bike from the Merlo Max Station to the school. Please fund this project and include a crosswalk/signal at the intersection of Merlo Rd and Merlo Dr.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	they should do it because when I ride this I feel very unsafe and this multipurpose road will be very helpful, not towards only me but others. I will be very happy with this and they should make this now because I don't wanna wait three more years for this to come when the idea is so amazing. also they should make a cross walk going to merlo from the apartments so people are constantly running across the roads. also this road improvement will be the best. love yall
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	ooh boy, oh boy. merlo really needs this road improvement. I feel very unsafe super close to the cars when riding my bike. make this happen!!!, if not now. do it sooner please!
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	Merlo Station HS is on Merlo Dr, off of Merlo Rd, and we have a lot of students who take transit, including young parents with their children. Anything we can do to make this road safer for them is a plus. We also love to use the Tualitin Nature Park as a place for students to gain outdoor field experience in our life-sciences courses. Again, any safe travel we can provide for students, the better. Beaver Acres elementary students also use this path. Please support these projects to provide a better experience for our students.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	This is a very dangerous road and dark duing the Winter months. We have Merlo CommunitySchool at SW Merlo, students are often walking from the Max to school, cars drive fast, any improvements would be greatll appreciated for our studnets.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	1 5	For bike traffic a connecting lane to the Augusta Ln bridge would truly complete the trail. 170th is quite narrow passing by the school. Fortunately the Augusta Ln bridge provides a way for bikes to avoid the rest of narrow, high speed 170th even if it is out of the way for some destinations.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	There should be marked crosswalks and a signal at the corner of Merlo Drive so students can access the Merlo Station Campus safely from the south side of Merlo Road. We have a number of students who live in the apartment complex there, as well as students who walk from or take Max rather than district buses.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	Great project.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	Can we widen Merlo Road to 5 Lanes from 170th to 158th. Eliminate Railroad Crossings to a Grade Separated Overpass. Cause MAX is a Very Frequent Service.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	This will help people get downtown on the future parts of the Beaverton Creek Trail, making the entire area more walkable and bikable
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	This stretch is not bike-friendly, so it would be good to complete an update to help make better connections for riders.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	If this segment and 170th are both improved with protected bikes lanes, Aloha will finally have a safe bikeway. Currently the options are: TV Hwy (high speed highway), 185th (high speed arterial) or 170th (lower speed narrow road with no sidewalks, let alone bike lanes).
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	Merlo is a nightmare to bike on for my daily commute. Please support this project and make it more pedestrian/bike friendly!
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	This is a short street, but it feels incredibly dangerous on a bicycle. And yet, it's the only semi-feasible east-west route from the Westside Trail and Tualatin Hills Nature Park. If this is completed, it would create a safer connection west into the neighborhoods and towards Hillsboro. By connecting with the Westside Trail, the regional connectivity is dramatically improved as well.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	GREAT PROJECT - Looking forward to this gap being closed in the off-street path and trail network. Thank you.

Project Name	Applicant	Support Rating	Comment
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	This is an example of those low hanging fruit that can have a big impact. Merlo is currently a fast, dangerous, and unpleasant road for people outside of cars. This project would help improve access to dense neighborhoods, employment, and schools. It would connect well to the existing trail network, meaning the previous investments we've made will benefit. There's a gap in our safe bike network between Aloha and Beaverton, and this would start to build a good, safe connection between them.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	I regularly ride my bike in this area and I concocted a weird route through neighborhoods specifically to avoid riding on SW Merlo Road between the Merlo/158th MAX station and the Augusta street footbridge over Beaverton Creek. Most people are not willing to go blocks out of their way—they'll drive instead, or ride on the (narrow) sidewalk. Filling this gap and making the Augusta bridge more accessible would be a huge improvement for people walking and biking in Washington County.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	Washington County's greatest need for bike/ped infrastructure is in East/West connections. Routes to connect Hillsboro to Portland are frustratingly disconnected currently.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	This is a valuable trail link in so many ways, especially with 170th improvements (hopefully) also on the way.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	This would be a welcome connector from the MAX and Nature Park westward to 170th. Augusta is a nice bicycle connection too with the new bridge in place.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	I have been a volunteer in the THPRD for over 20 years. I especially volunteer at the Tualatin Hills Nature Park, where I am current chairperson of the Friends of Tualatin Hills Nature Park. I have been a strong advocate of the trail network and have run/walked many of the trails. I feel completing another section of the Beaverton Creek Trail will be a huge benefit to the community. I look forward to connected safe Beaverton Creek Trail.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	Closing the gaps isn't necessary way to create safe passage for pedestrians and bicyclists in our community. Those safe passages give alternatives for people being on the road.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	This is an important connection between local schools, businesses, housing, the Nature Park, and the regional trail. It's a key gap to fill in the existing trail network. It would serve a diverse neighborhood.
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	Can we widen this to 5 Lanes & a Roundabout on Merlo @ 170th?
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	Put a Traffic Signal on Merlo Road at Merlo Drive
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	Put a Roundabout on Merlo Road at 170th & widen 170th to 5 Lanes from Baseline to Alexander Street
Beaverton Creek Trail: Merlo Road Improvements	Beaverton	5	Build a Light Rail Bridge over Merlo Road. So the Intersections at a Bus Yard will stay Coordinating's or a Temporarily Robot Sensors Al
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	1	Why on earth is this one block being prioritized when the surrounding area and crossings for Farmington and TV highway are just blocks away and desparately need safer crossings? This block of beaverton already feels pretty safe so this feels like a HUGE waste of money.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	1	Hard to find value in this as sidewalks and bike lanes exist.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	2	I'm supportive of bike/ped improvements in downtown Beaverton but this seems extremely expensive for the space.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	2	This seems really expensive for a very short segment. There are already sidewalks and a bike lane at this segment, I don't see why this would be the first priority. It would then dump cyclists right back onto the road after two blocks. Is it a part of a much bigger project? Are the other segments under construction already? This doesn't make a lot of sense to me.

Project Name	Applicant	Support Rating	Comment
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	4	Good idea.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	4	I think we need clear cross walks over anything at this stretch of Hall blvd, especially in the area between BHH and Canyon. I think instead of adding raised infrastructure. Spend the money elsewhere where there is no infrastructure for bikes and pedestrians
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	This can be a key project to demonstrate the value of the complete Loop project and jumpstart that effort.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	I think this could be one of the most important, impactful projects on this list to demonstrate our regional shift away from prioritizing cars in our downtown areas. This could be an example of what's possible for others to follow.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	The Loop is one of the most exciting regional projects in development! This portion of Hall is not as safe as it needs to be and can provider safer access to the park, library, farmers market, and numerous other services people need on a daily basis.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	This project is essential to saving lives and improving quality of life in Beaverton. Downtown Beaverton is currently deadly because of high vehicle speeds, dangerously long pedestrian delay at intersections, and a built environment that is entirely hostile to active transportation. This project is one small step toward improving this unacceptable situation.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	This project is essential to both person safety, but also the economic vitality of the Downtown area.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	I support this project but wish it was for a larger stretch! It sounds amazing and beneficial to our community.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	Anything to improve access and walk ability to downtown Beaverton is good!
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	This project would greatly increase the walkability and bikeability of downtown Beaverton, as well as increasing safety and efficiency
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	I thought the Phase 1 is on Watson Street between Milikan Way to 1st Street. Downtown Beaverton does need a Major Makeover. New Traffic Signals and Railroad Crossing Replacement. We need wider sidewalks and Bike Lanes.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	This project will help be a catalyst for the downtown loop
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	This area gets a lot of bike and pedestrian traffic and it would be great to improve it for those users.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	This is a highly-used walkway already; improvements will be noticed by many.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	I live in Central Beaverton, and travel by walking or biking to downtown at least a few times every week. I am so excited for this Downtown Loop project to be completed, so that my young children and I will feel safer and more connected to our Beaverton community through more easily walkable/bike-able infrastructure in Downtown Beaverton. My young children are just starting to learn to ride bikes, and this Downtown Beaverton Loop Project gives me such hope that they will live in a more open and accessible community than I ever imagined in our car-centric society. When my children are older I will feel more secure in the knowledge that they will be safe independently riding their bikes and exploring our beautiful Beaverton downtown (Library, Parks, Farmer's Market, Arcade, Restaurants, Performing Arts Center) if we invest in and complete this project for them and their entire generation of Beaverton residents.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	I live and work in downtown Beaverton. I commute primarily by walking or biking. My husband and I would love to bike more often but the lack of dedicated lanes makes it feel unsafe in certain seasons/weather. This project is one I am very excited. A commitment to improving safety and access for transportation with less carbon emissions is an important step.

Project Name	Applicant	Support Rating	Comment
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	I wouldn't call A green line on a map an image of what the project will look like. You would get more support if there was an architectural rendition of what you are planning to do. I don't like the idea of having bicycles and people in one area. Will there be lines to differentiate people from bicycles. Are electric bicycles and scooters going to be allowed? (An accident waiting to happen)
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	Very supportive of this work for the loop project!
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	Downtown Beaverton's accessibility should be a priority
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	We need 100 more projects like this, that are dedicated people and bike only spaces. Nothing improves the quality of life in a city more.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	The total project cost shows just over \$5M, but the full build-out of the Loop is much more than that, potentially higher than \$100M. This is completing one more phase of the project. With this phase complete, Hall Boulevard would be fully reconstructed between 5th to 1st, completing a major portion of the Loop.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	Why not all the way to Broadway? Very short.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	I regularly ride my bike from Bethany to the Beaverton Farmers Market, and this portion of Hall is part of my route from the market back to Millikan for my journey home. This portion of Hall Blvd is a much needed improvement to the downtown Beaverton area. While of course I'd love to see the whole downtown loop project funded at once, even a small piece of it would be amazing. Yes. Do it.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	Cars go way too fast here. I would love safer infrastructure around the library so that my 6 year old can safely ride to and from the library.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	The Beaverton Loop project would be pivotal in our access to downtown Beaverton, including while frequenting the farmers market and downtown restaurants and shops. Beaverton has so much to offer but getting to downtown is difficult and unsafe with the larger highways running through.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	The loop project is a key project for making downtown Beaverton more accessible and economically strong. It will also help build out a badly missing safe bike network to our area. This starting project will help be a demonstration and a catalyst for what we can do to improve our downtowns into places that everyone can feel safe, not only those on cars.

Project Name	Applicant	Support Rating	Comment
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton		Dear City of Beaverton We do agree everything you said it before. Downtown Beaverton Streets on Hall & Watson both need a Major Makeover. It is a Dangerous Intersection that involves so many accidents. Starting on Phase 1 on Watson between Millikan Way to First Street. Extension to Millikan Way to Lombard & Hall can be a Last Project. It will expect up to 5 to 10 Years or more. Downtown Beaverton Area is Unwelcoming & Dangerous to lots of Traffic. We need to make things Welcoming & Freindly. We need Wider Sidewalks for Pedestrians, Bike Lanes on Green Paint, Additional to Streetlights & Trees. It will also include Bus Shelters & Rebuild to Traffic Signal Intersections & Rebuild Railroad Crossings. Both of them are Outdated & it needs a New Upgrading. Quiet Zones on Freight Trains is OK as long is we add a Pedestrian Gates & Side Lights for Vehicles. Add a New Cantilever on the Leftside on Watson approaching Farmington. On Hall Railroad Crossings is to add a Guardrails so heavy trucks don't hit that crossing. Both on Hall & Watson needs to be rebuild with New Signals in a different spot on Foundation. It should be moved next to a Sidewalk. We would like to Eliminate Railroad Crossings to Bridges or Tunnels. Unfortunately it won't be anytime soon & it's Very Expensive. It's Very important to Save Humans Life's over Freight or Passenger Trains. Someday in the future is to change Farmington & Canyon Road into a One Way Street Couplet between Hocken to Highway 217. It always causing Major Problems & Heavy Traffic Congestions. Can Train Preempts to the Intersection be Removed & to install a Light Rail Bridge over Hall Blvd. Which will Eliminate Dangerous Railroad Crossings. We are looking forward to hearing from you to start on Construction in January 2027.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	Can we change Farmington and Canyon Road into a One Way Street Couplet between Hocken to Highway 217? Farmington Road to be Eastbound Traffic Only & Canyon Road to be Westbound Traffic Only. Having 4 Travel Lanes with Transit & Right Turns in the Right Lane. We would also like to Eliminate All Railroad Crossings to Grade Separation Only 100%. Either Build a Bridge or Tunnels, in order to Ease Congestion, Saving Life's & Improving the Environment. That should be a better Traffic Flowing in the Future.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	Pair this with some cheap demonstration improvements to complete the corridor and make this more continuous/ impactful and really showcase the future of the loop.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	Can we Permanently Eliminate All Railroad Crossings? 100% to be replaced to a Grade Separated Bridges Only. Cause we want everybody to be safe around Freight or Trimet Trains. We don't want anyone to Die.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	Construction will start Breaking Grounds for Downtown Beaverton Makeover in 2027 We need Wider Sidewalks and Bike Lanes.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	5th Street needs 3 Lanes, One Travel Lane in each direction with a Center Turn Lane. Additionally a Flashing Yellow arrow sharing on Steady Yellow. Green Arrow on the bottom.
Beaverton Downtown Loop: SW Hall Blvd – 3rd St to 5th St	Beaverton	5	Traffic Signals on each Block with a Automatic Walk Signals & Leading Pedestrian Intervals before Vehicles get a Green Light.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	1	Do not use ai. This only ends badly when you let ai take over infrastructure

Project Name	Applicant	Support Rating	Comment
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	1	Al will cost infinitely more in the long term via water and energy shortages. Please don't steal more of our limited resources just to power a street that will more than likely continue growing crowded anyway. This isn't a sustainable decision. Sustainability means creating a street that is more walkable and caters to public transportation. That will ultimately decrease traffic on the streets and contributes to a greener society something Oregon has aspired to for my whole youth and 20's. This is a step backwards and doesn't reflect the Oregon I grew up in.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	1	Al powered ?? Seriously? Stop wasting tax payer money on hype. Build better infrastructure to support non-car-oriented travel, such as separated bike and ped paths. This intersection is a nightmare to cross on foot or bike. "Al" will not help with this.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	1	Red light cameras increase accidents. This is a waste of money when a more permanent overpass solution has been identified. I would prefer to move directly toward the permanent solution.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	1	Max has disrupted every intersection since its inception. You should have built Max to go under or over the intersections. I still believe that going over the intersection is the best alternative. Inis is not a good project to spend our hard earned tax dollars for the following reasons.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	1	Implementing ITS requires significant upfront costs for infrastructure like sensors, cameras, data processing centers, and communication networks. Ongoing Maintenance: Maintaining and upgrading these systems can be expensive, including regular repairs, replacements, and software updates. Financial Burden: These costs can be a significant financial burden, especially for cities or regions with limited budgets. 2. Privacy Concerns: Data Collection and Surveillance: ITS systems collect vast amounts of data about vehicle movements and potentially individuals, raising concerns about constant surveillance and potential misuse of personal information. Data Security Risks: The large volumes of data collected by ITS systems are vulnerable to cyberattacks and data breaches, potentially compromising sensitive information. 3. Security and Reliability Issues: Technical Glitches and Malfunctions: Like any digital system, ITS are susceptible to technical glitches and malfunctions, which can disrupt traffic flow and create chaos. Software flaws and Vulnerabilities: Software flaws in connected vehicle systems and ITS infrastructure can create security vulnerabilities and potentially lead to system failures. Cyberattacks: ITS systems are increasingly targets for cyberattacks, which could lead to traffic disruptions, accidents, or even compromise critical infrastructure. Interoperability Problems: Different ITS systems and technologies may not be designed to work together, leading to compatibility issues and reduced effectiveness. Reliance on Technology: ITS systems are heavily reliant on technology, and any failure or disruption of that technology could lead to significant problems. 4. Other Challenges: Public acceptance of ITS technologies can be a challenge, particularly if there are concerns about privacy or security.

Project Name	Applicant	Support Rating	Comment
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	1	Machine learning typically happens through trial and error often requiring hundreds of thousands of errors to get good at the job you're trying to program it for. Considering this is only a short-term stop gap measure you will get the worst performance out of the AI. Given that it's an emerging technology finding people to repair it will be difficult as well. Tech companies are also infamous for burying in the details of their terms and conditions ways to steal data from the general public. It would make more sense to get rid of the light on stepping stone and make a new road in the newly developing area now that the greenhouses are gone. Stepping stone is just too close to baseline and doesn't allow many people to make a left hand turn if they're traveling northbound on 185th.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	1	This was supposed to be a survey. One multiple choice question? If you don't even know how to create a relevant survey why should I trust you knowing how to spend millions of dollars wisely?
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	1	Stop letting developers destroy the forest lands and make buildings on them and make the area more congested. All the beautiful trees and parks were destroyed on Walker and built many many buildings that are causing all the congestion. How about NO more buildings? Prevention is the key.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	1	What a waste of money. SW 185th avenue needs a cycle track and a light rail line; instead, you're proposing this? No. This is milquetoast. This is a useless half-measure. Stop wasting our time and the region's resources on this BS.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	1	There is a lot of traffic on 185th and Baseline during a considerable number of hours of each day. This project would help ease the congestion and make it safer for drivers and pedestrians.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	1	This sounds like a huge waste of 4.5 million dollars. Trimet is already losing billions of dollars a year. Throwing more money at it, will not fix it.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	1	Too expensive, minimal benefit. Let TriMet fund it.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	1	Get rid of the light rail. People are afraid to ride it
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	1	the ridership is down 40% and so reduce the trains by 40%. Move the train stop away from 185th to keep the speed of the train up. Stopping there makes the train slow down.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	2	Move the rail line to go above or below the street then your traffic congestion issues will be solved. The MAX makes that intersection extremely unsafe.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	2	Why waste money on this when you already know you need to rebuild the bridge that is next to 185th to go over it. These figure also do show what the upkeep will be to maintain all this high end equipment and the cost of ai associated with it.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	2	I would prefer to see money spent to raise the road or lower the max tracks to eliminate the jams at this intersection. I also prefer to improve the experience for drivers, not bus riders. Metro funding from car registration being applied to bus transportation feels like a misuse of funds.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	2	I'm leary of the fact that it is controlled by AI. Why does it have to be so fancy? And just what is "Transit Signal Priority"? Does that mean that every time a train is approaching, AI is going to interrupt traffic to let the train go through? That doesn't sound cool.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	2	I see nothing in this project that will help walkers or bikers. We should focus more on non-car issues in the area.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	2	A more needed solution is to elevate max line higher like Richmond BC's light rail lines so vehicle traffic and light rail line do not have to stop and wait for each other.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	2	Why? So Tri-Met can run faster buses? If we want to improve public transportation, then we should run a light rail from TV Hwy to PCC Rock Creek. Connect it to Tri-Met bus lines at TV Hwy, Cornell, Walker, Rock Creek Blvd, and West Union. Hop on and hop off for shoppers at Tanasbourne, students at Westview and PCC, and additional transit to Quatama MAX lines.

Project Name	Applicant	Support Rating	Comment
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	2	185th Ave. in Washington County has developed into one of the majou county roads in the area. The traffic management is essentially a failure from north of HWY 26 to Farmington Road. The multitude of traffic signals on 185th have not been aligned with others within the route. A program to make 185 the major traffic path in this area would include that all traffic signals would be programmed to permit as much constant traffic flow as possible! This should be an extensive case study in traffic management. I believe other cities/planners have done this in many other locations. I have heard of some coordinated projects that are being used but I have not seen any positive result. The area from NW Rock Creek to Baseline has so many signals but there is no real effort to permit a flow of traffic either south or north bound. Washington County, Hillsboro and Beaverton have permitted extensive development in the area (region) with no additional significant traffic improvements. The subject of public transportation in the area of Washington County is nearly non-existant. I used to use Tri-Met prior to the MAX system with relative rapid trips and many people actually used the system. One just needs to look at any Tri-Met bus or MAX train at nealy any time of the day of the week to note that the Tri-Met system in the region is a failure! In short, this Smart 185th Avenue Project will be studied for several years, designed and after another ten years construction that will start, the project will be obsoleted due to technology advancements and the planners realizing that directing people to do something they do not like is like hearding cats! I have purchased property more than fifty years ago and have seen the development occur. I am also a Registered Professional Engineer that has worked on many utility, road and traffic projets in the past. I am not optomistic about this.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	3	It sounds interesting but I don't understand the AI element of this project and why that is needed for traffic signals.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	3	The turning light facing West / turning south is almost always stalled due to the Max crossing. Turning right onto 185th from Baseline is always backed up due to the Max line.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	3	giving the bus's more access to the road would push cars back more in the right away
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	3	please stop prioritizing the mostly empty transit system at the periphery of metro every time my car stops for the max we play the "count the metro passengers, vs. count the cars" game and usually its 3:1 cars vs people in transit, and frequently transit is totally empty!
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	3	Especially the left turn onto baseline. It literally is green for 4 seconds. Traffic get supper clogged up there because ony 2-3 cars can make it thru.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	3	No cameras
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	3	Good to help light signals be intertwined but This seems like you are just kicking the can down the road for trimet bridge that was to be built 20 yrs ago. It's also kind of shocking to find out that the traffic signals are not tied to get her in some way. Why was the better red line project before a bridge?! Side question why wasn't there development fees charged to the panzer nursery redevelopment project to help pay for the bridge anyways?
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	3	Is it fair for the City of Hillsboro to promote this via email blast (Mar 31, 2025, 10:36 AM) and web sites saying "Voice Your Support"? It does not seem appropriate for a government entity to endorse. See https://content.govdelivery.com/accounts/ORHILLSBORO/bulletins/3d91cbd. Please do not allow the number of comments to be a factor due to the City of Hillsboro promoting its own local ones only.

Project Name	Applicant	Support Rating	Comment
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	4	I am very concerned about the dedicated bus lane that is mentioned but not detailed. Y'all have a bad reputation for pushing through TWO pet projects regarding this intersection and ignoring public feedback. All prior concerns raised have come to pass: (. Other than being freaked out about the possible bus lane, my top suggestion is: If you are installing smart train sensors, then put the left turn lane back into place and quit the stupid forced cloverleaf. The problem with the left turn lane (east baseline to north 185th) is that if a train comes, cars could get stuck in the intersection. Smart sensors can prevent this from happening. You don't have to physically remove the cloverleaf (that would be expensive). Just reinstate the left turn lane along with the new sensor support. Half of the time, people in the cloverleaf cannot get onto 185th when their light is green because northbound 185th traffic isn't stopped early enough and the intersection is full of cars.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	4	I know that 185th is a busy thoroughfare but sometimes the lights at Holly and Heritage to turn onto 185th seem to last red an extraordinarily long time. Also, the Trimet trains really cause large backups at times (especially with the Red line addition and at times a double wait because there are trains crossing in both directions). Glad something is proposed to mitigate these issues
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	4	There are often long lines at lights on 185th. This not only annoys drivers, it can limit access to business entrances and encourage light-running. Please approve this project to enhance safety and productivity in our community.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	4	Badly needed to aid in congestion which caused frustration to drivers, bike riders and pedestrians. Frustration constantly leads to everyone taking chances, or making VERY unwise actions. Additionally, action at the intersection is slowed due to drivers moving forward to the intersections as they wait for "risk takers" plowing thru red lights, or making unwise changes within the intersection. Also bikers are frustrated resulting in their going against signals, not allowing drivers to deal with traffic. Bottom line, everyone "pushes the window", esp if they think a MAX train is coming causing further delays.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	4	This is a major thoroughfare in Washington County, and it is also a bit of a mess. People who are traveling eastbound on Baseline and are unfamiliar with the area have little awareness or warning of the fact that they cannot turn north on 185th, which causes accidents. The MAX goes through this intersection often, and with its ability to change the traffic lights, I have waited through 3 or 4 lights numerous times while simple traveling south to north on 185th. The intersection is unclear and dangerous for the amount of traffic "exceptions" associated with it. There is also the consistent presence of pedestrians at this intersection, which causes additional potential mishaps/dangers for people. PLEASE make this project a priority, as we very much need better technology to manage this intersection, or an intersection revamp (which would cost so much more in money and traffic issues over a long period of time). Improvement at this intersection would improve efficiency, time, traffic congestion, and safety outcomes for both drivers and pedestrians. This problematic area only continues to get worse each year at all times of the day, not just peak hours. Please know that as a lifelong resident of Washington County, resolving safety and congestion issues at this intersection is a major priority. Thank you.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	4	Traffic along this corridor has been increasing. Enhancing the flow of traffic, and safety of pedestrian and bike traffic, is essential.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	4	Priority should be placed on making this section safer for pedestrians and bicyclists. And improving bus service throught this area. Lastly, lowering the speed limit.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	4	Would have been better to build an overpass for the max decades ago but improved signalling would also help here. This intersection is often brought to a standstill. This isn't my favorite project because I think the money could be better spent doing the hard work of building safer bike lanes/paths, multi-use nature trails, etc. The "Al" may not work at all and then a lot of money has been wasted.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	4	The intersection of Baseline and 185th itself seems to be the biggest issue, with the way the light rail track affects the signals. Once you get past the rail going either way there's not really much of a traffic issue, but the intersection at 185th and baseline northbound can sometimes feel like it's stuck forever watching every other street taking several turns before allowing the northbound traffic.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	4	Pedestrians are being stranded when the cross lights don't work because a train came through. There needs to be better timing, or smarter crosswalks - if the pedestrian wants to cross 185th, they're going the same direction as the train. Let them. Perhaps consider stopping all traffic in all ways and allow pedestrians in all directions. This is painful, and I know the fix will be painful as well, but hoping for a better experience for those trying to GET to the MAX station not being stopped because of a MAX train crossing!

Project Name	Applicant	Support Rating	Comment
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	4	lane turn usthisto have so 185thon baseline of south Liv .turn a geteven not do you sometimes terrible is 185th581 to baseline fromm lane turn Left
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	4	turn a get even not do you Sometimes
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	4	There are too many traffic signals in such a short area
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	4	The intersection at 185th and Baseline has historically been terrible for as long as I can remember. I've seen so many accidents and even more almost accidents, plus it takes forever to get through the intersection sometimes, mainly due to the timing of the lights with lightrail. Then there's the odd way of getting onto 185th from Baseline, it's not your normal take a left, so many people miss that. I basically avoid that intersection if I can now.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This is essential and needs to be prioritized
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I believe this project came about because something needs to be done about the backups at the MAX crossing. This project would be a huge benefit to heavily utilized corridor.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This project would help mitigate congestion on 185th Avenue by adding smart signal technology to the corridor to assist with bus preemption and pedestrian crossings. This project will increase safety for pedestrians and cyclists by providing adequate crossing windows, which will deter them from crossing the train tracks at inappropriate times.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This intersection has a high volume of traffic both vehicular and pedestrians who would benefit from increased safety.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	It's encouraging that county is willing to explore more innovative solutions before spending more \$\$\$ on construction. Although, this could be a temporary solution, it could be a great case study for Washington county and has the potential to make the whole traffic system much smarter and efficient. An AI powered intelligent system with presence detection and alligning traffic lights accordingly will not only save waiting time, can also save gas and it contributes to further improving our climate as well!
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This is a key investment to help improve multimodal transit. N/S transit routes have been lacking in Hillsboro for some time and this investment can help to address this long-standing issue by improving safety, transit reliability and overall reliability improvements for all users.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Please prioritize cycling, the current eastbound Baseline configuration is a death trap. I've been cycling for 40 years and am very comfortable in traffic and that merge on the east side of 185th always makes me wonder if I'll make it through. That is some horrible infrastructure, totally car centeric in design.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Needed!
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	185th is a nightmare at all hours of the day
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I would be so thankful if this went through. I'm beginning to loathe having to travel on 185th. The combination of the train and lights can really back up traffic at Baseline.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Good start but not sufficientneeds overpass for MAX
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Let's stay ahead of this looming problem before someone gets killed. This is a stopgap measure while the funds are found to install the actual solution of a raised grade rail line over 185th.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I take this road several times a week. Better roads and a better bus system would help.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Traffic flow is very "temperamental" up and down 185th due to multiple school accessways plus lots of incoming high volume east/west roads

Project Name	Applicant	Support Rating	Comment
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This is definitely needed, but it was predicted 15-20 years ago. Stop wasting money on Band-Aids and do the job properly.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This project is key for the current and future growth of the region - seems like it really benefits all modes of transit!
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	With MAX Better Red, the increased trains has only made this more congested, and the Willow Creek apartments have added to this as well. Any help in improving this intersection is highly appreciated, especially with South Hillsboro growing.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I travel through this are frequently and the left turn from 185th onto Baseline is one of the longest waits in the area, often worsened when the MAX comes through. An improved signaling system would ease congestion and make it safer for pedestrians and cyclists crossing through.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	While I think this project is needed a better choice would be Baseline road from 185th to Cornelius Pass. Those lights, especially at 205th are horrible at co-ordination and have larger backup traffic times.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	185th is a very busy and crucial areas between hillsboro and beaverton. Traffic here can be an absolute nightmare and it gets exacerbated due to short lights becomes of oncoming trains from the MAX. Having a smart sensor and real time traffic lights will reduce commute times, prevent accidents, and overall help with the flow of the daily commute.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I'd like to see this happen, as I live on 185th, and the traffic lights are terrible - they definitely do not allow for traffic flow.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	185th can get extremely congested. I live right off of it and traveling just up the block during rush hour is a massive headache. Many times it feels like you're waiting at long lights for only one or two cars to turn off of a side street, causing bottlenecks. This initiative would significantly benefit not only nearby residents, but also businesses on nearby Walker or Baseline Roads.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I attended the community involvement meeting where this was presented. It makes great sense to work on the timing of the lightrail to reduce the number of times traffic needs to be stopped (possibly in half!). I have shared this with multiple neighbors and they are equally impressed with the possibility.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This project will make travelling the area quicker and safer. As a bike commuter the intersection at 185th and baseline has always worried me and my safety.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Quite often, when driving at this intersection, I've been left sitting at a red light while other sides get multiple greens before my light turns green. This project needs to happen.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	The intersection of Baseline & 185th is quite a hassle, moving to the north and especially moving north trying to turn onto westbound Baseline. Adding better stoplight timing to the road would be greatly welcomed.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	My commute from below TV Hwy to Hwy 26 on 185th is the longest and most frustrating part. I get stuck at this light, and then the max stop for up to 10 minutes. I often need to turn left from 185th onto Baseline to get to the Align and Shine business and I stop at this light, not getting a green, sometimes for 3 cycles. Why does it take me 20 minutes just to get up 185th?
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	These improvements are very necessary to improve traffic flow and safety on 185th.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Make this a priority as it is needed urgently to fix the constant gridy
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	There is no way to overstate the need for improvement here. Traffic along this corridor is heavy, and the existing patchwork of traffic management creates many unnecessary stops. Connecting all the dots to maximize overall flow will massively enhance commute for thousands of people, and especially make public transit more attractive by lowering riding time. Please make this project a reality!
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	The project improves the safety of people walking on 185th Avenue by reducing the walking delay to cross Baseline Street. It also helps reduce greenhouse gas emissions by improving the saturated flow of the 185th Avenue. Bus service along 185th Avenue also improves with this project. This project is a win-win for all modes of traffic.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This is an unsafe area during high traffic times. I worry about pedestrians, children and bike riders navigating around the angry drivers who rage drive around the busses and trains. There are apartments, a day care and a max station all right here, they deserve more safety.

Project Name	Applicant	Support Rating	Comment
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This project is extremely important for commuters like us. All the motorists suffer when they travel north bound on 185th Ave, and have to wait for extremely long time to turn left onto West bound of Baseline. If a Max train passes then they'd lose a turn for the green left-turn signal, and the left-turn lane capacity is severely under-sized for the the amount of traffic.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This section of road is infuriating. With just a bit of timed lighting and adaptive traffic control it could be *much* better. I'm very supportive of this.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Traffic at this intersection is unpredictable and can cause significant backups. Drivers get frustrated, run red lights putting pedestrians and bicyclists at risk. With significant new housing going in next door and all down baseline, this intersection will only grow in traffic volume - updates need to occur soon
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Please make this happen! The congestion in this area is only getting worse and it's a high-traffic area for pedestrians. This will impact thousands of Washington county residents on a daily basis it will be well worth the investment in our future.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This spot is always so backed up with traffic.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I commute to work daily during regular business hours and must cross at this intersection. It is the most frustrating intersection of my entire commute and the timing/sequence of the lights appears to make no sense. Anything to improve this intersection would be greatly appreciated and significantly improve the quality daily commuting for me and many others. If I were looking to move homes, living on the other side of this intersection to avoid it would be a consideration for me. From a safety perspective, I've observed that, as drivers approach this intersection, many speed up (above the speed limit) to avoid a red light because the timing of when it will change appears very unpredictable and inconsistent with other traffic lights in the area. The size and layout of the intersection already create concern/confusion.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	As a daily commuter of both 185th and Baseline, including the intersection, I'm thrilled to see this getting attention and excited for the changes. I would also love to see the jughandle removed so eastbound traffic on baseline can directly turn left onto northbound 185th.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	185th Avenue is often a clogged mess of traffic. This improvement would be a huge, positive enhancement and increase traffic safety.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	The MAX Red Line extension is great, but now that trains are coming every 3-4 minutes, we need to improve flow at the grade crossings. Please fund this project to help fix 185th!
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	185th is a major bottleneck these days. Please make it more user friendly. The more you push traffic to the back streets, the less safe they become for pedestrians and animals, as people speed through the neighborhoods.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	would love to see more integration of technology to help improve traffic flow around Hillsboro.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This would greatly improve safety and efficiency at this critical intersection.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This would streamline travel through 185th and give us a smoother option for traveling between Walker and Baseline.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This stretch of 185th is extremely congested at all times. light spacing and timing are not conducive to streamlining traffic.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Traffic is very congested at this pinch point
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Excellent location to test intelligent signals for multimodal transportation

Project Name	Applicant	Support Rating	Comment
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Please prioritize this project to reduce traffic congestion and increase safety in Hillsboro. I am hoping that it will include the following: Real-time traffic management to improve flow Coordinated, Al-powered traffic & rail signals to reduce delays Safer crossings for pedestrians & cyclists Priority access for TriMet buses
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I just moved to the area and the most frequent thing I see or hear about on the Ring Neighbors app is that there was another accident on 185. It's up there with the posts of lost pets, and that's a lot. I think anything we can do to improve the safety of pedestrians and motorists in that area would be beneficial to the city. Nobody should have to bury a loved one due to infrastructure not keeping up with the city's growth.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This intersection is so congested and unsafe and I work on the corner. It sometimes takes me over 15 minutes waiting to turn left to access willow creek crossing. Please approve and please get to work on this asap.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I am supportive of any signaling/sensor improvements or grade separation done here. Regardless of that work, is it possible to increase the traffic light cycling frequency at 185th/Baseline? The turning phases are short, throughbound phases are long at I think 2min, and the frequent MAX trains cut the turning phases or travel on 185th. Traffic keeps building up over those two minutes, fills and backs up the lanes, and the short turning phases don't clear out lanes completely. If you increase the frequency of signal changes outside when the MAX is crossing, it could help keep cars moving and cut down on how many cars are stopped at that intersection.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Keep humans in the loop and analyze the data carefully. Al can lie.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This intersection is practically a roadblock during busy times. I've seen ambulances trapped, unable to move forward. The max resets the lights every few minutes causing north/south bound traffic on 185th to come to a complete halt.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	185 has been a nightmare ever since it went to 4/5 lanes. Too many traffic lights! Max seems to come just when NB 185th traffic should go, then the cycle starts over. I've waited thru multiple cycles countless times! I try to avoid 185th at all costs, not what you intend for a major arterial.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I like the improvements you are making. If you are adding timing to the lights on 185th, is it possible to make the lights at Holly and Heritage change more often when there's no traffic detected along that stretch of 185th? In the evenings or outside rush hour in daytime I sit for 2-3 minutes at Holly waiting to taking a left when there's no cars passing on 185th.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This is totally necessary and would eliminate the kind of traffic standstills we are now experiencing
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I've lived in the Tanasbrook neighborhood for 17 years, located on 185th and Cornell. Traffic here, from Baseline to Cornell, particularly during peak times, has always been fairly-to-severely congested and seems to worsen each year. There have been more than several tragic, fatal collisions and hit & runs just in the last few years, that could've been prevented or the risks of it greatly reduced, with improved infrastructure. When people drive north or south on 185th between Walker and Baseline, they typically get frustrated by the congestion, and then speed towards N towards Cornell or S towards Baseline. To put it simply, it's unsafe. It's unsafe to drive during peak times. It's certainly unsafe for bicyclists, bus riders, and pedestrians, particularly at the Eider (where there is a school)/Walker/Heritage/Salix/Baseline crossings. I used to bicycle and walk a lot around here, and I don't anymore for safety reasons. I also used the 185th MAX station fairly often, but I don't even bother driving there anymore, instead preferring to use Elmonica. SW 185th ITS is long overdue for improvements.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Definitely need safer and more efficient flow of traffic along this corridor. That overall cost is less than I would have thought, and certainly beings important value to the entire area from both a residential and commercial point of view.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	As a first responder, I am both intrigued and invested in what precedent this technology can introduce. The description seems a little vague, but it seems like this will connect the traffic signals to the MAX, which will help us getting through the area.

Project Name	Applicant	Support Rating	Comment
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Please help prioritize this project! Traffic snarls at this intersection are scary and even during non-rush-hour times it is not safe. I've had several near miss accidents while driving through this intersection. It's also very non-intuitive where drivers who are heading east on Baseline and want to turn north onto 185th actually need to be in the right hand lane of Baseline, cross past 185th, and then take the cloverleaf to turn them around for merging onto 185th going northbound. Lots of folks end up trying to make last-minute lane changes which only adds to the danger, and because traffic jams up so badly it is very hard to merge back onto 185h after you traverse the cloverleaf. This intersection desperately needs improvement!
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Hillsboro's population has grown and is still increasing. This improvement will help us get around more efficiently and safer for cyclists, pedestrians and motorists
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This would help us reduce traffic, it would coordinate signals and we'll make driving much easier and accessibel
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This intersection is problematic with long waits. It seems very unsafe for pedestrians too. I'm for anything that can reduce congestion and improve safety.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Reducing congestion here would help in more than obviously tangible ways. The frustration it can cause leads to unsafe driving maneuvers and drivers short on patience making less than wise choices. With PCC and the MAX stations so close to the intersection, we want to do all possible to maximize the use of those things, and reducing congestion and making it easier to get where needed would also help with that., as well as improve safety.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This is a very busy corridor and safety for all is needed. Better alignment of lights and max would create better flow and not strand pedestrians in vulnerable areas.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	It is very much needed as this is a busy traffic corridor and many intersections, especially around where the MAX line crosses 185th, is very prone to accidents and traffic tie-ups
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	The constant congestion in this section of 185th inhibits me and my neighbors from driving to the Willow Creek MAX station. Creating a free flow of traffic will improve pedestrian and bike safety. It will be a boon to the many small businesses along this route. My husband and I are strong supporters of this project. We'd like to see tax dollars spent where the majority of people in our County will benefit. Vote Yes.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	As South Hillsboro continues to develop, the north-south arterials are becoming increasingly important in moving traffic to Highway 26. 185th gets incredibly congested, even during non peak hours.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	there is even MORE single/multi-level housing being built in this area that is so congested! It is terrible with no end in sight! PLEASE at least fix some of the congestion with lights in sync, etc. It is only going to get worse and worse!
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Allow better timing and space for vehicles that want to turn left in the 185th and baseline intersection.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Would like to see this as well as an improvement to the 185th/OR-8 (TV Hwy) as well as that is also a huge bottleneck
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This project was promised as part of the original agreement with MAX, please do !
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	185th seems like a road that has long outgrown the population growth around it. There is always an odd, unorganized amount of traffic in this stretch and the area has simply modernized without the traffic improvements. This would be a great addition and I'd really like to see it come to life as a nearby resident.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	185th is a vital throughway that is often congested with a high volume of vehicles.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	The intersection at 185th and west baseline is THE most awful light to wait at especially when going west on west baseline waiting for the light . If a trimet max goes by, often have to wait 2-3 cycles of lights before it's my turn to to turn west coming from the south. I hope this project goes through! I take that road daily for daycare pick up and drop off

Project Name	Applicant	Support Rating	Comment
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	For 25 years I lived just off 185th between Walker and Baseline, much of that time being when it was a two lane road with stop signs and no traffic signals. Even after moving closer to the center of Hillsboro, I continued to work in that immediate area. My son still lives and works there, and I hate driving on 185th to visit. Not only is the congestion awful, but the traffic signals at intersections seem like they're designed to impede the flow of traffic. A lot of the time spent sitting on a side street waiting for the signal to change, there's little traffic on 185th. As soon as a flood of traffic comes along, THAT's when the light changes, just in time to stop the major flow of traffic. If ever there was a project that begged for timed lights and predictive AI, the project on 185th is it.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This is a key piece of traffic flow for my own commute to work, as well as many others for not only work, but many other errands. Increased use of technology to maximize efficiency would be appreciated.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This intersection is highly in need of this type of improvement, as it is extremely congested frequently. This area is only increasing constantly in population and these improvements would help tremendously.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This is an area of high congestion during multiple parts of the day and week. Coordinating the stoplights to help traffic flow rather than on the traditional timers they are on will help the flow, especially with South Hillsboro coming online in 2025 and beyond. As these areas grow, Tanasborne will continue to see increased traffic. Without these improvements, we will see congestion like what we see in Cedar Mills area. As Hillsboro continues to grow, we need to ensure all people in different modes of transit (car, bike, walking, bus, light rail, etc.) have safe and predictable ways to travel 185th. The construction to build this will be a small pain point, but will help to alleviate a growing pain for those traveling down 185th. Not only an immediate effect just on 185th but improvements will be felt on TV highway and Farmington. How? GPS will start to send people down 217 and through TV Highway and Farmington if there continues to be bottlenecks on 185th. This would impact the greater Washington County area. Keep people on Highway 26 to get to the 185th exit to get down to Aloha.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	It regularly takes me 10+ minutes to get through the Baseline/185th intersection going northbound around 5:30pm. The train signals mess up the traffic lights entirely and the line of people waiting to get through just gets longer and longer.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This transportation project will significantly improve traffic flow on 185th.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This is a much needed project on 185th Ave. many times I find myself waiting in the turn lane to turn onto baseline Road and it makes no sense the way that the railway max signals and the signal on 185th and baseline are not coordinated well there's a lot of waiting a lot of congestion and I fully support this project moving forward to make traffic more streamlined on 185th Ave.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This is a busy road and the traffic is always a problem, at all times of day and night. As the area gets busier this really needs to be addressed.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This will improve traffic flow in one of the busiest sections of Hillsboro Beaverton area.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Git 'er done!
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This partnership with TriMet, County, and 2 cities is an opportunity to be innovative, applying technology to solve problems more cost effectively than infrastructure. Will set an example that can be applied all over the region. Significant benefits to emissions on the corridor and would support future plans for High Capacity Transit/Frequent Service. This project may not fit in conventional categories, but it should be embraced as a cost effective and innovative solution to a challenging location for all modes. It is also located adjacent to a large low income housing development and anticipated transit oriented developments that will bear the brunt of the transportation issues at this location.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This project is great and the intersection is totally packed with cars, bicyclists and pedestrians who can't get to where they want to go due to light rail trains. This project should go to the top of the funding priority list!!!!

Project Name	Applicant	Support Rating	Comment
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Reduce congestion along with increasing pedestrian and bike safety. Metro needs to be more forthcoming regarding what type of project is appropriate for this grant. Seems like not all proposals align at all. Public interest is very high for this one. That should make for very high points as your constituents obviously approve of this and not base it off some random rubix. Listen to the people. This project needs to happen. This intersection is horrible.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	integration of rail and road signals is well overdue, thank you
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This is extremely necessary due to the new houses and apartments in the area
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	My wife and I drive through the baseline 185th intersection daily. We have gotten stuck traveling North on 185th for up to 15 minutes. We 100% support this proposal.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This is such a busy area all along 185th and improving traffic flow and pedestrian access should be a priority
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	i need this, almost every time i pass that light i have to stop. it's ridiculous
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I lived near 185th and Baseline for several years, 6 years ago. I went through this intersection daily. So many accidents here. I live in Orenco now and avoid this intersection as much as possible because of the accidents I had experienced. I would love to see improvements here! From what I remember the east/west bound signals for Baseline were regularly interrupted by the max crossing. During rush hour the max came often enough that the westbound turn lane would continuously get skipped leading to frustrated drivers making illegal u-turns at a red light. Eastbound would also get short cycles leading to a lot of running of red lights. I'm not sure if this is still a problem but I always thought it would be great for the max trains to synchronize their crossing of 185th during rush hours to limit the frequency the 185th & Baseline signal got interrupted for the train. Or maybe I'm dreaming but build a bridge for the max like Cornelius Pass Rd!
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This is an intersection that I use multiple times a day, and it is inefficient and dangerous on several levels.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Having grown up in this area, I've seen the transformation of this intersection over the years and it has become a terrible intersection. This intersection is not intuitive, it's very confusing, and dangerous. I feel bad for the businesses in the mall on the sw corner as I intentionally avoid going to shop there because I'm scared to try driving out back on to the roads and/or concerned with how much time it will take to get out. Altogether, this intersection is one of the strangest and dysfunctional in the county and it needs all of the help it can get to make it work well. Humans have made this situation worse, hopefully AI can find a better solution to save us from our bad designs.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	The traffic on 185th is horrible in general between Hyw 26 and Baseline not just that intersection with Baseline. The intersection of 185th and Evergreen rd is just about as bad. It sometimes takes 15min to go 2 miles unacceptable.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	easier and safer cross walks will be better for all members of the community.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	The system in place now has been pretty bad for the past decade I've lived here. The lights definitely don't understand what cars are at which side of the street. Now with so many more people here this is such a big hold up of an area A smarter system would do everyone here a huge favor. With the new housing developments next to 185th it's only gonna get worse if nothing gets done
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	The City of Hillsboro has been wanting to improve this intersection for a long time and this seems like an efficient way to do it, especially as future infill development creates even more pedestrian and car travel in the near future.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	185th at Baseline is a Bad Intersection, Light Rail Bridge needs to be Build

Project Name	Applicant	Support Rating	Comment
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Public transportation investment will help in the flight against climate change. It'll also help reduce traffic congestion. Investment towards pubic transit benefits multiple areas of society!
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This road is really congested these day.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I live 1/2 mile from this 185th problem. The backups become a significant problem because we have the 185th and Baseline lights dafaulting to the MAX crossing lights, creating huge backups. This has become a much more significant problem the past few years as additional housing has been built where all the tenants use 185th so addressing this growing problem would be a good use of funds. Thank-you
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	We need to make safety happen for everyone. All Intersections need to stay Coordination's. Train Preempts on 185th at Baseline needs to be Eliminated to a Smart Radar Camera. It is the Worst Intersection ever and its Dangerous and Hazardous. Once we get the Money by the Federal Government. We definitely need to Build a Light Rail Bridge. A Grade Separation Project needs to be made right now.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Yes please!
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I would like to see this area better prioritize people who are biking, walking and rolling, as well as accessing transit options.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I live nearby and strongly support better traffic management in this area.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Help to declutter 185th Ave. closer to the freeway would be helpful as well
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Wait time for signals here is very, very long. I have seen people make dangerous u-turns as well as drive into oncoming traffic out of frustration for wait time.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Public transportation investments helps to alleviate traffic, and meet our climate change goals. Making public transportation easier to use and less disruptive to private vehicles sharing the road will help both stakeholders.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	It will be great to have this project. Are there any simulations on how would this project improve traffic compared for example to a bridge construction?
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	185th is a major artery off Hwy 26 into suburbs of Hillsboro and Beaverton. These areas are growing by leaps and bounds. Maintaining smooth traffic flow balanced by safe walkability will keep these areas desirable and much safer places to live. The Smart SW 185th Ave ITS and Better Bus Project is desperately needed to keep these two important Portland Metro cities safe for its citizens.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	The max line creates a backup of traffic in all directions during high peak travel times. Ideally, the max would have a bridge to go over 185th to minimize impacts to traffic
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This intersection is a bummer with the MAX impacting traffic flow all too often
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I would like to report that 185th is Very Unsafe and Dangerous, Vehicles are Fast and Hazardous. We need to Coordinate All Timing to Traffic Signals between Highway 26 to Farmington Road. 185th at Baseline is a Very Bad Intersection and We need to Build a Light Rail Bridge. Start on Grade Separation Projects Immediately. First Railroad Crossings to be Removed is 185th. We would like to Permanently Eliminate All Railroad Crossings 100% on Trimet Property. All to be replaced to Grade Separation Bridges Only 100%. Cause we don't want anyone to get Hit or Killed.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	They are building LOTS new housing along baseline that will be adding to congestion, anything to ease what is coming for all who live in the area and commute.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro		This is an essential project for transportation in a complex corridor. By utilizing new technology we have an opportunity to make this stretch more efficient and safe for all who travel through this area. Part of building safe and effective public transportation system is dealing with challenges as they arise, so that negative experiences don't continue to impact people and change their opinions of our Trimet services. The longer this issue goes unresolved, the more dissatisfaction people will have with Trimet.

Project Name	Applicant	Support Rating	Comment
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	We need to make the MAX go over 185th. The county keeps approving these hideous apt complexes, and don't do anything for the traffic
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I like that it doesn't have much road widening and it makes bus travel better.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Improving traffic flow on Hillsboro's main roads should be a very high priority. Traffic lights are not optimized for the volume of traffic, especially during high traffic volumes, and many vehicles are often stopped to just let one or two cross the main roads. Optimizing flow to allow high traffic volumes to pass with far fewer stops will reduce fuel consumption, vehicle wear, and pollution. It may also reduce the likelihood of accidents.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This project needs to include traffic light timing all the way from Baseline to Hwy 26. The area between Cornell and the Hwy also suffers.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This project will provide needed relief to a traffic snarl created by too many trains crossing an important north/south route for the traveling public. Relief is needed to ensure certainty for public transportation and for communters alike.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	his area experiences significant congestion. The traffic light at Baseline and 185th frequently causes backups due to suboptimal settings. The loop from East Baseline to North 185th exacerbates the issue. Additionally, a planter on 185th just south of Baseline limits the number of cars in the left-turn lane, causing further delays when the left-turn light is red, but 185th northbound is green. An overpass for the MAX would be ideal, but it may be too close to 185th unless the station is relocated further west.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Any kind of intelligence added to this intersection would be great
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Get TriMet to fund this project, WAY TOO EXPENSIVE for minimal improvements.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	185th and Baseline traffic is unbearable in the mornings I have waited 3 full traffic lights for one left turn signal onto baseline from 185th this whole intersection, bus line and area needs reevaluated and monitored better for improvements there is a gridlock here every morning and afternoon that can take extended periods of time to get through one block. Pain point Mornings and Afternoon rush hour
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Improve this area
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This intersection is the WORST. I live right by it and everyday it takes up so many people's time and patience. Please do something!!
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Critical road connecting cooper mountain to Hillsboro and Intel. This becomes even more critical with all the planned housing projects in copper mountain.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Baseline/185th is a sore spot when trying to get anywhere, cleaning it up, even partially, would be a boon.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I drive this about 4 times a week and am constantly frustrated with the intersection of Baseline and 185th. When I am traveling north on 185th and want to turn left onto Baseline to travel west, I often have to wait several traffic cycles before the light turns green. The MAX train will come through and will cause the left turn light to miss its cycle. So the traffic sits there for several cycles and backs up the traffic going straight through the light traveling north because the left-hand turn lane is backed up. It would make sense that while the MAX is going through to allow the traffic to turn left since there is no oncoming traffic. Since it seems like no one has reasoned this out, perhaps AI detection and sensors can figure this out and relieve some of the traffic nightmare.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This area is a nightmare during busy traffic times. There is no close freeway/highway. Free up this congestion.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Smart traffic signals are needed to prevent accidents in this very dangerous intersection-185th and Baseline.

Project Name	Applicant	Support Rating	Comment
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I believe that this project needs to be prioritized over other projects, as during rush hours, it becomes extremely congested and obvious that the lights don't work together with the MAX crossing signals.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	It is a boondoggle. Poor management light rail should've been put underground. I live 185 and Heritage Parkway. And when I was driving for Tri Met, the 52 line or 88 line, we could forget our time points to Willow Creek because of the trains poorly designed.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I live off 197th Ave, so 185th Ave is crucial for travel in my area. There have been WAY too many deaths and serious injuries on this stretch over the last few years. These improvements are an absolute necessity!
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Being a bicyclist, getting stranded on the corner when you know the light pattern and it gets interrupted by the passing trains is not very pleasant in the rainy weather.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	PLEASE do this ASAP!!!! I have been rear-ended while waiting for the MAX. I have been nearly hit multiple times by vehicles rushing to beat the MAX. The light on 185th for the Baseline roundabout turn is basically useless. No one stops where they are supposed to. This area is a hazard and has been for the 30+ years I have lived within it.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	This has been necessary for a longtime.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Anything that would help traffic is great.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I'm thankful you are looking at the project from Baseline to Walker, but what about north to Hwy 26?
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	1 5	One option that could ease traffic would be to hold a train if the opposite train is within 2 minutes of the Willow Creek stop. Stopping north/south 185th traffic twice in a short period of time is just stupid. Also, the traffic at the light trying to enter 185th north just gets stuck there. That has to be looked at as well.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	It is LONG overdue! There have been times I have sat in the Northbound left turn lane on 185th for over 10 minutes because the timing of the lights resets every time the train goes by. The east and westbound lanes on Baseline both get green lights, a train goes by again, and it starts over with the east and westbound lanes getting green lights while we just sit there. The logical thing would be to have the lights set so the northbound left turn light on 185th turns green when no traffic is coming the other direction because it's stopped by the train but the lights aren't set up to work that way. I've seen the left turn lane backed up at least 20 cars at times
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Please support better traffic flow and increased bicycle and pedestrian safety by supporting this project. Accessibility is important!
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	185th is already a nightmare for cyclists and pedestrians. North/south lights are green but no walk light. Buses crossing into bike lanes. Please do what it takes to improve traffic flow.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Traffic also continues north to 185th and Cornell, this could continue further north.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	1 5	Trying to turn left from 185th onto baseline by the goodwill is ridiculous. You sometimes have to wait 3-4 times to get through the light. The light changes extremely fast. Only a few cars get through at a time. Also trying to exit out of goodwill back onto 185th is dangerous if trying to turn left back onto 185th.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I drive through this area along 185th on my way to/from work three days a week. It is not uncommon for it to take over 5 minutes and 4-5 light cycles to get through the Baseline/185th intersection, especially while heading northbound in the morning. Improvements are definitely needed.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Really needs a grade separation between the tracks and the road
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I pass thru this intersection every day and is by far the worst. The max line really disrupts the flow and we need a better way to get cars thru the intersection faster. Please consider this project

Project Name	Applicant	Support Rating	Comment
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Currenttly The MAX frequency clogs traffic at baseline and 185th. I see this as a way to fix that snarl.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Even though the shopping areas are geographically closer to me, I will stay out of the region because it takes me longer to commute into the area.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	The traffic lights at that intersection and regular max disruption cause significant delays and backup. The traffic control lights being synchronized would help this. It's a hard intersection to avoid to get where you need to go, not being able to turn left onto 185th from baseline further complicated things.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	One of the reasons we moved from this area was how bad the traffic lights are. The timing is off so you have to stop at every. Single. Light. And there's SO MANY LIGHTS. We lived just on the north side of 26 and getting to Aloha down 185th was so annoying that we didn't want to visit business in that area. It was easier to visit Beaverton via 26. It should be a smooth access road that connects 26 to the 8 quickly and efficiently. Also, there are many lights that have a left turn lane where the arrow should turn yellow so you can proceed when safe, but the turning arrow lights only go red and green. This causes extra hold up waiting for a whole light cycle when it was clear and safe to turn. These issues effect the whole area, however 185th is especially bad. I am convinced the poor light and traffic timing creates excessive frustration, light running, and road rage.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	As a central hub the Max rail changes the lights frequently and backs up 1 direction rapidly. Causing excessive time. If they can merge light rail time with traffic would be great.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Please consider increasing the bus bump outs on this stretch - this alone causes tremendous backup when buses block traffic flow in one lane. Can the bus stop at Edgeway and 185th be moved to around the corner off of 185th since the bus already turns to the Sunset Transit Center? When the light is green and the bus stops the flow it creates chaos and especially when lightrail then stops the flow immediately following this intersection. Why can't a bridge over 185th be installed for lightrail to travel over the road rather than disrupt flow so often? Once additional lines were activated, the backup in this area can push southbound traffic to a standstill from Parr Lumber to Baseline. Timing of the lightrail during peak rush hour also needs to be considered. We know commuters on the train deserve efficient flow but orchestrated timing for this area can help with the inherent limitations for vehicle traffic flow in the area. With more housing being built, this needs to be a priority zone for orchestration. Holding trains for crossing 185th at same time will benefit the vehicle flow for all lanes at the Baseline/185th intersection. Too often one train crosses and then the green light changes only allowing two cars through before the lightrail signal triggers because of the opposite direction train. This is a must need for that entire intersection to improve vehicle flow.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I am thrilled to see that the traffic issues on 185th are being addressed. I drive this almost daily and have been stuck on 185th northbound for 3 light cycles trying to get through in between trains! While I wouldn't normally be excited about an AI driven project, this is an area of use that this type of system is perfectly suited for. Improving and prioritizing the bus service is a necessary part of the plan as well. The only way to reduce traffic is to make public transportation accessible and reliable.

Project Name	Applicant	Support Rating	Comment
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Grade Separation Project on 185th @ Baseline is to Build Light Hail Bridge. It is the worst intersection ever. Treatments on a Busy intersection, we ve Notice that Railroad Crossings are No Longer going to be Working After Red Line Extension. Vehicles travel on 185th 100,000 Times a Day & 1,000 People on Public Transit. Oregon Electric Rail Freight Train used to travel here but not anymore since 1994. It's not Freight Train it's Light Rail MAX. Regarding 185th/Baseline, a team from Washington County, TriMet and the City of Hillsboro have been working on solutions to improve safety and mobility at the 185th/Baseline crossing. With the coming red line extension, we recognize this has the potential for more disruption, congestion, and crash exposure. The preferred solution, based on traffic analysis and input for construction contractors is to bring the light-rail tracks up and over 185th. This will allow the traffic signal to operate only based on traffic demands without the disruption of train preempts that overrides normal operation frequently out there. This rail up and over project was a part of the Metro transportation bond package that did not pass this past November (see below). The local agencies are working with Metro and ODOT to have the project included in candidates to receive future federal aid infrastructure funding, but time will tell with that. We have a plan B lower cost technology solution to try to regulate train flow across 185th to try to allow a better balance between congestion relief and need for rapid transit, but it's a problem of not enough space and too much traffic demand with all modes at grade. Blue Line MAX was extended to Hillsboro since September 12th 1998 & Red Line was extended since August 25th 2024. Blue Line MAX runs Every 15 Minutes on Weekdays & Every 20 Minutes on Weekdends. Red Line Same Thing, Better Red Project is here it does mean 185th Traffic, It's already causing Congestion, Collisions & High Crash Corridor. It's not good to have Railroad Crossings on a Busy Street
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	185th @ Baseline is a Dangerous Intersection for Railroad Crossings, Light Rail Bridge needs to be Built, Grade Separation Project RIGHT NOW, IT'S VERY UNSAFE, REPLACE TRAINS TO BUSES. RAILROAD CROSSINGS NEED TO BE GONE FOREVER.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	The lights on 185th currently make no sense resulting in backups and unsafe driving.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Fix the max interruptions. They need to remove the surface crossing immediately and enforce the no left turns.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	I drive through there often and if the Max goes by you are going to be stuck at a light longer because they are two systems aren't connected.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	The Baseline Rd crossing needs to be optimized. I've driven this route consistently on weekdays for the past 3 years and the northbound left turn lane on 185th at baseline is a real headache during morning and evening rush hours. You can sit at that light for 5-15 minutes depending on the timing of the MAX, and get skipped over multiple times in favor of east-west traffic on Baseline. I'd be happy with just consistently waiting 5 minutes, but something about the timing of that left turn needs to be done. Especially before the new developments come up and more traffic arrives in the coming decade. I do appreciate that this route is being evaluated and seriously invested in, thank you for improving Hillsboro.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	It seems like a good idea. The functionality of that intersection seems pretty questionable at times.

Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Can we Permanently Eliminate All Railroad Crossings on Trimet Property? 100% to be replaced to Grade Separation Bridges Only. Cause it's a Frequent Service & We don't want people to die.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	185th at Baseline is a Bad Intersection, Light Rail Bridge needs to be Bulit
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	185th at Baseline is a Dangerous Intersection, Grade Separation Project needs to be Right Now. They were supposed to start Construction before Red Line Extension back in 2020. Very Urgent to Build a Light Rail Bridge. RAILROAD CROSSINGS TO BE GONE FOR GOOD. AI Smart Technology Robots will help make sure to keep the Traffic Moving.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	We need to widen 185th to 7 Lanes from Cornell to Baseline. Goodwill Entrance needs to be Right In & Right Out Only. We need 2 Left Turn Lanes on each corner of the Intersections on 185th at Baseline. NE Right Turn Lane & Pedestrian Island. Add a Eastbound Right Turn Lane. 2 Eastbound Left Turn Lanes. A Bridge for MAX needs to be Build, RXR Crossings to be Removed Permanently. Add 2nd Northbound Left Turn Lanes on 185th at Walker, Cornell & Evergreen. Add Southbound 2 Left Turn Lanes & Westbound 2 Left Turn Lane & Right Turn Lane on Walker at 185th.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Railroad Crossings & Jug Handle on Stepping Stone Drive needs to be Removed Permanently cause it's Unnecessary. Add a 3rd Southbound Travel Lane on 185th between Johnson to TV Highway.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	We need to Permanently Eliminate All Train Preempts at a nearby Railroad Crossings on Trimet Property. An Al Sensors Robots can help Reduce Congestions. The Intersections that is Dangerous need to be Fixed. Intersections on 185th at Baseline, 205th at Quatama, Cherry at Century, Merlo at Trimet Bus Yard, Milikan Way Way at Hocken & Hall at Crescent. Once we get the Federal Government fundings is to do Grade Separation Project. Start with 185th & All of the Railroad Crossings on Trimet Property need to be replaced to Bridges Only. We went Everybody to Save Life's & Ease Congestion.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	We need to Permanently Eliminate All Train Preempts at an Intersections at nearby Railroad Crossings on Trimet Property. 100% AI Technology with Robot Sensors. On 185th at Baseline, Cherry at Century, 205th at Quatama, Merlo Road at Bus Yard, Hocken at Milikan Way & Hall at Crescent.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	We need to Get rid of All Railroad Crossings on Trimet Property. 100% to be Grade Separated Bridges Only. Cause we don't want People to Die.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	That intersection is horrible. I travel it 5 mornings a week and it takes at least 10 minutes to get through it. The max messes up traffic signals and sometimes the northbound traffic gets skipped multiple times because of the max.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Having lived 20 years on the street at the base of this prject, I have seen traffic and traffic jams back up traffic continue to increase. More and more housing is jammed into the area with increasing traffic. More often than not, traffic is backed to my neighbor forcing us to drive south and through neighborhood backstreets to go anywhere when I really just want to go north. With thenew housing at the baseline & 185th intersection as well as that east on Baseline it will only get worse. What is the point of a Max station there if you can't get to it? My shopping takes place in Beaverton because that is the only way I can drive. Bus service is out of the question by not having crossings between Baseline and Johnson road. Fixing the traffic here has been discussed for years with people acknowledging the problem, but only passing projects that compound the traffic The traffic is going through neighborhoods, many without sidewalks for pedestrians, just trying to get through a normal day. Its past time we get some help.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Add a Bus Only Lane is a Good Idea to get away for Congestions. I wonder if we can add a Bike Signal & Bus Signal. Crosswalks need to come on, When Train Passes Thru. Train Preempts does need to be Eliminated First before Railroad Crossings. We definitely need a Light Rail Bridge. Construction was expected in 2025 ow it will be in 2028.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	All Railroad Crossings in the Entire State of Oregon 100% need to be Gone for Good. Cause we don't want People to Die. All of them to be Grade Separated Bridges or Tunnels Only. Rather an Overpass or Underpass.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	185th at Baseline is a Bad Intersection, Light Rail Bridge needs to be Built.

Project Name	Applicant	Support Rating	Comment
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	185th at Baseline is a Dangerous Intersection, Light Rail Bridge needs to be Built.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	185th at Baseline is a Terrible Intersection, Light Rail Bridge needs to be Built.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	185th at Baseline is a Horrible Intersection, Light Rail Bridge needs to be Built.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	185th at Baseline is the Worst Intersection ever, Light Rail Bridge needs to be Built.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	it's not Good to have Railroad Crossings on Busy Street, which is 185th at Baseline. We need a Light Rail Bridge Immediately Built.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	Can We disrupt the MAX Trains on the Westside of Hillsboro between Hatfeild to Merlo Station. 10 Stations to be Closed for 2 Years while we do Grade Separation Project on 185th at Baseline. Shuttle Buses can run up to 2 years at the time of Construction.
Smart SW 185th Avenue ITS and Better Bus Project	Hillsboro	5	185th Traffic is Extremely Bad during the Rush Hour. There is way too many MAX Trains it's a Frequently Service Every 7 Minutes. Causing Railroad Crossings to activate Every 30 seconds to 2 minutes. Railroad Crossings & Train Preempts need to be Eliminated Permanently. A Grade Separation Light Rail Bridge needs to be Build Right Now. Start Construction as soon is possible. Temporarily suspend MAX in Hillsboro between Hatfeild to Merlo Station. Shuttle Buses to run at 10 Closed MAX Stations.
Westside Trail Segment 1 - King City	King City	1	This trail is of no benefit at all to my community, king city. This will increase traffic to an already congested small community. More traffic brings more noise and crime. The plan includes construction of a community park which we already have. It is not a need at all for the community. The only beneficiary in this project will be the developer. I beg you not to fund Westside trail. Thank you
Westside Trail Segment 1 - King City	King City	1	It is widely voted against by the residents of King City. Current City manager, Legal Counsel, and several sitting Councilors who continue to push the King City TSP will not be there very much longer. Washington County should spend funds on realistic projects that have a chance to go through.
Westside Trail Segment 1 - King City	King City	1	I live in Edgewater, so I will be directly affected by this Westside trail. Traffic and parking is already a nightmare for us and this trail is going to make it worse. Park play facilities directly across residential houses does not increase the value of any residential house at all. In short, the trail is going to bring very negative effects to the neighborhood. We already have a park with the same facilities they want to build. We do not need another park. I am asking that the grant money intended for the Westside trail be put to better use, where there is a need.
Westside Trail Segment 1 - King City	King City	1	The City would have to use Eminent Domain to complete the project. The City does not own the properties. This is very controversial in the area.
Westside Trail Segment 1 - King City	King City	2	This looks like a nice project but would like to see it connected to an overall master plan for King City that accounts for future growth.
Westside Trail Segment 1 - King City	King City	3	This probably would have been a 5 if the question had zoomed into the correct location. I can't tell where it is but am generally in favor of increasing active transportation options.
Westside Trail Segment 1 - King City	King City	3	I'm in favor of power line trails on principle, and it would be great to be able to bike from Tualatin to Bethany someday, but I worry this is going to enable King City's ecologically destructive and badly-planned expansionary ambitions out to Roy Rogers Rd. This stretch of the river and the natural resources around it need to be protected.
Westside Trail Segment 1 - King City	King City	5	This new trail segment would provide crucially important connectivity in a rapidly-developing part of the metro area. This is a vital improvement.

Project Name	Applicant	Support Rating	Comment
Westside Trail Segment 1 - King City	King City	5	The West Side Trail is great and should be extended/expanded as much as possible. Connection to the Tualatin River Greenway ideal.
Westside Trail Segment 1 - King City	King City	5	Great project, let's get r' done!
Westside Trail Segment 1 - King City	King City	5	With the UGB recently expanded to the west side of this corridor and new urban development on the way, now is a perfect time to fund this project. Not only will it provide an important N-S extension of the Westside Trail, it will include important short E-W crossings. In King City, it would be the only continuous active transportation route between Beef Bend Rd. and Tualatin River. 99W still has several serious gaps for pedestrians and cyclists.
Westside Trail Segment 1 - King City	King City	5	Important connection to the King City Park and contributes to closing gaps in our regional multi-use trail network.
Westside Trail Segment 1 - King City	King City	5	I am very excited to see this happen!
Westside Trail Segment 1 - King City	King City	5	I would love to see this project happen! I live off of 131st on Bedford St. It would be so nice to have safer paths to walk and ride bikes on. I hope to someday see it connect all the way with the trail to Wilsonville!!!
Westside Trail Segment 1 - King City	King City	5	Would love a fenced in dog park area
Westside Trail Segment 1 - King City	King City	5	The linked connection between beef bend and the KC park is a great idea. The upgrades to the space that include walk ability, and more useable space for the growing community is very exciting.
Westside Trail Segment 1 - King City	King City	5	This will be an essential link to the exisiting trail system.
Westside Trail Segment 1 - King City	King City	5	Here's another GREAT opportunity to create a new off road trail and enhance connections to a park, the river and local neighborhoods! This one is a no brainer for quality of life and recreational opportunity serving local residents!
Westside Trail Segment 1 - King City	King City	5	More North south connections to the Tualatin River are needed. The more connections and public access added to the riverfront, the more people will realize what a wonderful asset it is to our regional community.
Westside Trail Segment 1 - King City	King City	5	Would love to see this project happen. I think it would allow so many of us both bicycle and pedestrian access to parks and trails that would otherwise require driving or walking/biking along 99W, which I would be afraid to do. Seems like so many could benefit from this.
Cedar Creek/Ice Age Tonquin Trail: Roy Rogers - OR 99W	Sherwoord	1	Nice to have but more pressing problems to solve/alleviate.
Cedar Creek/Ice Age Tonquin Trail: Roy Rogers - OR 99W	Sherwoord	2	how does a walking path cost \$9m? Is that really good use of Tax Payer funds? Is there an alternative way to construct this?
Cedar Creek/Ice Age Tonquin Trail: Roy Rogers - OR 99W	Sherwoord	4	This is a great trail project and would connect neighborhoods and schools.
Cedar Creek/Ice Age Tonquin Trail: Roy Rogers - OR 99W	Sherwoord	4	Sure why not although spending on a park is more important than the 185th traffic it seems
Cedar Creek/Ice Age Tonquin Trail: Roy Rogers - OR 99W	Sherwoord	4	I take it this is a standalone trail. It doesn't connect to any other existing trails. They need something in this area, but there is a gap in the financing, hopefully that can be covered.
Cedar Creek/Ice Age Tonquin Trail: Roy Rogers - OR 99W	Sherwoord	4	This trail will help connections to nature and neighborhoods for people walking and biking quickly and safely limiting vehicle trips within the neighborhood
Cedar Creek/Ice Age Tonquin Trail: Roy Rogers - OR 99W	Sherwoord	4	As an active runner and cyclist, I am always for construction of trails
Cedar Creek/Ice Age Tonquin Trail: Roy Rogers - OR 99W	Sherwoord	5	Please, please fund this new trail segment. This area desperately needs new trail connectivity, and this project would provide an invaluable, safe place for families and children, as well as all bikers and pedestrians, to recreate. Please fund.
Cedar Creek/Ice Age Tonquin Trail: Roy Rogers - OR 99W	Sherwoord	5	This trail would provide a critical link through the City, enabling peds and bikes to traverse north-south without having to be on the heavily trafficked arterial and collector roadways. This trail connection would provide direct access to schools and parks, and would link up with other city trails to provide access to commercial and other amenities.
Cedar Creek/Ice Age Tonquin Trail: Roy Rogers - OR 99W	Sherwoord	5	I think making it easier to get around by non-motorized transportation is very important for pleasure and utility.

Project Name	Applicant	Support Rating	Comment
Cedar Creek/Ice Age Tonquin Trail: Roy Rogers - OR 99W	Sherwoord	5	Good project, let's make it happen.
Cedar Creek/Ice Age Tonquin Trail: Roy Rogers - OR 99W	Sherwoord	5	I strongly support the proposed trail project. This new trail would provide valuable recreational opportunities for residents of all ages and abilities, promote physical health through outdoor activity, and enhance our community's connection to nature. It will connect neighborhoods via now missing walking and biking paths and allow kids to take bikes to school. One improvement to this project could be made if it included a pedestrian crosswalk with traffic lights through Roy Rogers Road, connecting now disconnected part of Sherwood.
Cedar Creek/Ice Age Tonquin Trail: Roy Rogers - OR 99W	Sherwoord	5	What makes THIS project GREAT is that it connects with two other off road trails, lengthening the opportunity for people to really get out and walk a good distance off road. It may also provide an off road connection for cyclists, too, using road ways. I think this really serves the quality of life and recreational needs of local residents. Let's make this one happen!
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	1	There is already access to Fanno Creek trail less than 1,000 ' south of this intersection on SW Tigard St, AND via the paved pedestrian path from SW Tiedman Ave to downtown Tigarrd. This proposed project is an \$8,000,000 boondoggle. Repair our existing infrastructure in the form of pothole repair and pavement overlays that will have a broader benefit, don't build new infrastructure that will benefit very few when an acceptable alternative already exists.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	1	this is infrastructure for cars not for people
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	3	A full cycle track would be preferable to a bike lane.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	4	As the City of Tigards close proximity to Portland continues to drive growth, building upon infrastructure such as the Dakota St bridge replacement is critical
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	The Fanno Creek Trail is a vital connection for bikes and pedestrians, and rebuilding this bridge to accommodate bike lanes is crucial. Please fund this project.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	This is a critical piece of infrastructure in the city's bike/ped network.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	Increased pedestrian and bike mobility is so good for citizens! It improves our health and motor vehicle safety.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	yes, please! And thank you!
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	that this bridge needs to be replaced
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	pls replace dis bridge it so bad
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	replace the bridge!
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	This is a wooden bridge that has little life remaining. It is also a gateway to the heavily used Franno Creek providing north and south connections to those walking and biking. Failure to replace this wooden bridge would result in significant impacts to the community.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	Can we Build a Pedestrian Bridge over North Dakota with the Ramps. Also to Eliminate Railroad Crossings to an Grade Separated Underpass.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	The Fanno Creek trail is by far the best trail in the region. This will improve it.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	Please add in bike lanes! This is too narrow currently for pedestrians and bikers

Project Name	Applicant	Support Rating	Comment
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	This is a frequently used route for all modes of transportation.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	This bridge needs improvements to allow safe usage by automobiles, pedestrians and cyclists. Today it's a hodgepodge solution that could benefit our Tigard community.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	This is currently a dangerous place for cars and pedestrians, prone to flooding and heavily used by vehicles, bikers, and pedestrians. Any improvements would be appreciated and are overdue.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	This bridge is our only direct line into Tigard's downtown. The bridge is narrow, only has pedestrian and safe bike space on one side. It is also flood prone.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	This will serve as a key enhancement to the fanno creek greenway trail and is desperately needed!
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	This area is used by bike riders and pedestrians. When my kids were little, we rode bikes to the trail and crossing the bridge and riding on the road without sidewalk was frightening. But the trail, park, and playgrounds were worth it. Please make it safer to get there!
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	This section is so dangerous for bikes and pedestrians
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	Sidewalks. Area safety.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	This is a critically necessary projet!
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	It is necessary to keep this area safe and accessible.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	Critical link of the greenway trail supporting bikes and pedestrians.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	This crossing has a lot of traffic, but is confusing and unsafe. It would be wise to create a safer crossing for Fanno Creek bike path users.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	This project is long overdue with a temporary fix that was supposed to last 5 years, which it has exceeded. If it is not funded the bridge may need to be closed, hopefully before it collapses, resulting in hundreds of commuters and residents having to find long detours. This project should be a given and not have to undergo public opinion.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	the addition of pedestrian safety features would make this trail crossing so much safer. When I bike or walk across with my dog, I'm ultra cautious and eager to get across. In the winter time, if the rains are heavy, this area floods and debris has been known to flow down and hit the bridge. I try to go around it, even though it adds time and fuel to do so.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	Bridge is too small and needs sidewalks on both sides.
			I have loved off of North Dakota St. Since 1987 (38 years). These old and narrow bridges are a true hazard to both cars and bikes. The addition of the wooden bike lane on the outside of the bridge helps, but it's not a permanent solution, and it's only on one side of the road, forcing bikers and pedestrians to cross the street on a blind hill. Especially dangerous at night.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	I have seen other bridge replacements in the area that were done right and I have been patiently waiting for the North Dakota bridge to be addressed. And NOW is the time! Let's not lose this chance to upgrade this important artery road and make it safer for all. And by the way, it will also act as a safe "off ramp" for the Fanno Creek trail which intersects the road a few hundred feet west of the bridge.

Project Name	Applicant	Support Rating	Comment
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	Improved Safety and decreasing Environmental impact are the greatest issues this project will address, The gridge and road here is quite narrow and if you are headed west on the North Dakota over the train tracks, you are often blind of pedestrian traffic or stopped cars at the crossing. Many accidents and near misses occur annually here. The Fanno Creek trail is a major foot traffic arterial that crosses this road, near the bridge. The wetland, creek and Tualatin River will benefit greatly from an improved crossing., drainage and water management.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	North Dakota Street is EXTREMLY dangerous at the bridge. Pedestrians & cyclists have NO safe way to get across the bridge. I am surprised no one has been hit by a car there (that I know if)
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	Pedestrians, bikers, dog walkers etc walk the bridge right now without a bike path or sidewalk and it's extremely dangerous.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	There is a significant amount of bicycles and pedestrians who use this space. Updating it would improve the safety of those who are already using it.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	Long overdue, also, warning lights on the pedestrian crossing in front of the bridge a critical safety need, VERY dangerous!
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	Hundreds of pedestrians, and their dogs, walk or bike across North Dakota daily at the Fanno Creek trail/North Dakota road "crosswalk". This crosswalk is one of the most dangerous in the area because pedestrians walking or bicycling on Fanno Creek trail must walk along North Dakota'a narrow street for approximately 100 ft before they can walk across the cross walk to reconnect to the trail on the other side. This crosswalk does NOT have a flashing yield/caution sign. The trail heads are not directly across the road from each other as you can see from the map. There are no sidewalks on North Dakota here so pedestrians end up walking or bicycling along the side of the road, right at the exit of this busy narrow bridge. If the new bridge includes an under path/pass for the Fanno creek pedestrians to remain on the trail and separate from the road traffic (much like the Fanno Creek Trail underpass below Scholl's Ferry Rd.), on North Dakota, this project would make both North Dakota and Fanno Creek Trail much safer for everyone.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	This project would address a severely lacking safety situation on North Dakota steer. The limited (zero) should and only partial wooden. foot bridge mean pedestrians and vehicles are right on top of each other. I live off of SW 106th street, just one block away from this space and can personally vouch for the improvements this area needs. If it hasn't happened already, this area is ripe for a terrible accident and should be a top priority to address. Further, with weekend stores and events on the corner of greenburg and Tiedman (where N Dakota meets), a lengthy left turn lane and a railroad crossing, this area is tightly congested with no opportunity for foot or cycle traffic to safely navigate the area and access the Fanno Creek trail. The bridge is narrow and low-lying, adding to the danger level, especially during cold, foggy, and dark mornings, increasing the danger immensely, A new bridge an cycle paths would liven up the road while making it more safe and welcoming for folks to use the trail and access the area.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	Biggest piece is to make sure to add a sidewalk to connect the north side of the bridge/street up all the way to Greenburg road. Making it safe for people to walk/bike up to the crosswalks and lights.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	This is a primary artery that carries many daily cars from downtown Tigard and the Washington Square Mall to the cross street of 121st. Without this bridge traffic will likely reroute by a major park and church or thru downtown Tigard. This will stress other already busy traffic corridors that take significant bike and walking traffic as well. Additionally the additions of Walking and Biking connections will significantly reduce foot traffic that cuts from the Fanno Creek trail over to Main Street because North Dakota is a more direct connection than is Tigard Street. Finally, provided this bridge is not fixed or improved, it will cut off most homeowners along North Dakota from the only easily accessible thru road to get to downtown Tigard and to Highway 217.

Project Name	Applicant	Support Rating	Comment
North Dakota Street (FannoCreek) Bridge Replacement	Tigard		North Dakota Street is a major daily thru street for people living between 121st street and Tiedeman. Without it most people living between Tiedeman and 121st would be land locked and forced to use more residential streets to access Highway 217. Additionally the daily traffic for commuters exiting Highway 217 to avoid traffic on Scholls Ferry and gain access to 121st would be forced to reroute around this bridge and would put major traffic burden on Tiagrd St as an alternate route which is significantly more residential and foot traffic oriented. Finally, it would add a more direct connection to downtown Tigard and the the Fanno Creek trail which at this time requires pedestrians to walk on the street or on incomplete sidewalks. It is a common occurrence to have people walking at night in the dark on the road in this location. Better connection here to the Fanno Creek and downtown Tigard trail would be welcome for safety. North Dakota as a connector street between 217 and 121st carries significant daily traffic (thousands of daily cars) which without this bridge would be forced to congest other less efficient streets. Please fix this vital connector bridge before it is no longer structurally sound and safe for passage.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	It would not only support the neighborhood, but allows better throughfare for emergency services, not just improving lives, but saving them as well.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	The successful funding of this project is crucial to the progress of Tigard and the surrounding areas.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	The North Dakota Fanno Creek bridge is an absolutely critical bridge, and losing vehicular traffic over it would exacerbate already bad congestion in surrounding areas and most importantly, increase emergency response times. Please fully fund this bridge's replacement at the earliest possible opportunity. Thank you!
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	North Dakota is a major traffic street in the neighborhood. Closure of this street out onto greenburg would Heavily impact the surrounding area. In addition the significant traffic congestion to the surrounding roads I worry that the lack of this bridge would prolong emergency responser response times.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	If this bridge closes to auto traffic, the congestion on Scholls Ferry Road and Tiedeman will be a nightmare! Tiedeman and Scholls Ferry are already a mess - more so during rush hour/ school buses/ and train crossing delays!
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	Replacement of this bridge is of utmost importance to continue to support appropriate efficiency of travel and appropriate traffic flow. If the bridge is not replaced, it will create traffic bottlenecks; overcongestion in some parts of the city, and longer travel times for all. Please place high priority on this project to promote continued livability in our community.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	1 5	Bridge is unsafe. Too often vehicles use the middle of the bridge taking both lanes to cross creating near misses with incoming traffic. Also it does not connect to the nearby Fanno Creek trail.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	This project would have a great impact on the immediate and surrounding communities.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	This would greatly make the community better for our children and safety.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	Build a Pedestrian Bridge and Railroad Bridges. RAILROAD CROSSINGS NEED TO BE GONE FOR GOOD, WE DON'T WANT PEOPLE TO DIE.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	The current bridge needs to be replaced as it's just waiting for a tragedy to happen. Either a pedestrrian will get hit or a head on collision will happen since it is so narrow.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	There is a lot of pedestrian traffic as well as car traffic. We need to keep everyone safe.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	While i've heard that some people are apprehensive to support this project because of its "excessive" cost and "extra" and "unnecessary" features, i want to remind those involved that there are very few other alternates to this bridge if not approved. And if weight restrictions are put into place and alternates have to be exercised, city residents, both young children and elderly individuals will have to travel even further out of the way to get where they need to go, inconveniencing them and also adding unnecessary stress on the other parts of the transportation system. The City of Tigard has proven to be one of the best stewards of their dollars, budgets, and CIP projects, i find it best to trust the experts when making decisions like this, and Tigard has proven time and time again to be the experts.

Project Name	Applicant	Support Rating	Comment
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	This would help keep our community safe since it is so close to the local library and park.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	The bridge too narrow to accommodate bicycles and two lanes of cars simultaneously. A lot of pedestrians and cyclists travel along this section of ND as it connects from the Fanno creek trail to nearby bus routes and to the heritage trail for quick access to downtown Tigard. Also the bridge is low and floods every few years or so during very high water events.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	I think this project would be very helpful in making Tigard more walking-and biking-friendly, and believe it would be well-used. I feel this area is currently not very safe for pedestrian/bicycle traffic and this project could alleviate that, as well as provide a transition to the Fanno Creek Greenway trail. I would enjoy using it!
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	This bridge has needed to be widened and made safer for years! As a motorist, it is too narrow for two larger trucks/SUVs to cross at the same time. There is plenty of anxiety for clipping side mirrors (which can cost plenty to replace). But the worst is that a person who uses it for other modalities. As a cyclist and pedestrian on this road, I have had several near misses from motorists. It will make biking much safer, aid in being eco-friendly, and keep a car off the road for small local errands. I urge Metro to help Tigard fix this bridge and make it safer!
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	The bridge is used by vehicle, bike, and pedestrian traffic and saftey and integrity are vital.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	The neighborhood surrounding this bridge has grown exponentially in recent years. Traffic has increased, and the bridge cannot accommodate it. When bikes try to pass cars have to wait. When wide trucks go over it the other direction can't fit. Not to mention the huge amounts of walking traffic the road sees on the first weekend each month when the estate sales are happening. Please help make this road safer for our neighborhood and the people who use this road daily
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	This bridge is dangerous and needs to be replaced. It's scary to drive across. How has this not been replaced?
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	The bridge lanes are too narrow for most cars to drive over it and stay in their lane.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	This is a main road that would cause major disruption if the bridge fails or needs to be removed.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	I live just up the street from this bridge. I have two small children and we like to go out walking and biking. Additionally, I drive along this route multiple times a day. The bridge is currently very narrow and buses have to drive in the center to get accross safely. This would make a big impact on our community if this bridge was replaced.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	Very heavily used area near school and park. Could definitely use improvement, some additional space and safety improvements. Did I mention it's very heavily used??
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	Highly utilized industrial, residential and commercial area.

Project Name	Applicant	Support Rating	Comment
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	The Fanno Creek Bridge being considered for replacement is very narrow for just cars to use, and it is also used by all types of vehicles, pedestrians and bicyclists en route to nearby communities via the Fanno Creek Trail and from nearby neighborhoods. The lack of sidewalks there and the extreme narrowness of the road/ bridge is a serious safety issue for all users, in particular for people and bicyclists sharing the road with the high volume of vehicle traffic traveling down North Dakota Road to schools, businesses and accessing nearby highway 217. Pedestrians have no sidewalk on either side and have to walk next to the bridge railing and very close to the fast moving cars rolling by. Bikes have to share the narrow lanes with cars too, which is risky especially at the rate of speed the vehicles are traveling at that point. North Dakota has the high volume of traffic as it is one of the major feeder routes from the commiunities to the tigard business area and the freeways. Please consider this project as a priority for neighborhood safety.
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	This is a heavily traveled street and the bridge creates a safety issue for pedestrians walking or biking as there is no safe way to cross the bridge and cars risk either hitting the pedestrian or getting hit by on coming traffic
North Dakota Street (FannoCreek) Bridge Replacement	Tigard	5	much needed improvement for this heavily used thoroughfare whicj at present is dangerous for pedestrians and cyclists of whom there are many
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	1	Too expensive to make. Consider alternatives. How many pedestrians will walk this 30 million project?
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	1	WASTE TAX PAYERS HARD EARNING MONEY.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District		I use the THPRD Trail System extensively for my exercise while riding my bicycles (I have 3). One route takes me from my address just off Mission Oaks Drive to Walker Road, then to the Rock Creek Trail and traveling under Hwy 26, along the Rock Creek Blvd. to the east-west Rock Creek Trail, and take it to the Waterhouse Trail south, then West Union to Bethany Road, and across Hwy. 26 toward home. Having the Westside Trail Pedestrian and Bicycle Bridge would greatly facilitate another route for my exercises. I'm retired, and 79, and my bicycling is my "anti-aging" machine. The trail system is a huge advantage for me and my wife, which we use almost daily.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	1	this is in a little use area, and perhaps specific to a few in the nearby HS. location does not justify the use of funds.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	1 つ	\$30m for a bridge? Dont we have surfact streets now to cross highway 26? Do we really need to add another. Making a personalized path at a cost of \$30M is outragious. Lets try to find a cheaper alternative. Yes I do use walking and biking paths. I am a cyclist, so it effects me aswell.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	2	I would like to support this project but it is missing a key connection from the east end of Greenbriar PKWY to NW Meadow Drive. Without that connector the project fails to link neighborhoods south of the highway to Sunset HS. Users will still have to go out of direction to Murray or 158th. The network is still incomplete unless that link is created.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	3	While this project would be really cool I don't think I'd use it much as Greenbrier is not a destination for me. Cutting thru parking lots to 150th and Pioneer is possible though and if legal and signed would add value and usage.

Project Name	Applicant	Support Rating	Comment
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	4	I think I am in favor of this project. Anything to cut down on the congestion in Beaverton is a good thing!
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	4	While we continue trying to make increase housing in these areas this could be a main thoroughfare for people who don't drive.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	4	Why is this so far East? By having the bridge go over Hwy26 near NW 174th and Bronson you can not only connect kids who could now bike to their Middle School. (Five Oaks) but also allow people to be close enough to walk to all off the Tanasabourne services. Once you get over the freeway at the currently proposed spot you end up in nothing but neighborhood for miles.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	4	While an active cyclist and runner, this seems really expensive for a bike/ped bridge. I also disagree with the comment that this project would serve historically marginalized communities & improving safety/access to transit, schools. These aren't marginalize communities and doesn't really connect with transit. And school children would not use it since Hwy 26 is a boundary and are served by buses
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	4	We need more safe pedestrian crossings of Hwy 26 to encourage recreational cycling and bike commuting. This project would connect pre-existing trail systems to expand access to parks and schools on both sides of the freeway without getting in a car.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	4	I think this is a good way to connect communities across 26, but am wondering how this will connect to waterhouse trail etc. If does not connect into the trail system, then it seems like a lower priority project since there are other crossings across 26.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	4	This actually seems like a good idea. Reduce school traffic on Cornell for Sunset HS.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This project provides a much needed safe crossing of the 26. I would use this bridge a lot!
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Fills a major active transportation network gap
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This would immensely improve bike and pedestrian safety imo. All other bike and pedestrian crossings are shared with high speed auto traffic
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	There just aren't enough crossings over Hwy 26 that don't involve bicycles and pedestrians navigating traffic.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	If this project was completed I would ride my bike on it regularly. The area that I could safely ride my bike would be dramatically increased.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This is a key connection! We lack safe Hwy. 26 crossings. This would be an excellent alternative to Cornell and Murray, which are hostile to bike on.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This crossing is vitally important for safety, to protect pedestrians and bicyclists on this treacherous crossing of US 26. This is imperative to fund. Thank you.

Project Name	Applicant	Support Rating	Comment
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This project would provide a critical bike/ped connection over Hwy 26 and connect the Westside Trail segments north and south of the freeway.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This is a great project to provide a link in our trail system. I'm excited to ride my bike across it someday.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Pedestrian/bicyclist access is important to me. I am especially invested in this because it helps historically marginalized populations.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Absolute necessity for safe bicycle and pedestrian use between Bethany/Rock Creek THPRD trail system and Waterhouse etc trails. Great idea.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	safety! critical infrastructure to get folks to work and play!
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	There are very few bike options to get across Hwy. 26. I think this would really increase quality of life.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Yes! Please make this access safer!!
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Community should/will support anything that improves alternative transportation means and safety of commuters and leisure riders/pedestrians and expands these types of routes
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	I ride my bike as often as possible so I can commute to places in the community. I support all planning projects that increases access and improves safety for bikers and pedestrians. This is a very important topic and I'm glad to see it is being addressed.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This is a great project that will connect the pedestrian path North and South of 26. I think this is a great idea and one that has been needed for a long time.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This would help pedestrians to better access transpiration and services

Project Name	Applicant	Support Rating	Comment
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	I would like to start off by saying that this is a very important project for connecting the multi-use paths that we have in Washington County and I am highly supportive of this project. Creating a more connected trail network not only has the potential to increase the health/wellbeing of residents, but it gives residents viable alternatives to driving. Having viable alternatives to driving is important for people who cannot afford a car, people who want to improve their health by using active transportation, and for people who drive (having more people biking = less people on the road = less traffic). I would like the decision makers of this project to know that it is very important to people who bike and walk these trails that they are connected with a network of trails, and that the trails minimize the amount of exposure to car traffic and high-traffic intersections. We feel much safer when we can go on a bike ride without needing to have a route pre-planned that minimizes exposure to car traffic and high-traffic intersections. We feel much safer when we can go on a bike ride without needing to have a route pre-planned that minimizes exposure to cut a traffic and high-traffic intersections. We feel much safer when we can go on a bike ride without needing to have a route pre-planned that minimizes exposure to routes with large arterial roads and high speed motor traffic, and having an interconnected multi use path network is a big step in increasing safety. Now i'd like to comment on the north and south ends of this proposed crossing bridge. It is very important that the north end of this bridge connects with the segment of the Westside trail that ends on Oak Hills Drive. Not having these segments connected will mean bikers/walkers will feel less safe navigating the trail, have to plan on taking detours on roads, and will be exposed to car traffic which could lead to unsafe conditions. As for the south end of the bridge, again, getting it connected with the rest of the Westside trail with minimal car exposure
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	I love another safe way to bike across Hwy 26 especially since the Rock Creek Trail underpass is frequently impassable do to high water
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	It will connect communities. Is super important. Will encourage walking and biking; and less car driving.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Very needed.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Great idea
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Fantastic! This is the type of project the region needs more of!
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Many of our local youth, especially Sunset HS students who participate in running sports, have to cross this dangerous overpass. Also, this is a dangerous crossing for those who commute by bicycle. A pedestrian bridge would decrease their risk. (Side note: I'd love to see a similar pedestrian bridge on Murray crossing 26 - this is also a dangerous overpass for pedestrians and many students have to cross it on their way to school).

Project Name	Applicant	Support Rating	Comment
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Every fall and spring, Sunset High School cross country and track runners (100+ students) run in this vicinity, their routes often taking them across the Murray Rd or Cornell Rd overpasses during rush hour traffic. Construction of this pedestrian bridge over Hwy 26 would create a much safer alternate route for these students. I'm certain the bridge would also be utilized by the greater community as biking, walking, and running our common activities throughout the trail systems north of Hwy 26. The project should also include construction of trails that extend north and south of the proposed bridge location within the power corridor.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This project will make a big difference in the ability of commuters, students, and people recreating to walk and bike to important destinations on the west side. It is also a crucial connection for the Westside Trail as it goes from Portland down to King City. So much of the Westside Trail has already been built, this would transform walking and biking on the inner west side
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	A big deterrent and challenge in cycling or moving through the city on foot is having to rework your route for miles and miles. This bridge solves that! It's well worth the money to not have to ask cyclists and pedestrians to go miles and miles out of their way. This is brilliant.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Over due and desperately needed in the area.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	A bridge over 26 would be a critical connection for bicyclists and pedestrians in this area.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Read the StreetLight Travel Data Analysis report out at https://www.thprd.org/pdfs2/document4633.pdf. The data indicate that an active transportation bridge in the study area could offer a valuable transportation asset. Many trips in the area are already made by walking and biking, showing that people do use active transportation. Very few active transportation trips crossed the highway, however. Many of the motor vehicle trips originated from less than 3 miles from the destination. Given the population density on both sides of the highway, and the high number of work, shopping and recreational opportunities in the study area, the team expected more trips by walking and biking. The highway may therefore be a barrier for people making non-motorized trips. An active transportation link across US Hwy 26 could create a safer, more comfortable connection, allowing people who already walk and bike to easily go north and south. By making a more direct connection, the bridge may also attract other people who would have otherwise driven between origins and destinations north and south of the highway. The available trail network, recreational facilities, schools and commercial districts near and in the study area are other indicators that a connected and safe active transportation network could increase people's propensity to make active transportation choices. Much of the area that would be served by the bridge is considered an equity focus area for its combination of high populations of people of color, people with limited English proficiency, and people with low incomes.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This is essential. It will connect to existing trails and provide a safe way for pedestrians to cross a currently impassable area.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	A dedicated bridge for walkers and bikers across the highway would be so awesome, particularly in a location that is highly populated, has quite a few amenities like schools, recreation/parks, retail and businesses on either side of the highway. I believe that it will encourage more people to walk or bike to locations across the highway instead of using a car. It will also get kids safely across the highway to attend school or recreation/sports that they may be participating in.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Being able to use my bike to get around would provide a massive quality of life increase

Project Name	Applicant	Support Rating	Comment
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	There is very limited safe ped/ bikeaccess across HWy 26. The vehicle overpasses are not safe for peda and pikes with so many turning lanes. It would fill a crucial gap in our network- and connect with a lot of the regional trails. Strongly support
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	I have a daughter that goes to Sunset High and we live near Pioneer Park. Both me and my husband work, and struggle to drop her off and pick her up. This bridge will make it safe and easier for her to walk to and from school.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	While I don't live very close to this project, I think creating a Highway 26 Bicycle and Pedestrian bridge, to connect large existing trail networks, will be a boon for the entire metro. With this project's completion, the Westside and Waterhouse regional trails will become so much more integrated and so much safer! The existing 26 crossings of Cornell or Murray Blvd are so unsafe for biking currently, and also not a fun pavement walk near all that traffic for at least a mile or so just to get back onto either side of these nature trails to keep enjoying our beautiful natural resources. This overpass will also finally make it possible from people all the way down to Tigard/Tualatin (their trail expansion has been so successful) riding a bike all the way up to Rock Creek, maybe even Forest park, and the beautiful views from that area? That just sounds like such an idyllic Summer Saturday that I think people would even travel to our region to experience.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Please ensure that plenty of signage and path wayfinding is part of this.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This area has increased in size and population with no improvements to support the growth.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This would be an incredible connection for the westside, providing access to the great trails north of the highway. Currently trying to cross the highway is a very dangerous task that I would not feel comfortable with my children riding. This would provide a safe continuation of the power line park, which would help to complete the THPRD trail network.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This should have happened a long time ago. This will be so valuable for the community
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Nothing is more important than providing safe, segregated trails for people and bikes. While this project is an improvement, we need a dozen more like it to begin to make a dent in this car-centric city.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Like the rug in The Big Lebowski, this project would help tie the room together by linking the regional trail system. Please consider funding this project!
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Would this Project be connected with a path that runs along the connected power lines? If there was an established path I would be more likely to use this bridge.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	There is absolutely no safe north-south connection for people walking and rolling. This is essential for connecting north Beaverton and Bethany with the rest of Beaverton south of 26.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	A ped/bike bridge over 26 would help communities south of 26 take advantage of the amazing trails we have in the Bethany area. It would also help those north of 26 get to and use the incredible THPRD complex and beyond to the THPRD Nature Park. It would also allow us to get to a larger grocery store (Fred Meyer) and I'm guessing quite a few Nike employees who live north of the highway would be delighted to be able to bike to work.

Project Name	Applicant	Support Rating	Comment
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Great project - please include advance planning/design to link this project to the south with the recently completed side path on the north side of Walker Road east of 158th. There is 4200' of powerlines trail alignment and 1300' of side path along Walker Road to fill this gap linking the network to the the Rec Center at 158th, Tualatin Hills Nature Park and Beaverton Creek Trail. An alternative paths to the Rec Center via Pioneer Road, 153rd Court and Trenton Court are complementary but DO NOT replace the off-street shared use path linkage the ties the trail network together. Trails through the rec center supplement the network but are not THE network and completing the system link to Walker/158th via the powerlines should be planned and established with this RAFA project as the existing side path along Walker and 158th, the Westside Trail and Tualatin Nature Park and Beaverton Creek Trails are all built waiting for this gap to be filled. The RAFA project is the BIG link with the US 26 overpassbut do not let the opportunity to close the gap be lost and do at least some preliminary work to frame up how the last gap would be designed and built - getting it ready for the next funding opportunity with enough detail to have a good cost estimate.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This would allow my 8,9 and 13 yo children to bike to Sunset High School
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This would be a truly transformative project for letting people move without cars. Some of the most dangerous places for people walking and biking are a long roads that intersect on & off ramps to highways. Highway 26 acts as a major barrier to people traveling north south as there are only a few crossings. In this area the only options are highspeed arterial roads with speeding traffic. Providing a safe, relaxing crossing will give more people the ability to make trips outside of their car. This will connect more people to jobs, housing, businesses, schools, parks. Etc. This is the biggest challenge to closing a gap in our regional trail system, and building this bridge will remove the largest barrier to completing the network. This new construction will make previous investments even more valuable.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	I would like to see this project completed, but I would like to see access from NW Meadow Dr. or Pioneer Park. We're completely cut off from the area due to the Leopold campus and that causes us not to be able to access trails, walking paths, etc. without having to go miles out of our way. It would serve our community better if there were access either from Pioneer Park or NW Meadow Dr.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This would enhance so much more pedestrian traffic crossing Hwy 26. I would love to see this project come to completion!
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Project is important for safety of area bike and pedestrian in an area with little connectivity. Also this will provide a critical link to completing the Westside Trail.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Fixing the north/south discontinuities in our trail system across 26 is key to safety for runners, walkers, and bikers (including commuters). I hope that this will be followed or combined with a connection through oak hills to the north end of west trail.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Improve bike and pedestrian access and link to existing trails. Will improve non vehicle community to Sunset HS and area.

Project Name	Applicant	Support Rating	Comment
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	The Bethany and Cedar Mill areas are essentially an island for people walking or riding bikes. Crossing US 26 is loud, frightening, full of cars, and not welcoming at all to anyone not in a car. The current crossings at 185th, at Bethany/Cornell, and at Murray, are dangerous and not welcoming to anyone. Building this pedestrian bridge would enhance transportation for high school students at sunset high school, and for me, provide safer bike transportation to the Merlo/158th MAX station. I am a regular bike commuter from Bethany to downtown Portland using the Waterhouse Trail. I've nearly been hit by cars on the Bethany Blvd crossing over US26. Even though I am covered in lights and reflective gear. This crossing is in no way welcoming to less confident cyclists, to families with children it's frankly terrifying and dangerous. If our regional goal is to encourage less car use, this bridge would be a fantastic opportunity to encourage cycling for everyone, not just brave and fit adults.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Crossing 26 in this area on the main roads is dangerous for pedestrians and cyclists. This project will increase access for people on both sides of the freeway. Its proximity to Sunset High School and Columbia Sportswear will certainly improve commutes for employees and students. I have been waiting for a footbridge in this area since we moved here 10 years ago!
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This will connect residents to school, work, THPRD parks, and grocery.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	We need safe ways to get kids to school on foot and bike!
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This is an important buildout of the Westside Trail that will provide a safe off-street route bridging the existing trail over Highway 26. While we live in Multnomah County we enjoy the various bike trails in Washington County and especially appreciate the miles and miles of safe off-street trails. They are truly a wonderful regional asset that we in the tri-county area enjoy and should all support.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This is a much-needed alternative to navigating the Cornell Road Hywy 26 crossing. This will allow a safe connection of the South Westside Trail to the North Westside Trail. I have run/walked the South Westside trail from Cornell Rd all the way to Tigard a number of times. I want to connect to the northside, but I do not trust the pedestrian safety of crossing the complex Cornell Rd 26 interchange. I was very excited when I first heard about this project, and I look forward to using the new crossing.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	I strongly support funding for the proposed pedestrian and bicycle bridge project. This initiative represents a vital investment in sustainable transportation infrastructure, community connectivity, and public safety. By creating a dedicated, safe crossing for pedestrians and cyclists, the bridge will reduce conflicts between vehicles and non-motorized travelers, promote active transportation, and make our community more accessible for people of all ages and abilities. It will also serve as a crucial link for commuters, students, and families—especially those who rely on walking or biking as their primary means of transportation. In addition to its practical benefits, this project will contribute to healthier lifestyles, reduced traffic congestion, and lower greenhouse gas emissions. It aligns with local and regional goals for climate action, public health, and equity in transportation planning.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	We drive to and from Bethany area to THPRD 4 times a day for kids extra curricular activities. This would be an awesome alternative as we enjoy biking a lot. Plus it would also provide Sunset high's track team an alternative training route. Get it done!
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	As someone who walks and runs in this area, a pedestrian bridge here would be incredible! Much better than going all the way up to the existing Cornell overpass!
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This would alleviate the issue of using the Cornell overpass which is high speed and high volume of traffic.

Project Name	Applicant	Support Rating	Comment
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This would make it easier for kids and adults to walk and or ride bikes between residential and commercial communities. Even walk to schools kids are zoned in va being forced to bus or parents provide rides
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	All about connecting north and south
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Safe paths for pedestrians and bicyclists or desperately needed especially across busy roads and highways.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This will do a great job in providing exercise opportunities for local residents - specifically walking and increasing the ROI of all the trail systems on both sides of the highway.
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	It will connect a lot of jobs with the actual location of where those jobs are - meaning folks living north of 26 yet working on the other side - enabling them to either walk or bike to work
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Please review Metro's Westside Trail master plan: https://www.oregonmetro.gov/westside-trail-master-plan and read that this is the highest priority NEAR-term essential linkpin found to be "the most crucial section for functional regional trail".
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This project is critically important for completing a missing gap in the Metro Westside Regional Trail through THPRD. A bicycle and pedestrian bridge at this location would connect underserved neighborhoods to key destinations across Hwy 26, such as schools, parks, shopping, employment centers, transit and much more. The project will expand recreation opportunities for the community by providing equitable, accessible alternative transportation options across Hwy 26. Please support this important project!
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	This project will be such an important trail and highway connector for people who live in the area!
Westside Trail Pedestrian and Bicycle Bridge Over Highway 26	Tualatin Hills Parks and Recreation District	5	Add a 2nd Pedestrian Bridge on Cornelius Pass to access to Rock Creek Trail & Bethany.
Cedar Mill Better Bus and Access to Transit Enhancements	Washington County	1	Project will likely cause more overflow of traffic into neighborhoods and put additional pedestrians at risk of impatient motorist. This area of cedar mill is already poorly designed and a choke point. Bike lanes already exist and I have had no issues using them. If anything, the on street parking should be removed from this congested area.
Cedar Mill Better Bus and Access to Transit Enhancements	Washington County	1	Why are we focused on improvement projects when one of the projects is for a bridge that may collapse?! Why is that project even subject to this process as it's an issue of safety? Why doesn't TriMet fund projects that will improve its ridership?
Cedar Mill Better Bus and Access to Transit Enhancements	Washington County	2	what is the current ridership of busses? What was it last year and previous years? If we are on a decline, as said in the media, this would not be good use of tax payer funds. I see many busses partially, if not 1 or 2 riders in my area of west Beaverton - Hillsboro - FG.
Cedar Mill Better Bus and Access to Transit Enhancements	Washington County	2	This project should also contribute to increased bicycle network connectivity in the region. WashCo, go back to the drawing board and come back with a project that reduces car capacity in order to increase bicycle and transit network connectivity.

Project Name	Applicant	Support Rating	Comment
Cedar Mill Better Bus and Access to Transit Enhancements	Washington County	3	The town center design with on-street parking and only one lane each direction has severely limited the capacity of Cornell Rd in this area. Improved bus service is a decent start, but I grew up in this area and these folks like their cars. I don't see most of them using a transit system that is so spread out in time and location, as to be basically useless. I've happily used transit in NYC, Paris and London, and it was nearby, frequent and reliable. We do not yet have the density to successfully support such a system. And we don't seem to have the forethought to adequately fund it for the future.
Cedar Mill Better Bus and Access to Transit Enhancements	Washington County	3	How about improving traffic at the same time over cornell and murray?
Cedar Mill Better Bus and Access to Transit Enhancements	Washington County	3	While bus & quality public transit is very important, pedestrian and bike infrastructure is very poor in this area. More needs to be done.
Cedar Mill Better Bus and Access to Transit Enhancements	Washington County	4	With growth and development in this area, it has become less pedestrian-friendly. Any improvements to Cedar Mill that reduce car dependence will be welcome! However, improving access to the Target Market is not a good idea, since it is the frequent site of shoplifting and police presence in general. The neighborhood has certainly gone downhill since Target opened.
Cedar Mill Better Bus and Access to Transit Enhancements	Washington County	4	Improving bus service from town center to Cedar Hills/Cornell would benefit our household. Most of this lies with TriMet and their changes on the 48 and 62 routes (62 has infrequent service). However, even improvements within the project scope would be welcome.
Cedar Mill Better Bus and Access to Transit Enhancements	Washington County	4	This is an important part of the Transit network in Washington County. By making transit more reliable in this area, we'd but improving transit service not only in this area, but for everyone who rides on any part of the 48 (all the way to Hillsboro), and 62 (down to South Beaverton/Northern Tigard). TriMet has recently updated their long range planning for bus improvements they'd like to make, and one of the key aspects is the idea of a grid of intersecting bus lines that allow for easy connections. This is the foundation of a strong bus network. The 48 and 62 are two key bus lines in Washington Couny's bus grid, and making sure that they are reliable is key to making transit a viable option for people to use. I grew up taking the bus to the Cedar Mill library, and I know first hand how much the delays can impact the bus lines there. I also think it's key that we maintain the neighborhood center feel of Cedar Mill. Currently Cornell road between Saltzman and Murray is narrower than most of the main county roads. This is a good thing. The giant 5-lane monstrosities that the county has been building not only hurt our communities, but are setting us up for financial ruin. Every lane we add will need to be maintained, and every acre the county takes for road expansions removes land from the tax roles. This solution of using tools within the space that we already have is theost sensible solution.
Cedar Mill Better Bus and Access to Transit Enhancements	Washington County	5	Love this idea. It's always bottleneck during my commute.
Cedar Mill Better Bus and Access to Transit Enhancements	Washington County	5	This is a highly congested area that needs improved access to transit, biking and pedestrian improvements.
Cedar Mill Better Bus and Access to Transit Enhancements	Washington County	5	This project would address safety and congestion, as well as greenhouse issues by encouraging transit use.
Cedar Mill Better Bus and Access to Transit Enhancements	Washington County	5	As someone who walks around this area frequently, I'm very supportive of the proposal. Prioritizing the busses would make me more likely to use the bus. I currently don't use the bus partly because it gets stuck in congestion.
Cedar Mill Better Bus and Access to Transit Enhancements	Washington County	5	Transit delays are common, and we need more transit infrastructure and ridership in Washington county to meet regional goals.
Cedar Mill Better Bus and Access to Transit Enhancements	Washington County	5	This area is underserved and would benefit greatly from faster, safer transit.
Cedar Mill Better Bus and Access to Transit Enhancements	Washington County	5	This is a critical safety project to improve conditions for peds/bikes in this corridor. This area links schools, employment areas and commercial amenities.

Project Name	Applicant	Support Rating	Comment
Cedar Mill Better Bus and Access to Transit	Washington County	5	This project provides great benefits to the community by providing better access to transit and better transit service to an area that really needs it. It's a good use of

Project Name	Applicant	Support Rating	Comment
SW 175th Design: SW Condor Lane to SW Kemmer Road	Washington County	5	175th Ave is an increasingly busy travel corridor in a newly developing urban area. As Cooper Mountain continues to build out more and more traffic will use this road. The current roadway configuration includes a steep "kink" that is unsafe for all travelers and particularly for bikes and pedestrians. This funding would start the process for a future capital improvement by engaging the community and jurisdictional partners in a refined design to mitigate the kink and add ped/bike facilities.
SW 175th Design: SW Condor Lane to SW Kemmer Road	Washington County	5	There is a lot of new development in this area and this road is really steep with ditches on either side. It needs to be improved.
SW 175th Design: SW Condor Lane to SW Kemmer Road	Washington County	5	With the recent development areas of River Terrace and South Cooper Mountain, and the new-ish Mountainside High School, this mostly unimproved Arterial a vital link to and from these areas. 175th Ave is in need of safety and capacity improvements, as well as being in dire need of pedestrian and bicycle facilities.
SW 175th Design: SW Condor Lane to SW Kemmer Road	Washington County	5	This section of road and this intersection is dangerous, particularly at night. I am supportive of doing studies and coming up with alternative designs for this stretch.
SW 175th Design: SW Condor Lane to SW Kemmer Road	Washington County		With all the recent and continued development in the Cooper mountain and adjacent areas, this sharp turn and area of 175th gets more and more use and is more dangerous due to the number of people using it. The sharpness of the turn requires a significant decrease in speed. Exploring options for increasing the safety and traffic flow in this area is very important.
SW 175th Design: SW Condor Lane to SW Kemmer Road	Washington County	5	Considering the nearby growth areas, including but not limited to South Cooper Mountain and River Terrace, this arterial is in need of road widening improvements. It is also a designated Snow Zone. More standard curve radii, lane widths, and grades would help drivers navigate this increasingly busy road.
SW 175th Design: SW Condor Lane to SW Kemmer Road	Washington County	5	We need to widen this Road to 3 Lanes & straighten 175th a Straight Road & infill Sidewalks & Bike Lanes.

Public comments on proposed projects for Step 2 2028-30 Regional Flexible Funds.

May 2025

Appendix F – 2028-2030 Regional Flexible Fund Step 2: Community Involvement Application Questions

Community Involvement

- 1. Please describe how the members of your agency's governing body have been informed and/or indicated support of this project application.
- 2. List the interested parties, organizations (e.g. community, business, etc.), other agencies, utilities, funding partners etc. that are involved in the project and whether there are existing risks (e.g. regulatory approval, community support) with any of them. For each group, identify if their approval will be required to move the design of the project forward. If the group's approval is not required, describe the extent of influence the group has in the design of the project.
- 3. Describe how the project meets a transportation need identified by the community, particularly those communities who face disparities in the transportation system (see descriptions of communities in Equitable Transportation goal in the 2023 RTP). Describe how community input was solicited and how input from these communities informed the project's development to date and its prioritization for a RFFA funding request.

For definitions of communities in the Equitable Transportation Goal of the Regional Transportation Plan, see: https://www.oregonmetro.gov/sites/default/files/2023/12/21/2023-RTP-Ordinance-No-23-1496-adopted-package-exhibit-A.pdf

4. Does the project require or trigger a public outreach process prior to design? If yes, describe the process and when the outreach work will get started. Indicate in response to Project Delivery Question 4 whether or how the process may alter the responses provided elsewhere in this application.
